''We are deeply disappointed by the UAW's decision to strike at the AC Rochester West plant,'' GM spokesamn John Maciarz said. ''We continue to believe the issues involved can be resolved, and we will make every effort to do so.''

Maciarz said that so far the walkout has not affected the steady pace of the national contract talks that began in mid-July. Those talks are aimed at reaching a new agreement covering about 330,000 GM workers. The current three-year pact expires Sept. 14.

''This is a completely separate issue from the national talks,'' Burkes said.

Some GM assembly plants could begin to feel the impact of the walkout almost immediately, Maciarz said, since they operate on a just-in-time inventory basis and the AC West plant, which also makes van doors and truck grilles, is a key supplier.

''This could affect the majority of our assembly operations, but not until at least a day or two, or early next week,'' he said.

NEW YORK (AUG. 8) UPI - A 16-year-old boy fired a shotgun into a crowd at a housing project in Brooklyn, hitting three youths just hours after residents observed a ''National Night Out'' against crime, authorities said Wednesday.

Police said Jamal Stith fired the shotgun pellets at the youths, a 12-year-old boy and two 14-year-old boys.

The victims, who were not identified, were in stable condition at Brookdale Hospital, a hospital official said.

The shooting took place at 10:40 p.m. Tuesday behind 375 Williams Ave., near the Unity housing project.

Earlier in the day, Stith had apparently offended a young woman by touching her thigh, said police Sgt. Tina Mohrmann. Four male teenagers came to her defense, arguing with Stith, who soon left the area.

''He returned at night and fired into the crowd,'' Mohrmann said. ''He hit three of the four youths he had argued with.''

After the attack, Stith fled, and the crowd then started beating up his cousin, police said.

The unidentified cousin finally told them where Stith might be found, and police soon arrested him at his apartment.

Stith was charged with second- and third-degree assault, criminal possession of a deadly weapon and reckless endangerment, Mohrmann said.

The shooting took place in the same neighborhood where last month a random bullet took the life of a 9-year-old girl and a 1-year-old was killed by gunfire meant for her father.

Earlier in the evening members of various community associations in the crime-ridden neighborhood held a cookout and rally to band together in the fight against violence.

#90220u1314 08/08/1990 ~United Press International

CAIRO (AUG. 8) UPI - Egypt hiked its crude oil export prices Wednesday for the second time since Iraq's invasion of neighboring Kuwait last week, bringing its total increase on the week to $6 a barrel.

The Egyptian General Petroleum Corp. (EGPC) said it was raising prices $2 a barrel across the board.

This follows a $4-a-barrel increase Thursday, the day after Iraqi forces occupied Kuwait.

The latest increase brings the respective prices of the premium Zeit Bay-Ras el Behar and Gulf of Suez blends to $23.30 and $23.00 a barrel, said EGPC Vice Chairman for Foreign Sales Hammad Aiyyoub.

Prices of the medium Balaim and Ras Badran crudes were raised to $22.15 and $21 a barrel respectively, Aiyyoub said. The heavy Ras Ghareb was priced at $20.70 a barrel, he said.

Aiyyoub said his department would adjust its oil prices on a weekly basis as a result of recent events in the Gulf, a reference to Iraq's Aug. 2 invasion of Kuwait that has sent world oil prices soaring.

Egypt normally only adjusts its crude oil export prices on a two-week basis.

NEW YORK (AUG. 8) UPI - The owner of the exclusive rights to novelist Ian Fleming's James Bond character is putting the super spy on the auction block after a long run of movie hits that has grossed more than $1 billion worldwide, it was reported Wednesday.

Variety, the entertainment weekly, said the decision was made by veteran film producer Albert Broccoli because revenues from the ''007'' films have been slipping. The latest film, ''License to Kill,'' released last year, cost $30 million to make and has grossed only $16 million in domestic theaterical rentals so far.

Variety described the 81-year-old Brocolli's decision to ''protect and modernize'' his franchise on James Bond as a ''bloodless coup'' within the MGM/UA empire, which has made all but one of the 17 James Bond productions.

According to Variety, Broccoli has put Danjaq, a company that owns exclusive rights to Fleming's James Bond writings, up for sale. He also has turned over control of Eon Products, producers of 16 Bond United Artist releases to his daughter, Barbara Broccoli, and stepson, Michael Wilson.

The value of the Danjaq franchise, of which Broccoli is 100 percent owner, is not known, but analysts estimate the worth of the Bond library of l7 films at $166 million, and Danjaq could be worth considerably more, Variety reported.

Broccoli also has cut off Richard Maibaum, who wrote or co-wrote 13 Bond

movies, and John Glen, who has directed the last five Bond films, from future participation in Bond projects, Variety reported, and is negotiating with several other directors to replace Glen. He is also looking for a rewriter for a new draft of an original script by Wilson.

#90220u1323 08/08/1990 ~United Press International

ANALYSIS BY JIM ANDERSON

WASHINGTON (AUG. 8) UPI - President Bush, looking and sounding as if he had spent some sleepless nights over his decision to send troops to Saudi Arabia, explained to White House reporters Wednesday his reasons for sending U.S. military forces to the Middle East.

The strategic decision, as he described it, grew from these considerations:

-Protecting an ally, Saudi Arabia, which also happens to be sitting on top of reserves of 255 billion barrels of oil.

-Deterring a Middle East megalomaniac, Saddam Hussein, who has shown himself to be deceitful and obsessed with placing himself atop the fragmented Arab world, and who has the well-equipped, large army to do it.

-Preserving U.S. credibility by standing up to an aggressor.

Linked to these were some other unstated reasons that Bush did not mention but which were just as compelling.

One obvious consequence of a world oil shortage would be brutal price increases, with some industry analysts think could reach $35 barrel, compared to the present $27.

That kind of price increase and fuel shortage - as President Carter found out in 1978 - creates the basis for an economist's and politician's worst nightmare, a double whammy of inflation and unemployment, adding up to a recession.

If the effect in the United States would be unfortunate, the impact would be disastrous in the Third World.

As the Council on Hemispheric Affairs, a left-leaning Washington ''think tank,'' said in a recent analysis:

''What could be a recession in the United States and the other industrialized nations would reflect itself in Latin America as a full-scale depression, which would threaten not only to undo the positive accomplishments of a wide array of past international debt relief measures

but dash any hopes of positive results from President Bush's recently announced 'Enterprise for the Americas' initiative.''

What happens in Latin America would be duplicated around the world, including eastern Europe, with unforeseeable political effects but which might bring an avalanche of political changes, reversing the trend toward democratic reforms.

The Middle East has been in a state of low-level tension, punctuated by brutal but generally contained skirmishes and wars, for the past 10 years.

The prospect of a triumphant, strengthened Iraqi government directing its aggression toward Israel gives rise to the ultimate nightmare: a war fought between two Third World powers, possibly with chemical weapons, as Saddam Hussein has threatened, and conceivably with nuclear weapons.

That possibility would almost certainly involve the United States, either directly or indirectly as a guarantor of Israel's security.

Some of Saddam Hussein's rhetoric in the past week has suggested that Israel is his ultimate target. Whether that has been done to increase the number of his supporters in the Arab world, or whether he really means it as a direct threat to Israel is unanswerable.

President Bush decided - in light of Saddam Hussein's unpredictability - that the prudent course would be to figure out a worst case scenario, and that required him to draw ''a line in the sand'' sooner, rather than later.

#90220u1330 08/08/1990 ~United Press International

CAIRO, EGYPT (AUG. 8) UPI - The United States called on Americans Wednesday to defer travel to Saudi Arabia, Bahrain, Qatar, and the United Arab Emirates as thousands of foreign workers fled oil-rich Persian Gulf states fearing an escalation in the Iraq-Kuwait crisis.

The U.S. dollar became the most sought-after commodity in the region with anxious expatriates and locals seeking to switch their savings into a hard currency and transfer the cash abroad.

Spokesmen for airlines in the gulf states of Saudi Arabia, Bahrain, Qatar and the United Arab Emirates said flights to most European and Asian destinations were fully booked for the next month.

Banks in the gulf reported long lines and heavy demand for U.S. dollar and British pound sterling banknotes and travelers' checks, and even Asian currencies such as Indian rupees, as they tried to get rid of potentially worthless Saudi riyals and other gulf national currencies.

"We have no more dollar banknotes left ... people are just asking for all their savings in cash," said a spokesman for the Standard Chartered Bank in Bahrain.

"If the Iraqis go into Saudi Arabia, the Saudi riyal will become Monopoly money, and I don't think people will want to hold large amounts of other Gulf currencies either," said a banker in Dubai, UAE.

The State Department issued a travel advisory calling on U.S. citizens to defer travel to the Eastern Province of Saudi Arabia, Qatar, Bahrain and the United Arab Emirates "due to the Iraqi military invasion of Kuwait and the continuing unstable condition in the region."

"The Department is permitting dependants of U.S. government officials to depart the area on a voluntary basis," it said. The advisory said Americans in areas of Saudi Arabia other than the Eastern Province, "can continue to pursue normal daily activities."

There are some 28,000 Americans living in Saudi Arabia, according to the U.S. Embassy in Riyadh, and several thousand more in the other gulf states. But many are away on summer holidays.

Banks trading with Kuwaiti funds or owned by Kuwait were brought to a standstill after the Iraqi occupation of the oil-rich emirate. One Bahrain-based bank partly owned by Kuwaiti interests, the Arab Banking Corporation, was reported to have laid off large numbers of staff. Hotels in gulf states such as Bahrain were packed with refugees from Kuwait, many with no funds to support themselves.

Hundreds of British and American gulf residents meanwhile were reported to have flocked to the consulates of their embassies to register in case of evacuation.

"There is no normal life here ... everybody is just worried about the Iraq-Kuwait business spreading to the gulf," said Maureen Forland, an Australian advertising executive in Dubai. "If the Iraqis go into Saudi Arabia, the United Arab Emirates is within easy reach," she said. "Talk of war is dominating everything."

#90220u1332 08/08/1990 ~United Press International

(AUG. 8) UPI - President Bush told the nation in a nationally broadcast address today that Iraqi leader Saddam's invasion of Kuwait was an ''outrageous and brutal act of aggression'' and it must NOT go unanswered. Bush said that because America stands by its friends he ordered U-S ground air and naval forces to take up defensive positions in Saudi Arabia to

deter any possible invasion by Iraq. Bush said the deployment of U-S forces became necessary only after ''exhausting every alternative.'' He emphasized that the deployment is a defensive move.

Bush said Iraq has the world's fourth-largest military and has moved ''more than 100-thousand troops, along with tanks, artillery and surface-to-surface missiles'' into Kuwait. Before Bush's speech, it had NOT been known that Iraq had transported the missiles into Kuwait. The Pentagon confirms that the aircraft carrier U-S-S Eisenhower has passed through the Suez Canal into the Red Sea, off Saudia Arabia. It reportedly is heading for the northern Arabian Sea, near the Persian Gulf. There now are 34 American warships in the region... with more en route.

Sources say thousands of American paratroopers and at least 48 F-15's are arriving in Saudi Arabia today. A light infantry division is expected to be sent later. Many military analysts believe the deployment of U-S forces may help deter Iraq from invading that oil-rich nation... but most say the forces being sent would NOT be adequate to drive Saddam from Kuwait.

Bush said the U-S forces will ''work together with those of Saudi Arabia and other nations'' in trying to deter and intimidate Saddam, whose lightning strike into Kuwait last week led to international condemnation. However, still unclear is whether other Arab nations, such as Egypt and Morocco, will join in what American officials hope to see emerge as a multi-national force capable of standing up to Saddam.

In Cairo today, Egyptian President Mubarak called for an emergency Arab summit within 24 hours. Mubarak predicted terrifying aggression in the region if negotiations fail to begin. He said the present danger in the Middle East is unprecedented. The Egyptian leader also criticized Arab nations for their slow response to the Iraqi invasion... indicating that the United States, Britain and France were forced to fill the gap by the Arab world's inaction. Mubarak said that, so far, NO Egyptian forces are involved in the conflict.

MIAMI (AUG. 8) UPI - Pan American World Airways said Wednesday it will add service this winter to eight destinations in Central and South America, the Caribbean and New Jersey as part of the continued expansion of its Miami hub.

The airline will add flights from Miami to Valencia, Venezuela; Managua, Nicaragua; Belize City, Belize; San Pedro Sula, Honduras; San Salvador, El Salvador; Aruba, Curacao; and Newark, N.J.

Pan Am already has obtained U.S. route authority for all the flights, but

was still awaiting approval from the Nicaraguan government for the Managua flight, spokeswoman Pamela Hanlon said in New York.

The airline also said it would add two weekly nonstop flights between Miami and Frankfurt, West Germany, bringing the total to three weekly nonstop 747 flights between the two cities.

Pan Am said it will add a third daily nonstop flight between Miami and Los Angeles beginning Oct. 28.

In addition, the airline will add one daily flight each on exisiting routes between Miami and Tampa, Orlando, St. Thomas and St. Croix in the Virgin Islands, and Montego Bay and Kingston in Jamaica.

Additional flights will be added Dec. 15 between Miami and Port-Au-Prince, Haiti, Pan Am said.

Pan Am employs about 7,000 workers in the Miami area, about 1,000 more than it did 14 months ago, Hanlon said.

''Miami is becoming a very important hub operation to Pan Am. Two years ago we had 43 flights a week out of Miami. We're up this winter to over 100,'' she said.

Pan Am said plans were in the works to expand its Pan Am Express commuter service, which currently serves seven Florida cities.

''For the most part, for the expansion we announced today we'll be able to operate using the current employee headcount. However, certainly there will be some instances, perhaps in sales, where people will be added,'' Hanlon said.

Pan Am faces increased competition in Latin America from American Airlines which recently acquired Eastern Airlines' routes.

But Pan Am remains the largest carrier currently serving Miami, said John Lindsey, the airline's senior vice president for corporate affairs.

''The routes announced today are intended to maintain our strength in Latin America but they are also part of our buildup of Miami,'' Hanlon said.

Separately, Pan Am said it flew 3.301 billion revenue passenger miles last month - the highest July traffic ever posted by the airline.

A revenue passenger mile represents one passenger flown one mile.

Pan Am also said its load factor, which measures how full the airline's

planes were during the month, rose to 75.5 percent.

#90220u1354 08/08/1990 ~United Press International
BELGRADE, YUGOSLAVIA (AUG. 8) UPI - Serbia launched a new purge of ethnic Albanian officials in the troubled province of Kosovo and temporarily banned the only daily Albanian-language newspaper, the republic's communist goverment announced Wednesday.

The government of the largest of Yugoslavia's six republics said an undisclosed number of dismissals was aimed at ending alleged economic sabotage committed as part of a drive by members of Kosovo's ethnic Albanian majority for independence from Serbia.

Kosovo has long been wracked by tensions over demands for more autonomy by its 1.7 million ethnic Albanians, who claim a denial of rights by Serbia. Violence this year has left at least 30 people dead and more than 200 injured.

Serbs, of whom there are more than 7 million in Serbia, but only 200,000 in Kosovo, regard the province as the ''cradle'' of their heritage and religion and contend that the demand for more autonomy is the first step by ethnic Alabnians toward joining the province with their adjacent Stalanist-ruled homeland.

On July 5, Serbia dissolved the Kosovo assembly and administration after ethnic Albanian lawmakers, provoked by Serbian intentions to eliminate virtually all provincial self-rule, declared independence from the republic. Serbia took direct control of Kosovo and also purged the managements of the state-run media and several state-owned mines.

The announcement of the new round of dismissals was made at a news conference in the Kosovo capital of Pristina, 200 miles south of Belgrade, by Dragan Nikolic, a Serbian government official, and Serbian Vice Premier Momcilo Trajkovic.

State-run Belgrade Radio quoted the pair as saying that under a decision by the republic's single-party Parliament, the managements of ''many'' government-owned enterprises in Kosovo were replaced Tuesday and Wednesday.

In a related move, Serbia banned the publication of Rilidija, the province's only daily Albanian-language newspaper, until the next session of the republic's assembly, the date for which was not announced.

''These moves of the Serbian Assembly are forced by Albanian separatists who brought economic collapse of these enterprises by politicalization and national divisions among workers,'' Nikolic was quoted as saying by

Belgrade Radio.

#90220u1367 08/08/1990 ~United Press International
(AUG. 8) UPI - President Bush called on oil companies ''to show restraint'' and NOT use the Persian Gulf crisis as an excuse to unnecessarily raise prices. Bush also asked Americans to ''do their part'' by making efforts to conserve energy. In a nationally broadcast speech today, Bush vowed to explore whether the nation should draw on its petroleum reserves... estimated at 600-Million barrels.

The American Bar Association House of Delegates today adopted a neutral stance on the abortion issue, narrowly voting to rescind its pro-choice position. The delegates meeting in Chicago voted 200-188 to make the lawyers' group officially neutral on the abortion issue. The vote followed hints from Bush administration officials that the A-B-A's influence would suffer unless it reversed its pro-choice stance.

The nation's longest-serving lieutenant governor is the Democratic gubernatorial candidate in Georgia on a run-off election victory over former U-N ambassador Andrew Young. With 93 percent of the vote tallied, Georgia Lieutenant Governor Zell Miller had 65 percent to Young's 35 percent. Miller faces G-O-P state lawmker Johnny Isakson and a Libertarian candidate in the November general election. Young refused any suggestion that race played any role in his bid to become the first black governor in the Deep South.

-30- 1499
#90220u1371 08/08/1990 ~United Press International
UNITED NATIONS (AUG. 8) UPI - Secretary-General Javier Perez de Cuellar appealed Wednesday for ''utmost restraint'' from all parties involved in the Persian Gulf crisis and called on Iraq to withdraw its troops promptly from Kuwait.

Perez de Cuellar said in a statement that any measures to deal with the Iraqi invasion should be taken ''in conformity'' with the U.N. Charter and ''directed towards the fulfillment of the recently adopted decisions of the Security Council.''

The U.N. Charter, which serves as the constitution for the 159-nation world organization, bars interference in the internal affairs of any state but it allows its member states to act in self-defense.

''The secretary-general appeals to all concerned parties to exercise the utmost restraint so that the crisis can be contained and resolved,'' the statement said.

U.N. spokeswoman Nadia Younes said the U.N. leader neither disagreed nor agreed with the sending of U.S. troops and Navy ships to Saudi Arabia to counter any possible attacks by Iraqi troops on the Saudi kingdom.

Perez de Cuellar told reporters Wednesday morning that President Bush's decision to send American troops to help the Saudis was a ''parallel action'' with Security Council resolutions demanding the Iraqi withdrawal and imposing drastic economic and military sanctions against Iraq.

''As it appears to be a common decision of the United States and Saudi Arabia, I have nothing to say,'' Perez de Cuellar said.

''The only hope is that this decision will help in easing and not increasing tension in the area.''

Bush appealed to the American people Wednesday to support the deployment of unspecified U.S. forces in Saudi Arabia to counter Iraqi leader Saddam Hussein's ''blitzkrieg-fashion'' invasion of neighboring Kuwait.

He said the U.S. military role in Saudi Arabia would be ''wholly defensive.''

The 15-nation Security Council Monday ordered a worldwide embargo on oil imports from Iraq and Kuwait. It banned sales of arms and military equipment to Iraq and called on all governments to cut off financial loans and economic aid to that country.

Last Thursday, the council adopted a resolution demanding the immediate and unconditional withdrawal of the estimated 100,000 Iraqi troops that invaded the small but oil-rich emirate.

The sanctions were imposed after Iraq showed no sign of pulling out.

-30- 2610
#90220u1392 08/08/1990 ~United Press International
ANALYSIS BY HELEN THOMAS

WASHINGTON (AUG. 8) UPI - President Bush stressed Wednesday the defensive nature of the U.S. military involvement in the Persian Gulf, and is relying instead on worldwide sanctions to drive Iraq out of Kuwait.

Bush has insisted that Iraq must withdraw its troops from the tiny Persian Gulf nation that Baghdad swiftly overran last Thursday. He demonstrated his determination by ordering U.S. troops to the area, but outside Kuwait.

A U.S. move into Kuwait to drive out the Iraqis would be an act of war and

Bush told a news conference U.S. troops are assuming a ''defensive posture'' in the gulf. ''We are not in a war,'' Bush said, adding, ''That's not the mission - to drive Iraq out of Kuwait.''

''We have sanctions to that end,'' he noted, referring to the U.N. Security Council's 13-0 vote to impose a worldwide boycott of trade - including oil and food - with Iraq. The embargo ''should begin to bite pretty soon'' on cash-poor Iraq, Bush said.

Observers said that it would take an effort on the magnitude of World War II to put enough troops into Kuwait to liberate that oil-rich kingdom from the occupying force of more than 100,000 Iraqi troops and 5,000 supporting tanks.

Iraq has about 1 million troops and its fighting force has not been idle. Hostilities with Iran erupted into war Sept. 22, 1980, and ended in August 1988, when Iraq accepted a U.N. resolution calling for a cease-fire.

Pentagon strategists would like to have a 3-to-1 advantage in facing ground forces of the magnitude that Baghdad already has amassed in Kuwait.

That would mean 300,000 American troops, and, officials say, it would take months to get such a U.S. fighting contingent there.

Looming over any U.S. response in the Persian Gulf is the bitter memory and unhealed wounds of the decade-long Vietnam War, which divided the United States, alienated a generation of Americans and drove Lyndon Johnson from the White House.

More than 58,000 American soldiers were lost as a result of the Southeast Asia war and the United States would like to avoid getting embroiled in another ground war half way around the world.

Bush, in announcing the deployment of U.S. troops into Saudi Arabia to counter further Iraqi aggression, said in a nationally televised address:

''I want to be clear about what we are doing and why. America does not seek conflict, nor do we seek to chart the destiny of other nations. But America will stand by her friends.

''The mission of our troops is wholly defensive. Hopefully, they will not be needed long. They will not initiate hostilities, but they will defend themselves, the kingdom of Saudi Arabia and other friends in the Persian Gulf.''

Bush hopes that a U.N.-backed worldwide economic boycott, perhaps backed by a military blockade, will force Iraqi President Saddam Hussein to withdraw from Kuwait. Sources say efforts also would be made to

destabilize Saddam through U.S.-backed opposition and covert action.

The president has repeatedly called Saddam an international outlaw, and on Wednesday, he even likened the Iraqi president to Germany's Adolf Hitler.

Amid all the presidential rhetoric and military movements, are mounting concerns over reports that U.S. satellite photographs have shown the Iraqis loading chemical weapons on their warplanes.

Bush, in his speech, also mentioned for the first time that Iraq is supporting its tanks and artillery in Kuwait with surface-to-surface missiles.

One U.S. option is an air attack against Baghdad. But the administration would like to avoid such an escalation of hostilities.

As a Navy pilot shot down by the Japanese during World War II, Bush also has observed as a member of past administrations U.S. involvement in two no-win wars - Korea and Vietnam.

Bush must also be mindful of the withdrawal of American peace-keeping forces from Lebanon in the aftermath of American bloodshed

President Reagan on March 30, 1984, announced he was ending U.S. military involvement in Lebanon, citing the 264 U.S. troops killed and 134 wounded in action during their peace-keeping role in the capital. The Oct. 23, 1983, attack on the headquarters of the U.S. Marine peace-keepers killed 241 American servicemen.

#90220u1401 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - For 27 million households, owning or renting a home doesn't mean they are any closer to fulfilling the American dream because they cannot afford to buy other necessities, a study released Wednesday said.

The study's author, Michael Stone, a professor of community planning at the University of Massachusetts in Boston, noted that 50 years ago, President Franklin D. Roosevelt said one-third of the nation lacked adequate housing.

''If President Bush were to be so candid, he would have to acknowledge that we are now one-third of a nation 'shelter poor,''' Stone said in his report issued by the Economic Policy Institute, a liberal think tank in Washington.

''Nearly 27 million households in the United States - containing 78 million people, or 32 percent of the population - face so great a squeeze between in adequate incomes and high housing costs that, after paying for their housing, they are unable to meet their non-shelter needs at even a minimum level of adequacy.''

Stone blamed this ''shelter poor'' squeeze on lagging incomes, escalating housing costs, overdependence on credit, ownership arrangements that encourage speculation and mortgage rate instability.

Between 1970 and 1987, housing costs increased more sharply than incomes, Stone said, with renters particularly hard hit. Median rent rose by 26

percent, while median income declined by 13 percent, he said.

The study found that more than 42 percent of all renters - 13.9 million households - were shelter poor in 1987, most with incomes of less than $20,000.

As for homeowners, 22 percent, or 12.7 million households, were shelter poor in 1987, and Stone said many are risking foreclosure.

Rob Rosenblatt, an economist with the Mortgage Bankers Association, said the foreclosure rate has declined slightly in recent years. At the end of the first quarter of 1990, the foreclosure rate was 0.76 percent of all loans, down from 0.95 percent for the first quarter of 1989.

Racially, the majority of shelter-poor households are white, Stone said, but the problem is disproportionately borne by blacks and Hispanics. While one-third of households are shelter poor, Stone said, 50 percent of black households, or 5 million, and 50 percent of Hispanic households, or 2.5 million, are shelter poor.

Congress recently passed legislation to reverse an eight-year decline in federal housing funds, including grants to the poor under a program called HOPE, Homeownership and Opportunity for People Everywhere.

Bush has threatened to veto the bill because it spends more money than he requested, but congressional negotiators are optimistic a compromise can be worked out.

Stone offered several long-term recommendations, including:

-Expansion of non-profit, non-speculative production and ownership of housing.

-Direct public grants to finance production and acquisition of housing.

-Reform of the financial system to reduce speculative uses of credit and assure an adequate supply of low-cost credit for housing.

-Full and aggressive enforcement of anti-discrimination laws.

#90220u1416 08/08/1990 ~United Press International

BOSTON (AUG. 8) UPI - An epidemic of a potentially fatal blood disorder linked to the food supplement L-tryptophan was caused by a chemical contaminant, but reseachers have not yet identified the substance, scientists said Wednesday.

The contaminant was present in samples of L-tryptophan made by a one Japanese company, Showa Denko K.K. of Tokyo, which changed aspects of its manufacturing process at the start of 1989, said Michael Osterholm of the Minnesota Department of Public Health in Minneapolis.

In November, the Food and Drug Admistration recalled products containing L-tryptophan, an amino acid that occurs naturally in some foods, after it was linked to outbreaks of eosinophilia-myalgia syndrome, or EMS.

EMS can cause muscle pain, fatigue, breathing difficulties and in severe cases, heart failure and death. To date, the federal Centers for Disease Control in Atlanta has received reports of 1,535 EMS cases nationwide and 27 deaths. Most of the cases occurred between July 1989 and the time of the initial recall.

In March, the FDA expanded the recall, which at first covered L-tryptophan products designed to be taken in doses of at least 100 milligrams, to include even small doses of the supplement.

Osterholm said an investigation of the EMS outbreak in Minnesota, where 63 cases have been reported, found that among 30 EMS victims whose source of L-tryptophan was known, 29 had consumed a product containing the supplement manufactured by Showa Denko. He said product mislabeling may account for the single discrepancy in the findings.

By contrast, only 21 of 35 people in a comparison group who took L-tryptophan and did not develop EMS used supplement made by Showa Denko, Osterholm and co-researchers said in The New England Journal of Medicine.

Altogether, six Japanese companies supplied the raw material, in the form of a crystalline compound, that went into L-tryptophan products sold in the United States. However, only Showa Denko has been linked to the EMS epidemic.

While L-tryptophan can be made through a chemical process, Osterholm said Showa Denko used a multi-step bacteriological process that involved fermentation. At the start of 1989, the company made changes in its manufacturing methods that researchers believe are connected to the EMS outbreak.

Laboratory tests using chemical anaylsis known as high performance liquid chromatography showed that samples of L-tryptophan made by Showa Denka contained traces of 33 different chemical contaminants, but that only one contaminant - yet to be identified - was strongly associated with retail lots of the supplement consumed by people who developed EMS, Osterholm said.

When those particular lots were manufactured, between January and July of

1989, he said Showa Denko had changed the strain of bacteria used in the fermentation process and had also cut in half the amount of powered carbon used to purify each batch.

Osterholm said it is possible that the new bacteria strain somehow led to the appearance of the chemical contaminant in question. Alternatively, he said the contaminant might have present all along, but that the larger amount of carbon previously used in the purification process had removed it.

''We know the carbon didn't put the contaminant in there, but maybe, once the amount of carbon was reduced, it also didn't take it out,'' he said.

Osterholm said researchers believe the reason some people became ill from contaminated L-tryptophan, while others did not, is largely related to the amount they took. ''We think it is primarily dose related,'' he said. ''Some people took only a few milligrams a day, while others took 250 milligrams a day. That's a big difference.''

He said he was optimistic that ''within months'' further laboratory tests will identify the chemical contaminant that caused the epidemic.

WASHINGTON (AUG. 8) UPI - McDonnell Douglas Corp. may develop a new wide-body jet to compete with the Boeing Corp.'s 747-class aircraft, McDonnell Douglas officials said Wednesday.

Although the company has not introduced its new MD-11 tri-jet to market yet, it is already considering the production of another tri-jet aircraft, based on the MD-11, that would have a larger cargo and passenger payload.

In addition, the St. Louis manufacturer has also committed to the development of advanced versions of its MD-80 twin jet aircraft, to be designated as the MD-90 series of aircraft, according to documents the company filed recently with the Securities and Exchange Commission.

Elayne Bendel, a McDonnell Douglas spokeswoman, said her company is currently requesting customer feedback on the concept for the new wide-body jet, which is called the MD-12X.

"We are presenting concepts to airlines ... over the next few months, and will base our next steps on how well those concepts are received," Bendel said.

Bendel cautioned, however, that the company has not committed to developing the plane, which would have a price that would be "competitive"

with those currently charged by Boeing for comparable aircraft.

She added that McDonnell Douglas' large customer base for its tri-jet series - about 50 clients - would provide a potential market for the MD-12X, which is expected to complement, rather than replace, the MD-11.

The MD-11 is larger and has greater range than McDonnell Douglas's current flagship, the DC-10. Specifically, the MD-11 will be about 18.6 feet longer, will hold about 50 more passengers, and will have an additional range of 1,500 to 2,000 miles.

McDonnell Douglas has projected that 14,100 new aircraft will be needed over the next 20 years to replace present craft and to accomodate increased air traffic. Nearly one half of the market value of those planes will be in long-range, twin-aisle aircraft like the MD-11 and the MD-12X.

"With the MD-11 and this larger airplane as a complementary aircraft, we would be in position to get our share of (that) market," Bendel said.

#90220u1458 08/08/1990 ~United Press International
MARION, IL (AUG. 8) UPI - Pete Rose, baseball's all-time hit leader, arrived at prison just after noon Wednesday to begin serving a five-month sentence for tax evasion, U.S. Penitentiary at Marion officials said.

In a prepared statement, Warden John Clark said Rose would not grant interviews during his stay. He said Rose would go through an orientation process and then would be assigned an eight-hour-per-day job in the prison work camp.

Prison officials said Rose's release date is Jan. 7

The work camp is adjacent to, but separate from, the U.S. Penitentiary at Marion, which is the nation's most secure prison.

''I want to emphasize every attempt will be made to protect Mr. Rose's privacy and to have his term pass as uneventfully as possible for him and the other prisoners here,'' Clark said.

The work camp is a 100-acre facility that houses about 250 white-collar inmates with average terms of fewer than five years.

Rose, former manager of the Cincinnati Reds, was convicted in April of filing two fraudulent tax returns. He admitted concealing about $300,000 of income from gambling and baseball card shows.

Last August, Rose was banned from baseball by Commissioner A. Bartlett Giamatti after admitting to illegal gambling. Although the agreement did not say so, Giamatti said at a news conference that Rose had bet on baseball, including his own team.

Rose became manager of the Reds in 1984. He played for the Reds, Phillies and the Expos and broke Ty Cobb's hitting record in 1985 to become baseball's all-time hits leader.

#90220u1464 08/08/1990 ~United Press International

MEXICO CITY, MEXICO (AUG. 8) UPI - Hurricane Diana, after slamming the gulf coast of Mexico with 110 mph winds, killing two people and leaving thousands homeless, dissipated into a tropical depression Wednesday and disappeared.

A spokewoman for the National Weather Service said the tropical depression dissolved at about 9 a.m. between Salamanca and La Piedad, in the state of Michoacan, some 120 miles northwest of Mexico City.

''It is all over,'' she said.

Hurricane Diana lost much of its momentum after hitting the mountains of the eastern Sierra Madre and was downgraded to a storm by Tuesday evening, with winds dropping to about 60 mph, said Rafael Velasco, government spokesman for the state of Veracruz that borders the Gulf of Mexico.

The storm was downgraded further to a tropical depression in the early morning hours Wednesday, bringing sporadic rain and winds to the central Mexican states of Guanajuato and Queretaro.

''The depression moved west Wednesday morning at 12 mph with maximum winds of 30 mph,'' the spokeswoman said.

She said all of central Mexico, including the capital, was covered by cloudy skies throughout the morning, with heavy isolated showers.

Diana smashed ashore at 2:30 p.m. Tuesday between Tuxpan and Tamiahua, unleashing up to 110 mph winds that ripped roofs off houses, and uprooted trees and communications cables, Velasco said.

''The bad news is that two people died in Tuxpan. One person was killed when a wall fell, and the other was electrocuted by high-tension cables knocked down by a falling tree,'' Velasco said.

Four other people were reported injured, but none seriously, Velasco said.

In Tuxpan, the main communications tower was knocked down by winds, cutting off telephone communications to most of northern Veracruz, a telephone operator said.

Torrential rains flooded rivers and wipping winds felled trees and knocked over houses, leaving about 3,500 people temporarily homeless in the affected area. People whose homes were flooded or destroyed took refuge in city buildings and schools.

Army and civil officials distributed emergency kits of food and medicine to victims of the summer torment.

In September 1988, Hurricane Gilbert hit Mexico's Caribbean resort of Cancun with nearly 200 mph winds, killing 25 people before moving up to the inland industrial city of Monterrey where it killed 125 people.

#90220u1465 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - President Bush said Wednesday he feels "liberated" from an agreement with congressional leaders to avoid public comment on their stalled budget talks, warning he will soon start venting his anger at Democrats on the issue.

Bush told a White House news conference that despite the Iraqi invasion of Kuwait and related economic uncertainties, ''It is absolutely essential'' to reach an agreement with Congress on a plan for reducing the budget deficit.

''That's going to require a lot of compromise and that's going to require a lot of principle,'' Bush said of the ellusive budget deal.

Bush said his earlier agreement with congressional leaders not to talk publicly about the ongoing talks was off and that he intended to be more partisan and critical of Democratic actions in the future.

''But you know what I want to do is separate out my feelings about the

budget now that I feel uninhibited by an agreement not to say anything,'' Bush said. ''I want to tell you exactly how strongly I feel about it but I don't want to do it here today.''

The president said he preferred to avoid more pointed remarks about the budget during a news conference that was ''largely dominated by the world concern about the Middle East.''

''But I feel like a liberated human being now,'' he said. ''I don't feel bound by an agreement that I've told the congressional leaders is no longer in effect. We've been getting one side of that, mainly from the Democrats in the Congress, and you're fixing to get the other but not this minute. You have to stay tuned.''

Budget negotiators have until about Oct. 1 to reach and implement a budget deal, aimed at reducing the federal deficit by about $50 billion during the fiscal year that begins Oct. 1 and $500 billion over five years.

Failure to do so would trigger about $100 billion in automatic spending cuts, split between defense and domestic programs. Both the White House and Congress have said they want to avoid such cuts because they would be devastating to the economy and to government programs.

#90220u1466 08/08/1990 ~United Press International

NEW YORK (AUG. 8) UPI - Fears of a military conflagration in Mideast oilfields have spurred some classic buying of the dollar as a financial refuge, but currency analysts say the U.S. unit has lost some of its appeal as a "safe haven" investors can retreat to in crises.

Since Iraq invaded Kuwait last week, the dollar has moved up only slightly in value on the German mark but has gained at a greater clip against the Japanese yen. The muted response did not seem commensurate with the Mideast crisis.

At midday Wednesday, the dollar traded at 1.5910 German marks vs. 1.5875 at the close a week ago, prior to Iraq's seizure of oil-rich Kuwait. The dollar was also quoted at 150.10 yen vs. 147.20.

In the Gulf region itself, however, there was a run on the dollar as anxious foreign residents and locals exhausted greenback stocks. Most hard currencies were at a premium as thousands prepared to flee in the event of war.

On world currency markets, however, the traditional flight to quality no longer led only to the dollar. The main reason for this is the parlous state of the U.S. economy, which many economists believe is headed back to

the "stagflation" of the 1970s, when inflation ravaged an economy that had lost its impetus to grow.

Meanwhile, analysts say, sophisticated global investors are likely to regard other currencies as equally desirable - especially as Europe's perception of a Soviet military threat has eased along with lessened superpower tensions. These factors and others have prompted foreign-exchange traders and analysts in recent days to remark on the dollar's changing status.

"I think the dollar may be losing some of the safe-haven allure it had in the past," said National Westminster Bank trader Mark Morris. "People just don't have a lot of confidence in the U.S. economy right now."

"You have to wonder if the dollar is as much of a safe-haven currency as previously," said Robert White, vice president and corporate currency manager for First Interstate Bank in Los Angeles. "With the U.S. economy in the shape it's in, it's a little less enticing to put ... a lot of your portfolio in dollars right now," he added.

Stephen King, a currency analyst with the London investment bank James Capel, said the flight into dollars has been markedly less pronounced in the current oil crisis than in similar periods of turmoil in 1973 and 1979.

Given U.S. economic woes and a possible easing of credit policy by the Federal Reserve, King said that "what the market is focusing on is not the safe-haven status but the fact that the dollar must weaken over the short term."

As world oil prices rise, countries, like Germany and Japan, whose economies are growing strongly will have leeway to raise interest rates to counter resulting inflation. By contrast, higher U.S. rates could tip the nation into recession.

King also noted that money nowadays moves faster and easier in global financial markets, widening investors' choice of safe havens. "The notion of a safe-haven currency is somewhat diminished," he said. In the past, the dollar's main attraction in safe-haven buying was its liquidity - the ease with which it could be bought and sold in large amounts.

"As exchange regulations have been broken down, it means that currencies are more easily interchangeable than they were before," he said. "Increasingly, people are becoming indifferent to what currency they hold."

But Andrew Hodge, a foreign exchange vice president with the Banque Brussels Lambert in New York, said he believed the decline in the dollar's appeal was a direct consequence of lessened superpower tensions.

He said that flights to the dollar in the past often correlated to risks of an East-West superpower faceoff but that now "the risk of superpower confrontation and the risk to Europe has practically disappeared."

In the current crisis, unlike any since the end of World War II, the Soviet Union has actually backed up the U.S. position. "In those circumstances," said Hodge, "perhaps that is a reason why the dollar has been less responsive to the size of this crisis."

#90220u1472 08/08/1990 ~United Press International

ANAHEIM, CA. (AUG. 8) UPI - Dave Winfield angrily called accusations that he gambled on sporting events ''outrageous'' and said those who lend credence to them ''believe in the tooth fairy.''

Sports Illustrated reported several people close to Winfield said he knew Howard Spira had connections to gamblers and that the $15,000 Winfield gave him was earmarked to pay off gambling debts.

Winfield, a California Angels outfielder, played for the New York Yankees when he paid Spira $15,000 in 1981. Winfield said the money was a loan.

''When they were trying to develop the story, I told them how ridiculous this was anyway,'' Winfield said at Anaheim Stadium. ''It's outrageous that Winfield gambled. If you believe in that, you believe in the tooth fairy.''

Baseball Commissioner Fay Vincent forced Yankees principal owner George Steinbrenner to resign as Yankees' general partner last month for his involvement with Spira. Steinbrenner paid the self-described gambler $40,000 in an effort to gather damaging information on Winfield.

Barbara Frohman, the widow of Winfield's former agent Al Frohman, told the magazine that her late husband informed her of Spira's involvement in gambling.

She stated Winfield agreed to the give Spira the money after coming to both Winfield and Frohman ''crying, hysterical, on bended-down knees'' for help in covering huge debts he apparently owed to illegal bookmakers.

Al Frohman died in 1987.

''There is nothing to the story,'' Winfield said. ''It's a bunch of shady allegations and it's outrageous. Dave Winfield does not gamble. You get sick and tired of this and, yeah, I'm mad about it.

''It's stupid, it's ridiculous, it's a lie.''

But Albert Whitton, a chauffeur for a promotional company called Top Hat that was created by Frohman, told the magazine a similar story to Barbara Frohman's.

Whitton, who spent eight months in prison for bookmaking, said ''both men (Winfield and Frohman) were aware that Spira gambled'' and ''Frohman told (Winfield) that the money was to pay off Spira's gambling debts.''

In addition, the magazine quoted an unidentified source who claims Spira currently owes organized crime $2 million from gambling.

These reports conflict with Winfield's account of his relationship with Spira.

Winfield, one of the central figures in baseball's investigation - and subsequent removal - of Steinbrenner as general partner of the Yankees, testified under oath during Vincent's investigation in July that he had not associated with gamblers.

Winfield first denied making the payment to Spira, a former employee for Top Hat, but eventually admitted doing so.

However, Winfield insisted the payment was a loan rather than a gift. He also denied knowing Spira was a gambler or that Whitton was a convicted bookie.

The outfielder told baseball investigators during the inquiry that he consented to Spira's loan at his agent's request, without the knowledge of what the money was to be used for.

Two other sources, one a freelance writer for a New York weekly newspaper, overheard Winfield discussing ''his own apparent involvement in sports gambling.''

Allen Barra, a writer for the The Village Voice, heard Winfield ''talk about sports wagers ... and heard him make phone calls to get odds on sports events.''

Barra said that Winfield never bet on baseball.

During Vincent's investigation, Steinbrenner repeatedly wondered aloud why Winfield escaped the scrunity he received for his involvement with Spira.

Vincent responded by saying that his probe was confined to Steinbrenner and that Winfield's association with Spira was a separate issue.

#90220u1478 08/08/1990 ~United Press International

(AUG. 8) UPI - British Embassy officials say a Liberian rebel leader has freed Western hostages held by his troops, including one American and at least seven other foreigners. Seven African countries yesterday agreed to send a peace-keeping force to Liberia after one rebel faction leader, Prince Johnson, threatened to attack the U-S Embassy in Monrovia. Johnson also vowed to hold the foreigners hostages until peace-keeping forces arrived.

Lawyers for three former Northwest Airlines pilots accused of flying while intoxicated are presenting their case in a Minneapolis courtroom. Two air traffic controllers testified the crew on March 8th guided in a professional manner the Boeing-727 with 91 passengers aboard. Defense lawyers say that since the crew flew the aircraft safely in adverse weather, it proves the crew was NOT impaired. The three men were fired by Northwest Airlines one week following their arrest after a flight from Fargo, North Dakota, to Minnesota.

The Coast Guard says oil-eating microbes appear to be doing their job on a spill in Galveston Bay, Texas... but it'll be weeks before test results can confirm it. The 700-thousand-gallon oil spill was created July 28th when a Greek tanker collided with three barges. Coast Guard officials yesterday surveyed the bay where oil-eating microbes were sprayed this week. The-E-P-A is testing water samples taken before and after the

microbes were applied.

Lawmakers in the parliaments of both East and West Germany began debate today on uniting the two nations amid differences over the date of unification and all-German elections. There were heated arguments today in the East German parliament on a plan favored by both West German Chancellor Kohl and the East German premier to speed up the unification process.

WASHINGTON (AUG. 8) UPI - Crosman Products Inc. is recalling nearly 53,000 of its air rifles, used for target practice, because they may have a malfunctioning trigger mechanism, the Consumer Product Safety Commission said Wednesday.

The Model 3100 air rifles, which shoot pellets, may contain an improperly hardened sear, which is a piece of metal attached to the trigger mechanism the consumer agency said.

''An improperly hardened sear may wear prematurely and the consumer may be unable to cock the air gun. But if the air gun can be cocked, the air rifle could unexpectedly discharge without pulling the trigger, even if the safety mechanism is engaged,'' the agency said.

No reports of injury or accidental discharge have been reported. Crosman discovered the problem after inspecting a returned rifle that would not cock, the commission said.

Owners of Crosman Model 3100 air rifles should discontinue use and call the company's toll-free hotline - 1-800-836-3100 - for instructions on returning the rifles. Crosman, of East Bloomfield, N.Y., will inspect all returned rifles and replace improperly hardened sears, then return the guns at no charge.

#90220u1494 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - Yields fell on ten-year Treasury notes Wednesday to an average of 8.77 percent on the second day of the government's quarterly refunding.

The Treasury Department auctioned $10.5 billion of the 8 3/4 percent interest rate notes at an average of $99.869 with 100 equaling the face value and one point representing $10 on each $1,000 investment.

At the last quarterly refunding, May 9, the average yield on ten-year

Treasury notes was 8.88 percent. Wednesday's 8.77 yield was the lowest yield on a ten-year offering since 8.59 percent Feb. 7. The notes will mature Aug. 15, 2020.

Fresh cash raised through the auctions, from institutional as well as individual investors, allows the federal government to settle its debts that include other securities reaching maturity.

On Tuesday, investor fear over the crisis in the Middle East slammed yields on three-year Treasury notes down to 8.10 percent - the lowest level since last November - in weak bidding at the start of the auction marathon. The Treasury Department sold $11.53 billion of the three-year notes at an average price of $99.738.

At the last refunding, May 8, the average yield on three-year Treasury notes was 8.74 percent. On Nov. 9, the yield was 7.77 percent. The selling will continue Thursday with the auction of 30-year bonds totaling $10.25 billion. The Treasury Department will also offer 36-day cash management bills Thursday totaling $10 billion. All the issues sold at the refunding will settle Aug. 15.

There had been doubt as to whether the refunding would go on because Congress had yet to increase the debt limit. But lawmakers late last week passed a short-term bill granting $72 billion in additional borrowing authority through Oct. 2 and clearing the way for the sale of the bills, notes and bonds.

#90220u1500 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - A group of former soldiers, some with limbs missing, walks slowly past the Vietnam Veterans Memorial. Some put down bouquets of flowers. One man copies a name off the wall. Pictures are taken. Few words are exchanged.

The scene at the long, black wall, which lists the names of the 58,176 American soldiers killed in the Vietnam War, is commonplace - except for one difference: These visitors are not Americans but Soviet veterans of the Afghanistan war.

''We hope that some day we will have a similar memorial for our brothers who died in Afghanistan,'' said Rimas Ruzas, chairman of a recently formed veterans group in Lithuania and one of the 12 Soviets whose visit Wednesday morning was sponsored by Common Fate, a Vietnam veterans organization.

The Soviets and their American hosts wore white T-shirts that said in big black letters: ''Brothers in fate.'' The front showed an apple with an

American flag on one half and a Soviet flag on the other. Around the apple it said, ''War Veterans Vietnam Afghanistan.''

The Soviets arrived in the United States Tuesday and will leave Aug. 28 after a canoe trip in the lake country of Minnesota.

They came to exchange their experiences with Vietnam veterans and learn how the Americans are coping with their war experiences. For many it is the first time in America.

They found more similarities than differences. ''Our friends were killed, and their friends were killed,'' said Valerij Kurdyinkow, 28, from Minsk in Byelorussia, who served in Afghanistan in 1983-84. ''There were many differences between the two wars, but war is war.''

''They had exactly the same experience, probably worse,'' said Jim Otto, a Vietnam veteran. ''They are just starting their journey, learning to let their tears go and to grieve.''

The idea to invite the Soviet veterans to the United States came from Daniel Sandstorm of Minnesota, who lost both legs in Vietnam. Sandstorm met several Afghanistan veterans on a trip to the Soviet Union last year. ''The more we talked the more it became clear that they face a similar situation,'' he said. ''It was like looking in the eyes of younger brothers.''

American veterans plan to visit the Soviet Union next year as part of Common Fate's exchange program.

Jan Scruggs, president and founder of the Vietnam Veterans Memorial Fund Inc., told the Soviet guests, ''Our government did not want this memorial, did not want to remember us, but we forced it to. We hope you will win the battle in your country, too.''

#90220u1517 08/08/1990 ~United Press International

COLUMBUS, OH (AUG. 8) UPI - Agriculture experts predicted Wednesday the conflict in the Middle East would soon hit consumers at the grocery store.

Allan Lines, an agriculture economist at Ohio State University, predicted a three percent to five percent increase in food prices over the next year, based on the $10-a-barrel increase in oil prices that has already taken place. And he said inflation will undoubtedly cause additional increases.

"As oil prices go up and Americans funnel more money overseas, that can spur demand for our grain products - corn, soybean meal and wheat," Lines said. "Although that's good news for grain farmers, the demand will raise

prices of those products here, and that will increase the cost of raising livestock in the United States." Livestock producers may decide to cut back production as a result, which Lines said would raise the price of beef, pork, poultry, and milk.

Economists were already seeing signs of a recession in the economy. If people have less money to spend, they'll cut back at the grocery store, bypassing expensive cuts of meat for less expensive items such as hamburger and poultry.

Kamyar Enshayan, research associate for Ohio State's Sustainable Agriculture Program, said most people don't realize how much agriculture depends on oil and other fossil fuels.

Besides needing fuel to run tractors and other equipment, fertilizer and other agricultural chemicals are produced with energy-intensive methods and would likely become more expensive. Lines said grain farmers would be hurt by those increased costs.

Off the farm, the cost of transporting food will also increase because of higher oil prices, both researchers said. Enshayan also sees an increase in the cost of processing and packaging that food. Enshayan said the Middle East conflict should make the nation question its use of energy.

"The United States has three percent of the world's population, but uses 30 percent of the world's fossil fuels," Enshayan said. "Fossil fuels will run out someday, and the situation in the Middle East shows that the supply is already insecure. We should be questioning our reliance on fossil fuels and make research into renewable energy sources a priority."

Renewable energy sources include solar, wind, and hydro-power. They show promise, Enshayan said, but have not received the attention needed to make them more useful to the nation. He said efforts have focused on nuclear energy, but the waste it produces is causing even more problems.

Enshayan also advocates emphasizing regional markets to trim the cost of transporting food. "Most of the food eaten in Ohio is not grown in Ohio, even though our climate does enable us to produce a wide variety of products," Enshayan said. "If we concentrate more on a regional food supply system, our transportation costs would decrease and that food would be fresher and more nutritious."

#90220u1535 08/08/1990 ~United Press International

CAPE CANAVERAL, Fla. (AUG. 8) UPI - Launch of new weather satellites will be delayed because of flawed mirrors, but officials said Wednesday older satellites already in space should be able to provide crucial coverage of storms and hurricanes.

Forecasters currently rely on a single ''GOES'' satellite to provide the hemispheric television views of Earth familiar from nightly newscasts, a satellite that was due to be replaced in February 1992 by the first in a series of advanced ''GOES-NEXT'' spacecraft.

But trouble with critical relay mirrors in the new satellites likely will delay their launch beyond early 1992, forcing the nation to continue relying on the GOES currently in orbit and putting forecasters a single failure away from an inability to instantly track developing storms and hurricanes.

''We're concerned, of course, about any delays in launching a new satellite because we always want two of them up there,'' said Bud Littin of the National Oceanic and Atmospheric Administration. ''We've had this single satellite since early '89. It was launched in '88 so it's into its third year.''

But he said the satellite is in excellent condition and it likely will

continue to operate beyond its planned five-year lifetime.

''This is in very good health. We see no flaws in it,'' he said. ''It has fuel enough aboard ... to go a couple or three more years, anyway. It also has some built in longevity features ... that the earlier satellites didn't have.''

The mirror problem with the GOES-NEXT satellites is unrelated to the flaws crippling the $1.5 billion Hubble Space Telescope. In that case, Hubble's primary 94.5-inch mirror was ground into a slightly incorrect curvature, preventing the telescope from bringing starlight to a sharp focus.

The mirrors in the GOES-NEXT satellites, built by Ford Aerospace for NASA and NOAA, are flat and are used simply to relay images to various sensors. But engineers at ITT Aerospace/Optical Division of Fort Wayne, Ind., discovered that temperature extremes like exposure to sunlight can cause warping.

''They describe it as a temperature gradient across the surface of the mirror and this causes an unacceptable degree of warping,'' said Frank Lepore, a spokesman for NOAA. ''This fact was discovered by computer modeling and then tested experimentally.

''NASA has assembled a tiger team consisting of ITT, NASA and some independent consultants to examine the problem. They expect to come up with some kind of recommendation by the end of this month. There are a number of different fixes that could be employed.''

It is not yet known how long it will take to make repairs or how much the work will cost. First launch had been scheduled for February 1992, but it now will be delayed at least two months and possibly as long as a year.

Potential ''fixes'' range from coating the mirrors with a material that makes them less susceptible to temperature extremes or replacing them altogether.

In the meantime, Lepore said, engineers believe the GOES satellite currently in space will last well into 1993 and that even if it failed before the first GOES-NEXT could be launched, polar orbiting satellites and military weather stations would be able to take up the slack.

Lepore said when the mirror problem first cropped up, NOAA developed a contingency plan that ''calls upon polar, defense and European satellite coverage to provide these images. It would not be as timely, but we would still have the information.''

The ''Geostationary Operational Environmental Satellites'' operate 22,300 miles above the equator. At that altitude, objects take 24 hours to

complete one orbit and thus appear to hang stationary in the sky as Earth turns.

Satellites in such ''geostationary'' orbits can photograph one third of the entire planet every 30 minutes. Satellites in lower polar orbits might pass over a developing hurricane once a day while a GOES satellite can monitor the storm on a continuous basis.

The GOES system was designed for two satellites, one stationed over the Atlantic Ocean and one over the Pacific.

But since 1989, when the GOES stationed over the Pacific Ocean failed after six years of service, only a single GOES has been fully operational.

Ford Aerospace currently is building five advanced GOES-NEXT satellites that use mirrors to relay images to various sensors.

WASHINGTON (AUG. 8) UPI - Penn Central Corp.'s major shareholder has opted out of the company's recently announced stock buy-back program, according to documents released Wednesday by the Securities and Exchange Commission.

American Financial Corp., which beneficially owns about 34.3 percent of Penn Central's common stock outstanding, has informed Penn Central "that it does not intend to tender any of its shares," under the buy-back program, announced by Penn Central July 26. American Financial Corp. officials could not be reached for comment.

Penn Central's board of directors authorized the company to repurchase up to six million shares of common stock at $26 a share, along with an additional 1.5 million shares if the offer is oversubscribed.

The company began the stock buy-back program because it believed its shares were undervalued, according to Bob Burton, manager of investor relations. Penn Central, based in Cincinatti, has 64.5 million shares outstanding.

In addition to its Penn Central stake, American Financial Corp. owns Great American Insurance Co., a property and casualty insurance outfit, and also has an estimated 65 percent stake in Chiquita Brands International Inc.

Penn Central is a diversified holding company with operations in wire and cable manufacturing, heavy equipment manufacturing, insurance and defense. Its combined revenues in 1989 totaled $1.7 billion.

#90220u1589 08/08/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (AUG. 8) UPI - Four leftist rebels died and two soldiers were wounded in a series of clashes in the eastern countryside of El Salvador, an armed forces spokesman said Wednesday.

Combat in the town of Chirilagua, 70 miles east of the capital, left two rebels dead and three wounded, the spokesman said. Two other rebels of the Farabundo Marti National Liberation Front died in fighting in the eastern province of La Union.

Rebels also attacked a coffee processing plant early Wednesday morning in Chinameca, San Miguel province, 75 miles east of San Salvador, setting fire to the factory, Civil Guard Commander Juan Antonio Salmeron said.

''About 100 guerillas attacked the coffee plant with gunfire,'' Salmeron said.

He said two soldiers were wounded when rebels descended on an army convoy enroute to the coffee plant to confront the rebel attack.

The violent clashes continue despite recent peace talks between the government and the rebels to end the decade-long war in El Salvador that has cost more than 72,000 lives, mostly civilians.

-30- 1248

#90220u1601 08/08/1990 ~United Press International

CARSON, CA (AUG. 8) UPI - Union negotiators in Southern California's supermarket contract dispute, citing a "crisis" in talks with management, toughened their position Wednesday and imposed a new settle-or-strike deadline.

The announcement of the 7 p.m. PDT Thursday strike deadline came after 18 hours of talks between the management of six supermarket chains and the United Food and Commercial Workers Union, which represents 80,000 clerks and meat cutters.

The negotiations recesssed at about 7 a.m. Wednesday. They were scheduled to resume at 9 a.m. Thursday in Carson at the headquarters of the Food Employers Council, which is representing the six chains.

"After several days of marathon bargaining, we have reached a crisis situation," said Tom Vandevelt, president of the union's San Diego Local 135, which represents about 12,000 of the workers.

"For a while, I had been optimistic that we might conclude these negotiations without a strike. This morning at 6 a.m., all our efforts of putting together an agreement seemed to unwind," Vandevelt said.

On Monday, the union had promised to strike Lucky Stores Inc. at midnight, but a few hours before the deadline, it pulled back and indefinitely postponed the walkout. The union will not push back the strike deadline this time, Vandevelt said, adding, "There will be no more extensions."

A strike against Lucky, the No. 2 chain in Southern California, would probably spread quickly to the other five chains involved in the negotiations - Albertson's, Alpha Beta, Lucky, Ralphs, Stater Bros., and Vons.

David Willauer, a council spokesman, has said that a strike against one of the chains would be viewed as a strike against all, and that the other chains would lock out the union workers. The chains operate about 800 stores between San Luis Obispo and San Diego.

The statement from Vandevelt was in sharp contrast to comments from negotiators Tuesday. Spokesmen for both sides strongly indicated that the probability of a strike had diminished as a result of progress in talks and that a settlment could come soon.

Both sides said Wednesday that they have imposed a news blackout on the negotiations and referred calls to federal mediator Frank Allen, who was not immediately available for comment.

The negotiators have been holding talks on and off since June 18. The union had previously threatened to strike when their previous three-year contract expired July 29, but also backed off that threat as a result of movement toward a settlement. Once a settlement is reached between the negotiators, it would have to be approved by the membership of ten union locals.

Union officials said previous offers had contained unacceptable cuts in health benefits and contained problems with job security, allowing lower-paid workers to do jobs currently performed by higher-paid employees. The supermarket clerks currently earn between $4 and $13.05 per hour, while the meat cutters earn between $9.31 and $14.33 per hour.

Willauer has said that the chains have been preparing for a strike for more than a month by hiring and training replacement workers. He said any disruption in operations would be fairly minimal if a strike occurs, with the most likely effect to be in some reductions in operating hours at 24-hour supermarkets.

The region's last supermarket strike came in 1985, when meat cutters and drivers struck. Retail clerks last walked off the job in 1976.

AUBURN, WASH. (AUG. 8) UPI - A heart-shaped tombstone carved 79 years ago for a 3-year-old Japanese girl was returned to its original resting place this week - 45 years after thieves stole it in the final months of World War II.

''Pretty good,'' Frank Natsuhara, 79, said with a smile as he surveyed the gray marble marker on the grave of his sister, Yu Natsuhara, who was struck by a train in 1911 near the family farm.

Workers at Auburn's Pioneer Cemetery said vandals knocked down headstones on several tombs of Japanese immigrants during the last months of the war. But only one was taken, that of the little girl.

It was finally found in late June, when a backhoe digging land for a new building behind Highline High School unearthed the stone. Officials got it to Frank Natsuhara by checking the local telephone directory.

The marker, lettered in English and Japanese, was in place when the Natsuharas left during World War II for internment at Japanese relocation camps in California and Idaho. But when the family came home in September 1945, they were stunned to see the marker had been taken.

Because the young girl's father had a cement replacement marker affixed to the grave that could not be removed, the original marker had to be cemented to that.

Natsuhara said his older sister, Mary Natsuhara Takemura, 83, of San Francisco, who had witnessed her sister's death, had taken the headstone theft very hard, viewing the missing stone as a message that the spirit of her sister was wandering.

''When I told her the marker was found, she cried like the devil,'' Frank Natsuhara said. ''She's coming up next month for her granddaughter's wedding. The first thing she'll do is come and see this.''

#90220u1638 08/08/1990 ~United Press International

(AUG. 8) UPI - President Bush says his order to send U-S troops and combat jets to Saudi Arabia is needed to protect the Saudis from Iraq... which he said has the fourth-largest military in the world. Bush said history has shown that ''appeasement'' does NOT work... that the world must resist aggression.

At a news conference in Washington... the president said it would be ''unwise and unrealistic'' to assume Iraq would NOT attack again... after invading Kuwait on Thursday. Bush stressed the United States is NOT at war... but is in a defensive position. He said further steps will be taken to bolster an international embargo against Iraq... suggesting a blockade may be established.

Iraq today took more direct control of Kuwait... declaring its annexation. A spokesman for Iraqi President Saddam Hussein in Baghdad justified the overthrow of the Kuwaiti leadership as part of an intifada, the Arabic word for uprising. The spokesman said ''history has proved Kuwait is a part of Iraq.''

Libya's news agency says Libyan leader Gadhafi is talking to Arab leaders about what the report called the ''danger'' posed by U-S troops in Arab lands. The agency says Gadhafi telephoned seven Arab leaders today and yesterday to discuss the alleged threat to ''Arab freedom and dignity.''

Egyptian President Mubarak in Cairo today called for Arab leaders to hold an emergency summit within 24 hours to resolve the Iraq-Kuwait conflict. Egypt's Middle East News Agency said Mubarak's summit offer was swiftly accepted by Algeria, Yemen, Libya, Morocco and Syria. Mubarak also suggested that a joint Arab peace force could be set up.

#90220u1640 08/08/1990 ~United Press International

NEW YORK (AUG. 8) UPI - Entertainment giant Viacom Inc. reported a second-quarter loss Wednesday of $20 million compared with a wider loss of $34.7 million in the year-earlier period.

Viacom's revenues for the period amounted to $383.1 million, up 5 percent from $363.9 million for the 1989 second quarter.

A spokeswoman for Viacom - whose interests include the cable networks MTV, Showtime and Nickelodeon, basic cable systems and televison and radio stations - attributed the deficit to interest expense, which amounted to $73.4 million in the period.

Consolidated earnings from operations of $48.2 million for the second quarter increased 100 percent over $24.1 million recorded a year earlier.

For the first six months, Viacom reported a loss of $37.1 million, compared to earnings of $181.9 million, or $1.54 a share, a year earlier, when the company recorded a one-time gain from the sale of cable systems in suburban New York and Cleveland.

First-half revenues amounted to $776.3 million, an increase of 10 percent from 1989's $705 million.

(AUG. 8) UPI - The American Bar Association changed its stance on abortion today... taking a neutral position on the issue. The A-B-A's House of Delegates meeting in Chicago narrowly voted to rescind their pro-choice abortion stance. The tally was 200-188. The vote came after hints from the White House that the A-B-A's influence in Washington would dwindle without a change.

The prosecution wrapped up its case today in the New York trial of three

youths accused of beating and raping a Central Park jogger last year. While the prosecution charged that the teen-agers went on a ''spree of uncontrollable violence,'' about a dozen spectators abruptly left the courtroom to hold a prayer vigil for the defendants.

#90220u1668 08/08/1990 ~United Press International

NEW YORK (AUG. 8) UPI - The parents of one of three youths on trial for the gang rape of a woman jogger stormed out of the courtroom Wednesday when a prosecutor described ''the spree of uncontrolled violence'' in Central Park.

''Imagine what this attack on (the jogger) was like. Imagine the frenzy of these teenagers as they gathered around her waiting to take their turn, grabbing at her, reaching, beating,'' Assistant District Attorney Elizabeth Lederer told the jury in her summation at state Supreme Court in Manhattan.

Antron McCray, 16, Yusef Salaam, 16, and Raymond Santana, 15, were indicted in the rape and attempted murder of the 30-year-old investment banker on April 19, 1989. They were allegedly in a group of up to 30 youths that roamed the moonlit park on a random crime spree, attacking nine victims.

''Antron McCray, Yusef Salaam and Raymond Santana went on a spree of uncontrolled violence - they went wild in the park - beating, kicking anyone they could find,'' Lederer told the jury of 10 men and two women, which was expected to begin deliberating the case by Thursday.

During the summation, two loud bangs boomed through the packed courtroom as McCray's parents and 10 supporters stormed out of the room. They held a prayer vigil in the hallway outside, humming and singing spiritual songs.

An angry Justice Thomas Galligan banned the group from returning to his courtroom. It was just two days after he ejected Salaam's mother for screaming ''Liar!'' during a witness' testimony and ordered her not to come back.

Rebutting defense claims that the inconsistencies in the youths' confessions show they were coerced by police, Lederer attributed the differences to the mayhem of the rampage.

''There were so many people there,'' Lederer said. ''In the chaos of what was going on, the rush not to get caught, the rush to get involved, are you surprised that the defendants can't remember the exact details? What do you think their attention was focused on? It was on the wildness of what was going on.''

During defense summations, Santana's lawyer questioned why his client's blue jeans would be clean if he had sexually attacked the jogger in the muddy gully where her naked and battered body was found.

Lederer explained that the jogger was raped on a relatively dry patch of grass but after thrashing and kicking in protest, rolled down an embankment into the mud gulch.

All three defense lawyers also questioned the absence of blood on their clients' clothing.

Lederer said the jogger was bleeding from severe head wounds - far from the prime areas of contact during the sexual attack - and much of the bleeding occurred in the four hours after the gang left her for dead.

To bolster the rape charge, Lederer read aloud McCray's written confession in which he admits penetrating the jogger's vagina with his penis.

She noted that aiding another individual to commit a rape - by subduing the victim with a blow to the head or holding her down, for example - make both assailants equally guilty of rape. Santana admitted on his videotaped confession and Salaam told a detective that they helped others rape the jogger.

Turning to the attempted murder charge, Lederer said the youths could have raped her without repeatedly throttling her with a metal pipe and a rock and then leaving her ''bleeding and unconscious in the most desolate part of the park.''

With two skull fractures, the jogger struggled to survive but could never remember the night that changed her life. When she testified for the prosecution, she could not recall a single detail of the attack.

''It's a miracle that she survived,'' Lederer told the jury.

BOGOTA, COLOMBIA (AUG. 8) UPI - Venezuelan President Carlos Andres Perez, whose country belongs to OPEC, said his nation could increase oil production but would not do so without an agreement with other members of the oil cartel.

Perez, speaking to reporters after meeting with newly installed President Cesar Gaviria, also said his nation supported the decisions made by the United States in the Iraq crisis.

Responding to a question about whether Venezuela would increase its oil production, Perez said "We do not have the capacity to supply the United States, but we could increase production by a maximum of some 400,000 to 500,000 barrels."

He said the increased production would "add to others like Saudia Arabia and other producers (of OPEC) but decisions will be made in collective agreement with the members of OPEC and not unilaterally by Venezuela."

Perez met Tuesday with Vice President Dan Quayle, who led the U.S. delegation to the Gaviria inauguration. Quayle brought a message from Bush explaining the U.S. actions after the Iraq invasion of Kuwait, Perez said.

"I am fully in agreement with the decisions made by the United States," he said. He also expressed his nation's "profound solidarity" with the United Nations Security Council resolution concerning the Iraq invation of Kuwait. Venezuela and Ecuador are the ony two South American nations who are members of the Organization of Petroleum Exporting Countries.

#90220u1735 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - The tip-off of the influential role environmental and consumer groups have played in writing the farm policy bill appeared, by some estimates, weeks before the bill was called for floor debate.

It was the overwhelming House vote June 14 for two amendments to cut back on water subsidies to Western farmers. Leaders of two environmental groups say the lopsided victories sent a signal to farm-state legisators.

"The environmental community was able to demonstrate the ability to win," said Justin Ward of the Natural Resources Defense Council. "I think that was helpful to leverage some more environmental concerns (into the bill)."

Although environmental and consumer groups did not get as much as they intially proposed, they secured inclusion of a half-dozen items in the House and Senate versions of the farm bill.

The legislation faces two more hurdles before becoming law: House and Senate negotiators have to write a compromise version and President Bush must decide whether to sign it. The White House has threatened to veto a bill that is a budget-buster or establishes unacceptable policies. Agriculture Secretary Clayton Yeutter indicated Wednesday the veto threat

is still alive but declined to specify adminsitration objections.

The victory list for environmental and consumer groups includes language for the first-ever national standard for what can be called organic food, stronger protection of wetlands, a ban on export of pesicides barred from use by U.S. farmers, a requirement for farmers to keep records on use of pesticides, programs that would help defray the cost for farmers to switch to production methods that reduce the risk of water contamination, and to investigate what effect grading standards have on pesticide use.

Ken Cook of the Center for Resource Economics said the farm bill, formerly a "subsidy and food stamp bill" - half of the Agriculture Department budget is spent on public feeding programs - is being broadened to include other goals.

"Farm bill processes now have to carry additional weight: Consumer and environmental concerns," Cook said, noting how the 1985 farm policy law was the first to link environmental and farm program goals. Since 1985, farmers have been required to practice conservation in order to be eligible for benefits such as crop loans and subsidy payments.

At the start of the year, a coalition of a dozen consumer and environmental groups proposed an expansion of that requirement to control use of pesticides and fertilizers in environmentally sensitive land. That idea faltered, but the water quality programs proposed by the House and Senate are similar to proposals from the coalition.

During House debate, farm-state congressmen used an environmental argument to defeat an amendment to ban crop support payments to big farmers. Opponents said the ban would drive farmers out of the program and remove the government's only tool for assuring environmental compliance. They were aided by letters from four environmental groups that made the same appraisal.

The NRDC, however, supported the cut-off and other groups were neutral. One consumer advocate questioned if it was "a great thing" for environmentalists to take the role of deal-makers.

Cook and House Agriculture Committe Chairman Kika de la Garza, D-Texas, said there were no deals. The events, however, may have strengthened ties between the two sides.

"The committee played it this way," Cook said, "'We will go the extra mile. We want to make this an environmental bill but we want to know if you're going to clobber us on the floor."'

Cook disputed suggestions that environmental groups now are locked into supporting the farm program. "If it turns out that the environmental

portions of the farm bill aren't working ... it's very likely the environmental arguments will turn against the subsidies," he said.

Consumer and environmental groups proved their mettle with passage of the organic food provision. It was the only noteworthy amendment in the House to pass over the objection of Agriculture Committee leaders.

Allen Rosenfeld of Public Voice for Food and Health Policy said passage was aided by rising public interest in food safety and environmental quality. In addition, proponents created a well-organized lobbying effort that included the delivery of a six-pack of organic raspberry lemonade as a reminder of the issue.

"There are quite a few people in Congress (who) if they don't have a local vested interest ... they'll be looking for a 'green' (pro-environment) or a consumer vote," Rosenfeld said.

WASHINGTON (AUG. 8) UPI - Treasury Secretary Nicholas Brady defended Wednesday the Bush administration's efforts to rescue the nation's crippled savings and loan industry, but said no one is certain how much the process eventually will cost.

Speaking on the eve of the one-year anniversary of the signing of the Financial Reform, Recovery and Enforcement Act, Brady said the job of rescuing the thrift industry is getting done.

''But make no mistake. The problem is immense and the solution is not painless. A problem that was decades in the making cannout be eradicated in one year,'' Brady said in a speech before the Naitonal Press Club.

The government's thrift bailout effort has come under heavy congressional criticism for its slowness and lack of resources. The bailout is expected

to cost taxpayers between $130 billion and $500 billion, making it the most expensive financial enterprise since the Great Depression.

Brady said the exact cost of the bailout hinges on the health of the nation's real estate markets, which have softened in recent months.

''No one can be precise about the exact cost of the cleanup,'' he said. ''It depends almost entirely on the state of the real estate market at the time the (Resolution Trust Corp.) sells the assets it has taken over.''

The RTC was created last August by FIRREA to sell the assets of failed thrifts placed under government control. The agency has taken over 472 insolvent thrifts and has sold the assets of 211 institutions, or one every 48 hours, Brady said.

The rising costs of the bailout, which initially had been estimated at $166 billion, has led to several heated rounds of fingerpointing between the Bush administration and several members of Congress in recent months.

Brady said the bailout's ''staggering'' costs have alarmed taxpayers and firghtened politicians seeking to avoid the wrath of their constituents.

''The line in the political world goes, 'Since I don't make mistakes, someone else must be making them','' he said.

Brady also reiterated the administration's support for the federal deposit insurance system, which guarantees deposits of up to $100,000. So far, he said, the government has paid out $62.8 billion to protect 6.4 million accounts in failed institutions.

''A year after FIRREA, the government's promise to depositors is rock solid,'' he said. Not one single American who trusted in the government's promise to protect his savings has seen that promise violated.''

Later, under questioning from the audience, Brady declined to criticize the monetary policy of the Federal Reserve, but added that the administration would like to see lower interest rates to spur economic growth.

''Although inflation is important, the maintenance of economic growth, or pushing economic growth is very important,'' he said.

TORONTO (AUG. 8) UPI - Brascan Ltd. Wednesday reported second quarter earnings of $44.6 million, or 42 cents a share, down 29 percent from $62.9 million, or 65 cents a share, in the year-ago period.

Revenues at the company increased to $2.26 billion up from $2.02 billion in the second quarter of 1989.

For the first six months, Brascan reported earnings of $82.5 million, or

77 cents a share, compared with $123.3 billion, or $1.28 a share, in 1989. Revenues increased to $4.43 billion from $3.97 billion a year earlier.

Brascan said its results reflected a ''poor economic environment'' and its impact on the company's natural resource earnings.

Natural resource earnings dropped 56 percent to $29.1 million mainly as a result of lower commodity prices, the stronger Canadian dollar and higher interest rates, the company said.

Income from Brascan's consumer and industrial products and financial services divisions, and its investment and other income segment edged upward, the company said.

Brascan said it was confident its base level of earnings - from its consumer and industrial and financial services operations - would allow the company to report a lower than 1989 but reasonable level of earnings in 1990.

Brascan has interests in Noranda Inc., Westmin Resources Ltd., John Labatt Ltd., Scott Paper Co., of Philadelphia; and Trilon Financial Corp.

#90220u1866 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - The Bush administration wants Americans to help throw some sand into the gears of Iraq's war machine by turning out lights and driving more slowly.

In a nationally televised speech on the Middle East crisis, President Bush said, ''Conservation measures can also help. Americans everywhere must do their part.''

Reid Detchon, a top assistant in the Energy Department's conservation department, said one of the simplest ways to reduce gasoline consumption is to drive smoothly and carefully.

''Avoid jackrabbit starts,'' said Detchon. ''Don't jump from a dead stop by pushing your accelerator to the floor.''

Inflating automobile tires to the recommended level also saves gas, he said, because ''underinflated tires increase the drag on the vehicle and hurt your efficiency.''

Not exceeding the speed limit of 55 mph on most highways also saves gas, Detchon said. So does carpooling.

''Energy efficiency is important to anybody's economics, if nothing else '' the Energy Department official said. ''Almost anything you do can save money.''

Another easy energy-saving tip involves installing new light bulbs in your home. Replace ordinary incandescent bulbs with new compact flourescent bulbs, Detchon said. They last five times longer and use a fifth of the energy.

''They're expensive on the front end,'' he said, ''but on a life cycle they're quite a lot cheaper than ordinary bulbs'' because they last long and use little energy.

During the summer air-conditioning season, Detchon said, another way to save energy is to replace or clean filters. Also, air conditioners should be operated on a thermostat setting - automatically turning them on and off - rather than on a continuous-operation cycle.

''Use curtains to block heat during the day,'' Detchon added. ''Turn out lights in unoccupied rooms.''

Long-term conservation measures include buying energy-efficient appliances such as refrigerators and furnaces. When replacing windows, new ''low emissivity'' glass insulates far more than ordinary panes.

''There is a great loss of heat through windows,'' Detchon said.

Caulking and insulation also save money, he said. Before winter, furnaces should be tuned up for better heating efficiency.

The Energy Department said people may call a toll-free telephone number to receive a free booklet, ''Tips for Energy Savers.'' The number is (800) 523-2929.

WASHINGTON (AUG. 8) UPI - Having rallied global support against Iraqi aggression and ordered U.S. troops into the Saudi Arabia, President Bush seemed emotionally drained Wednesday.

Speaking at a White House news conference following a nationally televised address, Bush made a couple of slips of the tongue. And he even thanked reporters for pointing out his misstatements.

''I've screwed up a couple of times here, and I'm very grateful for your assistance in straightening it out,'' Bush said. ''God, I'd hate to have

of those answers stand.''

At one point, asked to explain his military objectives in the Persian Gulf Bush said, ''the defense of the Soviet Union.''

''Saudi Arabia?'' a reporter inquired.

Bush nodded and said, the ''defense of Saudi Arabia.''

Asked if any one specific action prompted his decision to send troops, Bush said: ''It would perhaps be the Saudis moving south when they said they were withdrawing.''

''You mean the Iraqis, sir?'' another reporter asked.

''I mean the Iraqi - thank you very much,'' Bush said. ''It's been a long night.''

It was a long night for lot of people at the White House.

At about 3 a.m., Defense Secretary Dick Cheney, just back from the Persian Gulf, sat in a limousine in the White House driveway and was handed a copy of the speech the president planned to deliver to the American people later in the morning.

Cheney promptly began to review the address, and then returned to the White House shortly past dawn to confer with the president.

''I'm very pleased with the cooperation we're receiving'' from other nations, Bush told a reporter while walking from the executive mansion to the Oval Office at 6:40 a.m.

His collar was open. His demeanor was upbeat.

An hour later, Bush held a breakfast meeting with Secretary of State James Baker, national security adviser Brent Scowcroft, and Cheney, who on his trip to the Middle East persuaded King Fadh of Saudi Arabia to permit U.S. troops on his bases.

At 9 a.m., Bush, in a dark suit with a maroon tie, delivered his televised address.

''If history teaches us anything, it is that we must resist aggression or it will destroy our freedom,'' said Bush, likening Saddam to Adolf Hitler.

''America's does not seek conflict, nor chart the destiny of other nations '' he said. ''But America will stand by her friends.''

After the president's 13-minute speech, photographers were ushered in to take pictures of Bush. The president was still at his desk.

WESTOVER AIR FORCE BASE, MA (AUG. 8) UPI - Eight giant Air Force Reserve C-5A cargo jets, the largest airborne transport in the U.S. military, were called into action, but officials would not say Wednesday what role the aircraft could play in the Middle Eastern crisis.

The eight C-5A Galaxy transports are among 16 of the aircraft assigned to the 439th Tactical Airlift Wing at Westover Air Force Base in Chicopee, Mass., base spokesman Gordon Newell said. They took off from Westover at different intervals, beginning with one already scheduled flight that left during the weekend, he said.

''Eight of the aircraft have been put into the regular Air Force system to move equipment. Where, I don't know, and if I did, I could not release

that information until the mission is over,'' Newell said.

One of the eight aircraft was on ''a routine mission to Turkey that was planned before all this started,'' Newell said. ''It's what we call a routine 'Turkey trot.'''

Air bases in Turkey, a member of the NATO alliance, are within striking distance of Iraq and could play a major role in U.S. military actions in the area, military analysts have said.

Some C-5As were seen landing at Pope Air Force Base, adjacent to Fort Bragg, N.C., where they likely would pick up heavy artillery equipment and helicopters troops will need in Saudi Arabia.

Dozens of Air Force reservists called Westover to volunteer for action in Saudi Arabia, where U.S. troops have been deployed to deter a possible attack by Iraq, Newell said.

''The phones have been ringing off the hook,'' he said. ''We're taking their names at this point.''

The Westover C-5As were last called into active duty during the Dec. 20 invasion of Panama in which that nation's de facto leader, Gen. Manuel Antonio Noriega, was deposed, Newell said. The C-5As transported military personnel and equipment during the Panama mission, he said.

A C-5A can carry up to two M-1 battle tanks, three CH47 Chinook helicopters, eight to 10 Cobra gunship helicopters, and 73 support personnel, Newell said. It also can be converted into an airbus and carry up to 263 military personnel, he said.

''The C-5A is the largest transport in the free world and is designed for rapid on-loading and off-loading of equipment and personnel,'' Newell said.

With a maximum payload of 7,069 pounds, the C-5A can travel at speeds of about 570 mph. It is 252 feet long and has a 222-foot wingspan.

#90220u1947 08/08/1990 ~United Press International

TRAVERSE CITY, MI (AUG. 8) UPI - A top Ford Motor Co. executive said Wednesday the auto industry was ready with fuel-efficient cars should the Persian Gulf situation worsen.

Speaking at the University of Michigan's annual Management Briefing seminar in Traverse City, Ford Executive Vice President Louis Ross said the industry was much better prepared than it was in the late 1970s, when the last oil shocks occurred.

''Very high mpg small cars are available today from Ford even though they meet the needs of very few customers,'' Ross said.

Figures show that subcompact car sales now account for about 18.5 percent of the total U.S. vehicle market. But some analysts said only a substantial price increase at the gasoline pump or a lack of availability will create a dramatic shift in current buyer habits.

Ford recently introduced all-new versions of its Escort and Tracer subcompact cars, based on designs by its Japanese affiliate Mazda but produced at plants in Michigan and Mexico.

Ford must sell nearly 500,000 of those small cars a year to meet corporate average fuel economy (CAFE) standards. Otherwise, it may have to curtail domestic production of its larger, more profitable but less fuel-efficient cars or risk government fines.

Ross also said that rapidly changing geopolitical events have the power to shape the auto industry as never before, with great sales potential opening up in Eastern Europe, the Soviet Union, India and the Pacific Rim.

''Fundamental economic changes must occur to support the dramatic political reform they are now experiencing,'' he said, adding that otherwise, any political progress already made could be undermined.

''It is for these reasons that Ford has been cautious in its approach to Eastern Europe,'' Ross said.

#90220u1967 08/08/1990 ~United Press International
BOSTON (AUG. 8) UPI - Two city councilors and a coalition of religious and political conservatives are taking new aim at the Robert Mapplethorpe exhibit at the Institute of Contemporary Art because of seven photographs they find objectionable or obscene.

Councilor Albert L. ''Dapper'' O'Neil asked the full council Wednesday to order the museum to remove seven photographs depicting homoeroticism or child nudity from the exhibition of 120 Mapplethorpe works.

''I don't want to close the show. I just want those seven photographs taken down,'' O'Neil said. The council tabled his motion.

The controversial exhibition opened Aug. 1 in Boston and closes Oct. 4.

Councilor James Kelly said he will seek $210,000 in back rent on the city-owned building, a former firehouse the ICA began leasing in 1973 for $14,000 a year for 99 years.

Kelly, no fan of Mapplethorpe's work, asked for a hearing to investigate the lease arrangement and require the museum to pay any back rent or face the possibility of closure. The request was referred to committee.

''The ICA is going to make a handsome profit on the Mapplethorpe show,'' Kelly told The Boston Globe. ''In light of that, I think it is high time they pay the rent they owe to the city.''

#90220u1980 08/08/1990 ~United Press International
VATICAN CITY (AUG. 8) UPI - Pope John Paul II urged Christians to pray for world peace Wednesday and the Vatican newspaper L'Osservatore Romano lamented ''the attack by Iraqi troops on the little emirate'' of Kuwait.

Speaking to a group of Japanese pilgrims during his weekly general audience in the vast Paul VI hall at the Vatican, the Roman Catholic pontiff made no direct reference to the Iraqi invasion of Kuwait.

But he said ''the solemnity of the Assumption of the Blessed Virgin Mary in heaven is now imminent. I know that this same day you commemorate the end of World War II.''

''Now, therefore, most dear pilgrims, invoking the maternal intercession of the Madonna, let us pray for peace in the world,'' the Polish pope said speaking in Japanese.

It was the first time the pope, who took time off from his annual vacation at his summer palace at Castel gandolfo outside Rome to hold the general audience, has mentioned, albeit indirectly, the turmoil in the Middle East.

Some Vatican sources said the pontiff may be reluctant to jeopardize the fate of Iraq's large Christian community by condemning the invasion of Kuwait more explicitly. Roman Catholics will celebrate the Assumption of Mary Aug. 15.

It was left to the semi-official Vatican newspaper L'Osservatore Romano to explore the issues at stake in the Gulf stand-off more at length.

''What has happened to the dignity and sovereignty of an independent state a fully-fledged member of the international community?'' asked L'Osservatore.

The newspaper said that concerns over the effect of the crisis on world petroleum markets and share values may have missed the point.

''The tone of the first day, emphasizing a worldwide condemnation of the attack by Iraqi troops on the little emirate, synthesized in an immediate and strong resolution by the U.N. Security Council, has, slowly but surely shifted to the problems of stock exchanges and the increase (in the price) of petroleum.''

''Many display a profund political uncertainty, perhaps seeing on the scales a relationship of forces - military and economic - well before a balance of values,'' said the newspaper of the Holy See.

#90220u1987 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - UAL Corp. directors Wednesday considered whether to extend Thursday's financing deadline for a foundering $4.4 billion, $201-a-share buyout bid by United Airlines employees.

The UAL board convened at 2 p.m., but there was no immediate word on a decision on the deadline extension. Three of five banks that tentatively agreed to take the lead in financing the deal have backed down in recent weeks.

The employee group was able to recruit a replacment for one of the three deserting banks, sources said. But the sources said uncertainty over the effects of the Iraq-Kuwait crisis - and soaring oil prices - on the airline industry left the proposed deal on shaky ground. Experts said it will take more than resolving the Persian Gulf crisis to persuade bankers that the UAL buyout is viable.

Kurt Karmin, chairman of the Chicago-based investment firm Rodman & Renshaw, said the buyout price is too high, even without the problems in the Persian Gulf. "That $200 price is ridiculous. United Airlines isn't worth $200, and certainly not in today's environment." he said. "They're probably going to have to come way down in price - probably to $125 to $150 - to make it work," Karmin said.

United's three employee unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - reached agreement with UAL directors last April on the $4.4 billion, $201-a-share, employee buyout.

Under the agreement, United Employee Acquisition Corp. had until Thursday to obtain commitments or reasonable assurances of financing for the deal, and until Dec. 9 to complete the acquisition.

The union groups agreed to major contract concessions in exchange for ownership stakes in the airline. Non-union workers also recently signed on to the deal, agreeing to concessions for a stake in the company.

Earlier this summer, the UAL board - at the request of United Employee Acquisition Corp. Chairman Gerald Greenwald - delayed granting contracts on a major purchase of widebody aircraft.

Greenwald planned to use that order - expected to be worth $15 billion - as leverage to get suppliers to invest in convertible bonds that would be subordinate to bank financing.

A source in the employee group said Greenwald had been hoping to raise as much as $1 billion by selling the subordinated bonds to UAL suppliers - specifically aircraft and engine builders and aircraft leasing companies that stood to profit from the widebody order. The remainder of the financing was to come from banks.

The employee group last month reached tentative agreements with Bankers Trust Co., Manufacturers Hanover Corp., Chase Manhattan Corp., Chemical Bank and Citicorp. But Citicorp, Chemical Bank and Chase Manhattan backed down in recent weeks.

Citicorp and Chase Manhattan were the lead banks in the attempt to syndicate financing for a $6.75 million, $300-a-share employee-led buyout of UAL that collapsed for lack of financing last October.

Security Pacific Corp., however, joined Bankers Trust and Manufacturers Hanover in backing the new buyout bid and trying to syndicate the remainder of the financing.

"They've (the lead banks) been pitching this to a lot of people, and might even have had a little interest until last week," a Chicago banking source said. "Now nobody even wants to talk about it."

He said the buyout proposal was "only marginally viable a week ago, even to an optimist." "Now with the goings on in the Persian Gulf with Iran and Kuwait, financing something like this is unthinkable," he said.

The buyout plan offered UAL stockholders $155 a share in cash plus $35 a share in senior subordinated notes bearing 16 percent interest and a proportional stake in a new security of Covia Corp., the UAL subsidiary that holds a 50 percent stake in the Apollo computer reservations system.

United's financial advisers have calculated the value of the Covia interest to be worth about $11 a share.

WASHINGTON (AUG. 8) UPI - President Bush said Wednesday he was satisfied that U.S. intelligence agencies knew in advance and offered adequate warning of Iraq's preparations to invade Kuwait.

''I don't feel let down by the intelligence at all,'' Bush said. ''When you plan a blitzkrieg-like attack that is launched at 2 o'clock in the morning, it's pretty hard to stop.''

During a White House news conference, Bush, a former CIA director himself, went to bat for the intelligence community against grumbling from some circles that the swift Iraqi takeover of Kuwait caught the United States by surprise.

Intelligence officials complain that politicians are all too quick to point a finger of blame at ''intelligence failures'' for crises the United States in the best of circumstances might be ill-prepared or even helpless to prevent.

CIA Director William Webster has been a frequent target of criticism, accused of presiding over a bureaucracy that was slow to foresee unrest in Eastern Europe and the Soviet Union and coup attempts in Panama and the Philippines.

When similar doubts surfaced again Wednesday, Bush offered a vote of confidence for the CIA, which took the unusual step last Friday of breaking with a policy of not commenting on such matters to defend its monitoring of events leading up to the invasion.

''We provided policymakers with very useful and timely information on these events and continue to do so,'' a CIA spokesman said at the time. ''There were no surprises.''

Based on satellite reconnaissance photos and reports from diplomats in the region, American intelligence analysts were aware more than two weeks ago that Iraq had massed as many as 30,000 troops along its border with Kuwait.

At the time, however, outright invasion was anything but a foregone conclusion. U.S. officials first believed Iraq's unpredictable leader, Saddam Hussein, was merely up to a bit of intimidation, hoping to extort oil revenues and loan forgiveness from the rich Kuwaiti royal family.

What the CIA had problems determining then as well as now were Saddam's precise intentions. While actions speak for themselves, said one administration official, ''we've just not been able to get inside the guy's head.''

The hard intelligence was there, officials said, even if it did not predict the speed or ease with which Iraqi troops would sweep through Kuwait or what Saddam would do once he had expanded his Persian Gulf power base.

Bush suggested that Saddam's own denials of any hostile intent, which should have been viewed with no small amount of skepticism by U.S. analysts, made it even more difficult to forecast events with any degree of certainty.

Overall, he said, ''the intelligence community deserves certain credit for picking up what was a substantial (military) buildup and then reporting it to us.'' The intelligence community assumes responsibility only for seeing the information gets into the right hands, not for any political or military decisions that may result.

''This information was relayed properly to interested parties,'' Bush said ''but the move was so swift that it was pretty hard to stop it.''

Should the United States have taken a far more aggressive early stand against Saddam even without conclusive evidence that he would send his 100,000 or more troops across the border into Kuwait, stay there and annex it as his own?

The fact of the matter is that the available intelligence was not so much inaccurate as incomplete. Even when the invasion appeared imminent, U.S. officials could not tell whether Saddam would stay just long enough to demand a big payoff from Kuwait for claims against its oil profits or for good.

As White House press secretary Marlin Fitzwater said Wednesday, ''We did the best we could.''

''We think it was the best reading of the situation and attempt to influence events,'' he said. ''And the fact is that Saddam Hussein has acted as an international outlaw in this matter. And you just can't predict those things.''

#90220u2017 08/08/1990 ~United Press International

(AUG. 8) UPI - Bush Administration officials flew to Paris Wednesday to confer with oil-consuming allies on the possible use of petroleum reserves to offset the economic effects of Iraq's invasion of Persian Gulf neighbor Kuwait.

U.S. crude prices rose more than $8 a barrel, or about 40 percent, in the

week since the Aug. 2 Iraqi takeover of Kuwait. The United Nations has placed an embargo on oil shipments from Iraq and Kuwait.

John Easton, the Energy Department's assistant secretary for international affairs and emergencies, led a team of administration officials to attend an emergency meeting of the International Energy Agency on the Mideast crisis set for Thursday.

The Paris-based IEA is made up of most of the world's oil-consuming industrialized nations.

Some IEA nations maintain oil reserves similar to the U.S. Strategic Petroleum Reserve of nearly 600 million barrels of crude oil stored in salt caverns in the southwestern part of the nation.

''We are prepared to use our SPR but would prefer to coordinate its use with our allies,'' said the Energy Department's Penny Adams, speaking for Easton.

''We will draw down the SPR if the severity of the situation warrants it '' she said.

In their meeting Thursday, Easton and representatives of allied nations will discuss the possible use of their reserves and other issues, Adams said.

Before supplies can be taken from the SPR, President Bush must make a presidential determinaton that the severity of the situation warrants its use, the spokeswoman said.

The United States used an average of 16.9 million barrels a day during the first six months of 1990. Of that amount, 8.43 million barrels - representing 49.9 percent of the total - were imports.

The SPR now has stores of 587 million barrels, about a 70-day supply of imported crude.

Congress authorized the U.S. reserve in 1975 after the Arab oil embargo, ordered after the 1973 Arab-Israeli war, led to long lines at U.S. gasoline stations.

Current SPR capacity is 627 million barrels, but when a new storage area in the Big Hill caverns 20 miles southwest of Beaumont, Texas, is ready to accept oil in September 1991, capacity will reach its authorized 750 million barrels.

New Senate legislation calls for increasing the authorized capacity to 1 billion barrels.

The SPR is now being filled at a rate of 39,000 barrels a day, or 14.2 million barrels a year, down from a peak rate of 336,000 barrels a day in 1981. Each barrel equals 42 gallons.

Daily deliveries dropped off from 119,000 barrels in 1985 to 51,000 barrels in 1986, the year an overproduction crisis in the 13-nation Organization of Petroleum Exporting Countries dropped the bottom out of support for world prices.

But as memories of the oil problems of the 1970s faded, Congress became reluctant to authorize money to purchase more oil for the SPR.

As a result, the SPR office has turned to leasing, rather than purchasing, oil as a cheap way of filling the caverns.

The Senate bill would give SPR officials broad powers for leasing crude from foreign suppliers such as Saudi Arabia, Venezuela and Norway, all of which have expressed an interest in this type of deal.

A separate bill passed by the House would require congressional approval of each leasing deal on a case-by-case basis.

The differences between the two bills must still be ironed out by a House-Senate conference committee.

Whether leasing is feasible depends on the amount of latitude the SPR is given in making deals, one U.S. government official said. The idea of leasing oil for the SPR came from Saudi Arabia or the United States - depending on who one talks to.

Last fall, Deputy Energy Secretary W. Henson Moore was quoted as saying Saudi Arabia had proposed a leasing arrangement that would allow the United States to get maximum mileage out of the meager dollars approved by Congress for filling the reserve.

The Saudis, in turn, would be able to make money on crude that would not be counted against the limit imposed on its output by the OPEC cartel.

OPEC quotas are in terms of crude sold to foreign nations. Any oil leased to the SPR would still be owned by the Saudis even though it was located in an underground U.S. cavern.

But, perhaps embarassed by this proposed end-run around OPEC quotas, Hisham Nazer, the Saudi oil minister, in March said: ''The leasing idea came from the United States. We do not yet know for sure what it is they want to do.''

#90220u2034 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - Thirty-nine Americans held by Iraq since the invasion of Kuwait remained confined to a Baghdad hotel Wednesday, permitted to ''use the swimming pool,'' but prevented by armed guards from leaving, U.S. officials said.

U.S. officials have refused to say that the detained Americans, including a 10-year-old girl from California, are held as hostages, describing them instead as being ''sequestered'' by Iraqi soldiers at the Hotel Rashid.

The Americans have not been threatened and are free to move about the hotel, State Department officials said.

President Bush said Wednesday he was ''encouraged'' by reports that other Americans in Kuwait and Iraq were free to leave, and he refused to speculate about whether Iraqi President Saddam Hussein might try to use U.S. citizens as pawns in the Persian Gulf crisis.

The 39 Americans include 11 oil field workers taken into Iraqi custody at

the outset of last Thursday's invasion, 25 Americans who were among 155 foreigners rounded up from three hotels in Kuwait City days later, and three others who already were in the Baghdad area, State Department officials said.

The United States has demanded the Iraqi government let the Americans leave, but the response has ''not been satisfactory,'' State Department spokesman Richard Boucher said.

A U.S. diplomat has been in contact with the Americans at the hotel in downtown Baghdad, and all appeared to be safe and unharmed, a senior U.S. official said.

''There are armed guards located at the hotel, but the Americans have not been threatened,'' Boucher said.

''They can use the swimming pool, but they can't leave the hotel,'' one official said.

Among the 39 Americans at the Hotel Rashid is 10-year-old Penelope Nabokov Albany, Calif. Her father, Peter, a professor at the University of California at Berkeley, said Wednesday the State Department first notified him of his daughter's whereabouts on Tuesday.

''She was pronounced in good spirits, spunky, and well-groomed,'' the anthropology professor told reporters at a news conference in suburban Oakland, Calif.

Penelope was on a flight from London to India when the plane, a British Airways jetliner, became stranded in Kuwait during a stopover in the emirate while the Iraqi invasion was underway.

The State Department declined to identify any of the Americans held in Baghdad, but confirmed that a 10-year-old California girl was among them.

The State Department has warned the Iraqi ambassador, Mohamed al-Mashat, that the United States holds the government of Iraq responsible for the safety of the Americans.

On Saturday, al-Mashat had said the 11 American oilfield workers were ''free to leave.''

About 350 Americans reside in Iraq, according to State Department officials, but there were no signs that they were being detained or prevented from leaving.

In addition, more than 3,000 Americans were in Kuwait at the time of the invasion and many are reported to have crossed by land into Jordan.

A State Department consular task force has fielded 11,000 telephone calls from relatives of the Americans believed to still be in Iraq and Kuwait.

At a White House news conference Wednesday, President Bush responded to a question about the potential for hostage-taking by saying: ''I've been encouraged that there ... have been announcements, I believe, saying people were free to leave. So I'm not going to speculate ... beyond that. I want to see them (Americans) out of there, obviously. But what he (Saddam) does, that's a bit unpredictable.''

Bush added, ''I'm not going to heighten tensions in this regard by responding to hypothetical questions.''

NEW YORK (AUG. 8) UPI - The dollar was mixed in New York trading Wednesday as market participants remained nervous but took some reassurance from

President Bush's declaration he would not launch an offensive against Iraq.

The dollar moved up and then retraced on Bush's speech to the nation, traders said. "It was almost (a situation of) 'buy on the rumor, sell on the speech,'" said David Wilson, a Girozentrale Vienna currency vice president.

Bush's declaration "basically keeps the tensions somewhat lower key for the time being," thus moderating buying of the dollar by investors in search of a safe haven, Wilson said. But the risk of Iraqi attack remained.

Lisa Finstrom, a Shearson Lehman Hutton analyst, agreed Bush "helped to calm the nerves a little bit." But doubt about Iraqi President Saddam Hussein's next move "leaves the dollar ready to bounce," she said.

In late New York trading, the dollar was quoted at 1.5925 German marks, ahead from 1.5865 late Tuesday but had lost ground against the Japanese yen, at 149.85 yen compared with 150.90.

Finstrom said the day's decline in oil prices helped the dollar, because oil price surges make a U.S. recession more likely. But she noted an underlying bearish sentiment on the unit, given U.S. economic woes.

Trader Stephen Burnett of the Bank fur Gemeinwirtschaft concurred. "More than likely we will see the dollar gain strength as confrontations develop" in the Mideast, he said. "But economic considerations will prevail."

Wilson described a seasonally thin market of mostly routine trade-related and corporate transactions. "The speculators, to an extent, are sitting on the sidelines ... and looking for opportunities," he said.

Most dealers saw a reduction of the dollar's attractiveness as a safe haven for investors in political crises, pointing to dim U.S. economic prospects and heightened competition in world financial markets. The dollar "is losing that glamour," Burnett said. "People are more concerned about the return on their money."

Other New York dollar rates: 1.3385 Swiss francs, up slightly from 1.3380; 5.3380 French francs, up from 5.3180; and 1,165.00 Italian lire, also ahead from 1,160 late Tuesday. The British pound moved down slightly to $1.8700 from $1.8710.

In Europe, the dollar strengthened in cautious trading against the European currencies as the U.S. deployment of troops in Saudi Arabia brought a measure of stability to currency markets and lifted the U.S. unit.

Dealers were wary of buying or selling but maintained their dollar positions in safe-haven strategies amid the military buildup. "The market is very nervous, bearish, looking for direction," a London dealer said. "No one wants to be short of dollars in case of an attack in the Middle East, so it is the safe-haven currency to some extent."

The dollar rose in both Frankfurt, to 1.5940 marks against 1.5790 Tuesday, and Zurich, to 1.3435 Swiss francs from 1.3315. In London, the pound sterling fell to end at $1.8675 against $1.88.

The U.S. unit advanced in Paris, Brussels and Milan, to, respectively, 5.3480 French francs compared with 5.2865, 32.775 Belgian francs against 32.45 and 1,165.25 lire against 1,154.

Earlier in Tokyo, the dollar fell against the yen as stabilizing oil prices eased fears of how a war over oil would affect Japan's economy, closing at 150.0 yen vs. Tuesday's 150.60.

Gold eased in Zurich, closing at $383.10 an ounce vs. $383.50 Tuesday, and in London, at $382.25 an ounce vs. $383.

Republic National Bank in New York closed cash gold at $383.25 an ounce, off from $384.50. The New York Commodity Exchange settled gold at $383.20 an ounce, down from $384.50.

Silver slipped in Zurich, to $4.87 an ounce from $4.95, and in London, to $4.87 an ounce against $4.89.

Republic closed cash silver at $4.865 an ounce, off from $4.89. Comex silver also declined, to $4.843 an ounce from $4.857.

RANGOON, Burma (AUG. 8) UPI - Security forces shot and killed four Buddhist monks and students in the central Burmese city of Mandalay Wednesday on the second anniversary of massive pro-democracy demonstrations, diplomats said Wednesday.

The capital Rangoon, however, remained quiet and the leading political party, which is demanding the military turn over power to the newly elected legislature, urged its followers to avoid actions that might lead to bloodshed.

A Rangoon-based diplomat contacted from Bangkok said the shooting took

place after Buddhist monks and dissident students staged an early morning procession in Mandalay, 300 miles north of Rangoon.

Two monks and two students were reported killed and two other people were injured in the shooting which broke out when a security captain was struck on the head by a rock, said the diplomat, who asked not to be identified.

No Burmese government officials could immediately be contacted to comment on the account.

The situation has been tense in Burma between the military and National League for Democracy (NLD), which swept general elections in May but has not yet been allowed to form a government.

All schools in Mandalay, Burma's second-largest city, have been closed and army troops have moved to secure the center of the town, the diplomat said.

He quoted witnesses as saying a large procession of Buddhist monks with begging bowls began moving through the city streets at 6 a.m., apparently commemorating the 1988 democracy demonstrations which were crushed by the army.

The monks were joined by anti-government students, including members of the NLD youth wing, he said.

When a security official tried to arrest a student raising a flag, a scuffle broke out that led to the rock-throwing and the shooting, he said.

In Rangoon, an NLD party spokesman said party headquarters was not observing the anniversary and had sent out a circular to all party branch offices in the country telling them to commemmorate the occasion only if conditions permit.

In a statement issued on the occasion, the NLD pledged to ''vindicate the sacrifices made by the heroes'' of the 1988 demonstrations by carrying on the struggle for democracy.

''But in this continuing struggle, we have resolved not to allow a repetition of that kind of situation which would entail spilling of the people's blood,'' the statement said.

Government offices and schools remained open in the capital as army troops on trucks patrolled the city.

Fewer people than normal were on the streets, possibly because of rumors of earlier violence in Mandalay.

Rangoon radio Tuesday night took the unusual stept of admitting there were

demonstrations, but denied that several demonstrators were killed in the demonstrations.

''The rumors that are quite different from the truth are purposely being spread by those unscrupulous people who want to take advantage of thesituation, to disrupt peace and tranquillity,'' the radio said.

Last week the military government announced it would not give up power to the legislature elected on May 27. It said the only function of the elected representatives was to draft a new constitution acceptable to the military and the people.

The NLD, which swept 80 percent of the seats in the election, has rejected the military announcement.

BOSTON (AUG. 8) UPI - Polaroid Corp., resisting the rising tide of layoffs in Massachusetts, plans to build a plant that could employ up to 450 workers next to its factory in New Bedford, United Press International has learned.

The estimated $13.75 million plant would have about 100 workers when it opens with a single shift, said James Oliveira, director of economic development for the city. But the company, based in Cambridge, Mass., ''absolutely'' intends to go to three shifts eventually, he said.

Polaroid said Wednesday it ''is going to be building a major manufacturing facility in Massachusetts'' but declined to give details until an official announcement scheduled for Thursday.

However, New Bedford zoning officials have already approved the company's request for a 275,000-square-foot addition to make ''coated imaging web'' on a site next to a factory that makes coated negatives for the company's instant film. In its appeal for a zoning variance, the company said it planned to employ about 450 people.

An analyst, B. Alex Henderson, who follows Polaroid for Prudential-Bache Securities, said the new plant may be used to make a digital imaging film

for X-ray photography that the company has promised to introduce by next year.

The film, to be part of the company's forthcoming Helios line of medical printers and films, is based on a new technology that Polaroid has developed, Henderson said.

The new film uses a heat sensitivity process instead of the standard silver halide used in most photography.

Henderson said the new film is ''a very exciting product. We think it can be a $100 million product within one to two years. It should be a major hit for them.''

If he is wrong about the heat-sensitive film, the analyst said, the New Bedford plant may be designed for the company's new Hybrid 4 film to be introduced next year as a replacement for its Spectra instant film.

#90220u2136 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - Jurors in the drug and perjury trial of Mayor Marion Barry asked Wednesday to see the videotape of the Jan. 18 sting operation on which Barry is seen taking two long puffs from a crack cocaine pipe.

Although jurors, who deliberated for a sixth day Wednesday without reaching a verdict on all counts, already had access to an exhaustive manuscript of the 83-minute FBI surveillance tape, U.S. District Judge Thomas Penfield Jackson granted them the right to review the actual tape.

The tape shows Barry and Rasheeda Moore - a top government witness who lured Barry to the Vista International Hotel - lounging around the hotel room and talking for more than an hour before Barry smokes from the crack pipe and is arrested by FBI agents and police who stormed the room.

Jurors viewed the tape or portions of it numerous times throughout Barry's trial on 14 cocaine and perjury charges, which is in its 10th week.

The tape forms the basis of Count 14, a misdemeanor charge of cocaine possession.

Prosecutors contend it proves Barry was predisposed to use illegal drugs.

But defense lawyer R. Kenneth Mundy claimed it shows Barry was entrapped, rejecting drugs a number of times before being coerced into using them by Moore, a former model with whom Barry carried on a two-year romantic relationship.

Moore had testified she used cocaine with Barry more than 100 times over a two-year period.

The panel of nine women and three men has deliberated more than 30 hours over six days while apparently reaching a verdict on only one of the 14 counts.

The jury informed Judge Jackson on Tuesday it had reached a verdict on Count 12, one of 10 misdemeanor cocaine possession counts, but did not announce whether it found Barry guilty or innocent of that charge.

In addition to the possession charges, Barry faces three felony counts of perjury and a single misdemeanor count of conspiracy to possess cocaine. He could be sentenced to 26 years in prison and fined $1.85 million if convicted of all counts.

WASHINGTON (AUG. 8) UPI - The Federal Reserve Board said Wednesday it approved the applications of C&S/Sovran Corp., and Sovran Financial Corp., to act as an agent in the private placement of securities.

A private placement is the sale of an entire issue of securities to a small group of investors.

The activity will be conducted through a subsidiary, Sovran Investment Corp., of Richmond, Va., and also include related advisory services and the buying and selling of all types of securities.

C&S/Sovran, of Norfolk, Va., has consolidated assets of $48.8 billion and is the 12th largest banking organization in the nation, operating 15 subsidiary banks and three trust companies.

#90220u2235 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - The chairman of the Senate Energy and Natural Resources Committee, citing the Middle East crisis, asked President Bush Wednesday to reverse his decision limiting offshore oil and gas development.

Sen. Bennett Johnston, D-La., sent a letter to the president asking Bush to ''revisit'' his decision imposing a moratorium ''on oil and gas leasing

and development on large areas of the Outer Continental Shelf.''

Johnston wrote, ''Given the crisis in the Middle East and at a time when nearly 50 percent of the oil we consume is imported, I question the wisdom of banning the development of these substantial domestic resources.''

Johnston's letter echoed recent remarks by oil industry officials and their political allies calling for a new assessment of the need for domestic offshore drilling in light of Iraq's invasion of Kuwait.

On June 26, Bush sharply limited drilling off the coasts of California, Washington, Oregon, Florida and New England, saying additional studies were needed on the potential environmental effects of drilling.

But Johnston noted that the president, in making his decision, reserved the right to change his mind if national security was endangered by oil supply disruptions.

''I believe the embargo on Iraqi and Kuwaiti oil and unfolding events in the Middle East warrant reconsideration of your previous decision in view of national security concerns,'' the senator said.

The White House had no immediate comment on Johnston's letter.

Johnston noted, ''Nearly one-quarter of U.S. estimated oil reserves and well over one-quarter of U.S. estimated gas reserves are located on the Outer Continental Shelf.''

In recent congressional testimony, American Petroleum Institute President Charles DiBona said that ''more of the Outer Continental Shelf should be made available (for drilling), especially areas which already have been leased.''

DiBona and other drilling advocates, including a handful of elected officials, have long argued that instability in the Middle East was a compelling reason to explore offshore drilling at home.

A vice president of the American Petroleum Institute, William O'Keefe, said, ''In California, at Point Arguello off Santa Barbara, Chevron and several other companies are ready to produce 80,000 barrels of oil a day. That's about one-seventh of the 600,000 barrels we've been getting from Iraq and Kuwait.''

Environmentalists maintain offshore oil reserves are not substantial enough to make a significant improvement in the nation's energy security or justify damage to environmentally sensitive coastal areas.

''The people from the oil industry are probably salivating at the prospect

of a Middle East crisis allowing them to pursue drilling in sensitive areas,'' said Michael Paparian, California director of the Sierra Club.

#90220u2243 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - Gen. Colin Powell said Wednesday reports Iraq has distributed chemical weapons to its forces are ''ambiguous'' but the threat is being taken seriously and U.S. troops in Saudi Arabia are prepared for gas attacks.

Analysts said Iraqi leader Saddam Hussein, who has used chemical weapons on Iran as well as upon his own people, may think twice about using them against Saudi Arabia or U.S. forces because of the massive retaliation that could provoke.

Powell, chairman of the Joint Chiefs of Staff, would not say if the U.S. air, sea and land forces going to the region are equipped to retaliate with chemical weapons to an Iraqi attack.

Published reports Wednesday said Iraqi military forces appeared to have been loading gas weapons on aircraft.

''The Iraqi armed forces do have chemical weapons, artillery delivered as well as other means (missiles and bombs),'' Powell told reporters at the Pentagon. ''It's a threat we're concerned with. I treat it as a capability that is there to be used.''

''I don't want to heighten any concern with respect to that because the intelligence is somewhat ambiguous,'' he added. ''It is a capability they have demonstrated in the past they will use. We understand that and are preparing our forces accordingly.''

And at his press conference, President Bush said use of chemical weapons ''would be intolerable and it would be dealt with very. very seriously. So I hope there would be no use of chemical weapons.''

U.S. forces train in gas masks and rubber suits that cover a soldier from head to toe. In addition, many aircraft and tanks can be ''buttoned up,'' sealed to keep outside contaminants from affecting the crews.

But because of the high temperatures - anywhere from 100 degrees to 120 degrees - troops on the ground in the Arabian desert can become quickly dehydrated, and communciation is difficult in the suits and masks. Analysts say that while unable to launch offensive assaults in the protective gear, troops can mount a credible defense in the equipment.

Powell said that in addition to taking protective gear, the U.S. forces President Bush ordered to the region are equipped with medicines to combat Iraq's nerve gases and mustard gas blistering agent.

Nerve agents, actually odorless and colorless liquids, attack and disrupt the nervous system, causing vomiting, loss of bladder and bowel control, headaches, blindness, convulsions, coma and death.

Brad Roberts, a scholar at the Center for Strategic and International Studies in Washington, said that if Saddam used chemical weapons, the United States would likely not retaliate in kind, but rather by bombing Iraq's chemical factories and military facilities - and perhaps even by taking aim at Saddam himself.

Seth Carus, a fellow at the Naval War College Foundation and author of a number of papers on chemical weapons, said Iraq has the world's largest active chemical weapons production operation.

He noted that during the Iran-Iraq war, Saddam delegated authority to employ chemical weapons to the divisional commanders, well down in the chain of command, suggesting that they are viewed as routine, not extraordinary, weapons.

While Iran could not retaliate, Carus noted the United States could strike

back both in kind and with massive conventional air attacks. And, he said, the military power of the United States carries with it the implied threat of nuclear weapons and Saddam ''has to think about it.''

The United Nations said Iraq used chemical weapons - primarily mustard gas and perhaps the nerve gas Tabun - during its eight-war war against Iran. Many of the casualties were civilians. The last attack, on an Iranian border village, occurred in 1988 after Iran agreed to a cease-fire.

Iraq ratified the 1925 Geneva Protocol outlawing use of chemical weapons but reserved the right to respond to first use by an enemy. Iraqi officials admitted to using chemical weapons but claimed that Iran did so first. Iranian use was never confirmed.

The CIA said Iraq also used chemical weapons against its own people, attacking the ethnic Kurdish minority.

#90220u2262 08/08/1990 ~United Press International

(AUG. 8) UPI - Crude oil prices tumbled nearly $4 a barrel on world markets Wednesday after reports that Saudi Arabia would pump an extra 2 million barrels a day to help make up for oil output lost in the embargo of Iraq and Kuwait.

''Prices are moving down on the reports late Tuesday that Saudi Arabia is willing to raise its production,'' said Tom Bentz, director of trading for United Energy Inc. in New York. ''If there's a war, the whole market will take off. Meanwhile, it looks like things are easing.''

''Traders feel that the Saudi move eases some of the output tension,'' agreed Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York.

On the European cash markets, Dubai light, the key Mideast crude produced by the Organization of Petroleum Exporting Countries that is shipped mainly to the Far East, was quoted at $21.80 a barrel, down $3.95 on the day.

Britain's widely traded North Sea Brent crude dove $3.65 to $24.75 a barrel.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for September delivery fell $2.35 to $25.96 a barrel.

Unleaded gasoline for September delivery nosedived 6.18 cents on the Merc to 76.21 cents a gallon, while September heating oil dropped 5.01 cents to 70.13 cents a gallon.

On the U.S. Gulf Coast cash market, prompt delivery WTI plunged $3.80 to $25.95 a barrel.

Sun Co., of Radnor, Pa., dropped the posted price it will pay for crude at the wellhead by 75 cents to $2, while Marathon Oil Co., the Findlay, Ohio, subsidiary of USX Corp., and Conoco Inc., Du Pont's Houston-based subsidiary, cut their posted price by $1.75 across the board. The changes brought the WTI posted price of all three companies to $24.75 a barrel.

Merc WTI prices had risen $8 a barrel, or 40 percent, in the week following the Aug. 2 invasion of Kuwait ordered by Iraqi leader Saddam Hussein, who has positioned his forces for a possible attack on Saudi Arabia.

Unconfirmed reports of the Saudi increase came late Tuesday after the oil markets had closed.

Venezuela also was reported to be ready to raise its output by 500,000 barrels a day.

Saudi Arabia's embassy in Washington would neither confirm nor deny reports the kingdom had agreed to increase its output. A knowledgeable source in the U.S. oil industry also said his company had not yet been able to confirm the increase.

Saudi Arabia, the OPEC cartel's largest producer, has been pumping about 5.5 million barrels daily and has the capability to produce several million more.

Iraq had been pumping more than 3.1 million barrels a day and Kuwait was producing 1.5-2.0 million barrels a day prior to the invasion, after which the United Nations ordered an embargo of oil shipments from the two nations.

But Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York, said he had independently confirmed that the Saudis tentatively agreed to raise output by 2 million barrels.

Barakat said his understanding was that Saudi Arabia and other members of the 13-nation OPEC cartel would raise production in exchange for the United States using oil stored in its Strategic Petroleum Reserve to drive down prices.

''I think the deal has been struck that the United States will open the SPR,'' Barakat said.

#90220u2269 08/08/1990 ~United Press International
LOS ANGELES (AUG. 8) UPI - Pacific Enterprises, the parent of Southern California Gas Co. and the Thrifty drugstore chain, announced Wednesday a major second-quarter loss of $229 million, stemming from $275 million of charges to its oil and gas and retailing businesses.

The holding company also said that the management of Thrifty Corp., which operates 1,070 drug and sporting goods stores, has been shaken up, with President and Chief Executive Officer Richard Eils resigning. Eils was replaced by Executive Vice President Daniel Siegel, while Leonard Straus continues as chairman.

''Although these charges reduce income now, they should help to position our companies for future earnings growth,'' said James Ukropina, chairman of Pacific Enterprises.

''At the same time, the solid performance of our utility and our continued strong consolidated cash flow readily accomodate our dividend policy,'' he said.

The company earned $50 million, or 78 cents a share, in the year-ago quarter. Second-quarter revenues for Pacific Enterprises were $1.6 billion up from $1.54 billion for the year-ago quarter.

The charges against included a $175 million non-cash writedown by Pacific Enterprises Oil Co. and a $100 million charge by Thrifty Corp. Both segments represent areas in which the parent company has diversified its business, largely through $1.6 billion in acquisitions between 1985 and 1989.

The company said it was forced to write down its oil and gas properties to reflect low energy prices as of June 30. Analyst Joseph Culp of First Manhattan said that those charges were not unexpected, as company executives have been indicating for some time that the company would have to make such a move.

''By writing down properties that are likely to increase in value, it will probably help their earnings in the long term,'' Culp said.

Second-quarter operating income before the writedown was $16 million, off from $20 million for the year-ago quarter. The 1990 quarter included an $11 million aftertax benefit from reduced depletion expense stemming from the writedown.

Ukropina said the unit is making a number of moves to increase efficiency.

The retailing business posted operating income of $2 million for the

quarter prior to the charge, off from $11 million for the year-ago quarter. Sales were up 6 percent to $671 million.

Ukropina said disappointing earnings will persist for the rest of the year.

Second-quarter operating income for utility operations was $58 million, up from $54 million for the year-ago quarter.

The company also posted a first-half loss of $169 million, vs. year-earlier earnings of $115 million, or $1.80 a share, for the year-ago period. Six-month revenues were $3.51 billion, up from $3.4 billion.

#90220u2284 08/08/1990 ~United Press International

(AUG. 8) UPI - The U.S. decision to send troops to protect Saudi Arabia, the free world's largest oil supplier, underscores how vital Persian Gulf oil is to the economic health of the industrialized nations.

With an international embargo removing 4.5 million barrels of oil produced by Iraq and Kuwait from the world market, only Saudi Arabia can make up much of the shortfall through its additional capacity, experts said.

Saudi Arabia, OPEC's largest producer, currently is pumping 5.1 million barrels a day. The kingdom and its Gulf neighbors - Kuwait, Iraq, Iran, Qatar, the United Arab Emirates and Oman - together produce about 30 percent of the free world's oil needs.

''If we don't get the full cooperation from all countries that have spare capacity, there would be a steady decline in (current excess) inventories and in a period of two to four months, supply dislocations would show up ''said Larry Goldstein at Petroleum Industry Research Foundation. ''The longer that is allowed to exist the deeper the impact would be on industrialized countries.''

But he said there now is a higher probablity that Saudi Arabia and other producers will make up the shortfall of oil from Iraq and Kuwait.

If Iraq knocked out Saudi Arabia's oil production, the consequences to the Western economies would be unimaginable, other specialists said.

''Persian Gulf oil has an incredible influence on the world economy and in the worst-case scenario, it would be absolutely horrible,'' said John Redpath at Energy Security Analysis Inc. in Washington.

Persian Gulf producers pumped about 16 million barrels of oil a day in 1989, or 37 percent of the free world's production of 44 millon million barrels a day, according to the American Petroleum Institute in Washington. The communist countries added another 16 million barrels a day in 1989, of which the Soviet Union's output was 11.4 million barrels a day making Russia the world's largest producer.

Saudi Arabia's current production accounts for 11.5 percent of the free world's production, or about 9 percent of non-communist oil demand..

The Middle East has proven reserves of 660 billion barrels, or 72 percent of the free world's reserves. Saudi Arabia alone has proven reserves of 255 billion barrels.

''Those oil supplies form a large part of the energy in the free world,'' said API economist Ed Murphy. ''In the United States 42 percent of our energy comes from petroleum.''

The United States currently is importing about 8.4 million barrels of oil a day to supplement its own production of about 7 million barrels a day. The United States is the world's second-largest producer after the Soviet Union.

Saudi Arabia, which supplies 1.3 million barrels a day, is the principal source of U.S. imports. Fellow OPEC member Venezuela supplies 980,000 barrels a day, OPEC member Nigeria 923,000 barrels, independent Canada 900,000 barrels and non-OPEC Mexico 698,000 barrels a day.

Europe consumes 12.6 million barrels a day, of which 4.7 million barrels come from its own sources. The Pacific Rim region, where Japan is the principal oil consumer, uses 5.8 million barrels a day, most of it imported.

''If we lost the Saudi production, along with that of Iraq and Kuwait, that would be larger than any energy crisis we have ever faced,'' Murphy said.

Chairman George Mitchell of Mitchell Energy & Development Corp. near Houston said it would be virtually imposible to make up some 40 percent of the free world's production that would result if the Saudi output also were lost.

#90220u2301 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - First Dog Millie, despite initial hopes for a quick recovery, still is suffering from acute lead exposure caused by a solvent used to strip paint from the White House, a spokesman said Wednesday.

White House press secretary Marlin Fitzwater, reporting new word on the condition of the 4 1/2-year-old English springer spaniel, said first lady Barbara Bush is ''very concerned'' about the dog.

''She's still sick,'' Fitzwater said. ''Her recovery is not going well.''

President Bush first disclosed the dog's illness last week, calling it a

''terrible'' situation related to lead poisoning.

Fitzwater then reported that blood tests had showed Millie was suffering from acute lead exposure, which veterinarians felt she picked up from walking through the paint thinner and then licking it from her paws.

Millie, a lively dog whose continued lethargy triggered alarms in the first family, has been with the first lady at the Bush's summer compound in Kennebunkport, Maine.

Mrs. Bush was scheduled to return to Washington Thursday before heading back on Friday with the president.

#90220u2307 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - The Securities and Exchange Commission alleged Wednesday that a pair of investors violated federal securities laws in their bid to buy the DeLaurentis Entertainment Group, a Beverly Hills, Calif., film maker that declared bankruptcy in 1988.

Anthony Serivola of Jacksonville, Fla., and Paul Landerman, of Rigby, Idaho, have been charged with violating the anti-fraud provisions of securities laws in a complaint filed by the SEC August 7 in a federal court in Washington state.

The SEC has alleged that the two men, who served as executives at the time for a Bellevue, Wash., company called Excoa Oil and Gas Inc., never had the funds needed to back their offer to buy DEG in 1988.

In addition, the SEC said in a statement that the two men ordered about 135,000 shares of DEG stock through a pair of brokerages, Morgan Stanley and Dain Bosworth Inc. ''without having the ability and intent to pay for the stock.''

The SEC said the two men had hoped that the stock's price would rise above the order price so they could sell it, pay the balance due, and pocket the difference, a practice known as free riding.

The primary charge, however, relates to the defendants' offer to buy the entire company.

Serivola, who also goes by the name Anthony Steele, allegedly sent a letter to DeLaurentis chief executive officer Stephen Greenwald in June 1988 offering to buy 10 million DEG shares for $1 a share.

Simultaneously, Serivola and Landerman issued a June 10 press release stating that they planned to buy a controling interest in DEG.

DEG, which was having financial difficulties at the time, agreed to consider the offer.

But Robert Goldsmith, a general counsel for DEG at the time, said ''we tried to do a due diligence to find out what they were all about, and we couldn't satisfy ourselves of their bona fides.''

DEG broke off contact after only two weeks, and issued a press release stating that it had determined the Excoa offer was not in the best interest of shareholders.

Goldsmith said that Serivola then sent a letter to DEG stating he would continue attempts to purchase a controling interest in the company.

Noting that filmmaker Dino DeLaurentis held 61 percent of DEG stock at that point, Goldsmith said Serivola and Landerman could have ''accumulate(d) stock until (they) were blue in the face and never taken control of the company.''

In any event, DEG did not last much longer. The company filed a voluntary petition for bankruptcy in August, 1988, and was purchased last May by Carolco Pictures Inc., of Los Angeles, for about $20 million in cash and $6 million in Carolco stock.

While in business, DEG made about 20 motion pictures, including ''King Kong Lives'' - a sequel to the DeLaurentis remake of King Kong - ''Date with an Angel,'' ''Hiding Out,'' and ''Million Dollar Mystery''.

#90220u2336 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - A man filed a $1 million federal suit Wednesday against the company that manufacturers the antidepressant drug Prozac, charging the drug led him to attempt suicide.

Ralph Langer, of Lake County, described as in his early 50s, filed suit in U.S. District Court in Chicago against Eli Lilly and Co. and its subsidiary, Dista Products.

The suit was the second filed in as many days against the drug, which both plaintiffs charged made them suicidal.

Suits seeking $300 million in damages also have been filed in New York and Kentucky by people claiming they were either driven to suicide attempts by the drug, or were related to victims slain by a man who had taken the drug.

''What we're saying is that what happened is that after being changed to a

regimen of Prozac he (Langer) began exhibiting suicidal tendencies,'' said Aron D. Robinson, Langer's attorney. ''After he was removed from the drug he returned to a peaceable state of mind.

''We are alleging Prozac led to suicidal tendencies.''

Robinson said Langer, who is seeking compensatory and punitive damages, has been under treatment for depression since 1985. He began taking Prozac in August or September 1988 and remained on the drug until he attempted suicide in November 1988.

Robinson said prior to the suicide attempt, Langer never had been hospitalized for depression.

The suit charges Lilly failed to provide accurate warnings to consumers and doctors over Prozac's ability to increase or create aggression and hostility toward oneself and others.

Tuesday an Indianapolis woman sued Lilly for what she said was the company's carelessness and negligence in selling the drug.

''They knew or should have known that Prozac was a substance known to produce ill effects upon certain users,'' said the claim by Janet Sims, who is involved in a national campaign to counsel Prozac users.

Sims, who seeks unspecified damages in her lawsuit, filed suit in Marion Superior Court.

Lilly spokesman Edward West said the company does not comment on pending litigation. He said, however, that Lilly had tested Prozac on 12,000 people since the mid-1970s and since it came on the market nearly three years ago the drug has been prescribed to more than 2 million people.

#90220u2347 08/08/1990 ~United Press International

(AUG. 8) UPI - Parents of one of three defendants on trial for the rape and beating of a jogger in New York's Central Park stormed out of the courtroom today. The parents of Antron McCray walked out with 10 supporters during a prosecutor's summation. They sang spiritual songs outside court. The angry justice banned the group from returning. The furor arose as a prosecutor asked the jury to imagine the ''frenzy'' of the teens during last year's attack.

Three teen-agers wounded in Brooklyn, New York, last night are listed in stable condition. They were shot when gunfire abruptly ended a neighborhood celebration of a ''National Night Out'' against crime. Police later arrested a 16-year-old youth who allegedly fired a shotgun into the

crowd.

Baseball great Pete Rose arrived at a federal prison in Marion, Illinois, today to begin a five-month sentence for tax evasion. Warden John Clark said Rose would be assigned an eight-hour-a-day job in the prison work camp. The warden emphasized every effort will be made to protect Rose's privacy.

-30- 1209

#90220u2349 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - The United States and Mexico agreed Wednesday to move ahead on a free trade agreement that would open the border to more trade and investment and Mexico also said it would sell more oil north of the border.

But U.S. Special Trade Representative Carla Hills, who is lead negotiator for the United States, said that the agreement, when it is concluded, ''would not include matters that are in the category of immigration.''

In public statements, the Mexican government has said it would insist that the free trade agreement, or FTA, include free migration.

The two countries, in an unusual reference to the Middle East, both condemned Iraq's invasion of Kuwait and urged an immediate withdrawal of Iraqi troops.

The head of the Mexican delegation, Foreign Secretary Fernando Solana Morales, said Mexico would agree ''for a couple of months'' to increase its oil exports to the United States by about 100,000 barrels per day, in response to the U.S. request to make up for oil supplies that will be lost by economic sanctions against Iraq.

Treasury Secretary Nicholas Brady expressed appreciation for the offer.

Both sides, in a news conference at the end of a one-day meeting of their Binational Commission, glossed over differences arising from the alleged seizure by U.S. Drug Enforcement Administration officers of a Mexican doctor accused of involvement in the torture killing of a DEA agent.

Attorney General Dick Thornburgh said the level of cooperation between the two countries in narcotics matters is the highest in history.

President Bush told the commission he will formally notify Congress in September the United States and Mexico intend to negotiate a free trade agreement, his spokesman said.

White House press secretary Marlin Fitzwater, announcing the step that

will officially set the process in motion, said Bush made the pledge contingent on agreement from Mexican President Carlos Salinas de Gortari, who has been actively seeking such a pact in his drive to restructure the Mexican economy.

The agreement in principle to move ahead on the FTA appeared to remove any obstacles to beginning the negotiations. Similar negotiations with Canada lasted for five years and the two-year-old U.S.-Canadian trade agreement remains a controversial political issue in Canada.

A formal free-trade agreement between Mexico and the United States, which had more than $52 billion in two-way trade last year, would cover tariffs and other import barriers, access to investment, trade in goods and services, and the protection of copyrights, patents and trademarks.

The United States and Mexico have taken a series of trade expansion steps since 1986, when Mexico embarked on the road to economic reform and joined the General Agreement on Tariffs and Trade, the world trade organization.

Mexico, concerned with the issue of sovereignty, has rejected the idea of a North American common market, but has made clear its enthusiasm for a bilateral free trade agreement with the United States.

Salinas and Bush issued a joint statement in June agreeing to begin negotiations on such an agreement after the conclusion in December of the so-called Uruguay Round of trade liberalization talks by members of GATT.

Sensitive areas that the United States would include in discussions are steel, agriculture and textiles, a U.S. official said.

Mexico's average import tariff for U.S. imports was unilaterally reduced last year to around 10 percent, although under GATT accords, Mexico is bound to maximum 50 percent tariff and can return to that level at any time.

Mexico, the United States' third largest trading partner, does not enjoy the lowest tariffs in the United States and its products are subject to about a 6 percent tariff.

The two sides also exchanged diplomatic notes, agreeing to cooperate on a sewage treatment facility in Tijuana, Mexico. Untreated sewage from Tijuana, with a population over 1 million, now flows into the Pacific Ocean and the Tijuana River, contaminating beaches in both countries.

The agreement establishes a bilateral commitment for the construction of an international sewage treatment plant to treat and dispose of 25 million gallons per day of sewage from Tijuana.

ST. LOUIS (AUG. 8) UPI - Anheuser Busch Inc. said Wednesday it recorded the best July sales performance in the company's 138-year history, registering an 8 percent increase in sales of Budweiser and growth in sales of Bud Light and Bud Dry.

The brewer said companywide sales rose 15.6 percent from July 1989.

''Our strategy for the Budweiser brand is working,'' said President Patrick T. Stokes. ''The trends for the brand are positive and, with the continuing growth of Bud Light and Bud Dry Draft, we have a competitive triple threat going into the 1990s.''

Anheuser Busch said Bud Light sales increased 14.9 percent in July compared with last year. Bud Dry Draft, introduced nationally in April, sold more than 1.5 million barrels through July.

''The strong performance of Budweiser in July is important,'' Stokes said, ''because it brings the brand to a year-to-date position which is equal to its 1989 performance. We've held Budweiser sales steady despite a strong increase from Bud Light and the successful introduction of Bud Dry.''

The company said it had met competitors' discounted prices, which ''returned Budweiser to a level playing field, where it clearly can compete very effectively.''

The three Budweiser brands represent approximately one-third of all beer sales in the United States, Anheuser Busch said.

#90220u2480 08/08/1990 ~United Press International
(AUG. 8) UPI - Defense officials say the first U-S combat planes have landed in Saudi Arabia. Sources say 48 F-15 jet fighters from Langley, Virginia, .. and about 23-hundred paratroopers from Fort Bragg, North Carolina... are in the first wave of U-S forces. Joint Chiefs of Staff Chairman Colin Powell says Iraq's estimated army of one-Million is NOT all ready to storm across any border. He voiced confidence that the U-S force can help defend Saudi Arabia.

The secretary-general of the United Nations today called for ''utmost restraint'' by all sides involved in the Persian Gulf confrontation. Secretary-General Javier Perez de Cuellar also urged Iraq to promptly withdraw from Kuwait. Perez de Cuellar said the U-S deployment of troops is ''parallel'' to a U-N embargo against Iraq... but his spokeswoman said the U-N leader neither agrees NOR disagrees with the move.

Iraq declared that it is taking possession of Kuwait today despite the arrival of U-S troops and combat jets to neighboring Saudi Arabia. In Cairo... Egyptian President Hosni Mubarak denied that his troops are part of a force to defend oil-rich Kuwait. He called for an emergency Arab League summit within 24 hours. Mubarak was joined by Jordan's King Hussein ... who later pledged to come up with ''an Arab resolution.''

President Bush has asked oil companies to- in his words- ''show restraint'' in altering their prices at the gas pump to reflect the UNcertainty in the Middle East. But Bush did NOT suggest any concrete steps to hold down gas prices, which have risen more than 16 cents a gallon in the first week of this month. ARCO responded by saying it would freeze prices for one week, but the consumer group Citizen Action called the Bush statement ''a weak response to the widespread price-gouging.''

#90220u2501 08/08/1990 ~United Press International

(AUG. 8) UPI - Iraq declared the annexation of Kuwait even as U.S. troops combat planes and a formidable naval force began arriving in the Persian Gulf region to protect Saudi Arabia against what President Bush called Iraqi leader Saddam Hussein's ''enormous war machine.'' Egyptian President Hosni Mubarak denied his troops were part of an multinational effort to defend the oil-rich kingdom, and instead called an emergency Arab League summit within 24 hours to press a regional solution to the escalating Persian Gulf crisis.

Vowing that ''America will stand by her friends,'' President Bush announced an unprecedented buildup of U.S. forces in Saudi Arabia to deter aggression by Iraq and pressure its withdrawal from Kuwait.

In what may prove to be a risky escalation of tensions, Bush said U.S. troops, combat aircraft and warships will remain committed to Saudi Arabia as long and at whatever cost required to see Iraq end its occupation of Kuwait.

At the same time, he welcomed an outpouring of support for the multinational force the United States has begun to form in Saudi Arabia and said Iraq already has begun feeling symptoms of economic strangulation from U.N.-ordered sanctions.

Thirty-nine Americans held by Iraq since the invasion of Kuwait remained confined to a Baghdad hotel, permitted to use the swimming pool, but prevented by armed guards from leaving, U.S. officials said.

President Hosni Mubarak called for an emergency Arab summit within 24 hours and opened the door to a possible joint Arab peace force to resolve

the Iraq-Kuwait conflict. He urged Hussein to withdraw his forces from Kuwait and restore legitimacy to the deposed regime of Emir Sheikh Jaber al Ahmad al Sabah. He also denied that he had committed troops to the defense of Saudi Arabia.

Libyan leader Moammar Gadhafi contacted Arab leaders to discuss the ''danger'' posed by U.S. troops deployed in Arab lands and ''the danger this poses for Arab freedom and dignity.'' the Libyan news agency said Wednesday.

JANA, monitored by the British Broadcasting Corp., said Gadhafi talked to the leaders of Algeria, Yemen, Tunisia, Morocco, Jordan, Egypt and the Palestine Liberation Organization.

Giant cargo jets filled with troops of the Army's crack 82nd Airborne Division roared into the skies under presidential orders to keep Iraq from invading Saudi Arabia.

About 15,000 Marine and Navy personnel left East Coast ports Tuesday bound for the Mediterranean and about 2,000 from Fort Bragg's elite 82nd Airborne were believed ordered to Saudi Arabia. Other units were being sent also, possibly the 101st Airborne Division in Fort Campbell, Ky.

British naval and air forces will join the multinational effort confronting Iraq, Foreign Secretary Douglas Hurd said. He said the government will contribute to the collective defense of Saudi Arabia and other threatened states and in support of the United Nations embargo.

Stock prices closed sharply and broadly higher in active trading, breaking a six-day string of losses, as concerns about an imminent escalation of the conflict in the Mideast began to fade. The Dow Jones industrial average, which fell 5.70 Tuesday, gained 24.26 to 2734.90, its first gain since July 30. It marked the first day of gains in both the Dow and the broad market since July 25.

Share prices rebounded Wednesday on the Tokyo Stock Exchange with investors snapping up bargain-priced issues after five straight losing sessions triggered by Iraqi invasion of Kuwait. In New York Tuesday, the Dow Jones industrial average erased early gains and dipped 5.70 points in heavy selling, unleashed by growing nervousness over the crisis in the oil-rich Persian Gulf.

Congress applauded President Bush for being tough on Iraq, but some Democrats said he was too lenient with U.S. oil companies and Senate Republican leader Robert Dole warned of a windfall profits tax unless gas prices come down.

Crude oil prices tumbled nearly $4 a barrel on world markets after reports

that Saudi Arabia would pump an extra 2 million barrels a day to help make up for oil output lost in the embargo of Iraq and Kuwait.

President Bush, responding to public outrage over soaring gasoline prices urged oil companies to ''show restraint'' and not exploit uncertainties over Mideast oil supplies by profiteering at the pump. At the same time, Bush called for greater conservation efforts on the part of American consumers.

#90220u2509 08/08/1990 ~United Press International

(AUG. 8) UPI - President Bush warned congressional Democrats today that he was about to step into the budget debate. Bush said he feels ''liberated'' from his promise NOT to comment on the talks and that he might soon give Democrats a tongue-lashing. Bush told White House reporters... ''I want to tell you exactly how strongly I feel about it, but I don't want to do it here today.''

The Consumer Product Safety Commission announced today in the nation's capital that Crosman Products is recalling 53-thousand air rifles. The Model 31-hundred rifles are used for target practice, but they may have a defective trigger mechanism. The problem makes it difficult to cock the rifles, but could also result in the gun going off UNexpectedly. NO injuries have yet been connected to the problem.

Hurricane Diana has dissipated after leaving two people dead on Mexico's east coast. The hurricane hit the shore yesterday afternoon, but was downgraded to a tropical storm last night, and by this morning a U-S National Weather Service official said ''it is all over.'' The hurricane's 110-mile-an-hour winds caused two deaths yesterday, but by this morning the winds had diminished to 30 miles an hour.

Government scientists reported today that they have found the chemical lock that marijuana apparently opens in the brain to produce its effects. The finding is a major step in the long quest to understand how the drug works. The discovery should aid research to develop drugs to treat diseases by mimicking marijuana's medicinal benefits... withOUT producing unwanted narcotic symptoms.

#90220u2516 08/08/1990 ~United Press International

LOS ANGELES (AUG. 8) UPI - MGM-UA Television Production Group sued CBS Wednesday in an attempt to block the network from broadcasting a movie starring Kenneth Olin during the premiere week of an ABC series Olin stars in - ''thirtysomething.''

The Superior Court lawsuit said CBS knew when it hired Olin to star in ''The Charles Stuart Murders'' that Olin's contract with MGM-UA carries an exclusivity restriction.

The restriction bars Olin from making any guest appearances in programs to be broadcast during the season's premiere week of ''thirtysomething'' - in which Olin plays Michael - or opposite any first run broadcast of an episode of the series, the lawsuit said.

CBS intends to broadcast ''The Charles Stuart Murders'' Sept. 18 in a time slot opposite the fall 1990 season premiere episode of ''thirtysomething '' the lawsuit said.

In addition, CBS has refused to comply with MGM-UA' demands that it reschedule its broadcast of the movie, the suit said.

The lawsuit seeks injunctions barring CBS from broadcasting the movie at a time that would violate Olin's alleged exclusivity agreement.

A lawyer for CBS said the network never comments on legal matters.

#90220u2565 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - UAL Corp.'s board of directors Wednesday gave United Airlines employees two more months to put together financing for their $4.4 billion, $201-a-share buyout of parent UAL, which has fallen on hard times in recent weeks.

The action extending the deadline to Oct. 9 came just a day before the original deadline - set four months ago when the board and the union reached agreement on the buyout proposal.

In a statement, directors said they agreed to extend the deadline because economic uncertainties arising from Iraq's invasion of Kuwait hampered efforts of the employee group - United Employee Acquisition Corp. - to arrange financing.

But the statement also noted, ''In the light of events in the Middle East, the state of the finaicial markets and the softening economy, there can be no assurance that a transaction can be completed.''

The board instructed its financial advisers to conduct further discussions with the employee group to explore changes in the structure of the agreement that might be necessary to win financing.

Spokesmen for UAL and the employee group refused to say what kind of changes might be involved. The board statement, however, stressed that

only structural changes ''that would provide values to UAL's shareholders commensurate with those contemplated in the Merger Agreement'' would be weighed.

Analysts and banking sources, however, said the pricetag on the deal is simply too high - far too high - to win the support of bankers.

As presently structured, the deal would give UAL stockholders $155 a share in cash plus $35 a share in senior subordinated notes bearing 16 percent interest and a proportional stake in a new security of Covia Corp., the UAL subsidiary that holds a 50 percent stake in the Apollo computer reservations system.

United's financial advisers have calculated the value of the Covia interest to be worth about $11 a share - bringing the total to $201 a share, or just under $4.4 billion.

But Kurt Karmin, chairman of the Chicago-based investment firm Rodman & Renshaw, said the price is too high, even without problems in the Persian Gulf.

''That $200 (a share) price is ridiculous. United Airlines isn't worth $200, and certainly not in today's environment.'' he said.

''They're probably going to have to come way down in price - probably to $125 to $150 - to make it work,'' Karmin said.

United's three employee unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - and non-union workers all agreed to major contract concessions in exchange for ownership stakes in the airline.

Earlier this summer, the UAL board - at the request of United Employee Acquisition Corp. Chairman Gerald Greenwald - delayed granting contracts on a major purchase of widebody aircraft.

Greenwald planned to use that order - expected to be worth $15 billion - as leverage to get suppliers to invest in convertible bonds that would be subordinate to bank financing.

A source in the employee group said Greenwald had been hoping to raise as much as $1 billion by selling the subordinated bonds to UAL suppliers - specifically aircraft and engine builders and aircraft leasing companies that stood to profit from the widebody order.

The remainder of the financing was to come from banks.

The employee group last month reached tentative agreements with Bankers

Trust Co., Manufacturers Hanover Corp., Chase Manhattan Corp., Chemical Bank and Citicorp to take the lead in finacing the deal. The banks were to pitch in $500,000 each, and recruit other banks to provide the remainder of the money.

But Citicorp, Chemical Bank and Chase Manhattan backed out in the past two weeks. Citicorp and Chase Manhattan were the lead banks in the attempt to syndicate financing for a $6.75 million, $300-a-share employee-led buyout of UAL that collapsed for lack of financing last October.

Security Pacific Corp. recently joined Bankers Trust and Manufacturers Hanover in backing the new buyout bid and trying to syndicate the remainder of the financing. But it has proved a tough task.

''They've (the lead banks) been pitching this to a lot of people, and might even have had a little interest until last week,'' a Chicago banking source said. ''Now nobody even wants to talk about it.''

He said the buyout proposal was ''only marginally viable a week ago, even to an optimist.''

''Now with the goings on in the Persian Gulf with Iran and Kuwait, financing something like this is unthinkable,'' he said.

#90220u2655 08/08/1990 ~United Press International

(AUG. 8) UPI - Diplomats say six Arab nations want the U-N Security Council to declare Iraq's annexation of Kuwait ''null and void.'' The six nations... Kuwait, Saudi Arabia, Qatar, Bahrain, the United Arab Emirates and Oman... are members of the Gulf Co-operation Council. They requested an emergency meeting of the security council, which will meet tonight to react to the annexation.

U-S troops rolled out of Fort Bragg, North Carolina, today... bound for Saudi Arabia. More than two-thousand paratroopers from the 82nd Airborne have been pressed into action. Two World Airways D-C-10's took off for the 14-hour journey. Also departing were three mammoth CA cargo planes... capable of carrying tanks and helicopters. Military officials say plenty of reservists are volunteering, and the sale of dog tags is way up.

At his White House news conference today, President Bush said he was NOT ''let down'' by intelligence reports before Iraq's invasion of Kuwait. Bush... a former C-I-A director himself... was responding to criticism that intelligence reports did NOT give enough warning. The C-I-A was aware more than two weeks ago that Iraq was massing troops on its border with Kuwait... but operatives say they could NOT determine what Iraq's intentions were.

NASA officials are readying to move the crippled shuttle Atlantis from the launch pad to its hangar for fuel-line repairs. Rain fell today at Cape Canaveral, delaying the move. Officials say Atlantis will be moved as soon as weather permits. The newly repaired shuttle Columbia is to be rolled out to the launch pad tomorrow in preparation for blast-off about September 1st.

#90220u2867 08/08/1990 ~United Press International

(AUG. 8) UPI - Iraq remained defiant today, despite mounting military, economic and political pressure against it. Iraq announced that it had formally annexed Kuwait. The U-N Security Council was to meet tonight to discuss the latest actions by Iraqi President Saddam Hussein.

Baghdad later claimed Israel was planning to attack. It says Israel has painted U-S military insignias on its aircraft and issued American identity cards to its pilots under plans to carry out- what it called-

''aggressive missions.''

In a last-ditch bid to find a regional solution to the crisis, Egypt's President Mubarak called for an emergency meeting of the Arab League tomorrow in Cairo. Libyan leader Moammar Gadhafi landed in Cairo tonight as the first arrival for the meeting. It's NOT known if Saddam will attend.

U-S officials flew to Paris today to confer with oil-consuming allies on the possible use of petroleum reserves to offset the economic effects of Iraq's invasion of Kuwait. The emergency meeting of the International Energy Agency, which includes most of the world's oil-consuming industrialized nations, is set for tomorrow.

In Washington, President Bush urged oil companies NOT to view the crisis as a way to increase profits. At the same time, he urged conservation on the part of American consumers. Atlantic Richfield announced a one-week freeze on its wholesale prices... beginning today.

The United States and Mexico agreed today to move ahead on a free trade agreement that will open the border to more trade and investment. Mexico also says it will sell more oil to the United States to make up for oil supplies that will be lost by economic sanctions against Iraq.

-30- 1869

#90220u2870 08/08/1990 ~United Press International

(AUG. 8) UPI - In Chicago today, the American Bar Association House of Delegates rescinded its pro-choice abortion stance and adopted a neutral position. The vote followed hints from the Bush administration that the A-B-A's influence in Washington would dwindle unless it reversed its pro-choice stance.

The British Embassy in Monrovia, Liberia, says rebel leader Prince Johnson has freed his Western hostages... which included at least eight foreigners. Among them- an American identified as a mining contractor from California.

Military sources in the Indian Ocean nation of Sri Lanka say Tamil rebels killed at least 59 civilians in the country's eastern section today. It's the fourth day in less than a week that the rebels have massacred large numbers of civilians.

A Salvadoran armed forces spokesman says four rebels died and two soldiers were wounded in a series of clashes in eastern El Salvador. The fighting comes despite recent peace talks aimed at ending the decade-long civil war.

Residents of Mexico's Gulf Coast are cleaning up after Hurricane Diana, which roared ashore yesterday- killing two people and leaving thousands

more homeless before turning into a tropical storm. Diana was downgraded further early today before dissipating over northwestern Mexico.

All is NOT well with first dog Mille. Despite hopes for a quick recovery, a White House spokesman says the four-year-old English springer spaniel is still suffering from acute lead exposure. Veterinarians believe Millie got sick after walking through paint thinner and then licking it from her paws.

-30- 1760

#90220u2949 08/08/1990 ~United Press International

(AUG. 8) UPI - 10 Arab nations today said they will attend tomorrow's emergency Arab summit to discuss Iraq's annexation of Kuwait. Egyptian President Hosni Mubarak called for the summit and suggested a joint Arab peace force. Jordan, Syria, Libya and Saudi Arabia intend to participate in the meeting in Cairo. But it's NOT clear whether Iraqi President Saddam Hussein will attend.

The Energy Department has come up with tips for Americans to honor a presidential request to save energy. President Bush asked Americans today to conserve energy because of Iraq's invasion of Kuwait. A top assistant at the Energy Department suggests that one of the simplest ways to save gasoline is to drive more smoothly. That means avoiding jackrabbit starts... keeping tires properly inflated... and car-pooling.

The United States and Mexico today began the formal process of putting together a free-trade agreement like the one on U-S-Canadian trade. That deal took five years to negotiate, and the U-S-Mexican agreement could take just as long to complete. U-S officials re-asserted today that negotiations will NOT touch on immigration. Free immigration is one of the foremost demands of the Mexican government.

Idaho is suffering its worst timber fire of the year- just one of more than 170 wildfires that have charred more than 72-thousand acres in four Western states. Many of the fires were sparked by lightning. More than 400 such strikes were recorded last night in the Klamath Falls area of Oregon alone. And more thunderstorms are predicted tonight.

-30- 1728

#90220u2958 08/08/1990 ~United Press International

(AUG. 8) UPI - A retired Federal Aviation Administration safety consultant testified for the defense today in the Minneapolis trial of three former Northwest Airlines pilots accused of flying under the influence of alcohol. Robert Collette says in reviewing all the tapes and transcipts from the flight last March, he found NO evidence of the pilots being impaired in their operation of the plane.

A study by the University of Washington finds that common shore-cleaning methods used after oil spills can actually increase environmental damage. The study released in Seattle today says oil spills since the mid-1970's reveal that crude oil does NOT cause the severe damage often suggested in the media. The report says cleanup crews with rakes and hoses can cause more damage by trampling delicate plants and animals.

Controversy has followed the Robert Mapplethorpe photo exhibit to Boston, where it opened at the Institute of Contemporary Art last week. Councilor Albert ''Dapper'' O'Neil asked the city council today to order the removal of seven pictures he found obscene. O'Neil says- ''I don't want to close the show. I just want those seven photographs taken down.'' The council tabled the motion.

A heart-shaped tombstone has been returned to the Auburn, Washington, grave of a three-year-old Japanese girl- 79 years after her death and 45 years after the grave was vandalized during the final months of World War Two. The graves of several Japanese immigrants were vandalized in 1945, but the heart-shaped tombstone of Yu Natsuhara was the only one taken. It was unearthed in June at the site for a new high school and was returned to the Natsuhara family, who oversaw its replacement this week.

#90221b0014 08/09/1990 ~Business Wire

WILMINGTON, DE (AUG. 9) BUSINESS WIRE - On July 31, 1990, TA Instruments Inc., a newly formed company, completed the previously announced acquisition of the thermal analysis business of E.I. du Pont de Nemours & Co., it was announced Thursday by David Chalmers, chairman and chief executive officer of TA Instruments.

The primary shareholders of TA Instruments are its management and employees and Chemical Venture Partners, an affiliate of Chemical Banking Corp. The purchase price was undisclosed.

TA Instruments is the worldwide leader in the design, manufacture and sale of thermal analysis instruments. Thermal analysis is an analytical technique used to measure the composition and reactive properties of materials as a function of temperature.

The primary materials are plastics and composites. These analytical instruments are used in academic and industrial research and development, as well as in quality control and assurance applications.

Chemical Venture Partners is a New York-based investment group managing more than $450 million of capital. The firm specializes in management buyouts and recapitalizations, as well as growth equity and venture capital transactions. Since its inception in 1984, Chemical Venture

Partners has closed more than 50 transactions. The headquarters of TA Instruments will remain in the Wilmington area, according to Chalmers.

SALT LAKE CITY (AUG. 9) BUSINESS WIRE - Wasatch Education Systems Corp. (NASDAQ:WESC) announced Thursday the appointment of two vice presidents and a corporate controller who will be assuming immediate responsibilities in new positions at the growing company.

Steven C. Chiaramonte, who joined the company in July of this year, has been appointed to the new position of vice president, treasurer and chief financial officer. Dr. Shari Robinson, corporate training director for the company since 1987, has been promoted to vice president for Educational Consulting Services.

Chiaramonte, who for several years has operated a private consulting practice, had been assisting the company since February of this year. Previously, Chiaramonte held an executive post similar to his new role at Wasatch with an industry competitor of the company. A native of the San Francisco Bay area, he held various executive positions with Atari Inc. before relocating to Salt Lake City in 1985. During his tenure at Atari, Chiaramonte witnessed from its genesis, a decade of growth, giving rise to a $2 billion international company.

Following the appointment of Chiaramonte, Kim Kimura joined the company as controller, replacing Keith Bradford. Kimura has a substantial background as corporate controller which she will apply as she undertakes to manage the company's day-to-day financial affairs under the direction of Chiaramonte.

Robinson has been an integral component in attaining the success Wasatch has achieved in recent months. She has, since 1987, led the industry's most dynamic and effective team of field-based educational consultants - all of whom are experienced teachers who assist the customer in training and program implementation for the company's Integrated Learning Systems product.

A former classroom teacher and researcher at the Harvard Graduate School of Education, Robinson developed educational courseware for the Bank Street College of Education, New York, and for an industry competitor of the company, before joining Wasatch in 1987.

Wasatch Education Systems Corp., of Salt Lake City, develops and markets fully integrated computer-aided learning systems for the elementary and secondary markets and for adult students enrolled in basic education programs. Wasatch Education Systems Corp.'s stock is traded over-the-counter under the NASDAQ symbol WESC.

#90221b0026 08/09/1990 ~Business Wire

JACKSON, Miss. (AUG. 9) BUSINESS WIRE - LDDS Communications Inc. (NASDAQ:LDDSA) Thursday reported results for the second quarter and six months ended June 30, 1990.

For the three months ended June 30, 1990, sales increased 45 percent to $37,352,000 compared with $25,812,000 in the second quarter of 1989. Net income rose 91 percent to $2,055,000 from $1,075,000 in the year-earlier period. Earnings amounted to 25 cents per share, up 47 percent from 17 cents per share in the same quarter last year.

For the six months ended June 30, 1990, sales increased 51 percent to $71,107,000 compared with $47,133,000 in the first half of 1989. Net income rose 155 percent to $3,618,000, or 44 cents per share, compared with $1,421,000, or 23 cents per share, a year ago.

LDDS Communications Inc. is a provider of long distance telephone services in Mississippi, Tennessee, Arkansas, Louisiana, Missouri, Indiana, Kansas, Kentucky, Texas, Alabama, Florida and Georgia. Its shares are traded in the NASDAQ National Market System under the symbol LDDSA.

AMERICAN FORK, UTAH (AUG. 9) BUSINESS WIRE - TEL Electronics Inc. (NASDAQ:TELS) Thursday reported on financial results for the second quarter of 1990.

The company reported a net income of $15,230 for the quarter ending June 30, 1990 on net sales of $648,554. The company reported that the sales for the quarter were less than projected, despite encouraging results in certain sectors of its business. Management indicated that most of the lag in sales came from two factors: a restructuring of the sales force mid-quarter in hopes of increased sales in the future and marketing expenses related to its voice products.

The decrease in net income compared to the same quarter of 1989 was mainly due to increased selling expenses in the voice processing segment and lower gross margins on these products.

The company focused, however, on indicators that it considers more fundamental to the company's long term health, such as the number of new dealers signed and an increase in the average sales per dealer. The company also indicated that at mid quarter certain cost cutting measures were taken which will be reflected in the third and fourth quarters.

Despite flat sales for the second quarter, net sales for the first half of 1990 of $1,308,036 still reflected an increase of 13 percent over 1989. Selling, general and administrative expenses wee $818,169 for the first half, up by $78,355 when compared to the first half of last year. The company continued to expand approximately 11 percent on research and development, which is another indication that the company is committed to the future at the expense of short term results.

Dr. John L. Gunter, TEL's president, stated, ''We believe that we have the best products available in call accounting. Coupled with improvements in our voice products and the addition of our new property management system, INN-FRONT, TEL continues to be a leader in the industry.''

TEL electronics inc. designs, produces, and markets microprocessor-based telephone call accounting, telephone management, line scanners and other telecommunications systems. TEL also markets voice/mail processing systems, automated telephone attendants and property management systems for use by the lodging industry, professional firms, government agencies and general business organizations.

TEMPE, AZ (AUG. 9) BUSINESS WIRE - MicroAge Computer Centers Inc. Thursday announced that Dan Shaver will join the company Sept. 4 as vice president of marketing.

Shaver, 48, brings to MCCI more than 25 years of sales and marketing experience in the computer industry, primarily with major manufacturers inclding IBM and Apple. Most recently he was employed by Apple Computer Corp. where during eight years, he held a variety of sales and marketing positions, including director of corporate accounts, and most recently, vice president of channel strategy and reseller development.

Under Shaver's leadership, Apple sales increased dramatically through the

reseller channel. Apple's relationships with the major computer resellers also improved. During that time, Shaver developed a particularly productive relationship with MicroAge.

''As I worked at developing relationships with Apple's major reseller partners, I became particularly impressed with MicroAge's management style especially the processes in place to enhance the management team and focus on long-term objectives,'' said Shaver.

''In an industry that moves so quickly, it's unique to see that kind of effort and longer-term thinking. It's that kind of organization-building strategy that will provide MicroAge an opportunity for continued success. It's also an area where I feel I can contribute significantly.''

Shaver's responsibilities will include strengthening MicroAge's relationships with its major manufacturing partners, including IBM, Apple, Compaq, Hewlett-Packerd, NEC, Epson, AT&T, AST Research and others.

A Chicago native, Shaver began his career with IBM. After 10 years at IBM he was self-employed for six years before joining Apple in 1982. Shaver has a liberal arts degree in economics from Dickinson College in Carlysle, Pa. products from more than 550 manufacturers.

MicroAge markets and distributes information technology products and services through an international network of more than 700 franchised, dealer and company-owned locations.

HOUSTON (AUG. 9) BUSINESS WIRE - Trunkline Gas Co., a subsidiary of Panhandle Eastern Corp., Thursday will begin providing natural gas transportation services on the Lebanon Lateral, formerly referred to as the Indiana-Ohio pipeline.

The Lebanon Lateral is located between Grant County, Ind., and Lebanon, Ohio. Trunkline owns the Indiana portion of the pipeline while the Ohio portion is jointly owned by Trunkline and ANR Pipeline Co., a subsidiary of The Coastal Corp.

Trunkline will operate the 52-mile, 30-inch Indiana pipeline and the 61-mile, 36-inch Ohio pipeline that links Panhandle Eastern Pipe Line (PEPL) to the facilities of Texas Eastern Gas Pipeline, CNG Transmission Corp. and Columbia Gas Transmission Corp.

Initial capacity will be 480 million cubic feet per day and will be equally shared by Trunkline and ANR. Capacity could be expanded to more than 1 billion cubic feet per day to meet future market demands.

''The completion of this project creates a strategic interconnection of Panhandle Eastern Corp.'s pipelines,'' said Fred Fowler, vice president of marketing. ''We are now able to provide the Northeast market area with direct access to the abundant Mid-Continent gas supplies on the Panhandle Eastern system and to provide access to Gulf Coast supplies on the Trunkline system.''

Shippers requesting transportation services should ask for the Master Receipt Point List on their PEPL and Trunkline transportation agreements to provide maximum flexibility in their supply options. Shippers who plan to transport gas will need a PEPL transportation contract redelivering to Grant County, as well as a Trunkline agreement for each redelivery to Lebanon.

For additional information or assistance, shippers should call the Panhandle Eastern marketing services department at 713/627-4765. Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

LAKEWOOD, CO. (AUG. 9) BUSINESS WIRE - K N Energy Inc.'s (NYSE:KNE) board of directors Thursday declared a third quarter common stock cash dividend of 28 cents per share payable Sept. 30 to common shareholders of record on Sept. 14.

The cash dividend reflects a 3 cents per common share increase, or 12 percent, over the previous quarterly cash dividend level of 25 cents per share which had been maintained since late 1987. The dividend will be paid on the 9,527,041 K N Energy common shares outstanding.

''We continue our commitment to maximizing long-term value for K N Energy's shareholders,'' said Charles W. Battey, K N Energy's chairman and chief executive officer. ''The third quarter dividend reflects the board of directors' confidence in the strength of K N's operating performance and recognition of K N's opportunities for the future.''

In other action the board also declared the following preferred dividends payable Oct. 1 to preferred shareholders of record on Sept. 14:

Quarterly dividend of $1.25 per share on the Class A $5 cumulative preferred stock (without par value).

Quarterly dividend of $2.125 per share on the Class A $8.50 cumulative preferred stock (without par value).

Quarterly dividend of $2.075 per share on the Class B $8.30 cumulative preferred stock (without par value).

#90221b0070 08/09/1990 ~Business Wire

ALAMEDA, CA (AUG. 9) BUSINESS WIRE - Hana Biologics Inc. (NASDAQ:HANA) Thursday reported quarterly revenues of $998,000 for the company's fourth fiscal period ended June 30, down 37 percent from $1,595,000 reported for the like period last year.

Contract manufacturing accounted for all revenues in the fourth quarter of fiscal 1990. Revenues for fiscal 1989 included sales from the company's now divested cell biology and diagnostic product lines. The company posted a net loss for the fourth quarter of $1,643,000, or 25 cents per share, compared to a net loss of $1,685,000, also 25 cents per share, for the like period of the prior year.

For fiscal 1990, the company recorded total revenues of $4,280,000, down from $5,746,000 in fiscal 1989, resulting in net income for fiscal 1990 of $5,315,000, or 48 cents per share, in contrast to a net loss for fiscal 1989 of $6,869,000, or $1.04 per share.

Net income in fiscal 1990 reflects both a gain of $12,756,000 on the sale

of the cell biology and diagnostic product lines and an expenditure of $1,640,000 as a result of a reorganization, both of which occurred during the first quarter.

Absent these non-operating items and the income tax incurred on the gain, the company would have had a net loss of $5,637,000 for its fiscal year ended June 30, 1990.

Hana Biologics Inc. is a biotechnology company dedicated to providing mammalian cells for therapeutic purposes. The company's research and development programs center primarily on the identification, purification, proliferation and processing of cells for the treatment of chronic, cell-based diseases such as diabetes, Parkinson's disease and various liver disorders.

#90221b0080 08/09/1990 ~Business Wire
PHOENIX (AUG. 9) BUSINESS WIRE - The Orange County, Calif., office of Snell and Wilmer has announced that, effective Aug. 20, five new partners will join the firm.

Four of the partners, Raymond Ikola, William O'Hare, Richard Derevan and David Evans, were formerly with the Orange County office of Hufstedler, Kaus & Beardsley, a Los Angeles-based law firm. Ikola, O'Hare and Derevan are litigation attorneys and Evans practices tax and estate planning.

In addition to the Hufstedler attorneys, Gary Wolensky, formerly a partner with Lavin, Coleman, Finarelli & Gray in Philadelphia, Pa. will join the firm. His practice concentrates on automotive product liability cases.

The former Hufstedler partners have practiced together in Orange County for over a decade, originally practicing in the firm of Wenke, Taylor, Evans & Ikola.

Their practice merged with Hufstedler in 1987. The move to Snell & Wilmer was motivated by ''the unique opportunities of the firm -- we were looking for a firm with experienced corporate and real estate attorneys to complement our practices. We also wanted to be able to offer clients better rates than the Los Angeles-based firms without sacrificing quality. Snell & Wilmer's size and state-of-the-art intra-office communications systems, along with very competitive rates, made this possible,'' explained O'Hare.

O'Hare, who served as the managing partner of Hufstedler's Orange County

Office is currently a member of the board of directors of the Orange County Bar Association and the chairman of the Orange County Conference of Delegates to the State Bar of California.

Snell & Wilmer's Orange County office opened in February of 1989 with one full-time attorney. It is now among the 15 largest firms in Orange County with 21 attorneys and provides a full range of services to California clients.

Robert Gibson, the managing partner of Snell & Wilmer's Orange County office, stated, ''We are very pleased to be able to add these fine attorneys to the firm. This development, along with the addition of Gilbert Kruger, Creighton Mills and Charles Hurst (formerly of Wyman Bautzer Kuchel & Silbert's Orange County office) in February of this year, have added some real depth to our practice here.''

Snell & Wilmer is a firm of over 230 attorneys with offices in Phoenix and Tucson, Ariz. and Orange County, Calif. The firm serves clients regionally, nationally and internationally.

#90221b0082 08/09/1990 ~Business Wire

SACRAMENTO, CA (AUG. 9) BUSINESS WIRE - Foundation Health Corp., (AMEX:FH) which operates one of the largest HMOs in California, Thursday reported record net earnings of $11.1 million for fiscal year 1990, compared to a $2.8 million loss in FY1989.

The fiscal year ended June 30.

Earnings per share for FY1990 amounted to $1.37 on 7.2 million common and common equivalent shares outstanding compared with a 55 cents per share loss on 6.9 million outstanding in FY1989.

Operating income nearly tripled to $25.1 million, compared with $9.3 million in FY1989. Consolidated revenues for the year were $895.2 million compared with $762.3 million in 1989, a 17 percent increase.

Comprising FY1990's total were revenues of $319.5 million for the commercial HMO, $569.1 million for the CHAMPUS Reform Initiative, and $6.6 million in interest and other income, compared to FY1989 figures of $316.8 million, $438.9 million and $6.6 million, respectively.

Daniel D. Crowley, president and chief executive officer of Foundation Health Corp., attributed the improvements in large part to tighter

management controls over costs and more focused marketing.

''Foundation Health Corporation has been re-worked from top to bottom in the past year, setting its sights on well-defined performance targets,'' he said. ''We streamlined the organization and focused all of our energies on controlling health care and adminisitrative costs, improving service and better targeting our marketing efforts.

''We're now beginning to reap the rewards of all the hard work.''

Crowley added: ''This past year was a milestone for Foundation. By focusing the company on well-defined targets, we put ourselves on strong financial footing, showed that we could save the U.S. Department of Defense millions of dollars, invested in new automation, initiated new products, began cultivating new markets and strengthened our provider panels throughout our regions.

We believe Foundation is in the strongest financial position of its 12-year history.''

For the fourth quarter of FY1990, net income tripled to $2.7 million, compared to $899,000 a year earlier, with EPS at 32 cents vs. 9 cents. Revenues and operating income were $247.8 million and $6.4 million, respectively, compared with year-earlier results of $200.9 million and $4.1 million, respectively.

Crowley, who joined Foundation in May of 1989 and initiated the new management directions, noted that the company's cost containment efforts had reduced its administrative expenses to 8 percent of total revenues, compared with 10 percent in 1989.

Through improved health care utilization controls, the company also brought its HMO health care expenses as a percentage of revenues -- called the ''loss ratio'' -- to 81.1 percent, compared to 82.1 percent a year earlier.

Contributing to the low loss ratio was hospital days per thousand members of only 285 in 1990, compared to 306 in 1989.

''We are quite proud that we have among the lowest loss ratios in the health care industry,'' Crowley said. ''This is a key indicator of how well we are doing controlling health care costs.''

Membership increased from 273,000 to 281,000 from FY1989 to FY1990, with per member per month premium increases averaging approximately 14 percent. While the company does not offer a ''Medicare risk'' product, it does have about 20,000 Medicare supplement, or ''Medi-gap,'' members.

''We took a very conservative approach to membership growth this past year as we focused on profitability,'' Crowley said. ''Now that those controls are in place, we expect -- and already are realizing -- much higher increases in enrollment for FY1991.''

Foundation Health Corp. administers the Pentagon's CHAMPUS Reform Initiative program for 860,000 eligibles in California and Hawaii, making Foundation the country's 29th largest defense contractor.

Its HMO also serves approximately 280,000 individuals in northern and central California, making it the largest IPA-model (''open-panel'') HMO in the state and fifth largest in the nation.

VANCOUVER, BRITISH COLUMBIA (AUG. 9) BUSINESS WIRE - During the past few weeks, Galactic Resources Ltd., has filed prospectuses with the Toronto Stock Exchange qualifying shares, previously issued to Yorkton Continental Securities Inc. for trading.

These shares consist of a) 1,582,625 shares that were issued as a result of private purchases of Cornucopia Resources Ltd.'s shares on the basis of 0.5 of a Galactic common share for each common share of Cornucopia, as announced in the Galactic news release of July 12, 1990, and b) 350,000 units issued to Yorkton Capital Markets (Overseas) Ltd., as agent's commission issued pursuant to a private placement of 5,000,000 shares which took place in September 1989. Each unit consists of one common share and one warrant for 0.8 shares of Galactic. The warrants will be exercisable in October 1990.

Yesterday's Dow Wire, which carried the recent announcement by the Toronto Stock Exchange, was merely clarifying the terms under which these shares may be traded and should not be construed as a new issue which will increase the number of presently issued and outstanding shares of Galactic Resources Ltd.

Galactic produces gold at the Ridgeway Mine in South Carolina with joint venture partner The RTZ Corporation PLC, and at its wholly owned Summitville Mine in Colorado. Galactic also has precious metal development projects in Nevada, California, Canada, China, and the Philippines.

Galactic trades on the American, Toronto, Montreal and Vancouver Stock Exchanges (symbol GLC). American Stock Exchange quotes in U.S. dollars

are listed daily in the ''Wall Street Journal'' under AMERICAN STOCK EXCHANGE COMPOSITE TRANSACTIONS.

MILWAUKEE (AUG. 9) BUSINESS WIRE - Milwaukee Insurance Group Inc. (OTC:MILW) Thursday reported second quarter net income of $480,000, or 16 cents per share, compared to a net loss of $803,000, or 26 cents per share in the first quarter of 1990 and compared to net income of $1,450,000, or 47 cents per share, for the same period last year.

First-half 1990 net loss was $323,000, or 10 cents per share vs. first-half 1989 net income of $2,244,000, or 73 cents per share.

Included in net income are pre-tax realized gains of $24,000, or 1 cent per share, for the second quarter of 1990 compared to $5,000 for the second quarter of 1989 and $138,000, or 4 cents per share, for the first half of 1990 compared to $8,000 in the first half of 1989.

Property-Casualty Insurance:

Milwaukee Insurance Group Inc.'s property-casualty insurance segment produced a net loss of $42,000, or 1 cent per share, for the second quarter of 1990 compared to net income of $866,000, or 28 cents per share, in the corresponding period of 1989.

''Premium rates on our personal auto policies were not adequate at the beginning of the year,'' said Robert W. Doucette, president and chairman of Milwaukee Insurance Group Inc. ''Rate increases initiated in March and April of this year will start to impact earned premium as the policies renew. In addition, homeowners losses increased as a result of storm losses during the second quarter.''

Life Insurance:

The life insurance segment of Milwaukee Insurance Group Inc. contributed net income of $522,000, or 17 cents per share, during the second quarter of 1990 compared to $584,000, or 19 cents per share in the corresponding period of 1989.

Milwaukee Insurance Group Inc. provides property and casualty insurance through two subsidiaries, Milwaukee Guardian Insurance Inc. and Milwaukee Safeguard Insurance Co.; and life insurance through its subsidiary, Milwaukee Life Insurance Co. It is traded on the NASDAQ National Market

System under the symbol MILW.

PALM DESERT, CA (AUG. 9) BUSINESS WIRE - StratAmerica Corp. announced it has signed the binding agreement to acquire 80 percent of Sports Archives Inc., Palm Desert, for 200,000 shares of restricted common stock.

Sports Archives Inc. owns and operates the ''Field of Dreams'' baseball card and sports memorabilia retail store based in Palm Desert. Sports Archives Inc. has a license from MCA, Los Angeles, to use the name ''Field of Dreams'' in the sports memorabilia business.

Sam D. Battistone, StratAmerica's president, said the ''Field of Dreams'' baseball card and memorabilia store has proven to be a profitable concept and will serve as the prototype for expansion into multiple locations. ''Field of Dreams'' has been developing a plan to expand and now StratAmerica can help provide its multi-location expertise, sports involvement and financial resources to expedite this concept.

Presently, several Southern California shopping center locations have been identified for new stores and leases are being negotiated for specific space. It is anticipated that these initial expansion units will be opened by the end of the year. Also future sites for 1991 expansion are being developed.

Battistone said the substantial market advantage of the goodwill associated with the name ''Field of Dreams,'' through the major motion picture and the ancillary merchandising efforts, will be a primary focus of the companies promotional activities. The design of the stores will reflect the positive elements associated with the ''Field of Dreams'' motion picture story.

A new and unique design concept has recently been completed for both the interior and exterior of the new stores. Each location will have a wide range of cards, collectibles and memorabilia of the sports heroes of the past and present. The selection will be inviting to the beginning collector as well as the seasoned professional investor.

The founders of Sports Archives Inc., Richard J. Heckmann and Gregory T. MacDonald, plan to remain active in the expansion plans for the ''Field of Dreams'' memorabilia stores. Heckmann is a senior vice president-investments and branch manager for Prudential-Bache Securities and is also the chairman of the board of American Toxxic Control Inc.,

owner of Smith Sports Optics Inc., the largest U.S. manufacturer of ski goggles, and the owner of several large California-based agricultural companies.

Previously he was an associate administrator of the Small Business Administration, director of the Kennedy Center in Washington, D.C., and chairman of the board of Tower Scientific Corp., a manufacturer of custom prosthetic devices.

MacDonald is the president and chief executive officer of an independent television producer and phonograph packager company that has specific emphasis in the area of direct to consumer broadcast advertising. In 1989 he was a nominee for The American Film Institute's - Billboard Magazine's video conference award for the best music documentary for his co-production of ''A Tribute to Ricky Nelson'' for whom he was the personal manager for 12 years.

Prior to managing Ricky Nelson he was associated with Col. Tom Parker and the management of Elvis Presley. He has personally promoted concerts for: Fats Domino, Little Richard, Chuck Berry, Smokey Robinson, The Judds, The Temptations, Jerry Lee Lewis, The Four Tops, The Everly Brothers, The Righteous Brothers, Merle Haggard, Sonny Bono, Jan & Dean, The Beach Boys, The Grass Roots, The Mamas & The Papas, Donovan Del Shannon, Chubby Checker, Little Anthony, Terry Stafford, Roy Orbison, Carl Perkins, Johnny Cash, Micky Gilley, The Diamonds, The Platters, The Coasters, The Drifters and others.

It is estimated by leading industry publications that the baseball memorabilia and collectibles market currently exceeds $2.5 billion annually and is rapidly growing. StratAmerica intends to market sport memorabilia for many other sports in addition to baseball, including basketball and football because of their increased popularity in this area through the ''Field of Dreams'' stores.

In addition to retail sales the company plans to establish a wholesale division to service company stores and independent retailers. ''Field of Dreams'' is also presently in the development stage of both television marketing and mail order promotions.

StratAmerica previously owned the Utah Jazz basketball franchise of the National Basketball Association (NBA). Battistone said the acquisition of Sports Archives is an unique opportunity to combine the company's professional sports and multi-unit operational expertise. As in the other successful acquisitions of StratAmerica, management has proven to be the key element to profitable growth within the specific business.

An experienced operating management team has been identified to operate ''Field of Dreams.'' This new management group will provide the same type

of leadership and direction that enabled the Utah Jazz and Shari's Management Corp. to achieve profitable results for the company.

Other public companies in the sports memorabilia business include The Score Board Inc., Fleer Corp., and Topps Co. StratAmerica's stock is traded on the NASDAQ system in the over-the-counter market with the symbol STCO.

SAN FRANCISCO (AUG. 9) BUSINESS WIRE - Mary M. Briggs joined Mellon McMahan Real Estate Advisors Inc., on July 16 as vice president and director of research.

Briggs will oversee a newly created four-person research department that will develop and manage analytical systems to support the firm's real estate investment, asset management and valuation activities.

She also will initiate and publish research on issues affecting real estate investment as well as speak to professional and public groups on topics of interest.

Briggs had been with the Roulac Group of Deloitte & Touche in San Francisco since 1985, serving as senior manager in the firm since 1988. At Roulac, she directed consulting engagements with real estate clients nationwide, including real estate investment managers, pension funds, developers and law firms.

Prior to 1985, she was assistant vice president, marketing, at Scudder, Stevens & Clark, a national investment advisory firm based in Boston.

''Mary brings to Mellon/McMahan national real estate experience of the highest caliber,'' said company president John McMahan. ''Her work has been well regarded throughout the real estate community. She will be integral to the success of the firm as it expands into new markets nationwide.''

Briggs holds a master's degree in city and regional planning from Harvard University, Kennedy School of Government, and a bachelor's degree in economics from the University of Oregon.

Mellon/McMahan Real Estate Advisors Inc., has been providing investment management services since 1980 on behalf of public, corporate, endowment and foundation pension fund clients. The firm is a wholly owned

subsidiary of Mellon Bank N.A. headquartered in San Francisco with offices in Stamford, Conn., Denver and Phoenix.

SAN FRANCISCO (AUG. 9) BIZWIRE - Bank of America Thursday announced that it is offering a new supplemental loan program that will help parents meet their children's college education expenses.

The College Triumph Program, which was developed by the Student Loan Marketing Association (Sallie Mae), is being offered only through Bank of America in the western United States.

The College Triumph Program offers parents up to $14,000 a year for each child in college by combining federally sponsored PLUS loans with the FamilyEd Loan Program, one of the most affordable private loan plans available. The borrower has the option of applying to BofA for both loans or only one.

''Parents today are looking for an education loan program they can live with that offers reasonable rates and an extended repayment period for assistance in meeting their children's college financing needs,'' said Kathy Cannon, Bank of America vice president.

''College Triumph offers all the benefits of PLUS loans while providing borrowers with access to additional funds available through FamilyEd.''

College Triumph can help parents whose children have exhausted all other financial assistance available through grants, scholarships, work-study programs and other government-sponsored loans.

The program also is an affordable option for parents whose income levels are too high to make their children eligible for assistance, but who need additional funds to help pay for their children's college expenses.

Two different loan plans are available for parents under College Triumph. For PLUS loans, up to $4,000 is available per child per year, to a total of $20,000 maximum cumulative for each child; for FamilyEd loans, up to $10,000 is available per year (or more, if the annual tuition cost is greater), to a total of $40,000 maximum cumulative per family.

Both PLUS loans and FamilyEd Loans have interest rates tied to current money market rates, with a cap on the PLUS rate of 12 percent per year. They also feature streamlined application procedures, lengthy repayment

terms, flexible deferment provisions, and no collateral requirements.

Cannon has advice for parents who are looking for help to finance their children's education.

''We recommend that College Triumph borrowers first apply for PLUS loans, followed by FamilyEd Loans,'' Cannon said, ''because, with an interest rate to borrowers that may not exceed 12 percent, repayment costs on PLUS loans are more predictable over the long term.''

BofA has been making student loans since 1962 and is the leading lender of student loans in California.

Sallie Mae, a federally chartered, stockholder-owned (NYSE) corporation, is the major financial intermediary by serving the education finance market.

By buying insured student loans and providing other financial services to financial and educational institutions, Salie Mae replenishes local supplies of student credit.

For additional information about College Triumph, call 1/800/831-LOAN, or write to College Triumph Program, P.O. Box 407, Beltsville, MD 20705.

College Triumph and FamilyEd are service marks of the Student Loan Marketing Association (Sallie Mae).

IRVINE, CA (AUG. 9) BUSINESS WIRE - Burlington Air Express announced Thursday that it is implementing a fuel-related surcharge in the pricing

of its domestic and Canadian airfreight services.

David L. Marshall, Burlington's chairman, commented that the recent run-up in oil prices and related fuel products, including jet fuel, have left Burlington no choice but to pass on these extraordinary cost increases to its customers. Accordingly, Burlington will implement a six cents per pound surcharge on its domestic and Canadian airfreight services effective Aug. 20.

Burlington's fuel surcharge will be reviewed on a continuing basis in order to take into account future changes, both up and down, in the price of relevant fuel products.

Burlington Air Express Inc., an $850 million worldwide cargo express company headquartered in Irvine, specializes in transportation and logistics management services for industrial shippers in 160 countries. Burlington offers overnight and second-day freight delivery to virtually every major U.S. business community, and international air freight and customs brokerage services worldwide.

TORONTO (AUG. 9) BUSINESS WIRE - Lawson Mardon Group Limited Thursday announced that net income for the second quarter increased by 10.4 percent to $8.5 million, or $0.30 per share, from $7.7 million, or $0.27 per share in the second quarter of 1989.

Sales in the second quarter of 1990 increased to $265.0 million from $254.2 million in the second quarter of 1989.

Sales for the first half increased to $522.0 million from $505.2 million in the same period of 1989. Earnings for the first half were $14.6 million, an increase of 11.5 percent from 1989's first half earnings of $13.1 million.

This improved performance is reflected in increased half-year earnings per share of $0.51 compared with $0.46 in 1989.

During the quarter, the company continued to strengthen selected market positions with the purchase of two carton companies in West Germany. The companies, W Cardes and Hanse Druck, are accredited suppliers of cartons for the tobacco, confectionary and cosmetics industries in Europe and are ideally situated to take advantage of emerging Eastern European markets.

Lawson Mardon also announced that a quarterly dividend of $0.10 per share wil be paid on Sept. 7, 1990, to shareholders of record on Aug. 21, 1990.

The Lawson Mardon Group produces flexible, rigid plastic, metal and folding carton packaging, and is engaged in commercial printing, label making and print trade finishing, with operations in Canada, the United States, the United Kingdom, Ireland, West Germany and France.

Lawson Mardon is listed on the Toronto, Montreal, American and London stock exchanges. Major shareholders are Roman Corporation Limited (26 percent), management (11 percent) and Woodholme Holdings (7 percent).

#90221b0123 08/09/1990 ~Business Wire

MOUNTAIN VIEW, CA (AUG. 9) BUSINESS WIRE - Sun Microsystems Inc. (OTC:SUNW) Thursday reported results for its eighth full fiscal year ended June 30.

Revenues for fiscal 1990 were $2.47 billion, a 40 percent increase over the $1.77 billion in fiscal 1989. Net income for the year was up 83 percent, to $111.2 million, or $1.21 per share, from the $60.8 million, or 76 cents per share, reported a year ago.

Revenues for the fourth quarter were $700.1 million, a 62 percent increase over the $431.2 million reported in the like period a year ago. The company reported net income for the quarter of $49.1 million, or 51 cents per share, compared with a net loss of $20.3 million, or 25 cents per

share, in the fourth quarter a year ago.

Scott McNealy, president and chief executive officer of Sun, said: ''We are continuing to reinforce our leadership position in easy workgroup computing -- including powerful, cost-efficient workstations and servers -- as these results clearly demonstrate.

''More than 34,000 units were shipped in the fourth quarter, bringing our worldwide installed base to more than 285,000 units. We had record bookings during the quarter and ended the period with a record backlog of orders. Fourth quarter gross margin reached a two-year high and operating income margins for the same period reached target levels despite an increasingly competitive environment.

''Throughout all of fiscal 1990, our employees did an excellent job of returning the company to levels of service, quality and profitability we can be proud of. Evidence of this is seen by the fact that Sun's revenue per employee reached a record $215,000, a 24 percent increase over last year's numbers.''

''Sun's financial focus throughout the past few quarters has been on strengthening the balance sheet,'' McNealy said. Sun ended the quarter with $394 million in cash, a sizable increase over the $54 million reported a year ago. Short-term debt decreased by $104 million from prior year levels.

The company reduced inventory levels to $205 million at the end of the fourth quarter from $309 million last year due primarily to improved management over inventory supply/demand and procurement processes and increased component commonality. These changes have all greatly contributed to Sun's increased financial flexibility.

''The ability of Sun to finance its growth has been an important facilitator of our success,'' McNealy said. Toward this end, shortly after the close of the quarter, Sun announced its intention to issue 4.58 million shares of common stock to AT&T under the terms of an agreement signed in January 1988. Sun expects to receive $192 million from this financing in early September.

Sun has evolved into a truly multinational company with more than 50 percent of fourth quarter revenues coming from outside the United States. The company was recently chosen by the New Zealand Inland Revenue Department to provide systems for an extensive office automation project.

In addition to major foreign contract wins, Sun has expanded its international presence with the opening of a new Scotland manufacturing facility, which will enhance the company's ability to serve customers throughout the world.

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of general purpose computing systems based upon the distributed computing model of networked workstations and servers.

SEATTLE (AUG. 9) BUSINESS WIRE - Second quarter results for Nordstrom Inc. For the second quarter, sales were $801,770,000 compared with $729,089,000 for the same quarter last year, a 10 percent increase. Sales for the six-month period ended July 31, 1990, increased 9 percent to $1,356,808,000 from $1,241,248,000.

For the quarter, net earnings were $35,924,000 compared with $38,546,000 a 7 percent decrease. On a per share basis, net earnings were $.44 compared with $.47. Net earnings for the six-month period ended July 31, 1990, were $49,093,000 compared with $61,519,000, a 20 percent decrease. On a per share basis, net earnings were $.60 compared with $.75.

''We are encouraged that second quarter results are clearly trending in the right direction. Sales increased at a higher rate than the last quarter, and the rate of increase in expenses is declining. While we're not yet satisfied, we are pleased to see sharp inprovement while operating in a difficult retail environment,'' said John A. Goesling.

During the next month, the company is opening three new stores: Santa Barbara on Aug. 17; Lloyd Center in Portland on Aug. 24; and the company's first store in Northeast U.S. in the Garden State Plaza in Paramus, N.J., on Sept. 7.

CHICAGO (AUG. 9) BUSINESS WIRE - Amoco Orient Petroleum Co. Thursday signed a petroleum contract for oil exploration rights offshore the People's Republic of China.

The contract area covers about 6.7 million acres (27,000 square kilometers) in the South China Sea, about 185 miles (300 kilometers) southeast of Hong Kong. This agreement covers the 40/06 contract area in the Pearl River Mouth Basin of the South China Sea.

Amoco currently operates an additional four contract areas in this basin. Agreements for these were signed in 1985, 1986, and 1989 as a result of the first three licensing rounds held by the People's Republic of China. In 1987 Amoco announced an oil discovery in contract area 29/04, which is located about 75 miles (120 kilometers) northwest of the 40/06 area.

The latest agreement calls for Amoco Orient to conduct technical studies and seismic acquisition and, at its option, exploratory drilling. Work is expected to begin by the end of the year.

The China National Offshore Oil Corp. (CNOOC) will have the option to acquire up to 51 percent working interest in any commercial discovery that is made.

Signing in Beijing on behalf of Amoco Orient was Richard M. Morrow, chairman of Amoco Corp. Signing for CNOOC was Zhong Yiming, president.

Amoco Orient is a unit of Amoco Production Co., the worldwide petroleum exploration and production subsidiary of Amoco Corp.

LOS ANGELES (AUG. 9) BUSINESS WIRE - Argonaut Group Inc. Thursday announced that it is offering to purchase shares of its common stock from shareholders who, as of Aug. 9, 1990, owned 50 or fewer shares of Argonaut Group Inc. common stock.

The offer will be mailed on Aug. 21, 1990, to eligible shareholders and allows them to sell all, but not less than all, of their eligible shares without being charged any brokerage commission. Shareholders who elect to participate in this offer must sell all of the eligible shares they own. Partial tenders will not be accepted and there are no withdrawal rights. Participating shareholders will be paid the highest of the closing prices during the period from Aug. 21, 1990, to Sept. 25, 1990, as reported in ''The Wall Street Journal.''

Many shareholders received their shares in 1986 when Teledyne Inc. spun-off Argonaut Group Inc. to the shareholders of Teledyne Inc. Argonaut Group Inc. is making the offer primarily to provide its smaller shareholders the opportunity to sell their shares without incurring any brokerage costs. The offer is also being made to an unknown number of beneficial shareholders of 50 or fewer shares. Also, this offer will

enable Argonaut Group Inc. to reduce its administrative costs associated with servicing their small shareholder accounts.

The manager of the offer, Shareholder Communications Corp., and Argonaut Group Inc. make no recommendation as to whether or not shareholders should participate in the offer. The offer is set to expire on Sept. 25, 1990, at 5:00 p.m., New York City time, unless extended by Argonaut Group Inc.

Argonaut Group Inc. is a holding company whose subsidiaries are engaged primarily in the selling, underwriting, and servicing of workers compensation and other lines of property-casualty insurance. Argonaut Group is traded on NASDAQ's National Market System, ticker symbol AGII.

ARLINGTON, VA (AUG. 9) BUSINESS WIRE - Oracle Complex Systems Corporation (OCSC), the systems integration subsidiary of Oracle Corporation Thursday announced it has been awarded a $39.4 million prime contract by the Defense Logistics Agency (DLA) to provide a sophisticated document imaging system for automating the DLA supply cataloging process.

Entitled Cataloging Tools On-Line (CTOL), this multi-agency requirements contract includes hardware, software, communications, maintenance, and services for one year plus nine option years. The ORACLE-based system will automate the cataloging logistics functions at five DLA Supply Centers and at other logistics facilities supported by DLA, as well as the cataloging facilities of the Army, Navy, Air Force, Marines, Veterans Affairs, Defense Nuclear Agency, NATO Maintenance and Supply Agency and General Services Administration. It will provide advanced scanning, on-line storage, viewing and printing of text, engineering drawings and compound documents on high-resolution workstations. The CTOL award is one of the government's first multi-agency imaging contracts and represents OCSC's largest Federal program win.

''After an intensive evaluation, we selected OCSC as our systems integrator for CTOL,'' said DLA Contracting Officer Pamela Hite. ''OCSC's technical expertise in image processing and project management experience, combined with the strength and stability of Oracle Corporation will help us meet the wide range of requirements of all the agencies served by this contract. This is a significant procurement for the government. It provides leading-edge imaging systems and is a major contracting vehicle for acquiring technology to meet logistics management requirements.''

The CTOL system will provide paperless processing of the millions of catalog searches and classifications performed by the DLA and other agencies annually. It is projected to save the government tens of millions of dollars over its lifecycle while increasing DLA's efficiency. The productivity improvements are estimated by DLA to be 30 percent with significantly increased overall quality and reduced cataloging rejects. CTOL will provide automated reporting and status monitoring as well as improved management control. The system is also designed to comply with various government and industry standards including POSIX, CALS, SGML, C2 Security and SQL. OCSC's system design integrates components such as optical storage, document scanning, distributed processors and X windows/Motif based workstations.

''This award is evidence of the exceptional performance of our OCSC team of professionals,'' said OCSC's President Robert B. Laurence. ''From day one, we have focused on finding the best and most cost-effective solution for the CTOL project. We are committed to providing DLA, our largest customer, with the technology and the support that will serve their needs well into the 21st century.''

Oracle Complex Systems Corporation is the systems integration subsidiary of Oracle Corporation, the world's largest database management software supplier. OCSC is a high-quality, full-service systems integrator serving commercial, government and international clients. OCSC specializes in designing and delivering integrated information systems, especially in the areas of compound data integration, document imaging, distributed database and heterogeneous environments and high performance systems, utilizing an open architecture. OCSC headquarters are located at 1110 North Glebe Road, Arlington, VA 22201.

LOS ANGELES (AUG. 9) BUSINESS WIRE - A class-action suit for unspecified damages of up to $3,000 per violation has been filed in Los Angeles Superior Court against Epson America Inc. (Epson), a wholly owned subsidiary of Epson-Seiko of Japan, for alleged invasion of privacy through the illegal tapping of Epson employee's Electronic Mail at the company's Torrance, Calif., facility, according to Noel Shipman, attorney for the plaintiffs Dick Flanagan, Alana Shoars, Glen Mosby and other members of the class numbering approximately 2,500 persons.

The suit claims that Epson violated California Penal Code Section 631 as it authorized and had knowledge of the acts of its management employees who are alleged to have ''systematically'' printed and read the internal and external MCI Electronic Mail messages of the approximately 700 Epson employees at the Torrance facility.

According to Shipman, the manager of HP Computer Operations and Data Communications for Epson, Robert Hillseth, had, since August of 1989, ''illegally placed a tap on the electronic mail gateway where the HP Mainframe computer interfaced with the outside MCI ''E'' Mail Communications Service, systematically printing and reading all of the ''E'' Mail that was entering and leaving Epson's Torrance facility.

#90221b0149 08/09/1990 ~Business Wire

CARSON, CA (AUG. 9) BUSINESS WIRE - TRW Systems Engineering and Development Division has received a $5.9 million contract to develop an Automated Message Handling (AMH) capability for the U.S. Army Europe Tactical Command and Control System (UTACCS).

The first step in a multi-year plan to field an AMH system for the U.S. Army, the program is divided into four phases over 20 months. The contract was awarded by the U.S. Army Communications-Electronics Command and Program Executive Office for Strategic Information Systems in Fort Monmouth, N.J.

TRW has been the prime systems engineering and integration contractor on UTACCS since 1987. Designed to provide secure, automated command, control and communications to European theater commanders at echelons-above-corps ranks, UTACCS is currently deployed at 40 sites throughout Europe.

AMH will support UTACCS with integrated message handling to facilitate processing of formal Department of Defense Automated Digital Network (AUTODIN), wire service and internal UTACCS messages.

Prototype demonstrations will occur at the end of Phase 1 in October 1990, and again in February 1991, at the end of Phase 2. With the initial capability, multiple users on a local area network can generate messages and electronically distribute them for coordination and release.

In Phases 3 and 4, users will be able to add annotations to messages and connect to wire services and government networks such as AUTODIN and the Defense Data Network (DDN). TRW will install an AMH at Fort McPherson, Ga., and Campbell Barracks, Heidelberg, Federal Republic of Germany.

''The AMH capability will significantly increase the commander's ability to handle the rapidly increasing flow of information,'' said Rhon Williams TRW program manager.

''This technology has future applications for many of the Army's command and control systems,'' said Jack R. Distaso, vice president and general manager of SEDD. ''TRW is playing a major role in automating the Army's battlefield functional areas and the related theater-level systems.''

The AMH design is incorporating the Fast Data Finder (FDF) developed by TRW's System Development Division. Capable of a sustained search rate of up to 9.5 million characters per second, FDF is probably the fastest text search system in the world.

The Systems Engineering and Development Division, located in Carson, is part of TRW Systems Integration Group, an operating unit of TRW Inc.'s California-based Space and Defense Sector.

leveland-based TRW is an international company that provides high-technology products and services to the space and defense, automotive and information systems markets. The company's 1989 sales totaled more

than $7 billion.

#90221b0150 08/09/1990 ~Business Wire

DFW AIRPORT, TX (AUG. 9) BUSINESS WIRE - American Airlines announced Thursday that it will establish a flight attendant crew base at Honolulu on Oct. 1.

The base will open with 135 flight attendants and could grow to more than 200 attendants by the end of 1991.

American will house the base in 700 square feet of office space in its terminal at Honolulu International Airport, and the Honolulu-based attendants will be assigned to the airline's flights to and from Sydney and Auckland.

Michael Zielinski, currently manager of flight service at Honolulu, will remain there to head the new crew base. He will be assisted by two services mangers and a clerk.

''The decision to open the crew base underscores the importance of Honolulu to American. We will operate more efficiently and do a better job for our customers,'' said George L. Mueller, the airline's vice president-customer services.

''With flight attendants based in Honolulu, we can quickly adjust staffing to meet schedule changes or heavier-than-expected passenger loads,'' Mueller said. ''And with greater numbers of flight service people in Honolulu, we will strengthen our service commitment and thus enhance our competitive position in the market''

Joseph J. D'Ambrosio, American's western division vice president, said the new crew base will pump more than $3 million a year into the Honolulu economy and will draw increased attention to Hawaii as a major gateway for the Pacific.

American began service to Sydney and Auckland on Feb. 2 with service four days a week to Sydney and three days a week to Auckland. The flights originate at Dallas/Fort Worth and stop in Honolulu on their way to and from the South Pacific.

Mueller said Honolulu will become the 17th flight attendant base in American's system, including South America. The base will increase the airline's total employment in Honolulu to nearly 530 people.

The airline operates a total of 12 flights a day to Honolulu to eight nonstop destinations. They are Chicago, Dallas/Fort Worth, Los Angeles, Maui, San Francisco, San Jose, Sydney and Auckland.

FRESNO, CA (AUG. 9) BUSINESS WIRE - WestAir Holding Inc. (ASE:WAH), operating as United Express through marketing agreements with United Air Lines (UAL), Thursday reported preliminary traffic results for the month of July.

The airline boarded 262,531 passengers during July, a 27 percent increase compared to the like month last year when the company boarded 206,370 customers.

Revenue passenger miles (RPM's) in July increased 37 percent from 41,790,000 in 1989 to 57,383,000 during July. Available seat miles (ASM's) in July increased 46 percent from 86,589,000 in 1989 to 126,096,000 in 1990.

Load factor for the month was 45.5 percent, down two and one half percentage points from the 48.0 percent figure logged during July, 1989.

According to Timothy P. Flynn, WestAir Holding chairman, traffic for the month met the airline's expectations. He added, however, that promotional fares related to the Independence Day holiday period and other discount pricing in the marketplace affected yields.

Flynn said that the load factor dip for July is partly attributable to the fact that during the month last year the airline industry's ''kids fly free'' promotion boosted load factors. Also during July last year, the airline operated only five of its six 90-seat British Aerospace BAe-146 jet aircraft due to aircraft maintenance requirements. As a result, the airline operated smaller turbo-prop equipment on more heavily traveled jet routes which also increased load factors, Flynn said.

In another matter, Flynn said that the company will raise fares approximately five percent effective Wednesday, Aug. 15, to help offset higher fuel prices.

Through the first seven months of 1990, WestAir Holding Inc. boarded 1,639,772 passengers, up 26 percent over the like period last year when 1,300,257 passengers were boarded. Revenue passenger miles for the seven months were up 36 percent, with 364,631,000 RPM's logged in 1990, compared to 267,773,000 during 1989. Available seat miles through July were 824,324,000, up 40 percent compared to the 589,625,000 ASM's logged in 1989.

Load factor during the first seven months of 1990 was 44.2 percent, down .8 of a percentage point compared to the 45.0 percent figure logged during the like period in 1989.

SUNNYVALE, CA (AUG. 9) BUSINESS WIRE - ZyMOS Corp. (NASDAQ/NMS:ZMOS) Thursday reported revenues of $11,871,000 for the second quarter ended June 30, 1990, an increase of 39 percent over revenues of $8,522,000 for the like period of 1989.

Net income for this period was $52,000, or 0 cents per share, compared with the 1989 loss for the like period of $324,000, or 1 cent per share.

Revenue for the first half of 1990 was $24,074,000, an increase of 58 percent over first half of 1989 revenue of $15,270,000. Net income for this period was $281,000, or 1 cent per share, a major improvement compared with a 1989 first-half loss of $1,136,000, or 3 cents per share.

''The increase we saw in revenues for the second quarter resulted from increased demand across all product areas,'' explained ZyMOS President David A. Handorf. ''Shipments of personal computer (PC) chip sets and graphics chips were up, as were shipments of custom chips to major PC manufacturers.''

RIDGEWOOD, NY (AUG. 9) BUSINESS WIRE - Quarex Industries Inc. (''QUAREX'') (NASDAQ:QRXI) reported Thursday that its independent public accountants, Borek, Stockel & Co. are completing an audit of the retail business conducted by PSL Foods Inc. and affiliates with which Quarex has agreed in principle to combine.

PSL reported 1989 sales of $67 million and pre tax income of 1,624,480 before executive bonuses.

Based on this report, Quarex expects that the 1989 pro forma earnings of the combined companies will be 48 cents per share as against 41 cents per share for Quarex alone.

The combined sales of the group for 1989, after elimination of intercompany transactions, are $235 million as against $195 million for Quarex alone.

According to Jules L. Verner, chief financial officer of Quarex, PSL reported first quarter pre-tax earnings of $567,313, which, on a pro forma combined basis, would increase Quarex' earnings for the quarter from 10 cents to 13 cents per share.

Verner said that the Quarex attorneys are now preparing an application for a tax ruling, a definitive form of agreement and a proxy statement.

He further said that Quarex expects to enlarge its board of directors and to create a new retail division to be headed by Peter Castellana as president.

The annual meeting has been deferred so that stockholders can vote on the business combination and on the new management structure at the same time.

SAN JOSE, CA (AUG. 9) BUSINESS WIRE - Semi-Gas Systems has named David C. Lowles company president and chief executive officer.

Lowles succeeds founder Andrew K. Lorenz who will continue as consultant to the president.

The appointment of Lowles, who has served as Semi-Gas vice president of new business development since 1986, underscores the company's intention to maintain continuity in the management philosophy of the company. Semi-Gas Systems is the leading supplier of advanced gas control and purification systems used in semiconductor manufacturing worldwide.

According to Lowles, for the long term, Semi-Gas will continue to focus efforts on product development, expansion of services to the customer, maintaining its relationships with all gas suppliers, and continued development and support of international markets, which include Japan, Korea and Taiwan, as well as the European market which is served through Semi-Gas Systems Ltd., a licensee.

As consultant to the president, founder Andrew Lorenz provides continuity as the company moves further into advanced control and gas purification systems.

Prior to joining Semi-Gas, Lowles served as vice president and general manager of Dover Corp.'s OPW division of Cincinnati, Ohio, a manufacturer of fluid handling components and equipment. Lowles is a graduate of Purdue University and holds an MBA from Case Western Reserve University, Cleveland, Ohio. He holds two fluid device patents and is an active member of the Rotary Club of San Jose.

Founded in 1980, Semi-Gas Systems is headquartered at 625 Wool Creek Drive San Jose, 95112. Fax number is 408/275-8643.

SANTA BARBARA, CA (AUG. 9) BUSINESS WIRE - The Industrial Designers Society of America (IDSA) in ceremonies last night at the group's annual conference here, awarded the Nissan concept light truck ''Gobi'' its Industrial Excellence (IDEA) gold award in the Transportation/Concept Vehicle category, marking the first time the creation of a design studio owned by a Japanese manufacturer has been so recognized.

In making the award, the society said, ''This hybrid explores new forms. Rather than a simple unity, the Gobi attempts a complex harmony of its discreet components. Each separate zone manifests its own identity, mood and functions, from the helicopter-like passenger cocoon to the rugged, corrugated, fold-down bed sides.''

''We are pleased to receive this award,'' said Yoshikazu Hanawa, president of Nissan North America, in accepting the award. ''Design will be a crucial component in the successful vehicles of the 90s as people seek products that are innovative, not imitative; distinctive vehicles that appeal to individual tastes and sensibilities. Nissan has brought to market such vehicles in the past several years and we plan more in the future.''

The Gobi is a design concept vehicle created by Nissan Design

International, San Diego (NDI), to break the mold of what might be visually acceptable to customers of two seat passenger cars. There are no plans to produce the truck, but elements of it may appear in future vehicles as the concept model was well received by the press and general public at auto shows in the United States.

In its 11th year, the Industrial Design Excellence Awards program is conducted annually by the IDSA to foster industrial design excellence. There were 525 entries in this year's IDEA competition, with only 16 other concepts receiving awards in unrelated categories. The entries were judged on six criteria, including: benefits to user, customer appeal, and appropriate use of materials and manufacturing processes. The entries were judged by distinguished designers from across the United States in the industries and markets represented.

The award for the Gobi continues a tradition of awards for innovative design received by the San Diego studio. NDI has previously been recognized by the IDSA with an Industrial Design Excellence Award 1987, Transportation category for the 1987 Pulsar NX, and an Industrial Design Excellence Award 1986, Transportation category for the 1986 1/2 light truck ''Hardbody.''

Nissan Design International, is part of Tokyo-based Nissan Motor Co. Ltd.'s worldwide network of design facilities and a member of the Nissan group of operating companies in the United States that fall under the Nissan North America umbrella.

MILPITAS, CA (AUG. 9) BUSINESS WIRE - ADAC Laboratories (NASDAQ:ADAC), a leading producer of medical imaging and information products, Thursday announced results of operations for its third quarter ended July 1, 1990.

For the three month period ended July 1, 1990, the company reported revenues of $19.0 million, compared to $24.5 million reported for the like period a year ago. Net income of $746,000, or 2 cents per share, was achieved, compared to net income of $4.4 million, or 10 cents per share, reported in the third quarter of fiscal 1989.

For the nine months ended July 1, 1990, the company reported revenues of $56.3 million, compared to $71.0 million reported for the like period a year ago. Net income of $3.1 million, or 7 cents per share, was achieved compared to net income of $12.2 million, or 28 cents per share, reported for the like period a year ago.

Michael O. Preletz, chairman and chief executive officer, in making the announcement said: ''The company's revenues and earnings continue to be impacted by our customers' restrictive capital equipment budgets and increased competition in significant portions of our product markets. We do not know whether these factors will persist in coming quarters.''

The company also announced that its $15 million revolving line of credit has been renewed by its bank, through Jan. 31, 1991.

#90221b0630 08/09/1990 ~Business Wire

NEW YORK (AUG. 9) BUSINESS WIRE - Jegeroil Corp. (NASDAQ:JEGR) announced Thursday the completion of its Falkner Parker 36-1 natural gas well located in Woods County, Okla.

The successful drilling of the Falkner Parker 36-1 well on July 31, produced, after a 16-hour open flow test, 1,516,000 MCFD of gas. With a projected average sales price of $2 MCF (which is expected to increase substantially with the curtailment of worldwide oil production) monthly revenues from this well are estimated at $90,000. Life of the well is projected to be 30 years.

Jegeroil has scheduled a total of five wells to be drilled on its Falkner Prospect. The remaining three wells are set to be drilled at three-month intervals. Geological studies indicate these wells will be as productive as the Falkner Pettit 35-1 and Falkner Parker 36-1, each capable of producing a minimum of 1 million cubic feet of gas per day.

Total anticipated monthly gross revenues from all five wells are $300,000. Jegeroil is the operator of these wells.

Jegeroil has invested $2 million of its own funds in high potential revenue producing oil/gas leaseholds, supported by geological and economic evaluations. Jegeroil is now converting these assets into revenues. Jegeroil operates and has working interests in 22 oil/gas wells. Estimates of oil/gas reserves from these wells are approximately $20 million.

Management has positioned the company to profit from present market opportunities such as the present crisis in the Middle East and rising

oil/gas prices and plans to accelerate its drilling operations as fast as prudent financing will permit. Jegeroil continues to acquire new prospects and also participates in joint ventures with other established oil and gas companies.

Jegeroil's current and projected revenues reflect escalating growth, but have not been updated to reflect current sharp price rises in both oil and gas. With a current undervalued market price, Jegeroil represents an excellent investment.

ROCHESTER, NH (AUG. 9) BUSINESS WIRE - In an effort to further extend its international direct sales, technical support and distribution services, Cabletron Systems Inc. (NYSE:CS) Thursday announced the opening of its Australian subsidiary -- Cabletron Systems, PTY.LTD.

The Australian subsidiary will provide Pacific Rim customers with a direct contact for the purchase of the company's full line of local area networking solutions, including transceivers, repeaters and bridges,

Remote LANVIEW network management software, diagnostic test instruments and the Multi Media Access Center (MMAC) -- an intelligent network hub that enables disparate media to be interconnected, producing one cohesive network.

''The addition of the Australian subsidiary to the Cabletron family allows us to establish a solid direct sales and service presence in a key market. With products like the MMAC becoming universally adopted, Cabletron will continue to expand to provide international customers with the level of service that our domestic customers have grown accustomed to,'' said Craig Benson, Cabletron's chairman and chief operating officer.

Cabletron Systems Inc., headquartered in Rochester, N.H., develops and manufacturers networking products based on its Integrated Network Architecture, a strategy which provides standards-based products and services necessary to build and manage a global, distributed platform of interconnected local area networks. The company currently has a worldwide installed base exceeding 1.3 million nodes.

Cabletron's common stock is traded on the New York Stock Exchange under the symbol CS. The company recently reported record revenue of $104.7 million and earnings of $22.3 million for the fiscal year 1990.

#90221b0639 08/09/1990 ~Business Wire

AMSTELVEEN, THE NETHERLANDS (AUG. 9) BUSINESS WIRE - On Friday, July 27 at Central Office, KLM signed the contract regulating the delivery of two Boeing 747-400F freighters in January and September 1994 respectively.

In addition, KLM has taken an option on two more dedicated cargo aircraft of this type. The order is worth approximately NLG 600 million.

Between now and 1995, KLM expects air cargo traffic to increase by about 8.5% every year. A similar annual development is anticipated for some years to come.

As a result of this growth expectation, the need for freighters on a number of routes has made itself felt. In order to meet this demand, KLM decided at the end of last year to purchase dedicated freighters for the first time since wide-body aircraft were introduced into the fleet.

For the record, this does not mean that KLM is abandoning its successful ''Combi concept'', implemented in 1975. On many routes, the Boeing 747-Combi will continue to be the aircraft most capable of achieving the

optimal balance between the demand for cargo and passenger capacity.

The transportation of airfreight is one of KLM's two core activities and was recently allocated its own corporate division, ''Cargo''.

The acquisition of these two freighters forms part of the considerable investment program upon which KLM Cargo has embarked, valued at NLG 1 billion. This program involves a significant expansion of cargo handling facilities at Schiphol Airport. In 1995, KLM will have at its disposal about 80,000 meters of floor surface for cargo handling purposes at Schiphol.

The arrival of the Boeing 747-400F and the expansion program underway at its homebase, will enable KLM to better gear its product and services to the requirements of the global air cargo market.

#90221b0640 08/09/1990 ~Business Wire

SAN DIEGO (AUG. 9) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Thursday released financial results for the second fiscal quarter ending June 30, 1990, and reported on progress in the clinical development of its two cardiovascular drugs in Phase 2 clinical trials.

Gensia reported a net loss of $3.2 million, or 29 cents per share compared with a loss of $2.4 million, or 34 cents per share in the 1989 second quarter. An initial public offering of 2.8 million shares of common stock in June 1990 increased outstanding shares to 13.1 million and raised net proceeds of approximately $28 million.

Interest income was $447,000 in the second quarter of 1990 compared with $108,000 in the second quarter of 1989.

Research and development expenses were $3 million in the 1990 second quarter and $1.9 million in the comparable 1989 period. General and administrative expenses were $619,000 and $562,000 in the 1990 and 1989 second quarters, respectively.

''The company believes it has a strong financial position to support its research and development programs,'' said David F. Hale, president and chief executive officer. The company's cash and cash equivalents balance was $43.6 million at June 30, 1990.

Gensia is currently conducting Phase 2 clinical trials with its lead product Arasine (acadesine, formerly ARA-100) in the United States, United

Kingdom and the Netherlands. Arasine is an intravenous drug under development by Gensia for use in hospitals for the treatment of acute cardiovascular ischemic disorders (caused by a lack of oxygenated blood in the heart's tissues).

In addition, Gensia will expand Phase 2 clinical testing of its ESA System currently underway in Germany, to the United States and United Kingdom. The ESA System is designed to enhance the diagnosis and evaluation of coronary artery disease through controlled, pharmacological stress of the heart.

''These trials are scheduled to begin in the fourth quarter of this year '' said Hale.

Gensia is a biopharmaceutical company formed to discover, develop, manufacture and market novel pharmaceutical products for the diagnosis and treatment of human diseases.

#90221b0641 08/09/1990 ~Business Wire

SAN DIEGO (AUG. 9) BUSINESS WIRE - Gensia Pharmaceuticals Inc. (NASDAQ:GNSA) Thursday announced the start of Phase 2 clinical trials with Arasine (acadesine, formerly ARA-100) in patients undergoing coronary artery bypass graft (CABG) surgery.

Four United States medical centers are initiating clinical trials, accoring to David F. Hale, president and chief executive officer.

''Based on preclinical studies, Gensia believes that Arasine may significantly reduce ischemic damage associated with CABG surgery and improve post-operative cardiac function,'' Hale said. ''These preclinical results, in addition to our previous Phase 1 and 2 clinical trials for safety and tolerance, have formed the basis for expanding our clinical program to patients undergoing CABG surgery.''

According to the American Heart Association, there were approximately 330,000 CABG surgeries performed in 1987 in the United States. CABG is performed to alleviate blockages in the coronary arteries generally caused by progressive atherosclerosis. Such blockages can lead to severe chest pain (angina) and in a large number of patients, death from heart attacks.

The objective of CABG surgery is to improve blood flow, relieve symptoms (angina) and prolong life.

During CABG surgery, the supply of blood to the heart is temporarily cut off, resulting in ischemia (lack of oxygenated blood to tissues) which may cause tissue damage in the heart and post-operative impairment of cardiac function. Gensia believes that Arasine, an intravenous drug, may reduce the tissue damage caused by ischemia and may improve cardiac function with the goal of improving patient outcome.

In pre-clinical research, Arasine has been shown to regulate and enhance adenosine release during ischemic events. Adenosine is a naturally occurring purine which, when released locally at the site of ischemia, is thought to play an important role in the body's natural cellular mechanisms for protection from ischemic damage.

The Phase 2 clinical trials on patients undergoing CABG will be ongoing for the remainder of the year.

Gensia is a biopharmaceutical company formed to discover, develop, manufacture and market novel pharmaceutical products for the diagnosis and treatment of human diseases.

#90221b0653 08/09/1990 ~Business Wire
FRAMINGHAM, MA (AUG. 9) BUSINESS WIRE - IG Laboratories (NASDAQ:IGLI) announced Thursday that it has signed an exclusive licensing agreement for the breakthrough fetal cell sampling technniques developed by Dr. Diana Bianchi and others at Children's Medical Center, Boston.

The technology has demonstrated the ability to collect fetal cell samples directly from a pregnant woman's blood rather than through the process of amniocentesis which poses a risk to the proprietary technology and will work with Dr. Bianchi's laboratory to develop methods for the broad application of the research. The Children's Medical Center has filed for patent rights covering the technology.

The new technique has the potential of testing for genetic defects in fetuses without the risk of spontaneous miscarriage associated with amniocentesis or chorionic villus sampling, the current methods used for fetal cell sampling. Currently, genetic screening is normally recommended only for women in high risk categories, particularly women over 35 years of age.

However, the majority of infants with genetic abnormalities are born to women who do not fall into the high risk categories and are therefore not tested. For example, over 80 percent of Down Syndrome births are to women under 35. The new process developed at the Children's Medical Center holds the potential that all pregnant women could be tested through genetic testing services offered by IG Laboratories.

Peter Lanciano, president of IG Laboratories stated, ''Dr. Bianchi's research has the potential of significantly expanding the use of prenatal testing by eliminating the risk associated with fetal cell sampling. We are very pleased to be the exclusive licensee of this critical new technology.'' Lanciano noted that several years of research would be needed before the technology would be generally available.

Dr. Bianchi's pioneering work, which was published in The Proceedings of The National Academy of Sciences in May, 1990, involved isolating fetal red blood cells from maternal blood.

She was then able to determine the sex of the fetus by examining the DNA contained in the fetal cells. The cells were obtained by a routine maternal blood sample that posed no risk to the fetus. It is believed

that these methods can be made applicable to testing for a broad spectrum of genetic disorders by combining this fetal cell separation technology with technology developed at IG Laboratories.

IG Laboratories, headquartered in Framingham, Mass., provides genetic testing services to hospitals, clinical laboratories, genetic centers, physicians and health maintenance organizations located throughout the United States. The company is focused on prenatal genetic testing that enables physicians to screen for and detect major genetic abnormalities.

NEW YORK (AUG. 9) BUSINESS WIRE - Overseas Shipholding Group, Inc. (OSG) Thursday reported that net income for the quarter ended June 30, 1990, increased to $18,822,000, or $.54 per share, from $13,696,000, or $.38 per share, for the second quarter of 1989.

For the first half of 1990, net income increased to $31,957,000, or $.92 per share, compared with $26,763,000 or $.74 per share, for the comparable 1989 period.

Gains from disposal of vessels amounted to $.31 per share in the first half of 1990, all in the second quarter, reflecting the sale of one 93,000 deadweight ton (dwt) tanker. This compares with $.04 per share from disposal of vessels in the first half ($.03 per share in the second quarter) of 1989.

Early in the third quarter, the company took delivery of a 121,000 dwt dry bulk carrier, completing its current 12-vessel newbuilding program.

OSG, one of the world's largest bulk shipping companies, owns and operates a fleet of 68 vessels aggregating 6.4 million dwt.

VALLEY FORGE, PA (AUG. 9) BUSINESS WIRE - Jerry L. Malis, chairman of the board and president of Valley Forge Scientific Corp. (NASDAQ:VLFG, VLFGW) (Boston Stock Exchange:VLF, VLFW), Thursday announced its revenue and earnings for the third quarter and the nine months ended June 30, 1990.

Malis commented that the statements of earnings for the three months and nine months ended June 30, 1990 are not necessarily indicative of results for the full year.

The increase in research and development expenses reflect increased expenditures on certain ongoing projects and new products which were not covered by funding agreements with the company's principal customer.

In the future, the company anticipates funding its research and development with current assets and revenue from operations. The company anticipates introducing certain products under development into the market in the suceeding three quarters.

Valley Forge Scientific Corp.

#90221b0672 08/09/1990 ~Business Wire

PLANO, TX (AUG. 9) BUSINESS WIRE - Eljer Industries, Inc. (NYSE: ELJ) Thursday reported second quarter earnings of $2.44 million, or 35 cents per share, compared with pro forma earnings of $2.95 million, or 42 cents per share in the second quarter of 1989.

Results for 1989 are reported on a pro forma basis due to the company's spin off from Household International in April 1989. Revenue for the second quarter was $114.9 million, up 8 percent from 1989's second quarter revenue of $106.1 million.

For the first six months of 1990, earnings were $3.52 million, or 50 cents per share, compared with earnings of $4.44 million, or 63 cents per share in the year-ago period. Revenue for the first half of 1990 was $224.0 million, an 8 percent increase over revenue of $207.0 million in the first six months of 1989.

Scott Arbuckle, president of Eljer said, ''While second quarter earnings are down slightly from last year, we are pleased to report increased sales despite the current economic softness, with housing starts down 17 percent from the prior year. Although sales in our traditional plumbingware business reflect the depressed industry conditions, we made solid market share gains in other areas of our plumbingware business and achieved significant sales increases in our retail fixture product lines.

''Additionally, while the markets for heating, ventilating and air conditioning (HVAC) products in North America are weak, Eljer's HVAC sales and earnings increased significantly during the quarter. The HVAC North America (Selkirk/Dry) operation significantly expanded its sales through the introduction of new products and market share gains. Selkirk Europe continues to set record sales and earnings for the sixth consecutive year.''

The company said the quarter's results were impacted by significant scrap costs caused by low yields at its Salem, Ohio, cast iron plant as the company brings its new automated foundry process on-line. Also impacting second quarter earnings were significant increases in bad debt expense related to the economy. The company expects to continue to increase bad debt reserves due to the impact of this weak market on accounts receivable. Other factors affecting the second quarter included increased selling costs and increased interest expense due to a higher level of short-term borrowings.

''There are no present indications that housing starts will pick up by year-end. Eljer's earnings in the second half will be somewhat dependent on housing related markets and accounts receivable issues arising from 1989 programs and the 1990 economy. The plumbingware market share gains and continued strength in our HVAC business in North America and Europe have tended to balance the impact of the plumbing market weakness,'' Arbuckle concluded.

Eljer Industries, Inc. is a leading manufacturer and marketer of high-quality building products, including plumbing, heating and ventilating products for residential and commercial construction, remodeling and repair, and do-it-yourself markets in North America and Europe.

PEABODY, MA (AUG. 9) BUSINESS WIRE - PictureTel Corp. (NASDAQ:PCTL) announced Thursday that co-founder Brian Hinman - former vice president of engineering - has assumed the newly created position of vice president of corporate business development in anticipation of his planned departure to form a new venture.

Under the terms of an agreement with PictureTel, Hinman will leave the company during the first quarter of 1991. Hinman's planned company will design and manufacture various products - some of which will be based on technology licensed to him by PictureTel - but will not compete with PictureTel's products.

In his new role, Hinman will report to Les Strauss, PictureTel's chief financial officer. Together, they will evaluate numerous business and technical opportunities that are presented to PictureTel.

The company also announced that Mark Mayes will succeed Hinman as vice president of engineering. Mayes joins PictureTel from the Apollo Division of Hewlett-Packard where he was senior director of workstation development and was responsible for low-end and mid-range workstation product

development.

Prior to Apollo, Mayes was chief engineer and technical director with LTX Corp. where he developed advanced semiconductor test systems. Mayes has also held positions with Whitesmiths Ltd. and Genrad. In addition, Mayes served as assistant professor of computer science at Boston University where he graduated summa cum laude.

PictureTel Corp. develops, manufactures and markets software-upgradeable visual telecommunication products for use with public and private digital networks. It is the world's leading videoconferencing systems and codec vendor based on shipments during the last 18 months.

FORT WORTH, TX (AUG. 9) BUSIENSS WIRE - Union Pacific Resources Co. (UPRC) of Fort Worth, the oil, gas and minerals subsidiary of Union Pacific Corp. (NYSE:UNP) of Bethlehem, Pa., Thursday announced test results of a Gulf of Mexico gas discovery on South Timbalier Block 214 South Addition, offshore Louisiana.

The OCS-G 7773 No. A-7 Well, which is the first well on Block 214, tested at a rate of 15 million cubic feet (mmcf) of gas and 72 barrels of condensate per day from 48 feet of perforations in Pliocene sands. The test was on 19/64 inch choke with 6,750 pounds per square inch flowing tubing pressure.

Union Pacific Resources Co., the operator, has a 25 percent working interest, as does Pogo Producing Co. of Houston and Oryx Energy Co. of Dallas. Wolverine Exploration Co. of Fort Worth has a 23.125 percent working interest and Ensco Resources Company of Houston a 1.875 percent interest.

The combined test results from six wells in the South Timbalier field show the capability of producing 83 mmcf of gas and 360 barrels of condensate per day when the platform, located approximately 100 miles southwest of New Orleans, comes on stream in late August.

BIRMINGHAM, AL (AUG. 9) BUSINESS WIRE - River Oaks Bancshares has signed a definitive agreement to be purchased by Central Bancshares of the South Inc. (NASDAQ/NMS:CBSS), for $44 million in cash and preferred stock, executives involved in the transaction announced Thursday.

The transaction will affiliate River Oaks into Houston-based Compass Bancshares, a holding company owned by $4.8 billion asset Central, headquartered in Birmingham.

Central's acquisition of River Oaks Bancshares marks an important advance toward the holding company's goal of becoming the premier, statewide, personal-service bank in Texas.

Compass Bancshares will emerge from this transaction and another pending acquisition with total assets in Texas of $853 million, compared with $377 million in assets today.

River Oaks Bancshares is comprised of two principal subsidiaries -- River Oaks Bank, Houston's fourth largest, with $403 million in total assets, $355 million in deposits and $24.5 million in capital, and River Oaks Trust Co. with $686 million in trust assets under administration, $4 million in annual revenue and capital at $6.3 million.

According to Central Bancshares Chairman and Chief Executive Officer Harry Brock, acquiring River Oaks furthers the holding company's Texas strategy.

Under the agreement, Compass will purchase all the outstanding shares of River Oaks for $17.6 million in cash and $26.4 million in stated value of Central Bancshares preferred stock having a coupon rate of 8 percent. Up to $3 million of the purchase price will be paid into an escrow account subject to the final disposition of certain loans and real estate properties.

The transaction, which has been approved by both holding company's boards of directors, is subject to approval by the appropriate regulatory agencies and shareholders of River Oaks. Lyon is the major shareholder, owning 62 percent of the stock, and will vote his shares in favor of the merger. The transaction is expected to be completed early in 1991.

River Oaks will be the ninth Texas bank to become a part of Compass Bancshares including the acquisition of $50 million-asset Plaza National Bank in Dallas. With the addition of River Oaks, Compass will serve Texas from 12 offices.

Shares of Central Bancshares of the South Inc. common stock are traded in the NASDAQ national market system under the symbol CBSS.

WORBURN, MA (AUG. 9) BUSINESS WIRE - Easel Corp. Thursday announced the initial public offering of 1,600,000 shares of its common stock at $8.00 per share.

Of the shares being offered, 900,000 are offered by the company and 700,000 shares are offered by certain stockholders.

The offering is being managed by Robertson, Stephens & Co. and Donaldson Lufkin & Jenrette Securities Corp. Net proceeds will be used for general corporate purposes, working capital and possible acquisitions.

Easel Corp. is listed on the NASDAQ National Market System under the symbol ''EASL.''

The company develops, markets and supports software products that enable programmers to develop business applications featuring graphical user interfaces. The company's EASEL product is a graphical application development environment that enables programmers to design, prototype and develop the personal workstation-based graphical user interface and communications components of these applications.

Applications developed with EASEL provide the end user with easy-to-use graphical displays and permit the user's IBM personal computer, PS/2 or compatible to work in cooperation with other computing resources including mainframes, minicomputers, servers and local- and wide-area networks. The company's software products and the applications developed using these products currently run on either the DOS or OS/2 Presentation Manager operating systems.

The company has announced support for Microsoft Windows and plans to release a version of the EASEL product in late 1990 which can be used to generate Windows applications.

NEW YORK (AUG. 9) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) announced Thursday that it is in the process of drilling an exploration well to test the Puli Anticline on its Puli concession area in Colombia, South America.

The Puli concession in which the company owns 45 percent working interest, comprises 94,000 acres of land in the Middle Magdalena River basin 50 air miles west of Bogota.

The Puli anticline prospect is located 15 KM Northeast of the company's Toqui-Toqui oil field which is the only heretofore proven oil field in the Puli concession.

The selection of the drill site in the Puli anticline area was based on a detailed seismic study indicating the existence of potential major structures at depths of 3,300 ft. and 5,000 ft.

American International Petroleum Corp. is engaged in refining, oil and natural gas exploration, production and transportation, and marketing activities in Louisiana, Texas and Kentucky, as well as Colombia, South America.

CORAL GABLES, FL (AUG. 9) BUSINESS WIRE - BLOC Development Corp. (NASDAQ:BDEV) Thursday announced record quarterly revenues, pre-tax and net earnings.

For the three months ended June 30, 1990, revenues rose 230 percent to $7.13 million as compared to $2.16 million for the comparable period in 1989.

Pre-tax earnings for the second quarter of 1990 jumped 272 percent to $1.21 million compared to $325,000 and net earnings surged 319 percent to $808,000 (4 cents per share on 19.8 million shares) for the current period compared to $193,000 (1 cent per share on 15.8 million shares) for the comparable period in 1989.

For the six months ended June 30, 1990, revenues, pre-tax earnings and net earnings were $12.6 million, $2.16 million and $1.48 million (8 cents per share on 19.3 million shares) compared to $3.68 million, $334,000 and $199,000 (1 cent per share on 15.3 million shares) for the same period last year.

The company's second quarter 1990 revneues and net earnings rose 30 percent and 21 percent, respectively, from first quarter 1990 levels. These gains reflect increased sales of 14 PC software titles in national distribution, continued corporate licensing of the F3 Forms Automation System, initial sales of the F3 ProDesigner and Accountant Inc. Professional software products, expanded TigerSoftware circulation in excess of 3 million catalogues (including computer magazine inserts) and efforts of the company's business automation group.

Based in Coral Gables, Fla., BLOC develops, publishes and markets business personal productivity and information management software products for the IBM PC, PS/2, IBM compatible and Apple MacIntosh markets. In addition the company provides business automation services to small and mid-sized businesses.

WALTHAM, MASS. (AUG. 9) BUSINESS WIRE - Meditrust (NYSE:MT) announced Thursday the completion of permanent mortgage financing of approximately $40,000,000 for six long-term care facilities.

With a total of approximately 750 beds, the six recently completed facilities are located in Bourne and New Bedford, Massachusetts and Farmington, Waterford, Bridgeport and Bristol, Connecticut.

In addition, Meditrust announced the execution of development agreements for the financing of three additional healthcare facilities representing approximately $22,000,000 of investments. The three development/loan agreements provide for Meditrust to fund the mortgage financing upon completion for a 170 bed long-term care facility in Reno, Nevada, a 120 bed long-term care facility in Hempsfield Township, Pennsylvania and a 60 bed rehabilitation hospital in Kokomo, Indiana.

Meditrust, with headquarters in Waltham, Massachusetts, is the nation's largest Healthcare Real Estate Investment Trust, holding investments in 105 healthcare facilities with 17 different operators in 24 states totaling approximately $750 million of investments.

The company specializes in the sub-acute sector of the healthcare industry including investments in rehabilitation hospitals, long-term care facilities, alcohol and substance abuse treatment centers, psychiatric hospitals and retirement living communities. A.M.A. Advisory Corp., a Delaware Corporation is engaged as the Advisor to Meditrust.

CONCORD, NH (AUG. 9) BUSINESS WIRE - Community Bankshares Inc. (NASDAQ: CBNH) Thursday announced net income of $472,000, or $.28 per share, for the quarter ended June 30, 1990.

These earnings, combined with the net income of $242,000, or $.14 per share, reported during the prior quarter, reduces the company's loss for the fiscal year ended June 30, 1990 to $7,354,000, or $4.38 per share. For the quarter ended June 30, I989, the company reported a loss of $1,424,000, or $.84 per share, but earned $194,000, or $.11 per share, for thc fiscal year ended June 30, 1989.

As previously announced, the company's loss for this fiscal year resulted from providing $10,300,000 into the allowance for possible loan losses during the first two quarters. An additional $100,000 was provided to the allowance during each of the third and fourth quarters of the year, bringing the total amount provided for the year to $10,500,000.

The prior year's provision to the allowance during the fourth quarter and for the year amounted to $3,132,000 and $4,0I7,000, respectively.

At June 30, 1990, the company's allowance for possible loan losses was $6,264,000 after net charge-offs of $2,406,000 for the fourth quarter. The allowance represented 2.80% of total loans and 67.9% of non-performing loans, which amounted to $9,222,000 at June 30, 1990. Total non-performing assets at June 30, 1990 stood at $18,727,000. Stockholders' equity totalled $20,370,000 at June 30, 1990, or 7.02% of total asset+ of $290,299,000.

The company's net interest margin was 2.94% for the fourth quarter and

2.93% for the most recent fiscal year. Net interest margin for the comparable periods of the prior year was 2.99% and 3.43%, respectively.

Total interest and dividend income during the fourth quarter decreased by 2.1% over the same period of the prior year, but increased by 3.9% for the fiscal year. Non-interest expense increased by 3.0% in the fourth quarter over the same period of the prior year, and by 13.2% for the fiscal year. This increase was due primarily to the increased costs of resolving non-performing assets and of maintaining real estate acquired through foreclosure.

Community Bankshares Inc. is traded on the NASDAQ National Market System under the symlol ''CBNH''. The company's principal subsidiary, Concord Savings Bank, is a member of the Federal Deposit Insurance Corp. and offers a wide range of consumer and commercial financial services throuqhout New Hampshire with three offices in Concord, N.H.

#90221b0739 08/09/1990 ~Business Wire

DUBLIN, Ohio (AUG. 9) BUSINESS WIRE - ACCEL International Corp. today announced continued growth in earnings for both the second quarter and the first half of 1990 compared with the same periods in 1989.

Net income for the three months ended June 30, 1990, was $1,832,000, compared with $1,490,000 for the second quarter of 1989, representing an increase of 23.0 percent. Per share earnings for the second quarter of 1990 improved to 37 cents from the comparable period's 29 cents. All per share figures have been adjusted for the 5 percent common stock dividend paid on June 4, 1990.

Gross written premiums for the quarter ended June 30, 1990, were $36,920,000, compared with $28,514,000 for the same quarter in 1989, representing an increase of 29.5 percent. Second quarter gross revenues represent the highest quarterly revenue figures in ACCEL's history.

For the six months ended June 30, 1990, net income was $3,573,000, compared with $2,722,000 for the same period in 1989, representing an increase of 31.3 percent. Net income per share was 71 cents and 53 cents for the six months ended June 30, 1990 and 1989, respectively.

Gross written premiums for the six months ended June 30, 1990, were $61,129,000 as compared with $51,136,000 for the six months ended June 30, 1989, representing an increase of 19.5 percent.

R. Max Williamson, chairman, president and chief executive officer of ACCEL, reported that, ''Second quarter net income was consistent with the 1990 profit objectives established by ACCEL's management. Furthermore, the positive second quarter results strengthen the solid earnings growth pattern that ACCEL has demonstrated in recent years.''

He also noted that ACCEL's 29 percent premium revenue growth in the second quarter of 1990, compared with 1989, favorably reflected on ACCEL's continued growth and diversification in both the medical product segment and the property casualty product line. He commented that, ''With the year to date results significantly ahead of last year we are encouraged that the results for the remainder of 1990 will continue to be favorable.''

ACCEL International Corp. is a Dublin-based holding company that provides specialty insurance products and services through its life and casualty subsidiaries, operating throughout the United States.

FORT WORTH, TX (AUG. 9) BUSINESS WIRE - Union Pacific Resources Co. (UPRC) of Fort Worth, the oil, gas and minerals subsidiary of Union Pacific Corp. (NYSE:UNP) of Bethlehem, Pa., Thursday announced test results of a Gulf of Mexico gas discovery on South Timbalier Area South Addition, Block 214 offshore Louisiana.

The OCS-G 7773 No. A-7 Well, which is the first well on Block 214, tested at a rate of 15 million cubic feet (mmcf) of gas and 72 barrels of condensate per day from 48 feet of perforations in Pliocene sands. The test was on 19/64 inch choke with 6,750 pounds per square inch flowing tubing pressure.

Union Pacific Resources Co., the operator, has a 25 percent working interest, as does Pogo Producing Co. of Houston and Oryx Energy Co. of Dallas. Wolverine Exploration Co. of Fort Worth has a 23.125 percent working interest and Ensco Resources Co. of Houston a 1.875 percent interest.

The combined test results from six wells from UPRC's platform on South Timbalier Block 198, show the capability of producing 83 mmcf of gas and 360 barrels of condensate per day when the platform, located approximately 100 miles southwest of New Orleans, comes on stream in late August.

COLUMBUS, OH (AUG. 9) BUSINESS WIRE - Goal Systems International Inc. Thursday announced that B. Wade Monroe, 48, has accepted the position of vice president and chief financial officer with the company.

Monroe, previously CFO for Computerland Corp., brings more than 20 years of experience in finance, administration, treasury, planning, systems, public reporting and controllership with organizations including ITT, PepsiCo, UCCEL and Datapoint. He is expected to join the company on or around Sept. 1.

''As a key financial officer with other fast-growing technology companies, Wade has consistently developed systems and solutions which supported the revenue-producing divisions of the business, thus supporting further growth,'' said Goal President and CEO David C. Wetmore. ''At the same time, he has instituted the controls necessary to monitor this growth while communicating on a regular basis with outside investors and analysts. He is exactly the kind of person we were looking for when we commenced our search more than three months ago, and we are looking forward to having him on board.''

Goal Systems (NASDAQ:GOAL) designs, develops and markets software products grouped into two product lines. The DCM Division consists of a broad range of systems software products for IBM and compatible mainframe computers which allow users to manage, automate, monitor and analyze the use, cost and performance of their data processing resources. The Information Technology Division (ITD) product line consists of performance support products including computer-based training and computer-based reference software, along with associated courseware and professional services.

The company reported revenue of $86.6 million for its fiscal year ended Jan. 31, 1990.

NEW ORLEANS (AUG. 9) BUSINESS WIRE - Freeport-McMoRan Oil & Gas Co. (NYSE:FMP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), announced Thursday that, as operator, it has initiated natural gas production at East Cameron Block 311 with sales averaging 35 million cubic feet of natural gas per day.

Six successful development wells have been drilled and completed in a Pleistocene sand from the FMP East Cameron platform, located offshore Louisiana in the Gulf of Mexico approximately 198 miles southwest of New Orleans in 200 feet of water.

Working interest in the 5,000-acre East Cameron Block 311 is owned 89.3 percent by FMP; 6.7 percent by Continental Land & Fur Co. Inc.; and 4 percent by others.

FMP explores for, develops, and produces oil and natural gas offshore and onshore in the United States, where it is one of the largest independent oil and natural gas companies in terms of production and proved reserves. Exploration activities are also conducted in the international arena.

HOUSTON (AUG. 9) BUSINESS WIRE - Serv-Tech Inc., (NASDAQ:STEC) reported second quarter net income of $987,000, more than double the $444,000 net income before an extraordinary credit reported for the same period last year.

Net income per share was 22 cents in the second quarter 1990, 57 percent above the 14 cents per share, before extraordinary credits, reported for the second quarter 1989.

Including extraordinary credits for tax benefits from net operating loss carryforwards, net income was $675,000, or 21 cents a share, for the quarter ended June 30, 1989. There are no extraordinary credits available in 1990. Average shares outstanding for the second quarter increased to 4,444,982 at June 30, 1990, from 3,409,996 a year earlier.

Revenues were $10,277,000 for the second quarter 1990, compared with $10,353,000 for the period ended June 30, 1989. For the six months ended June 30, 1990, Serv-Tech had revenues of $21,062,000, an increase of 27 percent compared with $16,568,000 for the first six months of last year.

Net income the first six months 1990 was $2,009,000, or 45 cents per share about double the $1,025,000, or 32 cents per share, in the first half of 1989. Giving effect to the extraordinary net operating loss carryforwards in the first half of 1989, net income was $1,575,000 or 49 cents per share.

Richard W. Krajicek, chairman of the board, said the company's performance during the second quarter of 1990 was favorably affected by continued strong demand for refinery maintenance services, increased size of jobs performed and higher gross profit margins, resulting from additional supervisory personnel and improved control systems added in 1990.

ST. CHARLES, MD (AUG. 9) BUSINESS WIRE - Interstate General Company, L.P. (ASE:IGC) announced Thursday that its managing general partner has authorized a quarterly cash distribution of $.20 per Class A unit, payable on September 1, 1990, to unithold- ers of record on August 21, 1990.

This is the fourth consecutive quarter that IGC has paid a $.20 distribution, following three quarters of $.18 distribu- tions. As a publicly traded partnership, IGC's distributions are similar to dividends paid by stock companies.

Founded in 1957, IGC is a diversified real estate organization specializing in community development, homebuilding, invest- ment properties and management services. Listed on the American and Pacific stock exchanges, the company is a master limited partnership that first issued units to the public in February 1987.

APPLETON, WI (AUG. 9) BUSINESS WIRE - Air Wis Services Inc., Thursday reported operating revenues of $53,311,000 for the second quarter of 1990, an increase of 18 percent from the same 1989 period.

Net income was $699,000 for the period, or 8 cents per share. This compares with net income of $1,638,000 or 18 cents per share for the prior year's second quarter. All per share amounts have been adjusted to reflect a 10 percent stock dividend declared in May 1989 and paid the following month.

Aspen Airways Inc. was acquired by Air Wis Services on April 30 of this year. Aspen results for May and June have been included along with those of Air Wisconsin Inc. for the second quarter. Aspen operating revenue was $2,968,000 and its net operating loss was $1,789,000, somewhat higher than expected. As a result of the loss at Aspen, net income for the period was reduced by 13 cents per share. The return of excess aircraft and staff reductions are expected to shrink losses at Aspen over the balance of 1990, leaving the company well-positioned to take full advantage of the 1991 skiing season.

Revenue passenger miles (RPMs) rose 10 percent in the quarter to 125 million while available seat miles (ASMs) climbed 16 percent to 268.5 million, resulting in a load factor decrease to 46.6 percent compared to 48.9 percent a year ago. Aspen accounted for 4.8 million RPMs and 10.5 million ASMs during the two months under Air Wis Services ownership.

Net income for the first six months of 1990 was $2,069,000 or 23 cents per share, almost identical to the $2,061,000 or 23 cents per share earned during the first half of 1989.

Air Wis Services Inc. is a publicly-owned company trading on the OTC National Market System under the symbol ARWS.

RENO, NV (AUG. 9) BUSINESS WIRE - Sierra Pacific Resources (SPC), a Reno-based diversified utility holding company, Thursday announced it has determined not to proceed with further development of the Thousand Springs Project planned for construction in Elko Co., Nevada, which effectively terminates the project.

This will result in an after-tax charge of approximately $35 million against SPR's 1990 earnings.

SPR is the project manager of, and largest participant in, this independent power project, which was to be built and operated by a group of non-utility companies to produce wholesale electricity for sale in the Western states.

SPR's position from the beginning has been that no Thousand Springs generating units would be constructed unless firm long-term purchase power agreements had been signed for the project's electricity.

While purchase proposals have been submitted to some potential buyers in the Western states, no firm contracts have yet been obtained, and this continued market uncertainty led the company to drop its financial commitment to the project.

Austin W. Stedham, chairman of SPR, stated, ''Significant changes occurring in 1990 have pursuaded us that, although Thousand Springs is a sound concept for the future energy market, it is no longer financially feasible for us to go forward with the project at this time.

''We regret this project, which could have provided many jobs and economic benefits for our home state, must be shelved, but we must adapt to today's market coonditions.''

In the past few weeks, four other corporations announced withdrawal from the Thousand Springs Project. These were: Bonneville Pacific Corp.; Foster Wheeler Energy Corp.; The Pittsburg & Midway Coal Mining Company; and Westinghouse Electric Corp.

NEW YORK (AUG. 9) BUSINESS WIRE - Charles L. White has been named Vice

President, Counsel/Cable in the Law Department of Viacom International Inc., it was announced Thursday by Edward N. Schor, Senior Vice President, General Counsel/Communications of the Company.

In this capacity, Mr. White will provide counsel to Viacom Cable on legal and regulatory matters. Viacom Cable owns and operates 14 cable systems, serving more than 1 million basic customers.

In making the announcement, Mr. Schor said, ''Charles has extensive experience in legal and regulatory issues, such as regulatory compliance, involving the cable industry. I am confident that his strong background will enable him to make valuable contributions to Viacom.''

Prior to joining Viacom, Mr. White had been Vice President and Counsel for Paragon Cable Manhattan since 1987. He also served as Assistant Counsel with Manhattan Cable Television, Inc. from 1984 to 1987.

Previously, Mr. White was an Associate with Webster & Sheffield for four years and a Law Assistant at the New York State Supreme Court: Appellate Division.

Mr. White received his J.D. from New York University School of Law in 1977 and his A.B. from Princeton University in 1972.

Viacom International Inc. is a diversified communications and entertainment company headquartered in New York City. Viacom Inc., the holding company parent of Viacom International Inc., is an approximately 84% subsidiary of National Amusements, Inc., a closely-held corporation which owns and operates approximately 650 movie screens in 14 states and England.

#90221b0786 08/09/1990 ~Business Wire

MOUNT AIRY, NC (AUG. 9) BUSINESS WIRE - Workmen's Bancorp Inc. (NASDAQ: WRKB) Thursday reported that net income for the quarter ended June 30, 1990 was $814,809, or 50 cents a share compared to $202,706 for the quarter ended June 30, 1989.

Net income for the six month period ended June 30, 1990 was $1,697,671, or $1.05 per share compared to $821,914 for the year earlier. Workmen's principal subsidiary, Workmen's Federal Savings Bank, converted from a mutual to a stock savings bank and was acquired by Workmen's Bancorp on Jan. 10, 1990.

Commenting on the results, Thomas M. Faw, president and chief executive officer of Workmen's Bancorp, indicated that earnings for the six months were marked by continued increase in net income attributable to an increase in the Savings Bank's net interest income.

''Net interest income after provision for loan losses totaled in excess of $2,208,855 for the three months ended June 30, 1990, and in excess of $4,282,747 for the six months ended June 30, 1990 representing increases of $710,346 and $1,239,809, respectively, over the figures recorded for the comparable periods in 1989,'' Faw said.

As of June 30, 1990, Workmen's Bancorp had total assets of $247.6 million, an increase of $5.2 million, or 2.1 percent over that recorded on Dec. 31, 1989.

''Between Dec. 31, 1989, and June 30, 1990, the Savings Bank increased its investment securities by approximately $6 million,'' Faw said. ''During that same period, deposits increased from $204.2 million to $209.4 million while loans receivable increased from approximately $193.8 million to $196.9 million,'' he added.

At Dec. 31, 1989, the retained earnings of the Savings Bank amounted to approximately $15.5 million; at June 30, 1990, the retained earnings of Workmen's Bancorp amounted to $17.2 million and the total stockholder equity of Workmen's Bancorp amounted to $32.2 million. ''At June 30, 1990 the total capital Workmen's Bancorp was almost 13 percent of total assets '' Faw added.

Workmen's Bancorp Inc. is a unitary savings and loan holding company headquartered in Mount Airy. The holding company's subsidiary, Workmen's Federal Savings Bank, operates five retail banking offices; two in Mount Airy and one each in Sparta, Pilot Mountain and King, N.C.

NEW YORK (AUG. 9) BUSINESS WIRE - Playboy Enterprises Inc. announced Thursday that the lawsuit filed by the Keith Haring Estate against the company and others regarding copyright infringement has been settled. The settlement did not involve any payment of money by either party.

The dispute involved illustrations that Playboy magazine had commissioned the late artist to create. In spring 1990, Playboy's art publishing subsidiary, Special Editions Ltd. (SEL), in partnership with American Portfolio Inc., reproduced and began marketing four illustrations as

limited-edition silkscreen prints.

Under the settlement, SEL will continue to offer for sale two of the images and will offer additional Haring works through its partnership with American Portfolio. Playboy voluntarily agreed to discontinue selling two images from the original set of four illustrations. To settle Playboy's countersuit, the Haring Estate agreed to stop selling and to turn over to SEL its inventory of t-shirts bearing a Haring illustration (''Earth Man'') that was published in Playboy magazine in 1986 and is one of the illustrations SEL will continue to sell as a limited-edition print.

In 1988, the company formed Special Editions Ltd. to manage Playboy's corporate art collection and to market selected works. Since then, Special Editions has formed a number of joint-venture agreements to publish high-quality limited-edition graphics of works by such artists as Andy Warhol, Ed Paschke, Roger Brown, Alberto Vargas and Patrick Nagel. The prints and posters are sold in more than 5,000 fine-art galleries in North America, Europe and Asia. The retail price of the reproductions range from $35 to $300 for posters and $350 to $1,200 for signed, limited edition prints.

#90221b0819 08/09/1990 ~Business Wire

CONCORD, NH (AUG. 9) BUSINESS WIRE - Eastern Utilities Associates (EUA) testified today before the New Hampshire Public Utilities Commission (PUC) that it would ''guarantee'' $750,000 per year in reduced rates and other customer assurances if the proposed acquisition of UNITIL Corp. (UNITIL), is approved by the PUC. UNITIL is the parent company of Concord Electric Co. and Exeter & Hampton Electric Co.

On the first day of hearings on the proposed merger, John R. Stevens, president of EUA, testified: ''We will absolutely guarantee savings which will have the immediate effect of lowering the electric bills of Concord Electric's and Exeter & Hampton's retail customers. We will file such a rate decrease within 30 days of the completion of the merger.''

Stevens based the savings on:

1) EUA's acceptance of a 12.5 percent cost of equity which is dramatically lower than the current costs of Concord Electric's and Exeter & Hampton's, translating into guaranteed savings of $500,000 per year; and

2) Guaranteed savings of $250,000 per year resulting from operational efficiencies and synergies.

In addition, EUA would provide UNITIL Power with a long-term, reliable power supply that would eliminate UNITIL's reliance on short-term power re sources. Stevens agreed to submit a plan to meet this goal to the PUC for its approval before seeking regulatory approval from the Federal Energy Regulatory Commission.

Stevens assured the commission that electricity from EUA Power Corp., which has a 12.1 percent interest in the Seabrook Nuclear Power Station, ''will not be sold or made available to UNITIL unless approved by the PUC and is the best option available.''

Stevens offered further assurances that EUA Power would not adversely impact customers. He cited previous agreements, before EUA Power was formed, with both Rhode Island and Massachusetts officials to insulate EUA's retail customers in those states should EUA Power fail to meet its financial obliga tions.

EUA is a Boston-based investor-owned holding company, whose shares are traded on the New York and Pacific Stock Exchanges. Subsidiaries are Blackstone Valley Electric Co., Eastern Edison Co., EUA Cogenex Corp., EUA Energy Investment Corp., EUA Ocean State Corp., EUA Power Corp., EUA Service Corp., Montaup Electric Co. and Newport Electric Corp. Together the companies are known as the EUA System. The EUA System provides electric service to approximately 294,000 customers in Massachusetts and Rhode Island.

#90221b0822 08/09/1990 ~Business Wire

NEWARK, N.J. (AUG. 9) BUSINESS WIRE - New Jersey Bell filed a plan with the state Board of Public Utilities Thursday (Aug. 9) to provide equipment tht will be used with the statewide 911 Enhanced (911E) emergency telecommunications system currently under development.

Scheduled for completion in 1992, the 911E system requires special equipment located at each Public Safety Answering Point (PSAP).

This equipment, which will be available for monthly lease or sale, consists of a control console and units that display the calling telephone number and the name and address associated with that number.

When an emergency call is received at PSAP, officials will press a single button on the console to route the call automatically to the police, fire or ambulance unit that serves the caller's area.

''New Jersey Bell expects to be a primary supplier of this 911E equipment '' said 911E product manager John DePaola. ''Many municipalities have told us that they want to obtain both 911E network service and the on-premise equipment to be used in conjunction with the service from one source.

''Although New Jersey Bell is not required to supply the associated equipment, the company believes it can provide a competitive alternative to other vendors,'' DePaola said.

New Jersey Bell's monthly lease plan includes installation and maintenance of the 911E equipment. Customers who purchase their equipment also may obtain maintenance from New Jersey Bell.

The costs of installing, operating and maintaining the 911E equipment at each PSAP will be paid by the municipality or county, while the state will pay for the 911E network service.

The number and locations of the PSAPs must be approved by the state Office of Emergency Telecommunications Services. Towns may elect to join neighboring communities to form one answering location, while a county may decide to establish a single PSAP to take calls from all its residents.

''When it becomes available statewide, the new 911E telecommunications service will enable all New Jerseyans to get faster, more effective emergency help,'' DePaola said. ''That ability, however, will depend on equally fast and efficient maintenance and service restoration if a problem arises.

''By providing the PSAP equipment as well as the service, New Jersey Bell will be in a good position to keep the 911E system running smoothly.''

#90221b0832 08/09/1990 ~Business Wire

NEW YORK (AUG. 9) BUSINESS WIRE - At the Annual Meeting of Stockholders

of Insituform of North America, Inc. (''INA'') (NASDAQ:INSUA) held here on Tuesday, the stockholders reelected all incumbent Class A and B Directors, and filled the sole vacancy on the board with the election of Douglas K. Chick.

Chick is a member of the group of controlling stockholders of INA. The incumbent Class A directors reelected were: Paul A. Biddelman, Managing Director, Corporate Finance Department, Drexel Burnham Lambert Incorporated and Alfred B. DelBello, Chairman of DelBello-Lynch Associates.

The incumbent Class B directors reelected were: Brian Chandler, a member of the group of controlling stockholders of INA; INA Chairman and Chief Executive Officer, James D. Krugman, partner in the law firm of Krugman, Chapnick & Grimshaw; Joseph Pellegrino, President of Langford Capital Corp., and Silas Spengler, partner in the law firm of Spengler Carlson Gubar Brodsky & Frischling.

An amendment to the Company's 1983 Stock Option Plan increasing the number of shares issuable pursuant to the exercise of options granted under the Stock Option Plan from 750,000 shares to 1,000,000 shares of the Class A Common Stock was also approved by stockholders. The stockholders voted to adjourn the meeting to the offices of Krugman, Chapnick & Grimshaw, Park 80 West - Plaza Two, Saddle Brook, New Jersey, on Friday, August 24, 1990 at 10:00 A.M., local time, for the purpose of considering and taking action upon a proposal to amend the Company's Certificate of Incorporation so as to increase the number of authorized shares of Class A Common Stock from 8,750,000 shares to 25,000,000 shares and to increase the number of authorized shares of Preferred Stock from 500,000 shares to 2,000,000 shares, and to transact such other business as may properly come before the meeting or any adjournment or adjournments thereof.

Based in Memphis, Tenn., Insituform of North America, Inc. provides state-of-the-art techniques for the reconstruction of deteriorated pipelines utilizing the InsituformR Process.

In addition, INA furnishes its present network of thirteen United States licensees with the InsitutubeR, resins and other related products used by them in the rehabilitation of pipeline systems throughout the country, and is a center of research and development for trenchless pipeline rehabilitation processes.

Through a wholly-owned subsidiary, NU-PIPE, Inc., INA plans to introduce the NuPipeR Process later this year.

INA serves the needs of America's infrastructure.

#90221b0834 08/09/1990 ~Business Wire

NEW YORK (AUG. 9) BUSINESS WIRE - Grey Advertising Inc. (OTC) Thursday reported second quarter gross billings of $784,098,000 compared with $712,342,000 for the same period in 1989.

Income from commissions and fees was $117,556,000 vs. $106,798,000. Second quarter income rose to $5,160,000 compared with $4,940,000.

Primary earnings per common share were $3.96 vs. $3.73, for the same period in 1989. On a fully diluted basis, second quarter earnings per common share were $3.82 as compared with $3.59.

For the first six months of 1990, gross billings rose to $1,479,686,000 from $1,339,109,000 for the same period in 1989. Commissions and fees income increased to $221,842,000 from $200,766,000; net income was $7,968,000 vs. $7,447,000.

Primary earnings per common share for the six months of 1990 was $6.04 compared with $5.50. Earnings per common share, on a fully diluted basis, amounted to $5.84 vs. $5.29.

Grey Advertising Inc.
and consolidated subsidiary companies
consolidated condensed statement of income

	Three Months Ended June 30 (a)	
	1990	1989
Gross billings (b)	$ 784,098,000	$ 712,342,000
Commissions and fees	117,556,000	106,798,000
Income before taxes on income	11,219,000	11,383,000
Provision for taxes on income federal, foreign, state and local	6,059,000	6,443,000
Net income	$ 5,160,000	4,940,000
Net income per common share (c)		
Primary	$ 3.96	$ 3.73
Fully diluted	$ 3.82	$ 3.59
Weighted average number of common shares outstanding		
Primary	1,213,529	1,258,553
Fully Diluted	1,266,506	1,315,348

(a) Unaudited and subject to year end adjustments.
(b) Amounts reported computed in accordance with industry practice of multiplying income from commissions and fees by 6.67, since income generally amounts to 15 percent of gross billings.
(c) After giving effect to amounts attributable to redeemable preferred stock, the assumed exercise of dilutive stock options, and for fully diluted net income per common share, the assumed conversion of the 8-1/2 percent Convertible Subordinated Debentures issued December 1983.

#90221b0850 08/09/1990 ~Business Wire

PERRIS, CA (AUG. 10) BUSINESS WIRE - Modtech Inc. (NASDAQ:MODT), a leader in California manufacturing of modular relocatable classrooms Thursday announced operating results for the second quarter and the six months ended June 30, 1990.

For the second quarter, pro-forma net income increased to $844,000, or 29 cents per share, on revenues of $12,923,000 vs. pro-forma net income of $584,000, or 20 cents per share, on revenues of $10,154,000 for the like period last year.

For the first half of fiscal 1990, the company's pro-forma net income rose to $1,268,000, or 43 cents per share, on revenues of $23,077,000 compared with pro-forma net income of $504,000, or 18 cents per share, on revenues of $18,477,000 for the like period in fiscal 1989.

In reviewing the results for the first six months of fiscal 1990, Evan Gruber, chief executive officer, attributed the company's increase primarily to additional production at its expanded manufacturing facilities in response to continued overall demand for modular relocatable classrooms, as well as to increased sales of the customized classrooms built by Del-Tec division under the company's management.

Gruber further noted that the growth in population in California, both from births and from immigration, continues to lead to increasing school enrollments. Changes in population demographics have left many existing permanent schools with excess capacity.

Consequently, in 1986, California adopted legislation that requires, with certain exceptions, 30 percent of all new classrooms constructed with state funds be relocatable structures. Modular relocatable classrooms take less time to construct and install and cost less than conventional ''red brick'' schools.

In addition, modulars permit a school district to relocate the classrooms as student enrollment shifts.

With its improved financial position due in part to the July 1990 initial public offering, Modtech is prepared to benefit from the opportunities in its niche of the infrastructure market.

Modtech Inc. designs, manufactures, markets and installs modular relocatable classrooms. The classrooms are sold primarily to school districts throughout California.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

GROUP LED BY RIPLEY ACQUISITION OWNS 460,315 SHARES (77.85%) OF RIPLEY CO INC (TICKER: RIPY) OF CROMWELL, CT.

ANNOUNCEMENT:

On July 25, 1990, seven holders of an aggregate of 347,350 shares of Ripley common stock entered stock purchase agreements with RAC and its parent, Capewell, providing for the sale of their shares of stock at a price of $4.15 per share and contingent upon the execution of a merger agreement, dated July 31, 1990, between Ripley, RAC and Capewell providing for the merger of RAC into Ripley on terms whereby holders of common stock other than RAC and Capewell would receive $4.15 per share in cash. On July 31, 1990, Martin Roegnigk and wife entered into a similar stock purchase agreement to sell an aggregate of 112,965 shares of the Ripley common stock. Ripley entered into an agreement with Capewell and RAC providing for an increase in number of directors from four to nine and for the election to the board of five nominees designated by Capewell, and for the issuance in favor of Ripley's transfer agent of a letter of credit. RAC entered into letter agreements with Messrs. H.I. Thayer and James E. Griffin pursuant to which they have agreed to vote their share of Ripley common stock in favor of the merger.

PURPOSE:

To acquire more than two-thirds of all outstanding share of Ripley Co. Inc. in order to effectuate a merger.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 3

ANNOUNCEMENT:

On July 12, 1990, Petroleum Investment LTD(TICKER: PIL) and Egolf Co. executed and delivered among themselves the first amended and restated plans of liquidation and consolidation. Pursuant to the plan, Petroleum Investment LTD disposed of all of their respective depository units of the partnership on Aug. 3, 1990, when such units, having been tendered to Bradmar in connection with the offer to exchange, could no longer be withdrawn. On Aug. 6, 1990, Bradmar accepted the units, totalling 13,390,518, and on Aug. 7, 1990, exchanged the units for Bradmar common at a rate of 10 units for each common share of Bradmar. The partnership was

dissolved on Aug. 7, 1990 and Bradmar tendered its units to the partnership for redemption, in exchange for which it received an assignment of the partnership's assets, subject to existing liabilities, in proportion to the percentage of outstanding units Bradmar held. Bradmar subsequently recovered the remaining assets of the partnership in exchange for common stock.

PURPOSE:

Plan of liquidation and consolidation.

GROUP LED BY CORNWALL PETROLEUM HOLDINGS INC OWNS 51,174,611 SHARES (72.60%) OF TAURUS PETROLEUM INC (TICKER: TAUR) OF SAN ANTONIO, TX.

ANNOUNCEMENT:

On May 22, 1990, Cornish and Curnow each received 250,000 shares in exchange for arranging letters of credit for a total of $420,000 and providing for a deposit of $210,000 to collateralize the letters of credit. On July 30, 1990, Cornish and Curnow each acquired 4 million shares and an option for an additional 16 million shares in exchange for $50,000 each. The group presently intends to look for merger opportunities

for Taurus Petroleum Inc. with other corporations, and for opportunities for Taurus Petroleum Inc. to acquire producing and non-producing oil interests.

PURPOSE:

Shares acquired in exchange for arranging for a letter of credit and through a private placement.

DHAKA (AUG. 9) - Bangladesh's export earnings increased by 21 percent during the last fiscal year with exports totalling 1.4 billion U.S. dollars, a minister said Thursday.

The figure was 90 million dollars more than the targeted export earning of 1.3 billion dollars for the year ending June 30, Commerce Minister Shamsul Haque was quoted as saying at an official meeting.

He said during the previous fiscal year, Bangladesh earned 1.2 billion dollars through exporting various commodities. The minister gave no reason for the increase.

Bangladesh's major exports include clothing, leather products, jute goods, tea, and frozen food.

#90221d0040 08/09/1990 ~French/German News Agency

WASHINGTON (AUG. 9) - The White House said Thursday the U.S. deployment of troops to Saudi Arabia was being carried out successfully.

Presidential spokesman Marlin Fitzwater said: "We're very satisfied with the course of events during the last 24 hours. U.S. forces have successfully moved to help defend saudi Arabia."

The spokesman said he was "heartened" by a unanimous U.N. Security Council resolution earlier Thursday declaring Iraq's annexation of Kuwait Wednesday to be "null and void."

He said the Saudi Government was continuing "to pursue international participation in their own defense, and this amounts to a very complex but rapid combining of international interests to thwart the aggression of (Iraqi leader) Saddam Hussein."

The spokesman said President George Bush had telephoned the leaders of Turkey, Oman and the United Arab Emirates, and that all three had "expressed satisfaction regarding the concerted efforts of the international community."

Recently, U.S. officials have been expressing frustration at the position of Jordan's King Hussein.

But at his press briefing, Mr. Fitzwater said: "We note that Jordan has indicated it intends to abide by U.N. sanctions against Iraq. This is a further positive step that highlights the international community's attitude. It also indicates that King Hussein has recognized the threat that Saddam Hussein represents to the Arab world."

LONDON (AUG. 9) - Foreign diplomats in Kuwait have been told they have two weeks to leave the country and go to Baghdad following Iraq's annexation of Kuwait, the British Foreign Office said here Thursday.

"We've been told from Kuwait that the diplomatic representation is now in Baghdad," a spokesman said.

Iraq had no objection to diplomats remaining in Kuwait during the two-week period to look after their national interests there, the spokesman said, adding that British diplomats would remain in Kuwait for the time being.

#90221d0210 08/09/1990 ~French/German News Agency

DURBAN, South Africa (AUG. 9) - The anti-apartheid African National Congress Women's League (ANCWL) was re-launched here Thursday planning to "infiltrate" the ANC before it ends talks with the South African government.

Baleka Kgositsile, the ANCWL's secretary who fled South Africa in 1976 after the black township of Soweto, near Johannesburg, erupted into massive riots, said women wanted up to 30 percent of the nominations for ANC posts when the ANC formally reconvenes inside the country on December 16.

The once active ANCWL, which was first launched in 1948 and waged numerous defiance campaigns and demonstrations against apartheid, was re-launched on South Africa's National Women's Day Thursday after being banned for 30 years.

President Frederik de Klerk legalised the ANC and 23 other anti-apartheid organisations on February 2 and last Tuesday the ANC and government held a second round of historic preliminary talks which saw the ANC suspend the 30-year guerrilla war it has waged against the white-minority government.

Observers believe that the accord reached Tuesday -- known as the Pretoria Minute -- has paved the way for South Africa to break out of its political impasse and to move quickly towards a negotiated political settlement.

Lindiwe Mabuza, the ANC's chief representative in Washington, slammed previous government attempts at birth control as "geared to the elimination of the black population."

To supportive murmurs of "genocide," Miss. Mabuza said future ANC policy would be geared to giving women a choice on contraception, not population control.

The ANCWL is considering the appointment of a national commission to consider the emancipation of women, the SAPA news agency said Thursday.

ANCWL members said the ANC was committed to the adoption of a charter of women's rights as a constitutional instrument in a post-apartheid South Africa and the formulation of policies that will encompass the full emancipation of women.

The wife of ANC president Oliver Tambo, Adelaide Tambo, who returned from exile to attend the re-launch, will Friday tour strife-torn black townships near here where some 3,000 people have been killed in a bloody Zulu civil war in the past four years.

The civil war has been raging between supporters of Zulu chief Mangosuthu Buthelezi's conservative Inkatha party and the ANC-aligned United Democratic Front.

#90221d0660 08/09/1990 ~French/German News Agency

PARIS (AUG. 9) - The 21 industrialized countries belonging to the International Energy Agency (IEA) decided here Thursday that the threat to oil supplies is insufficient to justify immediate and exceptional measures, particularly through release of governmental stocks.

But while warning against panic, it said that IEA countries had to prepare for introduction of emergency measures if the supply situation worsened. Referring to the surge in oil prices caused by the embargo against oil from Iraq and Kuwait, the president of the IAE management committee, Ulrich Engelmann, said: "There is no shortage so far."

He said: "What you see, the increase of prices, is a typical speculative reaction to negative political developments." So "there is no reason to activate the emergency system of the IEA," he said.

There was unanimous agreement that the current situation was not serious,

and this was supported even by the countries most dependent on oil from the embargoed sources, such as Turkey, IEA executive director Helga Steeg said.

Engelmann said: "No member suggested drawing on government stocks now." The management commitee is to meet in Paris on August 23, and Engelmann said the true effects of the embargo on consuming countries would not be known for two weeks.

He expressed confidence that industrialized countries could face up to the situation despite the shortfall of embargoed oil, representing 4.6 million barrels per day.

Oil stocks representing 99 days of consumption in the 24 countries of the Organization for Economic Co-operation and Development (OECD) and 150 days of imports for IEA countries are much higher than in 1979.

Minimizing the threat of price tension, he noted that oil prices had fallen on Thursday. West Texas Intermediate opened Thursday down 0.51 dollars at 22.45 dollars per barrel.

Engelmann said consuming countries could ask un-named producing countries to increase production. But Steeg noted that maintenance work on North Sea installations would prevent Britain from increasing output.

Engelmann said that IEA countries had to prepare to be able at any time to introduce emergency measures in case the situation worsened. But he urged oil companies and consumers "not to run in a panic situation" - as had some governments such as the French administration.

The IEA has two mechanisms designed to cope with an oil crisis. The first, the emergency oil sharing system, provides for allocation of available oil supplies to members on a formula based on their consumption levels. It can be invoked if supplies to some or all members are cut by seven percent or more, but has in fact never been implemented.

The second option is for the IAE to issue recommendations. It could, for example, advise members to release onto the market part of government-held stocks, which are particularly large in Japan, West Germany and the United States.

Total government stocks in the IEA total 142 million tons, or 150 days' worth of imports, against 25 million tons at the time of the second oil crunch in 1979.

The IEA could also recommend measures to reduce consumption, or ask other countries to increase output to compensate for the lost Iraqi and Kuwaiti supplies.

Individual governments are free to choose the measures they think appropriate in such circumstances, which could include operating power plants on gas and coal rather than fuel oil, or energy saving.

#90221d0690 08/09/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (AUG. 9) - The United Nations Security Council, by a 15-0 vote, Thursday declared Iraq's annexation of Kuwait "null and void."

"Annexation of Kuwait by Iraq under any form and whatever pretext has no validity and is considered null and void," the council said in its third resolution on the Gulf crisis since Iraq invaded Kuwait August 2.

U.S. delegate Thomas Pickering applauded the vote and said Washington was prepared to call for yet another meeting of the council with an eye to further measures aimed at forcing Iraq to withdraw from Kuwait.

The acting Soviet delegate, Valentin Lozinskiy, meanwhile proposed that the security council's Military Staff Committee begin discussions on a possible U.N. intervention in the Gulf.

Before Thursday's vote, a Soviet Foreign Ministry spokesman in Moscow said the Soviets rejected the use of force in the Gulf but were prepared to reconsider that position if the Security Council decided to send a multinational force.

The Military Staff Committee consists of the chiefs of staff, or their representatives, of the five permanent members of the security council -- France, Britain, China, the United States and the Soviet Union.

The annexation was announced Wednesday by Iraq's decision-making Revolutionary Command Council, which declared Kuwait an integral part of Iraq and that the union was "total and irreversible."

The U.N. resolution Thursday called on "all states, international organizations, specialized agencies not to recognize that annexation and to refrain from any action or dealing that might be interpreted as an indirect recognition of the annexation."

It demanded that Iraq "rescind its actions purporting to annex Kuwait."

Speaking after Thursday's vote, Mr. Pickering defended the U.N. action as "necessary because Iraq is attempting to extinguish the sovereignty of a member state of the United Nations.

"There is something repugnant, chilling and vaguely familiar about the

statement issued yesterday by the Iraqi Revolutionary Command Council," he said. "We have heard that rhetoric before."

The Security Council Monday approved trade, military and financial sanctions against the regime of Iraqi President Saddam Hussein. Hours after the Iraqi invasion, it condemned the invasion and demanded the immediate and unconditional withdrawal of Iraqi forces from Kuwait.

WASHINGTON (AUG. 9) - Three U.S. Navy ships will visit the Soviet port of Vladivostok September 10 through 14, the Defense Department announced Thursday.

A Pentagon statement said the three vessels were the amphibious command and control ship USS Blue Ridge, the guided missile cruiser USS Princeton and the guided missile frigate USS Reuben James.

It said the visit would be part of a U.S.-Soviet naval exchange program.

Three Soviet ships paid a similar visit to the port of San Diego, California, earlier this year.

#90221d0780 08/09/1990 ~French/German News Agency

LAGOS (AUG. 9) - The Nigerian military government said Thursday it would hold Charles Taylor and the Patriotic Front of Liberia responsible for any harm to Nigerians taken away Wednesday from the Nigerian embassy in Monrovia by these rebels, official sources said.

They were quoting the minister of external affairs, Alhaji Rilwanu Lukman.

He said the warning had become necessary following a report the Nigerian government received confirming that the rebels penetrated the embassy and took away an unspecified number of Nigerians who had taken refuge there to an unknown destination.

Nigeria, along with other six other nations - Gambia, Ghana, Guinea, Sierra Leone, Togo and Mali - attended a mini-summit of the Economic Community of West African States (Ecowas) this week in Banjul, where a decision to send a pecae-keeping force to war-torn Liberia was taken.

Charles Taylor's rebels are reported to be opposed to the force, while President Samuel Doe supported the idea.

Nigeria's Armed Forces Ruling Council (AFRC), Nigeria's highest

decision-making body, met here Thursday, and the Liberian issue, particularly the peace-keeping force, was discussed, a reliable source said.

A communique is expected at the end of the meeting Friday.

A Ghanaian delegation led by a member of that country's ruling Provisional National Defence Council (PNDC), Lt. Gen. Arnold Quainoo, met here Thursday with President Ibrahim Babangida and high-ranking Nigerian military officers and discussed the peace-keeping force to Liberia, the source added.

The minister of external affairs also held discussions Thursday here with heads of diplomatic missions and international organisations accredited to Nigeria and briefed them on the Ecowas position on the Liberian crisis.

''In view of our shared responsibility for the maintenance of peace and stability, we have no doubt that you will lend your considerable moral support to the Ecowas initiatives in Liberia'', the minister told the diplomats.

He urged them to ensure that their respective governments contributed materially towards the attainment of these Ecowas objectives.

''Ecowas intervention is in no way designed to serve one party or punish another'', he told the diplomats, adding that the peace-keeping force was going to Liberia to ''stop the senseless killings of innocent civilians, nationals and foreigners''.

He held a similar meeting here Wednesday with ambassadors of the U.N. security council members.

#90221d0840 08/09/1990 ~French/German News Agency

ABERDEEN, Scotland (AUG. 9) - More than 700 workers on North Sea oil and gas rigs went on strike for 24 hours Thursday, union sources said here.

According to the organizers of the strike, all North Sea rigs but two were affected by the strike, the second in four days.

The Offshore Industry Liaison Committee, an unofficial union council, said that 3,000 employees of construction and petrochemical industries in Scotland had stopped work in solidarity with the striking North Sea workers.

Shell Oil company said that the strike had not affected oil production.

The strikers are demanding rehiring of over 1,000 contract workers fired last week following a protest strike against poor safety conditions in the North Sea.

They are also calling for official recognition of their union and improved working conditions.

-30- 1033

#90221d0870 08/09/1990 ~French/German News Agency

PARIS (AUG. 9) - French President Francois Mitterrand came out Thursday in favour of an internal Arab settlement to the Gulf crisis.

Speaking after a cabinet meeting, he said that if an Arab solution could not be found, France would assume its ''own responsibilities''.

France announced at the same time that it was reinforcing its military presence in the crisis area with an aircraft carrier group. Defence Minister Jean-Pierre Chevenement said the carrier Clemenceau would be sent to the Gulf area with accompanying naval ships.

''France continues to wish that the problem be settled within the Arab community,'' Mitterrand said.

Because of the dangers, it was important to move up French naval and air-force units so that they could intervene if France believed this necessary, he said. France would not accept either Iraqi aggression against Kuwait or the subsequent occupation.

The president indicated that France had not been officially asked to provide units for a multinational force to protect Saudi Arabia, but was merely participating along with other western nations in efforts to resolve the crisis.

Mitterrand described French citizens unable to leave Iraq and Kuwait as ''prisoners'' and said French forces were also being moved up in case they were needed to evacuate people.

Sources here said the Clemenceau had 2,000 men aboard and would be mainly equipped with helicopters on its Gulf mission. Previously France had just two escort ships on station in the Gulf, as well as a frigate on its way to the hot spot.

-30- 1761

#90221d0880 08/09/1990 ~French/German News Agency

LONDON (AUG. 9) - Some holders of bonds in tottering Australia-based Bond Corporation voted here on Thursday in favor of the sale of group brewing

interests to Australian Bell Resources.

This sale is one of the pillars of a plan to save the business empire built up by Alan Bond, but the creditors rejected the other essential part of the plan for a one-year moratorium of payment of interest on their paper.

The votes give Bond Corp. a further delay to consider its future with parties involved, said group administrator Peter Lucas, who chaired the meeting.

They also leave open the way for Bond to resign as chairman, as he said last month that he was ready to do if the resolutions were approved, Lucas said.

"Bond holders have exhibited today the realistic attitude we were hoping for," Lucas said.

The principle of the sale of the breweries for 1.8 billion Australian dollars (1.42 billion U.S.) was approved by the holders of sterling-deonominated bonds.

The holders of dollar-denominated bonds approved it by a majority which fell short of the 75-per-cent vote required.

Both groups of bond holders voted by an inadequate majority in favor of a moratorium on interest payments.

A meeting of dollar-bond holders has been called for Sept. 10, and a meeting of all bond holders on Nov. 30 to vote again on the moratorium.

Asked about what Bond was doing, Lucas replied that he was sailing in Australia.

#90221d0980 08/09/1990 ~French/German News Agency
TOKYO (AUG. 9) - Japan's Honda Motor Co. announced Thursday the creation of an automobile subsidiary in Italy separate from its motorbike and spare parts operations there.

The move is aimed at almost doubling Honda car sales in Italy from 4,500 units this year to 7,500 in 1991, the company said.

Honda set up a new trading subsidiary, Automibili Italia SpA, in Verona, which is due to begin operations in October with responsibility for all imports and sales of Japanese cars in Italy.

The motorbike and spare parts divisions will remain with Honda Italia Industriale SpA based near Rome.

Honda says the scheme, so far limited to Italy, will help define its products in the public eye and increase sales.

#90221d1000 08/09/1990 ~French/German News Agency
SRINAGAR, INDIA (AUG. 9) - A general strike sponsored by Moslem militants to protest the India-Pakistan talks on reducing bilateral tensions crippled life in Kashmir on Thursday, officials said.

Meanwhile, Moslem militants abducted a government-owned company manager and demanded that authorities release two of their top leaders arrested recently, officials said.

The Press Trust of India (PTI) said a senior Kashmir state government official and a police officer were among 15 suspects detained during a search by security forces for militants and their accomplices in the northern region.

The dominant Jammu and Kashmir Liberation Front (JKLF) closed shops, businesses and schools as Pakistani foreign secretary Tanvir Ahman Khan arrived in New Delhi to begin talks with his Indian counterpart Muchkund Dubey, the officials said.

The JKLF, protesting the exclusion of its representatives in the three-day talks that are to centre on secessionist tensions, ordered the general strike in the Moslem-majority valley's 28 towns.

The JKLF says the talks cannot be fruitful without Kashmiris' inclusion.

Witnesses said vehicles stayed off the streets in Srinagar, the state of Jammu and Kashmir's summer capital, as militants staged street

demonstrations.

Militants abducted P.N. Chowdry, the manager of a Kashmir government-owned cement manufacturing company, from Kashmir valley's Wuyan village late Wednesday, officials said.

The abductors, who did not identify themselves, said in telephone calls to company staff that Mr. Chowdry would be freed only if two top JKLF leaders detained recently were released unconditionally, the officials in Jammu said.

The two detainees, Yasin Malik and Abdul Hamid Sheikh, were captured in Srinagar on Monday.

Two civilians, including a school teacher caught in crossfire between militants and security troopers, were killed in separatist-linked incidents in Srinagar, officials said, adding that nine more people, including five paramilitary troopers, were injured.

PORT ELIZABETH, SOUTH AFRICA (AUG. 9) - The death toll in rioting in mixed-race areas of this auto-manufacturing town had risen to 33 by late Thursday, police spokesman Major Bill Dennis said.

In another late development, Law and Order Minister Adriaan Vlok announced that more police, South African Defence Force (SADF) troops and additional air support would be deployed in the townships bordering Port Elizabeth.

The rioting began on Monday but most of the deaths occurred on Wednesday night as mobs ran through the townships, looting stores before torching them.

Police used shotguns, teargas and rubber bullets to disperse the looters. Of those killed, 18 died of gunshot wounds, Major Dennis said earlier Thursday.

He said police were not the only ones to use shotguns and that "shopkeepers also used shotguns to protect their property."

Some 32 shops, six houses, three schools, two factories and a church had been gutted, Major Dennis said. Ambulances and fire engines have only been able to enter the townships under police escort.

Other reports Thursday said the situation in the townships had deteriorated into anarchy, with police, backed by teargas-spraying helicopters fighting running street battles with militant youths.

-30- 1448
#90221d1030 08/09/1990 ~French/German News Agency
BRUSSELS (AUG. 9) - The European Economic Community (EEC) welcomed Thursday the measures taken by the South African government and the African National Congress (ANC) following meetings between them on Monday.

The EEC described the ANC's suspension of armed struggle and the government's decision to liberate political prisoners and give amnesty to exiles as a "significant step" towards national reconciliation.

Saying that it "favorably received" the developments, the EEC expressed hope that they would lead to negotiations for a new constitution in the near future.

#90221d1090 08/09/1990 ~French/German News Agency
WASHINGTON (AUGUST 9) - U.S. forces in Liberia evacuated 25 foreigners from the war-torn country Wednesday, including the French and Italian ambassadors, sources here said Thursday.

A state Department spokesman said the 25 included South Koreans, Portuguese, and a number of other nationalities. Since August 5, when the first U.S. helicopter evacuations began, 150 foreigners have been lifted out of the country.

Among them were 94 Americans, 14 Liberians, five Britons, and a host of other Asian and Western residents. A spokesman said the U.S. ambassador had no plans to leave Monrovia for the time being.

State Department spokesman Richard Boucher has said there appears to be ''no end in sight'' to fighting between government forces and two rival rebel groups.

The United States has said it will not intervene in the civil war, but welcomed the efforts of West African nations led by Nigeria and Sierra Leone to intervene in hopes of imposing a truce.

-30- 1160
#90221d1240 08/09/1990 ~French/German News Agency
WASHINGTON (AUG. 9) - Kuwait's envoy to the United States said Thursday that Iraq has ''expansionist'' ambitions and is plotting to invade still further countries in the Gulf.

Sheikh Saud Nasir al-Sabah, speaking on the television network Cnn, said

Iraqi leader Saddam Hussein had been planning ''for months'' to send his armies abroad, but that he had not reckoned on the ''unprecedented'' international response.

Al-Sabah said his country was ''grateful'' to the United States for coming to its aid in rallying the international community against Iraq's invasion a week earlier.

The ambassador also expressed gratitude to Kuwait's ''brothers in Saudi Arabia and all civilised countries'' for supporting the oil-rich nation in its time of crisis.

But the envoy suggested Saddam would not invade Saudi Arabia, which has reinforced its borders with U.S. troops and aircraft as a deterrent. ''Saddam,'' he said, ''is not stupid.''

#90221d1310 08/09/1990 ~French/German News Agency

WASHINGTON (AUG. 9) - Pakistan is to reduce oil imports and make a para-statal energy company run more efficiently through a World-Bank-supported project designed to expand the distribution of natural gas, the Bank announced Thursday in Washington.

Pakistan has extensive natural-gas reserves, but inadequate transmission and distribution facilities have led to shortages of the fuel and increased use of other, more costly forms of energy, said the Bank, which is lending 130 million dollars.

The project is expected to increase sales of natural gas throughout the country and reduce the need for imported fuels.

The World Bank loan is for 20 years, including five years of grace, with a variable interest rate, currently 7.72 percent.

#90221d1320 08/09/1990 ~French/German News Agency

PARIS (AUG. 9) - France temporarily closed its embassy in the Liberian capital Monrovia on Thursday after evacuating embassy personnel and other French citizens from the war-torn country, the foreign ministry said.

The ministry said that an unspecified number of French nationals who embassy personnel "managed to reach" had been evacuated along with diplomats to a U.S. naval vessel.

Ambassador Louis Giustetti and three security guards remained at the embassy in Monrovia, the ministry added.

A ministry spokesman said the embassy would be reopened "as soon as circumstances permit it."

There are still about 15 French nationals in Liberia, all of them living outside of Monrovia, according to informed sources. Most are either missionaries or forestry workers.

The Liberian capital has been under seige by rebel forces for several weeks and without fresh food supplies, electricity, water or communications.

-30- 1100

#90221d1430 08/09/1990 ~French/German News Agency

ACCRA (AUG. 9) - Some of the West African troops who are to attempt to impose peace on war-torn Liberia were to leave the western Ghanaian seaport of Takoradi Thursday night, the Ghana News Agency (Gna) reported.

The Ghanaian contingent, who are to join a five-nation force, were to board a merchant vessel, the Mv tano River for Freetown, Sierra Leone, where members of the ceasefire monitoring group Ecomog are to converge before moving to Liberia.

The force was established by seven leaders of the Economic Community of West African States (Ecowas).

Gna did not say how many troops were involved, but unofficial sources say Ghana will be contributing about 1,000 men. The ship was to be escorted by two naval vessels, the ''Yogaga'' and the ''Achimota''.

Ecomog, under the command of Ghanaian Lieutenant-General Arnold Quainoo, 51, is charged with keeping the peace, restoring law and order and

ensuring that a ceasefire is respected.

Two of the civil-war rivals in Liberia, President Samuel Doe and Prince Johnson have accepted Ecomog, but the main rebel leader, Charles Taylor whose invasion of the West African country late last December started the war, has vowed to fight the peacekeepers.

Gna said Ghana's head of state, Jerry Rawlings, had a private audience with the troops Thursday, telling them Ghana had a high reputation for peace-making and peace-keeping and urged them to maintain this.

Ghana has contributed forces to the United Nations Interim Force in Lebanon and to ceasefire monitors on the Iran-Iraq border.

#90221d1750 08/09/1990 ~French/German News Agency

WASHINGTON, (AUG 9) - Planeloads of crack U.S. soldiers spearheading President George Bush's operation "Desert Shield" were landing in Saudi Arabia Thursday as the Pentagon reported that Iraqi forces in Kuwait were improving their air defense.

(Five Giant C-5 Galaxy transport planes laden with soldiers of the 82nd Airborne Division based in Fort Bragg, North Carolina, landed in the Saudi city of Dhahran early Thursday, a member of a Western civilian air crew said.)

At Pope Air Force Base near Fort Bragg, other elements of the 82nd Airborne's 2,300-member division ready brigade -- the brigade that's always kept in the highest state of readiness -- boarded C-5's, presumably for the 15-hour flight to Saudi Arabia.

At the Pentagon, spokesman Pete Williams said Operation Desert Shield -- formally announced by Mr. Bush Wednesday and aimed at deterring any Iraqi attack against the oil-rich kingdom -- had so far gone "extremely well."

All U.S. tactical air assets -- an unspecified number of F-15 fighters from Langley Air Force Base in Virginia and five AWACS (Airborne Warning and Control System) radar surveillance planes -- were now in Saudi Arabia, he added.

Mr. Williams refused to say exactly where in the desert kingdom the U.S. forces were being stationed. But Pentagon sources earlier said the U.S. forces would be based near Riyadh and at Dhahran Air Force Base, which protects the largest Saudi oil field complex.

Mr. Williams said Iraq was consolidating its forces in Kuwait and estimated the strength of Baghdad's contingent there at 120,000. Iraq invaded Kuwait

August 2 and annexed its tiny, oil-rich neighbor Wednesday.

"They (Iraqis in Kuwait) are in a defensive posture ...but capable of offensive action...They are improving their air defense," Mr. Williams said.

More Iraqi troops appeared to be moving south from Iraq into Kuwait, he added.

WASHINGTON (AUG. 9) - As many as 50,000 U.S. troops may be sent to Saudi Arabia in the coming weeks as part of a military deployment involving aircraft carriers, missiles, fighters, bombers, tanks and other weapons, U.S. newspapers reported Thursday.

The New York Times and The Washington Post both cited U.S. military officials as saying the planned deployment could reach 50,000 ground troops.

The movement of U.S. troops and equipment began Tuesday, ordered by U.S. President George Bush to protect Saudi Arabia against possible attack by Iraqi troops massed on the border.

U.S. military officials said it would take several weeks for the deployment of military forces to be completed, according to the Post.

The newspaper said an estimated 200,000 Iraqi troops were massed in southern Iraq and Kuwait, which was invaded last week by Iraqi troops and annexed Wednesday by Baghdad.

U.S. intelligence officials said there had been no major additions to the Iraqi forces in Kuwait, but that they had been fully resupplied and reinforced and "could move south in a couple of hours' notice," the Post said.

Washington, meanwhile, warned Yemen not to align itself with Iraq following reports that Iraq had sent three squadrons of fighters to Yemen, possibly for safekeeping or to outflank the Saudis, The New York Times reported, citing a senior administration official travelling with Secretary of State James Baker.

General Colin Powell, chairman of the joint chiefs of staff, told a news conference that Wednesday's deployment involved elements of the 82nd Airborne Division, an unspecified number of F-15 aircraft and five AWACS (airborne warning and control systems) radar surveillance planes.

The Post said U.S. military planners also were ready to send a tank brigade from the 24th (Mechansized) Infantry Division, a brigade from the 101st Airborne Division, the 7th Marine Amphibious Brigade; and the 1st Marine Amphibious Brigade.

Pentagon sources said U.S. forces also would have available to them cruise missiles aboard the battleship Wisconsin that could be programmed to strike oil refineries in Iraq.

ANKARA (AUG. 9) - U.S. Secretary of State James Baker arrived here Thursday amid reports that Iraq was strengthening its army positions near the Turkish border.

Observers said Mr. Baker would reassure President Turgut Ozal, Foreign Minister Ali Bozer and Prime Minister Yildirim Akbulut of Washington's support in the crisis.

Turkey, a member of the North Atlantic Treaty Organisation, is in the front line of the conflict with Iraq. It has declared a total embargo on trade with its neighbour and shut down the pipeline which carries around 50 per cent of Iraq's oil to the Mediterranean sea.

Tanker truck drivers arriving in Turkey from Baghdad said Wednesday that the Iraqi army was strengthening its positions near the Turkish border.

The oil tanker drivers said Iraqi forces were being reinforced in the Zaho region near the Turkish border town of Habur. The reports have not been confirmed officially.

The drivers, whose tankers were returning empty because of the embargo on Iraq, said they saw unusual military activity along the route they take transporting Iraqi oil products to Turkey. The road runs parallel to the Iraqi pipeline shut down by Turkey on Tuesday.

Mr. Baker was expected to offer U.S. economic and military assistance to Turkey, whose sanctions against Iraq could cost it around a billion dollars according to analysts here.

The Americans want to use bases in Turkey as possible staging posts in the event of fighting breaking out, although the Turks are anxious not to turn their country into Iraq's next target, observers here said.

Mr. Baker will leave here later Thursday with his Turkish counterpart Mr. Bozer for Brussels, where NATO foreign ministers will hold an emergency meeting Friday.

The question of using Turkish bases for a multi-national force will be discussed at Friday's meeting.

NAGASAKI, JAPAN (AUG. 9) - Premier Toshiki Kaifu Thursday condemned Iraq's annexation of Kuwait as an unjustifiable act, but said Japan would not join a U.S.-led multinational force to protect Saudi Arabia against possible Iraqi attack.

In Tokyo, the Jiji Press news agency reported that a number of Japanese firms had instructed their Japanese staff stationed in the Gulf to leave the region.

Government sources said Mr. Kaifu's planned Middle Eastern tour next week could be cancelled or modified if tension continued to rise, although Mr. Kaifu said here that there was "no change in plans."

"If Japan can do anything to contribute to the quest for a peaceful solution" to the Gulf crisis, "it is prepared to cooperate positively with other countries," Mr. Kaifu said in Nagasaki.

"Although Japan cannot contribute to securing peace through military actions," he said, "we must join ... any move to secure peace through peaceful dialogue."

Mr. Kaifu, who was in Nagasaki for ceremonies marking the 45th anniversary of the atomic bombing of the city in the closing days of World War II, also said he had asked Iraq "to take the necessary measures to protect Japanese nationals" in Kuwait.

Reports reaching the foreign ministry in Tokyo said there was a 7:30 p.m. to 7:00 a.m. curfew in Kuwait City, which Iraqi troops invaded on August 2 and that shops were well stocked, but open only for limited periods.

The ministry said Wednesday that of the 277 Japanese living in Kuwait, 246 had sought refuge at the embassy, 30 continued to live in their homes and one businessman had been missing since Saturday.

Officials said it was possible the 49-year-old man had been evacuated by Iraqi troops to Jordan via Iraq along with other foreigners.

KUALA LUMPUR (AUG. 9) - Malaysia Airlines is to fly to three new

destinations in Australia from the end of October, its managing director, Abdul Aziz Rahman, said Thursday.

He said the airline would begin flights to Brisbane, Adelaide and Darwin on October 28. It already services Sydney, Melbourne and Perth.

Mr. Aziz said Malaysia Airlines would also add Nagoya and Vienna to its list of destinations and increase flight frequencies to to Auckland, Brussels, Zurich, New Delhi, Karachi and Jakarta.

He said Malaysia Airlines was buying a Boeing 747-400 and leasing five Boeing 737-400's to launch the new services.

The airline would have to review its operations if crude oil prices continued to rise as a result of the Iraqi invasion of Kuwait, Mr. Aziz warned.

Fuel currently accounts for 18 per cent of operating costs, but this could rise to 25 per cent, he said.

Raja Mohar Badiozaman, the airline's chairman, said in his annual report distributed Thursday that the company should do well in the current financial year.

The Malaysian Airlines System group made a pre-tax profit of 200 million dollars (74 million U.S.) in the year to March, compared to 204 million dollars (75.5 million U.S.) in the previous year.

Malaysian Airlines System is the registered company name of Malaysia Airlines.

MANILA (AUG. 9) - The Philippines has renewed a contract to import oil from Iran as the country's oil reserves are expected to run out within 70 days, a presidential palace statement said here Thursday.

Under the contract, Iran will supply 20,0000 barrels of crude oil per day.

Manila has been forced to seek other sources of supply because of the Gulf crisis following Iraq's invasion of Kuwait a week ago.

The Philippines received almost 20 per cent of its oil requirements last year from Iraq and Kuwait, and was due to buy 720,000 barrels of Kuwaiti oil this month.

The Philippines also imported 15.1 million barrels of oil from Iran in

1989, representing 20.8 per cent of its oil supply.

Philippines officials said they were also eyeing increased oil purchases from Brunei, China, Mexico, Indonesia and Malaysia.

MOSCOW (AUG. 9) - Soviet cosmonauts Anatoly Solovyov and Alexander Balandin returned safely to earth Thursday after a six-month stay in space aboard the ''Mir'' space station.

Their space capsule landed in the steppes of the central Asian Soviet republic of Kazachstan.

The two men narrowly evaded death in space last month when their oxygen tanks nearly went empty while the cosmonauts were conducting repairs to the outside of the space station.

The Mir station is now manned by Gennady Manakov and Genadi Strekalov, who were launched into space on August 1. The two men are scheduled to spend 132 days in space.

LONDON (AUG. 9) - Brent North Sea crude oil prices fell back sharply in London on Thursday morning, largely due to speculation that OPEC output will be boosted to compensate for embargoed Iraqi and Kuwaiti deliveries.

Brent was quoted at 24.75 dollars a barrel at the opening, almost three dollars below Wednesday's close of 27.35 dollars and after hitting a peak of 28.8 dollars at one point in Tuesday trading, its highest level in four and a half years.

But Wednesday's opening rate was still well above the less than 20 dollars a barrel prevailing before Iraq's invasion of Kuwait a week ago.

Prices were falling back on speculation that the Organisation of Petroleum Exporting Countries (OPEC) would increase output to compensate for the some four million barrels a day being lost to the market due to international sanctions on Iraqi and Kuwaiti products.

But "in the event of military action, prices will shoot up again," said Nick Antill, an analyst with County Natwest. "In the meantime, they will continue to drift if they are not given additional news."

PARIS (AUG. 9) - Brigitte Bardot, the French movie star turned animal protection militant, has called on Japan return a French-born chimpanzee which she said was "freezing" at a Japanese research center.

The chimpanzee, named Chloe, born at Vincennes zoo here in 1980, was transferred to Japan four years later along with a French-born orang-utan in exchange for 10 Japanese macaques.

Ms. Bardot told Japanese ambassador to France Akitane Kiuchi Wednesday that the chimpanzee now at the Primate Research Institute at Kyoto university was "just about getting along in a freezing environment" at the center.

The former actress decided to intervene to press for the chimp's return after the orang-utan died earlier this year. She charged that the orang-utan had been in a "concrete cage" with "a tire as sole companion for five years".

Chloe, according to the Brigitte Bardot Foundation, is living in a basement without sunlight and deprived of games and contacts with other chimps.

A Japanese embassy spokesman contacted by Agence France-Presse said that the Tokyo government was not directly concerned by the Bardot protest as the exchange had been arranged between two institutions.

But Japanese authorities would look into the Chloe case, the spokesman added.

BEIJING (AUG. 9) - Growth in China's industrial production was down to an annualised 2.9 percent in July after rising for four consecutive months, the China Daily reported Thursday.

Domestic demand remained weak despite a relaxation in the nearly two-year-old austerity program, the official English-language newspaper said.

Industrial output totalled 32.8 billion dollars in July, 13 percent less than in June, when it increased 5.9 percent from a year earlier, the paper quoted the State Statistical Bureau as saying.

"Although the government has greatly relaxed its austerity program, shortfalls in the immediate demand are still the major culprit for hampering the industrial production," bureau economists said.

They also blamed depressed demand for the "dismal performance of the state-owned enterprises," which saw a 0.3 percent decline in output compared with July last year.

The decline came after a recovery in April and was in sharp contrast to foreign-funded and private firms, which saw a 48.2 percent growth in production.

The paper said floods and other natural disasters had also slowed industry in July.

In the first seven months of the year, industrial production grew 2.3 per cent to 229 billion dollars compared with the same period a year earlier. The government growth target is six percent this year.

Light industrial production in July was 4.1 percent more than in July 1989 at 15.4 billion dollars, while heavy industrial output increased 1.8 percent to 17.4 billion dollars.

After suffering a 0.9 percent decline in the first two months of the year, overall industrial production rose 1.4 percent in March.

The recovery continued in April, May and June with increases of two, 4.2 and 5.9 percent following an injection of 8.5 billion dollars in bank loans, the paper said.

The government implemented a strict austerity program in the last quarter of 1988 after overheated growth in industrial output of 17.7 percent that year. Output growth declined to 6.8 percent last year.

#90221d6740 08/09/1990 ~French/German News Agency

NAIROBI (AUG. 9) - Kenya is to receive aid from West Germany totalling some 19 million dollars to restructure its financial sector, the Daily Nation newspaper said here Thursday.

The aid agreement was signed Wednesday by Kenyan Vice-President George Saitoti and West German ambassador to Kenya Franz Freinherr von Mentzingen.

Mr. Saitoti hailed West Germany's continued support of local projects and its recent decision to write off loans amounting to 800 million Deutsche marks (300 million dollars).

He said West Germany was a major consumer of Kenyan coffee and horticultural products and accounted for the highest number of tourists every year.

Mr. Mentzingen noted that West Germany was the first individual donor country to take part in the financial sector programme for Kenya started by the World Bank and the International Monetary Fund.

DUBAI (AUG. 9) - Thirty-six passengers of a British Airways plane grounded in Kuwait have been taken to Baghdad by Iraqi troops, but another 295 remain stuck in Kuwaiti hotels, the airline said here Thursday.

A BA spokesman denied earlier reports that more than 200 passengers of the Boeing 747, which was stopping over in Kuwait when Iraqi forces invaded on August 2, had been transferred in buses to Baghdad.

"We have identified the location of a majority of passengers and we know that 295 of them, as well as the crew members, are in three hotels in Kuwait," he said, adding that all were "safe and well."

"Thirty-six passengers are in Baghdad and they are also safe and well," the spokesman said, without being able to specify names or nationalities.

He said the plane remained grounded at the airport in Kuwait, despite an assertion by the French government that it had been authorised to fly to Baghdad and then back to Europe.

The BA jet had arrived from London and was due to fly to Madras in India and Kuala Lumpur when the invasion occured.

Another 60 British Airways personnel remain in Kuwait, the spokesman said, and they have all been accounted for.

#90221d6850 08/09/1990 ~French/German News Agency

LAGOS (AUG. 9) - About 450 inmates of Nigerian prisons died in the first six months of this year, the government-owned ''Daily Sketch'' newspaper

reported here Thursday quoting the minister of internal affairs.

A total of 822 prison inmates died within the same period in the country last year, Commodore Lamba Gwom Wednesday told a news conference in Abuja, the nation's future capital.

To arrest this high death toll, he said the ministry had introduced a prison primary health care program with a focus on preventive rather than curative medicine.

Massive overcrowding plus poor food and health facilities for prisoners are said to be the factors responsible for the high number of prison deaths.

Cells built for only four prisoners are frequently occupied by about 20 inmates. Their food allowance is only five naira (0.6 U.S.cents) a day.

#90221d6960 08/09/1990 ~French/German News Agency

KUWAIT (AUG. 9) - The exiled Kuwaiti government said it will attend Thursday's emergency Arab summit in Cairo to discuss the Iraqi invasion of

Kuwait, the official Saudi Press Agency (Spa) reported.

Spa, which quoted Foreign Minister Sheikh Sabah al-Ahmed as-Sabah for its information, said in a separate announcement that Saudi King Fahd would make a televised address to the nation at 1100 Gmt on the Iraq-Kuwait crisis.

In Kuwait, the loyalist radio resumed transmission from a clandestine location on the same frequency it was broadcasting on before the Iraqi invasion August 2.

The radio issued repeated appeals to Kuwaitis to join the ''resistence at the nearest location to your homes'' and called on female Kuwaitis ''to encourage and back our men in defending our soil and honour against the aggressor''.

''Here is Kuwait, it will always be heard ... and it will always refer to Sheikh Jaber al-Ahmed as-Sabah as the emir, Sheikh Sa'ad al-Adbullah as the crown prince and the legitimate Kuwaiti government, regardless of what the aggressors may say, and regardless of the puppets they have installed in government, the broadcast said.

''The conscience of every Kuwaiti spells out the the name of the Emir Sheikh Jaber as the the sole legitimate ruler of this country. No Kuwaiti nor any Arab would accept anybody else (as a ruler) except him,'' the radio added.

HANOI (AUG. 9) - Belgian oil giant Petrofina has signed a joint oil exploration and production contract with PetroVietnam, the official Nhan Dan newspaper said here Thursday.

This is the first such contract that allows the foreign partner to carry out a geological survey before committing resources to drilling.

Under the terms of the contract, signed Wednesday, Petrofina will conduct geological surveys in designated areas of the continental shelf south of Vietnam, the Nhan Dan daily said.

The contract allows Petrofina to follow up the surveys with research, exploration and drilling in a 10,000 square kilometer (4,000 square mile) zone,
Nhan Dan said.

This is the ninth international oil contract Vietnam has signed since it opened up the continental shelf to Western companies in May, 1988.

Petrofina is already part of a Dutch-Anglo-Belgian consortium operating in Vietnam along with French Total, British Petroleum, the Franco-British group CEPT-Enterprise Oil and Sweden's SECAB.

The Soviet-Vietnamese group Vietsopetro, which employs about 1,000 Soviets,

is currently the only project in production, with rigs drilling the White Tiger field off Vietnam's south coast.

In March, Vietsopetro hit a landmark, with three million tonnes extracted since it began production in 1986.

In the first six months of 1990, the White Tiger field produced 1.2 million tonnes of crude oil, and is chasing a target of 2.5 million tonnes for the whole year.

Vietnam, which has no refineries, sells almost all the oil it produces, mainly to Japan, and imports almost three million tonnes of refined products a year, 80 per cent of it from the Soviet Union.

#90221d7240 08/09/1990 ~French/German News Agency

ANKARA (AUG. 9) - A senior U.S. diplomat was to travel to Damascus Thursday as part of a U.S. attempt to broaden Arab support for efforts to force Iraq's President Saddam Hussein to withdraw from Kuwait.

Secretary of State James Baker said Wednesday he was sending John Kelly, assistant secretary of state for the Near East, to the Syrian capital "to see if we can coordinate with the Syrians on collective efforts regarding Iraqi agression."

Mr. Baker briefed reporters on board his plane to Turkey on the diplomatic

efforts to reach out to Arab countries, including two that have been traditional U.S. adversaries in the region -- Syria and Iran.

He said U.S. officials had made indirect contact with Iranian leaders in search of a solution to the crisis. U.S. officials said the contacts were made through the Swiss Embassy in Tehran.

An administration official on board the secretary's plane said President George Bush spoke by telephone with the president of Yemen, a country Washington has been trying to persuade not to align itself with Mr. Hussein,
according to the official.

Mr. Baker, refusing to comment on the liklihood of joint military action by Washington and Arab countries against Iraq, said he would maintain contacts with Israel, "a powerful ally of the United States".

Regarding a multinational force based in Saudi Arabia, Mr. Baker said "the naval and air forces have the priority." He added that the Soviet Union and France have said they would send warships to the Gulf.

Mr. Baker would not say whether Egypt would participate in the multinational forces, saying he would await the outcome of the Arab summit in Cairo.

ACCRA (AUG. 9) - Twenty-two health officials from 12 African countries began a ten-day workshop in Ghana aimed at finding out how to control Malaria on the continent.

Press reports here Thursday said the workshop, being held at Sogakofe, some 90 miles north of here, is aimed at training health personnel in the skills needed to carry out the control of malaria on the continent.

Participants come from Kenya, Ghana, Burundi, Tanzania, Zambia, Malawi, Cameroun, Namibia, Sierra Leone, Uganda, Ethiopia and Mozambique.

World health officials estimate that malaria, caused by the anopheles mosquito, remains endemic in some 100 countries, and world-wide cases are put at about 100 million.

The workshop, which began Wednesday, is being jointly organized by the Ghana government and the World Health Organization.

#90221d7310 08/09/1990 ~French/German News Agency
BEIJING (AUG. 9) - China, warning of the dangers of superpower intervention, on Thursday repeated its view that the Gulf crisis would be best resolved by Arab nations themselves.

"We stand for the resolution of the Gulf crisis by Gulf and Arab countries " said a Foreign Ministry spokesman a day after Iraq announced a union with Kuwait, which it invaded August 2.

"Outsiders, especially the superpowers, should not meddle in these affairs " it said. "Otherwise, it will intensify the Gulf crisis and further worsen the situation."

Premier Li Peng, on a visit this week to Indonesia, Wednesday issued a similar warning against the United States getting involved militarily in the crisis.

But he added that as a sovereign nation, Saudi Arabia -- which set up diplomatic ties with China less than a month ago -- had the right to appeal for outside help.

China has already joined an international arms embargo against Iraq, and appealed to Baghdad to withdraw its forces from Kuwait.

-30- 1197
#90221d7420 08/09/1990 ~French/German News Agency
Riyadh (AUG. 9) - Kind Fahd of Saudi Arabia confirmed Thursday that his country has requested the deployment of foreign and Arab troops, including U.S. and British, for ''purely defensive purposes'' and denounced the invasion by Iraqi forces of Kuwait, calling for their withdrawl and re-instatement of the ruling Sabah family.

Fahd in his address broadcast on Saudi Tv also stressed that the presence of these forces on Saudi soil was on a temporary basis and that they ''will withdraw upon our request''.

He called the Iraqi invasion ''the ugliest aggression ever seen in the modern history of the Arab nation''. More dpa ba 091324 aug 90

Fahd also expressed Saudi Arabia's outright rejection of all measures taken by Iraq in Kuwait following the invasion, including statements and resolutions by the Baghdad-installed Kuwaiti government.

Fahd emphasised support to all international demands for the Iraqi withdrawal, including those from the Arab League, the Islamic Confererence Organsation (Ico) and the six-member Gulf Cooperation Council (Gcc).

''Saudi Arabia demands the restoration of the situation in brotherly Kuwait before the (August 2) Iraqi invasion and the return of the ruling family led by the Emir Shaikh Jaber al-Ahmed as-Sabah and his government,'' he said.

Fahd expressed hope that the upcoming Arab League summit meeting in Cairo would yield positive results that would meet the aspirations of the Arab nation and strengthen Arab solidarity.

#90221d7550 08/09/1990 ~French/German News Agency

WASHINGTON (AUG. 9) - The White House has said it would formally notify the U.S. Congress of the deployment of U.S. troops to Saudi Arabia in line with the War Powers Act.

The law, which limits U.S. involvement in foreign conflicts, requires the president to consult with Congress formally when U.S. forces are introduced into situations such as the Gulf crisis.

The White House advised the Senate Foreign Relations Committee that it would soon be providing formal notification of the deployment of U.S. troops to the Gulf, committee spokesman Frank Sieverts said Wednesday.

House Foreign Affairs Committee chairman Dante Fascell, a Florida democrat, said deployment of U.S. troops to Saudi Arabia in case of an attack by Iraq "absolutely" triggered the War Powers Act and he expected notification.

The president must terminate the military deployment within 60 days unless Congress specifically authorizes its continuation, according to the law.

The period can be extended to 90 days if the president certifies that the mobilization is "an unavoidable military necessity."

Mr. Fascell said he thought congressional approval would not be hard to win, given the support in Congress for the administration's position in the Gulf crisis.

U.S. President George Bush deployed U.S. ground forces to Saudi Arabia beginning Tuesday in what he said was a defensive stance in case Iraqi troops tried to invade Saudi Arabia.

-30- 1645

#90221d7580 08/09/1990 ~French/German News Agency

WASHINGTON (AUG. 9) - President George Bush won strong bipartisan support in Congress for his decision to send U.S. troops to Saudi Arabia but lawmakers also cautioned against the United States going it alone in the Gulf.

Senate Majority leader George Mitchell, voicing support for the president, expressed hope Wednesday that the U.S. moves "will deter an Iraqi attack on Saudi Arabia and convince Saddam Hussein to withdraw his troops from occupied Kuwait."

Senator Edward Kennedy, a member of the Senate Armed Services Committee, said the decision to send in U.S. troops was "clearly justified as part of the timely international effort to deter further Iraqi aggression."

There were words of caution as well, however -- even by Republicans such as Senate Minority leader Bob Dole who told reporters, "the Arab countries must come to the party too."

"I hope we will not be the 'Lone Ranger' like we were in Vietnam," said Senator Alan Cranston, a Democrat of California.

Senator Howard Metzenbam, an Ohio Democrat, defended Mr. Bush's decision to send in troops as being in the best interest of the United States. But he expressed disappointment that "more of the Arab nations are not standing shoulder to shoulder with the rest of the world in defending the independence and freedom of Kuwait and Saudi Arabia.

Other lawmakers focused on the possible repercussions of the president's move.

"The next 48 hours is crucial," said Senator Sam Nunn, of Georgia, chairman of the Senate Armed Services Committee. If Iraqi forces did attack Saudi Arabia, they would likely do so soon, before U.S. intelligence was firmly in place, he said.

"There is a danger of a hot war," said Representative Les Aspin, chairman

of the House Armed Services Committee. "Saddam sees us coming. He knows more troops will be there tomorrow and still more next week. If he wants to move, now is better than later."

#90221d7660 08/09/1990 ~French/German News Agency

JOHANNESBURG (AUG. 9) - South African troops were mobilize in the eastern Cape province city of Port Elizabeth Thursday to end four-day old rioting which has left 23 people dead and scores injured.

South African police spokesman Bill Dennis confirmed the deaths, including that of a baby, saying they occurred during running battles between police and rampaging mobs in the city's ''coloured'' (mixed-race) townships.

Initial estimates put the cost of the damage at millions of dollars, after drunken mobs looted and set afire houses, schools, factories and vehicles.

By early Thursday ambulances were unable to reach the wounded because of burning barricades erected in streets.

An army spokesman said citizen force units had been sent to the worst-hit areas.

While the violence began as a protest against Allan Hendrickse, leader of the coloured house in the segregated South African tricameral parliament, civic leaders agreed that criminals had taken advantage of the situation to plunder shops.

#90221d7770 08/09/1990 ~French/German News Agency

ISLAMABAD (AUG. 9) - Opponents of ousted premier Benazir Bhutto have started lining up their forces for an electoral showdown expected in October.

"We will crush the enemies of Pakistan at the ballots on October 24," said Ms. Bhutto's archrival, Nawaz Sharif, who heads the eight-party Islamic Democratic Alliance (IJI).

Hectic parleys are on to forge a grand alliance of right-wing forces to humble the Pakistan Peoples Party (PPP), whose leaders, including Ms. Bhutto, face possible disqualification from the election if found guilty of corruption.

Analysts said the Pakistan Muslim League (PML) is expected to play a key role in a united anti-Bhutto front.

The party, headed by Mohammed Khan Junejo, who was Prime Minister under the late President Mohammed Zia ul-Haq, is a pivotal group of the IJI, and Mr. Junejo and Mr. Sharif quickly patched up their long-standing differences at a meeting here Wednesday of the PML high command.

PML Secretary-General Iqbal Ahmad Khan said the party would try to bring about a "greater alliance" to defeat the PPP.

"All differences within the party have been resolved amicably," he reported.

The rivalry between Mr. Sharif and Ejaz ul-Haq, another PML leader and the son of Gen. Zia, has ended with the new realignments emerging in Pakistani politics, party sources said.

Mr. Sharif said the IJI, which shared a split mandate in the 1988 general elections that brought Ms. Bhutto to power, would maintain its identity while trying to bring more parties into the fold.

Interim Premier Ghulam Mustafa Jatoi flew to the Punjabi capital of Lahore Thursday to attend an IJI meeting convened by Mr. Sharif, party officials said.

Mr. Jatoi told a news conference here Wednesday that he was expanding his government by calling in associates from the former Combined Opposition Parties (COP), which was automatically disbanded when President Ghulam Ishaq Khan dissolved the parliament Monday as he sacked Ms. Bhutto.

"I will also take men of integrity" from outside the COP, Mr. Jatoi said, adding that that his interim administration would be made up of "clean and honest people."

He said judicial commissions would be set up to probe charges of corruption against the Bhutto government.

The tribunal would decide on the punishments to be meted out, including disqualification from contesting the elections, to those found guilty, he said.

The new premier said his government believed in "democracy and justice" and, to allay fears of a delay in the election programme, added that the process of "accountability" and electioneering would be conducted simultaneously.

There will be no "victimization," but elements responsible for looting and plundering the nation's financial resources will not be spared, he added.

Ms. Bhutto, along with some of Mr. Jatoi's allies, is worried that the

accountability process could lead to a delay in the promised elections.

Nawabzada Nasrullah Khan, a veteren politician and an IJI member, warned that postponement of elections would be a constitutional violation, and Mr. Junejo has vowed that his party will resist such a move.

"If the job (of accountability) is entrusted to impartial men of integrity, it will have credibility and popular backing," Lahore's independent The Nation daily said Thursday.

But, in case it is seen as selective and politically motivated, the exercise will be deemed an attempt to victimize political opponents, and the ensuing elections will take on the appearance of a "stage-managed show " it added.

HAMBURG (AUG. 9) - Libyan leader Moamer Gaddafi confirmed that the Soviet Union has stopped supplying his country with arms, in an interview to be broadcast on West German radio Thursday.

In remarks recorded before the invasion of Kuwait by Iraq seven days ago, Gaddafi said the Soviet Union was demanding that Libya pay off some three billion dollars of debts. Moscow had refused to accept oil as payment and insisted on cash.

The Libyan leader said he felt certain that a war between the Arabs and Israel was inevitable at some stage in the future. A political solution in the Middle East was unlikely, he added.

Gaddafi ruled out the Arab use of chemical, atomic or biological weapons against Israel. ''Only a madman would contemplate such a thing,'' said the Libyan leader.

The Middle East was too small a region to allow the use of mass weapons of destruction. Their deployment against Israel would rebound on Palestinians, Lebanese, Syrians, Jordanians and Egyptians, said Gaddafi.

COLOMBO (AUG. 9) - Libya and Iran have been briefed in detail by the Sri Lankan government on the current conflict in the island's northeast between government troops and Tamil guerrillas, a senior Minister said Thursday.

Cabinet spokesman Ranjan Wijeratne told a weekly press briefing in parliament that he and Trade Minister A.R.M. Munsoor had visited Iran and

Libya last week to brief leaders there on the situation in Sri Lanka.

Mr. Wijeratne said that one of the reasons the government decided to send a team to Moslem nations was "a lot of misconception" about the crisis. He did not elaborate.

He said that he met Iranian President Ali Akbar Rafsanjani on the first leg of their visit.

Mr. Wijeratne, who is also minister of state for defence, said Mr. Rafsanjani showed great interest and expressed concern at the killing of innocent civilians.

Mr. Wijeratne said he was unable to meet Libyan leader Colonel Muammar Qaddafi when in Libya, as Col. Qadaffi had gone out of the country.

The eruption of the Iraqi-Kuwaiti crisis also prevented him from meeting Iraqi President Saddam Hussein, Mr. Wijeratne said.

The minister said that during the visits, the Sri Lankan delegation had meetings with senior government officials and armed forces heads in those countries.

"You can assume what you want", Mr. Wijeratne said when reporters suggested that the two cabinet members went on an arms-buying spree to the Moslem states.

The trip by the two ministers was not officially announced, but press reports said they went to purchase military hardware for the Sri Lankan armed forces in their fight against Tamil Tiger guerrillas in the northeast.

He denied claims by the guerrillas that the mission to the Moslem states had been a failure. "They (the Tigers) may think so," he said.

WEELINGTON (AUG. 9) - Some 3.5 million registered voters in New Zealand will be called to the polls October 27 to elect a new parliament, Premier Geoffrey Palmer announced Thursday.

He took over a year ago from David Lange who resigned ''for reasons of health'' after squabbles within the ruling Labour Party, which has 56 seats in the 97-seat legislature, compared with 40 seats for the conservative National Party.

In order to take over the government, the National Party would have to win

ten seats from Labour. Recent opinion polls have given the National Party a wide lead in voter sympathy.

COPENHAGEN (AUG. 9) - The Danish unemployment rate edged slightly upwards in June to 9.5 per cent of the workforce compared with 9.4 per cent in May and was up on the 9.3 per cent in June 1989, seasonally adjusted official figures showed on Thursday.

The raw unemployment figures showed a slight fall to 8.9 per cent compared with 9.1 per cent in May, but were marginally higher than the figure of 8.8 per cent in June 1989.

LONDON (AUG. 9) - The British ambassador to Iraq, Harold Walker, has left London and was returning Thursday to Baghdad by way of Amman, the foreign office confirmed.

Mr. Walker, who left London late Wednesday, will meet with Iraqi officials in an effort to obtain guarantees for the safety of British nationals currently stranded in Iraq and Kuwait, notably some 100 British citizens being housed in a Baghdad hotel, a spokesman said.

On Wednesday, Foreign Secretary Douglas Hurd said he had told his Iraqi counterpart Tariq Aziz "in plain terms" that Britain held Iraq responsible for the safety of British citizens in Iraq and Kuwait.

British and other foreign nationals remained stranded in Kuwait and Iraq Thursday with the main airports in both Baghdad and Kuwait City closed along with overland border crossing points, the spokesman added.

#90221d8190 08/09/1990 ~French/German News Agency

RIYADH (AUG. 9) - King Fahd of Saudi Arabia confirmed Thursday that his country requested the deployment of foreign and Arab troops, including those from the United States and Britain.

The measure was taken for ''purely defensive purposes'', said Fahd in an address broadcast on Saudi Tv. The presence of these forces on Saudi soil was temporary, he stressed.

''The kingdom of Saudi Arabia expressed desire in the particiation of brotherly Arab and other friendly foreign forces,'' said Fahd in his

statement.

Several thousand American troops and dozens of combat aircraft have already arrived in Saudi Arabia, most of them at Dhahran base on the Gulf coast, Pentagon sources said Thursday.

The U.S. soldiers are equipped with gas masks and protective suits in case Iraq decides to use some of its stockpile of chemical weapons in a possible attack on Saudi Arabia.

The Saudi monarch denounced the Iraq assault on Kuwait a week ago, calling on Baghdad's forces to pull out, and demanded the re-instatement of the ruling Sabah family.

The Iraqi invasion was ''the ugliest aggression ever seen in the modern history of the Arab nation'', said Fahd.

It wasn't clear Thursday whether Iraqi President Saddam Hussein would attend an emergency League summit in Cairo, which has been described by some Arab leaders as a ''last chance'' for a peaceful settlement of the crisis.

-30- 1593
#90221d8300 08/09/1990 ~French/German News Agency
CAIRO (AUG. 9) - World sanctions against Iraq following its invasion of its Gulf neighbour Kuwait have fuelled anxiety in Arab nations about negative economic repercussions in the region but have sparked mixed political reactions.

In Egypt, Iraqi President Saddam Hussein's action has been met with widespread criticism among the population. One Cairo taxi driver summed up what many of his compatriots feel. Drawing his hand across his throat, he said: ''Just finish him off.''

The Egyptian media, too, has been unusually critical of other Arab nations' reaction to the crisis.

The government-orientated al-Akhbar newspaper said in reference to a failure by Jordan, Sudan and Yemen and the Palestine Liberation Organisation (Plo) to support the Arab League's condemnation of Iraq:

''The world's reaction to the Iraqi invasion was unique in the history of interational relations... Unfortunately the handful of countries, which did not denounce the aggression, were Arab nations,'' the paper added.

''The West now compares Iraq with Nazi Germany ... May God help the Arab world which has been plunged into an unprecedented gloomy crisis by the

uncalculable Iraqi actions - a crisis from which nobody knows a way out,'' al-Akbar added.

In Lebanon, fears are mounting about the collapse of the economy in the Gulf which analysts said would affect the country's economy, already battered by the ongoing civil war.

#90221d8350 08/09/1990 ~French/German News Agency

MOSCOW (AUG. 9) - Armenia considers the role of the Soviet central government under a new treaty should be to act only as coordinator between the republics, Armenian President Levon Ter-Petrossian said here Thursday.

The people of the Soviet Union will find an "acceptable future" if the Union acts as a coordinator between republics and governments, "but each republic should have its own constitution and own legislation," Mr. Ter-Petrossian said.

The Armenian parliament has been preparing a declaration of independence since the beginning of the week which could be adopted in the next few days.

"The treaty of the Union will have a coordinating function between the republics, neither more nor less," said the Armenian leader, who was elected president of the Armenian Supreme Soviet (parliament) on Saturday.

The main preoccupation now for the new leadership in Armenia is the question of armed militias. The 15-day time limit on President Mikhail Gorbachev's ultimatum ordering nationalist militia to turn in their arms ended Wednesday.

"I am sure that I will be given the necessary time to apply the presidential decree," said Mr. Ter-Petrossian, who met Wednesday with Prime Minister Nikolai Ryzhkov at the Kremlin.

He also said he spoke by phone with Mr. Gorbachev, vacationing near the Black Sea, who congratulated him on his recent election.

The Armenian leader said "it is understood" that implementation of the decree will be entrusted to the Armenian republic's authorities "without intervention by special troops of the Ministry of the Interior."

Mr. Ter-Petrossian described some Soviet estimates of 160,000 men in the Armenian militia as a "myth," putting the figure closer to 5,000 armed men.

"The Armenian National Army (one of the main militia groups) made it known three days ago that it was ready to submit to parliament, " he said.

One of the solutions to be included in the proposed declaration of sovereignty is creation of an army in the Armenian Republic, a process which the Armenian president said was a "trend" noted in all Soviet republics.

On the Armenian enclave in Azerbaijan, Nagorny-Karabakh, Mr. Ter-Petrossian said the first step towards a compromise would be "the re-establishment of a legal Soviet authority in Karabakh."

Mr. Ter-Petrossian, 45, one of the founders of the Karabakh Commitee, spent six months in prison in 1989 when the committee was forcibly dissolved by Moscow.

#90221d8450 08/09/1990 ~French/German News Agency

NEW DELHI (AUG. 9) - Some 170,000 Indians are stranded in Iraqi-occupied Kuwait and the Indian government said Thursday it is trying to find a way to get them out.

Foreign Minister Inder Kumar Gujral told parliament Thursday that New Delhi was exploring the possibility of evacuating them through Oman by road and sea, adding that it was in touch with the International Red Cross for help.

But the minister rejected opposition demands that Prime Minister Vishwanath Pratap Singh personally contact Iraqi President Saddam Hussein to ensure the safety of Indians in Kuwait.

The rejection sparked a protest walkout from the lower house by members of former prime minister Rajiv Gandhi's Congress (I) party, who accused the government of not doing enough for Kuwait-based Indians.

Mr. Gujral described the situation in Kuwait as "war-like," with the airport and the seaport closed and communications cut.

But all Indians living in the tiny oil-rich Gulf state, whose annexation was announced by Baghdad Wednesday, are safe, he said. The Iraqi government had ordered its troops to protect Indians, he added.

The minister made no comment on Kuwait's annexation or the deployment of U.S. troops in Saudi Arabia, saying the government was still studying the "whole situation."

India has refrained from outright condemnation of Baghdad's action, but called for a withdrawal of Iraqi troops who occupied Kuwait on August 2.

-30- 1641
#90221d8480 08/09/1990 ~French/German News Agency
PARIS (AUG. 9) - Israeli Defence Minister Moshe Arens Thursday attacked French arms supplies to Iraq in a strongly-worded interview which could fuel political embarrassment over a policy which enabled Baghdad to build up a mighty arsenal.

"Unfortunately, Iraq has many French aircraft, which are the best it has, and I suppose that many in Paris regret having sold these planes and the corresponding missiles to the Iraqis," the Israeli minister said in an interview published by the French daily Le Figaro.

Iraq on Wednesday announced that it had annexed Kuwait, which it invaded last week.

Iraqi President Saddam Hussein "has Mirage (fighter planes), Gazelle helicopters and Exocet air-to-sea missiles which are the 'nec plus ultra' (star performers) of its equipment. Today, the Iraqi army is more powerful than the French army, and it has a bigger air force," Mr. Arens went on.

"France supplied its first nuclear reactor (destroyed by an Israeli attack in June 1981). And I know that France continued to provide assistance after it (Iraq) used chemical arms against the Iranians" during the Gulf war, he added.

France in May suspended its arms shipments to Iraq to protest Baghdad's non-payment of a debt totalling some 24 billion francs (4.6 billion dollars) and mostly dating from a 1974 military accord.

Paris has also joined in U.N.- and European Economic Community sanctions adopted since the invasion of Kuwait, but has so far declined to join a U.S.-led multi-national force being deployed in Saudi Arabia as a deterrent to Iraq.

But French President Francois Mitterrand was returning to Paris Thursday from his vacation home at Latche in southwestern France to chair a crisis meeting of his inner cabinet focusing on the Gulf.

-30- 1959
#90221d8560 08/09/1990 ~French/German News Agency
LONDON (AUG. 9) - The threat of chemical warfare in Saudi Arabia combined with the extremely harsh climate and terrain on the Arabian peninsula, pose major logistical obstacles to ground and air forces there, according to military experts.

"If Iraqi troops have an advantage over western soldiers in the region it is the fact that they are used to the temperatures" which can average

between 110 and 120 degrees fahrenheit (45 to 50 centigrade) during the summer, said Nick Cook, aviation editor with Jane's Defence Weekly.

"Your average 82 Airborne troop, tough as he is, is not accustomed to unabated exposure to temperatures like there are in this region," Mr. Cook said.

Soldiers operating in the searing temperatures of the Arabian peninsula face a high risk of heat stroke, which can be fatal, dehydration and heat exhaustion and the forces stationed there face the immediate logistical challenge of maintaining continuous supplies of ice and fresh water to avoid these risks.

The danger to ground forces posed by the heat is compounded by the threat of a chemical weapons attack from Iraq, which Mr. Cook said was "already emerging as the most important factor in this conflict."

To defend against that threat, soldiers would have to wear special rubber "nuclear, biological and chemical suits," or NBC suits which raise body temperatures substantially and require troops to consume around 40 liters of water per day to avoid dehydration.

"Troops might be able to do without their gas masks for a while, but they would have to wear most of the NBC suit that NATO forces are equipped with -- which covers the entire body -- for most of the time," Mr. Cook said.

He said the Iraqi threat to use chemical weapons was "the one thing that differentiates this conflict from any other since World War I."

Along with ensuring vast supplies of fresh water, the forces being sent to Saudi Arabia would also need to send specially trained medical personnel and equipment as a precaution against a chemical attack.

#90221d8600 08/09/1990 ~French/German News Agency

NEW DELHI (AUG. 9) - Pakistan's caretaker government is deeply interested in improving relations with India, soured by Moslem separatist turmoil in Kashmir, Islamabad's foreign secretary said here Thursday.

Tanvir Ahmed Khan said interim Prime Minister Ghulam Mustafa Jatoi's administration was keen to establish friendly relations with New Delhi by removing the "underlying causes of the current misunderstandings."

Mr. Khan arrived here Thursday for talks with his Indian counterpart, Muchkund Dubey, which are expected to focus on Kashmir.

He told Indian news agencies on arrival that his talks with Mr. Dubey

starting Friday would seek to set up a framework in which the two governments could open a "new chapter in India-Pakistan relations."

The talks will be held against the backdrop of Monday's sacking of Benazir Bhutto as Pakistan prime minister. Her 19-month-old government was replaced by the interim administration, which will rule until elections set for October 24.

Mr. Khan's statement appeared designed to scotch fears expressed by Indian analysts that Ms. Bhutto's removal meant a more dominant role for hawkish elements in the Pakistani military which could step up intervention in Kashmir.

The official said he had been mandated by the caretaker premier to state "very clearly" in New Delhi that Islamabad wanted a "cooperative, mutually-beneficial" relationship.

He described Ms. Bhutto's sacking as "an internal democratic development."

"This was a ... democratic manifestation of a certain process that had been going on for some time," he added.

The talks, the second between Mr. Khan and Mr. Dubey in a month, have been set to try and reduce border tensions over Kashmir, which have sent relations plunging to an all-time low.

India accuses Pakistan of arming and training Moslem secessionists in Kashmir, whose disputed ownership has been the cause of two of their three wars.

-30- 2138

#90221d8610 08/09/1990 ~French/German News Agency

NEW DELHI (AUG. 9) - India and Pakistan were to begin a second round of talks here Thursday in a bid to reduce tensions over Kashmir against the backdrop of Prime Minister Benazir Bhutto's abrupt dismissal.

Pakistan Foreign Secretary Tanvir Ahmad Khan was to meet his Indian counterpart Muchkund Dubey to hammer out what an Asian diplomat described as "concrete proposals" aimed at defusing tensions.

The diplomat said the talks would focus mainly on Kashmir, where anti-Indian Moslem militants are spearheading a bloody secessionist campaign, and the massing of troops by India on its northern border with Pakistan.

Indian external affairs ministry officials said the two foreign secretaries would be assisted by experts at the three-day talks and added that New

Delhi was hoping for progress.

"We hope to make progress this time," a senior ministry official said, adding that the two sides had discussed several "confidence-building measures" during July talks.

The two foreign secretaries met in Islamabad last month, but reached no agreement on the "vital issues" of Kashmir and the retreat of troops to peacetime positions.

Indian officials said the talks had nonetheless helped the two sides identify specific problems that have sent relations plunging to rock bottom.

Pakistan's interim prime minister, Ghulam Mustafa Jatoi, said Wednesday he had asked Mr. Khan to resume the talks, but added that "genuine peace" between the two Asian neighbours could not be established without a solution to the Kashmir dispute.

Mr. Jatoi's statement echoed the stand of Ms. Bhutto's deposed government, which extended moral support to the Moslem secessionist campaign in Kashmir which it described as a legitimate struggle for self-determination.

AMMAN (AUG. 9) - Foreigners, including Americans, West Germans, Britons and Egyptians, Thursday continued to flee Iraq and Kuwait via Saudi Arabia and Jordan as military tension heightened in the Gulf.

About 150 Egyptians crossed the Iraqi border with Jordan in the early morning hours, Jordanian sources said. Some 40,000 Egyptians, who were working in Iraq, were still awaiting permission to leave the country for Jordan, the Egyptian news agency Mena reported from Amman.

In addition, 83 non-Arabic foreigners, among them 28 Germans, 22 Britons and seven Americans, crossed the border to Jordan, the Jordanian sources added.

Cairo authorities provided additional ferries to facilitate the return home of Egyptians from Iraq and Kuwait via the Jordanian Red Sea port of Aqaba to Nuwaiba. Some 700 Egyptians, who fled Kuwait via Saudi Arabia, poured into Aqaba in the past 24 hours alone.

Egyptian charge d'affaires to Jordan Ramsi Alam said all Egyptian refugees had praised the Saudi authorities for their help. The diplomat said he expected that several thousand Egyptians would leave Kuwait in the next few days.

#90221d8890 08/09/1990 ~French/German News Agency
BRUSSELS (AUG. 9) - U.S. Secretary of State James Baker is to meet Friday with the Soviet Union's new NATO envoy during a meeting here of NATO alliance ministers to discuss the Gulf crisis, diplomatic sources said Thursday.

The meeting between Mr. Baker and Soviet ambassador Nikolai Afanasievsky will be the first time in the history of the North Atlantic Treaty Organisation that the U.S. holds direct NATO talks with the Soviet Union.

Following a trip to Turkey, where troops have been mobilised near the Iraq border, Mr. Baker will be in Brussels on Friday to meet with NATO ministers to discuss the annexation of Kuwait by Iraq less than a week after the Iraqi invasion of the Gulf emirate.

Mr. Afanasievsky was appointed Soviet ambassador to NATO on August 2 by President Mikhail Gorbachev, the Tass news agency reported.

A month earlier, NATO Secretary General Manfred Woerner had said the Soviet Union would soon receive diplomatic status within NATO.

On Thursday, Mr. Afanasievsky had still not completed formal procedures to obtain his diplomatic creditials within the alliance, NATO sources said.

#90221d9090 08/09/1990 ~French/German News Agency
FRANKFURT (AUG. 9) - The yield on West German federal five-year bonds is to rise from Friday from 8.50 per cent to 8.75 per cent, the West German finance ministry said on Thursday.

Series 92 bonds, expiring in 1995 and carrying a nominal yield of 8.75 percent, are to be sold at 100 percent, increasing the effective yield from 8.50 per cent to 8.75 percent. The ministry also announced an increase in yields on various treasury bonds.

On the Frankfurt bond market, yields have been rising for several days, particularly in response to uncertainty over the crisis in the Middle East, and over German unification.

On Wednesday, the average yield of federal ten-year loan stock rose above nine percent to 9.01 percent compared with 8.51 percent on July 25. On July 19, the government reduced the yield on federal loan stock from 8.57 percent to 8.50 percent.

#90221d9120 08/09/1990 ~French/German News Agency
TOKYO (AUG. 9) - Iran told Japan Thursday it was considering increasing its oil production to help stabilize the world oil market amid tensions in the Gulf following Iraq's invasion of Kuwait, a press report here said.

Japanese news agency Jiji Press quoted government sources as saying the message was conveyed by Iran's ambassador to Japan, Hosein Kazempur Ardebili, to the Japanese government.

But Mr. Ardebili did not specify how much Iran might boost its oil output, the sources said. Iran and Iraq are allotted an output quota of 3.14 million barrels a day each by the Organization of Petroleum Exporting Countries (OPEC) for the second half of this year.

The envoy was quoted as saying that OPEC has yet to decide whether or not to increase output, but Iran is positively considering increasing oil production.

#90221d9140 08/09/1990 ~French/German News Agency
BONN (AUG. 9) - About 300 Nigerians have taken refuge in the West German embassy in Monrovia, putting the total number of Nigerians holed up in the diplomatic compound at close to 500, a Foreign Ministry spokesman said here Thursday.

According to the spokesman, Liberian troops loyal to rebel leader Charles Taylor attacked the Nigerian embassy, causing about 300 people refuged there to seek shelter in the nearby West German mission.

About 170 Liberians, 16 West Germans, one American and a French woman had already been in the West German embassy since the beginning of the month, so the compound was already "saturated" when the Nigerians flooded in, the spokesman said.

The spokesman added that food supplies could feed the 500 refugees for "the next few days."

"We are in contact with the Americans in view of a possible evacuation," the spokesman said.

-30- 1064

#90221d9170 08/09/1990 ~French/German News Agency

BONN (AUG. 9) - Bonn expects that economic growth in what is now West Germany will slacken to between 3 and 3.5 per cent in 1991 following an estimated 4 per cent growth this year, State Secretary in the Economics Ministry Otto Schlecht said Thursday.

A decline in exports to the country's major trading partners like the United States as part of a ''world interest rate rise'' was to blame for the expected slackening.

He said demand from what is now East Germany would give the West German economy an expected growth impulse of between 0.5 to 1.0 percentage points in 1991 following nearly 0.5 per cent this year. But continuing high demand for West German goods by East Germany could not offset the decline in exports.

With inflation expected to be 2.5 per cent this year, he said prospects for the economy this year and in 1991 looked ''fantastic''.

He predicted that 1990, the eighth successive year of economic upswing with an cumulative growth of nearly 30 per cent, would see unemployment fall to below 2 million for the first time since 1982.

The two Germanys are expected to unite by the end of this year following the introduction of a currency union in July.

#90221d9180 08/09/1990 ~French/German News Agency

LONDON (AUG. 9) - Scandinavian firms (including Finland in that designation) bought almost as many companies in the European Economic Community (EEC) in the first six months of 1990 as they did in all 1989, a British publication said Wednesday.

The latest edition of Acquisitions Monthly said that Finnish, Swedish,

Norwegian and Danish firms purchased 217 companies valued at 7.89 billion pounds (14.7 billion dollars) in the European Economic Community during the first half of 1990, as opposed to only 265 EEC companies valued at 2.09 billion pounds (3.89 billion dollars) for all of 1989.

The Scandinavian companies are hoping to gain a foothold in the European market which will be instituted in 1992, or, in the case of EEC member Denmark, are looking to reinforce their position, according to the magazine.

Swedish firms were the most aggressive among the four countries, buying 126 EEC companies for 6.6 billion pounds (12.14 billion dollars), far more than American companies, which bought 23 EEC companies for 904 million pounds (1.66 billion dollars).

Finnish companies were the second most active in the group, followed by Denmark and Norway.

Great Britain was the most popular EEC destination for Scandinavian capital, followed by West Germany and France.

JOHANNESBURG (AUG. 9) - President Frederik de Klerk is to pay an official visit to Madagascar on Aug 14 -- his fifth visit to an African country since he became president in August 1989, reports said here Thursday.

Quoting an unnamed government source, the pro-government Citizen newspaper said Mr. De Klerk would be meeting President Didier Ratsiraka -- who has been ruling Madagascar for the past 15 years -- next Tuesday.

Mr. De Klerk's visit will coincide with a South African Airways (SAA) flight to Madagascar which is set to pave the way for scheduled flights from South Africa to Madagascar later this year, the Citizen said.

Earlier this year, following reforms announced by Mr. De Klerk which included the unbanning of the anti-apartheid African National Congress (ANC) on February 2, Madagascar granted SAA flying rights.

The Citizen said officials from SAA and Air Madagascar have been involved in exploratory talks for some time about the establishment of a scheduled air service between the two countries.

Both Mr. De Klerk's office and the Department of Foreign Affairs refused to comment on the Citizen report.

Last year Mr. De Klerk visited Zambia, Zaire, the Ivory Coast and

Mozambique where he held talks with the countries' heads-of-state.

#90221d9270 08/09/1990 ~French/German News Agency
NEW DELHI (AUG. 9) - Opposition deputies walked out of the Indian parliament Thursday after chiding the government of Prime Minister Vishwanath Pratap Singh for lacking a ''Gulf policy'' following the invasion and annexation of Kuwait by Iraq.

The walkout by the Congress (I) and Muslim League party members came at the end of a 100-minute heated debate in the Lok Sabha (Lower House) when they insisted that Singh should talk to Iraqi President Saddam Hussein and seek his help in evacuating 172,000 Indians from Kuwait.

Foreign Minister Inder Kumar Gujral said if Singh were to talk to Hussein, the first thing that the Iraqi leader would want to know would be New Delhi's stand on the Gulf crisis.

Gujral tried unsuccessfully to explain to the agitated deputies that India was in the process of formulating its position on the ''complicated situation'' and that it was too early to ''commit'' anything now on the issue.

Stating that all the Indians in Kuwait were safe, including those working on the Kuwait-Iraq border, Gujral said India was keen on evacuating all its nationals from Kuwait but this would prove to be a difficult task in the existing circumstances.

Clearly dissatisfied with the minister's response, the Congress and Muslim League members walked out of the debating chamber amidst loud protests.

#90221d9290 08/09/1990 ~French/German News Agency
WASHINGTON (AUG. 9) - As U.S. ground and air forces continued to land in Saudi Arabia Thursday, there was broad public support for President George Bush's decision to order what may be the largest U.S. military overseas deployment since the Vietnam War.

A poll in the daily USA Today showed that more 80 per cent of Americans surveyed backed the deployment, aimed at deterring an Iraqi attack against a country which Washington considers of vital strategic interest.

About half of those polled said they were prepared to make sacrifices at home and to keep troops in Saudi Arabia "as long as it takes."

Mr. Bush also won strong bipartisan support in Congress for his decision

although legislators warned against the United States going it alone in the Gulf.

"I hope we will not be the 'Lone Ranger' like we were in Vietnam," said Senator Alan Cranston, a California Democrat.

Echoing this sentiment, The New York Times said in an editorial Thursday: "Americans will not be willing to pay the costs in Saudi Arabia indefinitely when others help with no more than sideline cheers. The United States cannot withstand the inevitable backlash in the Muslim world unless Arab states send troops to Saudi Arabia."

"Japan, as dependent on Gulf oil as the West, can certainly provide funds for the expeditionary forces...The participation and assistance of these and other countries will determine success or failure in the Arabian desert."

As giant C-5 Galaxy transports laden with U.S. paratroops landed in the Saudi city of Dhahran early Thursday, the magnitude of the operation began to sink in here.

MOSCOW (AUG. 9) - Soviet deputy foreign ministers Alexander Belonogov and Yuri Kvisinski met here Thursday with top embassy officials from Warsaw Pact allied countries to discuss the Gulf crisis, Tass news agency reported.

The envoys were informed of the attitude and practical steps taken by Moscow with regard to the Gulf crisis, including its position at the United Nations, Tass said.

Moscow aimed to prevent the escalation of the conflict and bring about a political dialogue to settle the crisis, it said.

NEW YORK, UNITED NATIONS (AUG. 9) - The United Nations Security Council, by a 15-0 vote, Thursday declared Iraq's annexation of Kuwait "null and void."

"Annexation of Kuwait by Iraq under any form and whatever pretext has no validity and is considered null and void," the council said in its third resolution on the Gulf crisis since Iraq invaded Kuwait August 2.

Iraq's decision-making Revolutionary Command Council Wednesday declared

Kuwait an integral part of Iraq, and that the union was "total and irreversible."

The U.N. resolution Thursday called on "all states, international organizations, specialized agencies not to recognize that annexation and to refrain from any action or dealing that might be interpreted as an indirect recognition of the annexation."

It demanded that Iraq "rescind its actions purporting to annex Kuwait."

Speaking after Thursday's vote, the U.S. ambassador here, Thomas Pickering, defended the U.N. action as "necessary because Iraq is attempting to extinguish the sovereignty of a member state of the United Nations.

"There is something repugnant, chilling and vaguely familiar about the statement issued yesterday by the Iraqi Revolutionary Command Council. We have heard that rhetoric before."

The Security Council Monday approved a worldwide trade embargo against the regime of Iraqi President Saddam Hussein. Hours after the Iraqi invasion, it condemned the invasion and demanded the immediate and unconditional withdrawal of Iraqi forces from oil-rich Kuwait.

#90221d9540 08/09/1990 ~French/German News Agency

SINGAPORE (AUG. 9) - Singapore Premier Lee Kuan Yew Thursday took the salute of 66 armed contingents as the Asian island state celebrated the 25th anniversary of its independence with the country's biggest ever military parade in downtown Singapore.

Lee, dressed in his ruling People's Action Party's all-white uniform and flanked by his cabinet ministers, watched a 250-vehicle mobile column of military and non-military segments drive past.

The two-hour show also included the first-ever sea review of 150 vessels of the national navy in the Strait of Singapore, south of the parade grounds, and a display of Air Force planes.

American-made F-16 and F-5 fighter jets and Super Pumas of the Singapore Air Force thundered over the parade grounds followed by other Air Force units, including E2C hawkeyes and Skyhawks.

At the end of the National Day parade, 25 white doves were released to mark the nation's 25 years of independence.

Lee is due to hand over his job to First Deputy Prime Minister Goh Chok Tong in November when he steps down after 31 years in office.

#90221d9550 08/09/1990 ~French/German News Agency
MOSCOW (AUG. 9) - Moscow Thursday publicly raised the possibility of Soviet participation in an international intervention force in the Gulf, shortly before a meeting of the United Nations Security Council.

As the U.N. security council prepared to meet in New York to condemn Iraq's annexation of Kuwait, the Soviet Foreign Ministry rejected unilateral use of force in the Gulf, but suggested Moscow was prepared to take part in immediate talks on joint military action by the U.N.

Moscow "is prepared for immediate consultations within the framework of the U.N. Security Council's military staff committee, which according to the U.N. charter, can perform very important functions," according to the Foreign Ministry statement read out at a press conference here.

The security council, for the purpose of maintaining international peace and security, can be assisted by a Military Staff Committee consisting of the Chiefs of Staff, or their representatives, from the permanent members of the security council -- France, Britain, China, the United States and the Soviet Union.

"At this stage we are not considering taking part in the multinational force, the naval blockade or any other measures outside the framework of security council decisions," Soviet spokesman Yuri Gremitskikh also said.

"The Soviet position is that the settlement of the situation related to Iraq's invasion of Kuwait must follow coordinated actions within the framework of the U.N. security council," he added.

The statement follows the dispatch by the United States of fighters and paratroopers to Saudi Arabia and the decision by Britain to send Tornado fighter-bombers to the Gulf.

Warships from several nations, including the Soviet Union, are also steaming towards the Gulf, and Mr. Gremytskikh said two Soviet naval units were currently on station there to "ensure the security of the Soviet merchant fleet" in the region.

MOSCOW (AUG. 9) - President Mikhail Gorbachev published a decree Thurdsay establishing a fund that will manage and privatize state property, TASS news agency reported.

The decree, published by TASS, institutes a fund "to protect the rights of the state regarding property and its interests," to manage joint ventures involving shareholders and to privatise the economy.

The fund will also determine the the value of state property being leased, sold or "transformed into other forms of propertym," TASS said.

The fund was set up in response to the move by the Soviet Union towards a market economy involving transformation of a number of large state-owned enterprises into private or partially-privatised businesses in which shareholders own an interest.

"The state must create conditions for rational use and preservation of its property, and find modern forms in order to use them in the economy," the decree said.

The main thrust of creation of the funds was to "elaborate and put into effect stock-controlled joint ventures," as well as businesses based on other forms of ownership, while "breaking the monopoly in production," the decree said.

The fund will not be operative until it is given government approval, TASS said.

On Wednesday, the Soviet government published a law which provides for establishment of a network of small businesses across the country to be aided by "all executive bodies."

#90221d9800 08/09/1990 ~French/German News Agency

MOSCOW (AUG. 9) - The presidium of the parliament of the Russian Federation published a decree Thursday forbidding the Soviet Union to export key resources from Russia without prior approval, according to the Soviet news agency TASS.

The decree "invalidates external trade agreements for sale of strategic resources" signed by the Soviet union, TASS reported.

Specific resources mentioned in the decree include diamonds, precious and non-precious metals, petrol, gas, uranium and other strategic resources and products extracted or manufactured on Russian territory.

The presidium, an executive committee, founded its decision on the declaration of sovereignty adopted by Russia in June.

Russian President Boris Yeltsin is currently touring the republic.

The Russian Republic accounts for some 80 percent of primary materials produced in the Soviet Union.

According to the text of the decree, Russian authorities have the right to accept or to refuse contracts signed by Soviet officials.

The Russian government will examine all agreements signed with foreign trading partners, and only agreements concluded with the participation of Russian representatives will be considered valid, according to TASS.

A Russian official attributed the rapid adoption of the decree to the necessity of controlling "resources extracted from Russian territory by federal organs."

LONDON (AUG. 9) - About 50 Iraqis demonstrated Thursday in front of the United States embassy in central London, shouting out anti-American and anti-Israeli slogans, police said.

"We Iraqis feel that a one-sided propaganda war has been mounted and very effectively propagated by Zionist forces in Europe and America," a leaflet distributed by the demonstrators said. "We support the free government of Kuwait, which stopped the theft of Kuwaiti wealth by the deposed emir and his family."

Police and anti-riot squads maintained a high profile at the demonstration in London's posh Grosvenor Square district.

Several dozen Kuwaitis meanwhile demonstrated in front of their embassy in London, as they have done since the Iraqi invasion of Kuwait a week ago.

#90221d9850 08/09/1990 ~French/German News Agency

WASHINGTON (AUG. 9) - U.S. President George Bush will start his holiday in Kennebunkport, Maine, as planned Friday despite the heightening of military tension in the Gulf, White House officials said Thursday.

White House spokesman Marlin Fitzwater told reporters Bush would be able to follow events in the Gulf and if necessary contact Washington's allies from his holiday home in Kennebunkport.

Since the U.S. military forces were ordered to Saudi Arabia only to defend the country and were not involved in a war it was not necessary for the president to follow events there ''minute by minute'', the spokesman added.

However, it was possible that Bush might interrupt his holiday to fly back to the capital briefly for a day before his scheduled return to Washington on September 3, he said.

He said the White House welcomed the latest decision by the United Nations Security Council to declare Iraq's annexation of Kuwait null and void as a further move in the world's condemnation of Baghdad.

Fitzwater said the world appeared to be abiding by an earlier decision by the Security Council to impose comprehensive economic sanctions against Iraq in reaction to its invasion of Kuwait one week ago.

WARSAW (AUG. 9) - Solidarity leader Lech Walesa said Thursday he is in favour of direct presidential elections in Poland and called for the end of "personal attacks" among rival political factions within his movement.

In a statement released in Gdansk, Mr. Walesa's appeared to be taking the opposite view from that of his "presidential party," the Centre Alliance, which has called for Mr. Walesa to be elected president by the Polish parliament in accordance with the constitution.

Mr. Walesa's statement was more in line, on the other hand, with a proposal by supporters of his rival, Polish Prime Minister Tadeusz Mazowiecki, that the constitution be amended to permit a direct presidential vote.

"I believe, and I have always believed, that Poland needs a head of state with significant powers and elected by universal suffrage," Mr. Walesa said.

Forthcoming legislative and presidential elections "must take place as soon as possible" and must be "entirely free and democratic," Mr. Walesa added.

Referring to the rivalry that has pitted him against against Mr. Mazowiecki, Mr. Walesa said "it is time to put an end to personal attacks."

Calling for "tolerance towards the political culture," Mr. Walesa said that "to make Poland democratic, the important thing is not men, but programs."

Polish President General Wojciech Jaruzelski has said he would be prepared to step down "at the right moment," but has not indicated any readiness to leave his post within the next few weeks, as the Centre Alliance has been demanding.

#90221d9960 08/09/1990 ~French/German News Agency

PARIS (AUG. 9) - The 21 members of the International Energy Agency (IEA) agreed here Thursday that the industrialized countries oil supplies are not sufficiently threatened by the embargo on Iraqi and Kuwaiti oil to demand exceptional measures for the time being.

IEA Steering Committee chairman Ulrich Engelmann said "There is no shortage for the moment," speaking after a meeting of the committee, which includes representatives of all member countries.

He added that "the increase in oil prices noted (over the last few days) is only a speculative reaction to negative political events" -- referring to the Gulf conflict that began August 2 when Iraq invaded Kuwait. "Hence there is no reason to invoke the IEA's emergency procedures."

The United Nations ordered an oil embargo on both Iraq and Kuwait, giving rise to fears of oil shortages in industrial countries.

#90221d9980 08/09/1990 ~French/German News Agency

WOLFSBURG, WEST GERMANY (AUG. 9) - West German auto manufacturer Volkswagen said on Thursday that it intends to set up a company specialising in financing services in Japan.

Volkswagen's Japanese marketing branch, called Volkswagen Audi Nippon KK, and Nippon Shinpan Co. Ltd, one of the biggest consumer credit organisations in the Japanese non-banking sector, are to sign a joint-venture agreement.

The company will have capital of 40 million Deutschemarks (25 million dollars), and will be controlled 51 per cent by VW Audi Nippon KK and 49 per cent by Nippon Shinpan.

It will provide a range of services linked to financing purchases of Volkswagen or Audi cars.

In 1989 the Volkswagen group sold 49,200 VW and Audi cars in Japan compared with 42,000 in 1988.

Sales in the first half of 1990 totalled 26,700 cars, representing an increase of 18.1 per cent over the same period of 1989.

MANILA (AUG 9) EFE - At least nine people were killed and 20 more were seriously injured Thursday when a fireworks factory in a Philippine town burst into flames after a strong explosion, the town's mayor said.

Mayor Daniel Edralino of Candelaria, in the province of Quezon, some 90 km south of Manila, said the explosion ripped through the factory when some 30 employees were inside.

Firefighters managed to put out the blaze several hours later and rescued several survivors suffering from third-degree burns and, in some cases, with limbs blown off by the explosion.

The cause of the blast was not known, but town authorities ordered an immediate investigation.

LONDON (AUG 9) EFE - Prospecting by British Gas is destroying Ecuador's jungle and endangering the survival of Indians in the region, the ecology organization "Friends of the Earth" claimed Thursday.

The group said in a statement that BG's Ecuadorean subsiduiary was failing to take the necessary precautions to protect the environment in its search for untapped veins of natural gas in the eastern jungle province of Pastaza.

The province lies on the western edge of the Amazon jungle, which is rapidly deteriorating as land developers, particually in Brazil, raze thousands of square kilometers of the rainforest each year.

In a letter to the company's management, Friends of the Earth member Simon Counsell accused British Gas of boasting about its ecological policies in Britain while ignoring threats to the environment in other areas of the world.

A spokesman for the gas company described as "totally distorted" the ecology group's claims regarding the company's activities in Ecuador.

MONTEVIDEO (AUG 9) EFE - The presidents of Argentina, Uruguay, Brazil, and Chile are set to visit U.S. leader George Bush in the United States in September to discuss a proposed pan-American free trade zone, diplomats said Thursday.

The five leaders will discuss the U.S.-proposed Americas Initiative, put forward by Bush on June 27, which envisages a free trade zone extending from Anchorage in Alaska to Tierra del Fuego in Argentina.

Washington is selling the idea to Latin America on the basis of a partial reduction of Latin American foreign debt, substantial U.S. private investment and a huge North American market for cheap agricultural produce.

Presidents Carlos Menem (Argentina), Fernando Collor de Mello (Brazil), Patricio Aylwin (Chile) and Luis Alberto Lacalle (Uruguay) will hold their meeting with Bush when they travel to the United States to attend a United Albed a half-day visit to La Paz, where Bolivian Presidency Minister Gustavo Fernandez expressed his government's interest in entering the proposed Americas-wide free trade zone.

MURCIA, SPAIN (AUG 9) EFE - Seven people were killed, including two small children, and another seven were injured Thursday after a gasoline tanker truck swerved off the road and burst into flames in southeastern Spain, Civil Guards said.

A Civil Guard spokesmen said the accident occurred after the Campsa oil company truck's brakes failed and the vehicle spun out of control on a road on the outskirts of Murcia, 360 km southwest of Madrid.

The truck hurtled through pedestrians, stationary vehicles, and into buildings before bursting into flames.

Several shops and houses were destroyed or badly damaged in the blaze.

The driver was among those killed in the incident. Four of the seven people injured are reportedly in a serious condition in hospital.

#90221e0038 08/09/1990 ~Latin America New Agency

BRASILIA (AUG. 9) EFE - Brazilian police Thursday arrested the son of former Paraguayan dictator Gen. Alfredo Stroessner on corruption charges, radio reports said.

The government of Paraguayan President Gen. Andres Rodriguez had asked for the extradition of Gustavo Stroessner, who fled to Brazil with his father following a February 1989 coup which ended Stroessner's 34-year dictatorship.

Reports on radio station "Jornal do Brasil" said Gen. Stroessner, resident in Brazil with his family, had asked the Brazilian foreign ministry to treat his son's case with "special attention".

The foreign ministry said the matter was out of its hands and was dependent on the Supreme Court, which favored extraditing Gustavo, according to the radio reports.

Earlier in the year a Paraguayan court handed out a 13-month jail sentence to a former consul to Brazil for assorted financial crimes.

After the coup, some 12 senior Stroessner aides were charged with corruption.

#90221f2094 08/09/1990 ~United Press International

CHICAGO (AUG. 9) UPI - The grain market was mostly higher Thursday in fairly active trading ahead of the August crop report. Grain and soybean futures made session highs about midday on the Chicago Board of Trade and closed just below those levels.

The exception was corn which went against the trend and was lower across the board. Widespread selling pressured corn as traders expected a high production estimate by the Agriculture Department.

Wheat was higher from the opening bell on an increase in export sales. Commercials were featured buyers on news that Algeria, Mexico and the Philippines were in the market for nearly 500,000 tons of wheat.

November soybeans rallied to $6.14 1/2 per bushel, their highest level in nearly one month. Steady export business and firm crude oil prices were supportive throughout the soybean complex.

Soybean oil and meal turned higher as buying interest picked up. Basis levels were steady to firm.

At the close, corn was unchanged to down 2, soybeans up 6 to off 1/2, wheat up 3 1/2 to 5 3/4 and oats up 2 1/4 to 3.

#90221f2096 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - Prices were sharply higher at the close of the New York Stock Exchange in moderate trading Thursday as investors reacted

favorably to news from the Mideast and to a strong bond market.

The Dow Jones industrial average, which rose 24.26 Wednesday, closed up another 24.01 to 2758.91.

Among broader market gauges, the New York Stock Exchange composite index rose 0.84 to 186.24 and Standard & Poor's 500-stock index rose 1.59 to 339.94. The price of an average NYSE share gained 14 cents.

Advances led declines 834-675 among the 1,996 issues crossing the NYSE tape. Big Board volume totaled 155,810,000 shares, compared with 190,400,000 shares traded Wednesday.

Analysts said prices were bolstered by news that a Pentagon spokesman described Iraqi troops in Kuwait as seeming to be "in a defensive posture." "This morning, we see the Iraqi military consolidating its forces in Kuwait. It would seem to us that they are working to hold on to what they've acquired," spokesman Pete Williams said.

Meanwhile, White House press secretary Marlin Fitzwater said: "We're very satisfied with the events in the past 24 hours," referring to the biggest U.S. military operation since the Vietnam War and to a U.N-ordered embargo against Iraq.

Also boosting stocks, analysts said, was stronger-than-expected demand for 30-year bonds in the final leg of the Treasury's quarterly refunding. Yields jumped on 30-year Treasury bonds Thursday to an average of 8.87 percent - the highest level in more than a year.

But analysts were generally pleased after anemic bidding on three- and ten-year Treasury notes earlier in the week that they blamed mainly on investor concern over the Iraq crisis and a souring of the U.S. economy.

"It went well," said Robert Dederick, chief economist at Northern Trust in Chicago. "The market had this horrible showing (Wednesday) and you had a lot of people taking cautious stands." Treasury bonds were up 7/8 point in late trading.

"I think the market took comfort in what the bond market did," said Sid Dorr, vice president of institutional equity trading at Charles Schwab & Co. in San Francisco.

Dorr said the market was basically trying to settle in after some crazy days. "It's just good news that (more) shots haven't been fired in the Mideast, because when we came in here Friday, Monday, Tuesday and Wednesday, that seemed like a lot less of a certainty," he said.

On the trading floor, Wal-Mart was the most active issue, up 3/8 to 30

5/8. The retail giant reported an eight percent increase in comparable-store sales for July, healthy compared to others in the industry but below its usual performance. The company also reported a 25 percent jump in second-quarter earnings.

Glaxo Holdings followed, down 1 5/8 to 28 3/4. United Telecommunications was third, up one to 25 3/8.

Texaco was also active, up 1/8 to 62 7/8. Oil issues were mixed with crude oil futures closing higher in New York trading.

Among other blue chips, AT&T rose 1/8 at 35 1/8, IBM was up 1/8 to 103 1/4, Eastman Kodak advanced 7/8 to 42 and Philip Morris was up 7/8 to 46 1/2.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 188,042,280 shares, down from 237,911,350 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 1.46 to 341.49. Advances led declines 309-246 among the 803 issues traded. The price of an average share rose five cents. Composite volume totaled 16,478,900 shares, compared with 17,852,200 shares traded Wednesday.

Continental Air led the Amex issues, surging 1 3/4 to 6 1/4 after the company said Frank Lorenzo would sell most of his investment in the company and step down as chairman and chief executive in efforts to bolster Continental.

The controversial Lorenzo was frequently portrayed as a villain by labor unions and built his company through acquiring several airlines, including Eastern, in the 1980s.

The National Association of Securities Dealers composite index jumped 5.25 to 412.98.

NEW DELHI (AUG. 9) XINHUA - INDIAN EXTERNAL AFFAIRS MINISTER INDER KUMAR GUJRAL CATEGORICALLY STATED ON WEDNESDAY THAT THERE IS NO PROPOSAL TO TAKE REFUGEES FROM SRI LANKA.

ANSWERING SUPPLEMENTARIES DURING QUESTION HOUR IN THE RAJYA SABHA (UPPER HOUSE), GUJRAL SAID THAT NEW DELHI WAS HOPEFUL THAT REFUGEE CAMPS WOULD BE SET UP IN SRI LANKA FOR THE 400,000 DISPLACED PERSONS THERE.

INDIA IS IN TOUCH WITH THE UNITED NATIONS, AND INTERNATIONAL AGENCIES HAVE

OFFERED TO PROVIDE HELP IN THE SETTING UP OF THE REFUGEE CAMPS IN SRI LANKA, HE SAID.

HE SAID THAT EVEN BEFORE THE INDIAN PEACE-KEEPING FORCE WITHDREW FROM SRI LANKA (IN MARCH THIS YEAR), THERE WERE 90,000 (SRI LANKAN) REFUGEES IN INDIA AND THE NUMBER HAD NOW GONE UP BY ANOTHER 60,000.

GUJRAL REJECTED A PLEA BY SOME MEMBERS OF THE UPPER HOUSE FOR PROVIDING PROTECTION TO REFUGEES FLEEING THE ISLAND NATION AS THEY SAID THE SRI LANKAN NAVY WAS PREVENTING THEM FROM COMING TO INDIA.

IT WOULD BE ERRONEOUS TO PROVIDE PASSAGE SECURITY AS THEN THE "WHOLE SRI LANKA WILL COME TO INDIA," GUJRAL SAID.

PARIS (AUG. 9) XINHUA - FRENCH DOCTORS HAVE SUCCEEDED IN TRANSPLANTING HEART, LUNGS AND LIVER SIMULTANEOUSLY FOR A 16-YEAR-OLD GIRL, LOCAL NEWSPAPERS REPORTED.

ACCORDING TO A RECENT COMMUNIQUE FROM A HOSPITAL IN PARIS, THE GIRL WITH THE THREE NEW APPARATUSES HAS LEFT HOSPITAL AND IS IN A GOOD CONDITION.

THE OPERATION WAS PERFORMED AT THE END OF JUNE. DOCTORS TRANSPLANTED ONTO THE GIRL THE HEART, LUNGS AND LIVER FROM A YOUNG FEMALE WHO DIED IN AN ACCIDENT. THE GIRL'S LIVER AND LUNGS WERE HURT BY A KIND OF PANCREAS DISEASE.

THE GIRL'S HEART IS IN A GOOD CONDITION, BUT FOR SOME TECHNICAL REASONS OF THE OPERATION, SHE HAD TO HAVE HER HEART TRANSPLANTED AT THE SAME TIME.

HER OWN HEART WAS TRANSPLANTED TO ANOTHER YOUNG PATIENT WHO SUFFERED FROM A HEART DISEASE.

MANILA (AUG. 9) XINHUA - THE PHILIPPINES WOULD FIND ALTERNATIVE JOBS IN SAFE AREAS IN THE MIDDLE EAST FOR FILIPINOS WHO WOULD BE DISPLACED BY THE IRAQ-KUWAIT CRISIS, THE PHILIPPINE OVERSEAS EMPLOYMENT ADMINISTRATION (POEA) SAID TODAY.

"WE WILL HELP THEM RELOCATE IN SAFE AREAS WHERE THEY CAN FIND OTHER JOBS. THOSE WHO WOULD NOT LAND IN OTHER JOBS WILL BE BROUGHT HOME," SARMIENTO ADDED AFTER ATTENDING A HEARING OF THE SENATE COMMITTEE FORMED TO STUDY IMPLICATIONS ON THE PHILIPPINES OF THE MIDDLE EAST CONFLICT.

ACCORDING TO HIM, THE PHILIPPINE LABOR DEPARTMENT WOULD MEET WITH THE CHAMBER OF COMMERCE OF RIYADH AND JEDDAH TO DISCUSS THE POSSIBILITY OF EMPLOYMENT ABSORPTION OF THE FILIPINO WORKERS BY SAUDI EMPLOYERS IN THE CENTRAL AND WESTERN REGIONS OF SAUDI ARABIA.

A COMMAND CONFERENCE IS SCHEDULED TO BE HELD IN RIYADH ON FRIDAY TO BE ATTENDED BY PHILIPPINE AMBASSADORS TO SAUDI ARABIA, KUWAIT AND IRAQ AND LABOR OFFICERS IN THE MIDDLE EAST COUNTRIES TO ASSESS THE MIDDLE EAST SITUATION AND TO DEVELOP EMPLOYMENT ALTERNATIVE FOR FILIPINOS.

DEPARTMENT OF LABOR AND EMPLOYMENT FIGURES PLACE THE NUMBER OF FILIPINO WORKERS IN KUWAIT AT AROUND 40,000 WHILE THOSE IN IRAQ AT AROUND 5,000.

SENATOR ERNESTO HEERERA, SENATE COMMITTEE CHAIRMAN, SAID NEARLY HALF A MILLION FILIPINOS WORKING IN THE MIDDLE EAST CONTRIBUTE ABOUT 1.3 BILLION U.S. DOLLARS TO THE PHILIPPINE ECONOMY EVERY YEAR THROUGH OFFICIAL REMITTANCES.

INCLUDING REMITTANCES THROUGH UNOFFICIAL CHANNELS, HEERERA SAID, THE WORKERS ARE CONTRIBUTING AROUND TWO BILLION TO THREE BILLION U.S. DOLLARS EVERY YEAR TO THE ECONOMY.

#90221h0136 08/09/1990 ~Chinese News Agency

ATHENS (AUG. 9) XINHUA - IRAQ TODAY REVOKED GREECE'S MOST FAVORED NATION TRADING STATUS.

IT WAS CONSIDERED HERE AS AN IRAQI REPRISAL FOR GREECE'S PERMISSION TO ALLOW U.S. MILITARY AIRCRAFT TO FLY OVER THE COUNTRY'S AIRSPACE TO THE GULF REGION AND FOR GREECE'S PARTICIPATION IN THE U.N. AND EEC TRADE EMBARGOES ON BAGHDAD.

ABDEL FETAH AL KHEZREJI, IRAQI AMBASSADOR IN ATHENS, TOLD A PRESS CONFERENCE THAT THE POSITION TAKEN BY THE GREEK GOVERNMENT COULD ONLY "BE DAMAGING TO GREECE'S CURRENT AND FUTURE INTERESTS."

AS A RESULT OF ITS POSITION, THE AMBASSADOR SAID, GREECE IS LOSING ITS MOST FAVOURED NATION STATUS AND RETURNS TO THE "NATURAL RELATIONS THAT IRAQ MAINTAINS WITH OTHER COUNTRIES."

"THE ONGOING EFFORTS TO IMPOSE SANCTIONS AGAINST IRAQI AND KUWAITI ASSETS AND TRADE, WHILE FUTILE AND MUTUALLY DAMAGING, CAN ONLY EXACERBATE AND COMPLICATE THE SITUATION," HE SAID.

HE SAID THE SANCTIONS WOULD IN THE LONG RUN BE DAMAGING TO THE VERY COUNTRIES IMPOSING THEM.

REPLYING TO QUESTIONS, THE IRAQI ENVOY SAID THAT HIS COUNTRY HAD NO NUCLEAR ARMS, BUT CHEMICAL WEAPONS, WHICH IT WOULD USE ONLY AS A MEANS OF DEFENSE.

#90221h0157 08/09/1990 ~Chinese News Agency

HARARE (AUG. 9) XINHUA - ZIMBABWEAN FOREIGN MINISTER NATHAN SHAMUYARIRA HAS SAID THAT HIS COUNTRY IS ENCOURAGED BY THE DECISIONS THAT ARE BEING TAKEN AT THE PEACE TALKS IN SOUTH AFRICA.

IN AN INTERVIEW WITH THE ZIMBABWE INTER-AFRICA NEWS AGENCY ON WEDNESDAY, SHAMUYARIRA ALSO SAID THAT "THE PROCESS OF NEGO- TIATIONS GOING ON AT THE MOMENT IN SOUTH AFRICA APPEARS TO BE MOVING IN THE RIGHT DIRECTION."

AT THE END OF THE SECOND ROUND OF PEACE TALKS ON MONDAY, THE AFRICAN NATIONAL CONGRESS (ANC) ANNOUNCED A LANDMARK DECISION TO SUSPEND ITS ARMED STRUGGLE AGAINST THE MINORITY WHITE RULE IN SOUTH AFRICA. AT THE SAME TIME, PRETORIA AGREED TO RELEASE REMAINING POLITICAL PRISONERS AND FACILITATE THE RETURN OF POLITICAL EXILES.

HOWEVER, THE ZIMBABWEAN OFFICIAL STRESSED THAT AS FAR AS THE DISMANTLING OF APARTHEID IS CONCERNED, NOTHING HAS HAPPENED YET TO CHANGE THE EVIL SYSTEM.

-30- 1063

#90221h0160 08/09/1990 ~Chinese News Agency

HARARE (AUG. 9) XINHUA - ZIMBABWEAN VICE-PRESIDENT JOSHUA NKOMO TODAY CALLED FOR REMOVING TRADE BARRIERS BETWEEN AFRICAN COUNTRIES.

OPENING THE PREFERENTIAL TRADE AREA (PTA) FINANCE MINISTERS' MEETING HERE, NKOMO SAID THAT AFRICA'S CALL FOR DEVELOPED COUNTRIES TO REMOVE TRADE BARRIERS WOULD MAKE SENSE ONLY IF THERE WERE NO TRADE RESTRICTIONS WITHIN AFRICA ITSELF.

SOME SHORT-TERM BENEFITS CAN BE ATTAINED BY KEEPING THESE TRADE BARRIERS IN PLACE BUT THE CURRENT TREND IN THE INTERNATIONAL RELATIONS DEMANDS "OPENING UP OUR ECONOMIES BETWEEN OURSELVES", HE SAID.

AFRICA SHOULD FOREGO SOME SHORT-TERM BENEFITS, SAID NKOMO, ADDING THAT "IT REQUIRES VISION, DETERMINATION, PERSEVERANCE AND EVEN SACRIFICE."

THE VICE-PRESIDENT NOTED THAT THE CURRENT DEVELOPMENTS IN SOUTH AFRICA AND THE INDEPENDENCE OF NAMIBIA SHOULD BRING PEACE IN THE SUB-REGION AND RESULT IN THE RE-DEPLOYMENT OF RESOURCES TOWARDS ECONOMIC PROGRESS.

HE STRESSED THAT POLITICAL AND ECONOMIC LIBERATION IN AFRICA AND IN THE

REGION IN PARTICULAR WOULD REMAIN INCOMPLETE AND PERILOUS AS LONG AS SOUTH AFRICA IS NOT FREE AND DEMOCRATIC.

THEREFORE, NKOMO URGED UNITY AND SOLIDARITY WITH THE SOUTH AFRICAN PEOPLE IN THEIR STRUGGLE AGAINST APARTHEID.

#90221h0161 08/09/1990 ~Chinese News Agency

YANGON (AUGUST 9) XINHUA - HUNDREDS OF PEOPLE INCLUDING MONKS, YOUTH AND STUDENTS HELD DEMONSTRATIONS IN PAKOKKU, MONGWA AND MEIKTILA TOWNSHIPS ON WEDNESDAY, ACCORDING TO THE VOICE OF MYANMAR TONIGHT.

IN MONGWA OF SAGAING DIVISION, ABOUT 300 PEOPLE INCLUDING MONKS AND STUDENTS DEMONSTRATED ON WEDNESDAY MORNING. THEY CLASHED WITH SECURITY FORCES WHEN THEY IGNORED THE ORDER TO DISPERSE. THE SECURITY MEN FIRED INTO AIR AND DISPERSED THEM.

IN MEIKTILA TOWNSHIP OF MANDALAY DIVISION, SOME 300 YOUTH MARCHED IN THE STREETS AND SHOUTED SLOGANS YESTERDAY AFTERNOON. LATER, THEY LEFT WHEN SECURITY FORCES ARRIVED.

SIMILAR DEMONSTRATIONS ALSO TOOK PLACE IN PAKOKKU OF MAGWE DIVISION YESTERDAY, WHERE ABOUT 50 YOUTHS WENT TO STREETS AND CHANTED SLOGANS.

ON WEDNESDAY DEMONSTRATIONS ALSO OCCURRED IN YANGON AND MANDALAY. ACCORDING TO OFFICIAL REPORT, THREE SECURITY MEMBERS AND ONE MONK WERE INJURED IN CLASHES IN MANDALAY.

IN THE GENERAL ELECTION HELD ON MAY 27, THE NATIONAL LEAGUE FOR DEMOCRACY (NLD) WON A LANDSLIDE VICTORY. SINCE THEN, THE PEOPLE HAVE DEMANDED THAT THE MILITARY GOVERNMENT HAND OVER THE POWER QUICKLY TO THE ELECTED PARTY AND RELEASE NLD'S GENERAL SECRETARY DAW AUNG SAN SUU KYI, WHO HAS BEEN UNDER HOUSE ARREST FOR OVER A YEAR.

SEOUL (AUG. 9) KYODO - NORTH KOREA REFUSED THURSDAY TO ACCEPT A LIST OF SOUTH KOREANS WHO WISH TO CROSS THE HEAVILY ARMED BORDER NEXT WEEK FOR THE FIRST TIME, SOUTH KOREAN OFFICIALS SAID.

THE NORTH KOREAN REFUSAL APPEARED TO CRUSH THE SLIM REMAINING HOPE OF REALIZING SOUTH KOREAN PRESIDENT ROH TAE WOO'S PROPOSAL FOR A PERIOD OF FREE TRAVEL BETWEEN THE TWO COUNTRIES, OBSERVERS SAID.

ON JANUARY 20, ROH ANNOUNCED THAT SOUTH KOREA WOULD OPEN ITS TIGHTLY SEALED BORDER WITH NORTH KOREA FOR FIVE DAYS FROM MONDAY FOR FREE TRAVEL BY RESIDENTS FROM BOTH SIDES. ROH ALSO CALLED ON PYONGYANG TO ALLOW SOUTH KOREANS TO FREELY VISIT NORTH KOREA THROUGH THE TRUCE VILLAGE OF PANMUNJOM.

A TOTAL OF SOME 61,000 SOUTH KOREANS HAVE APPLIED TO THE SEOUL GOVERNMENT TO TRAVEL ACROSS THE BORDER, ACCORDING TO THE OFFICIALS.

IN A TELEPHONE MESSAGE TO SOUTH KOREAN PRIME MINISTER KANG YOUNG HOON, NORTH KOREAN PRIME MINISTER YON HYONG MUK DISMISSED A SOUTH KOREAN DEMAND FOR A LIST OF THE NAMES OF SOUTH KOREANS HOPING TO VISIT NORTH KOREA.

IN RESPONSE TO THE YON'S MESSAGE, KANG SAID THAT SOUTH KOREA WILL SEND TWO OFFICIALS TO PANMUNJOM ON FRIDAY TO SUBMIT THE LIST OF NAMES TO THE NORTH

KOREAN SIDE, THE OFFICIALS SAID.

YON HAD ALSO CALLED ON SEOUL TO REPEAL THE SOUTH KOREA'S SECURITY LAWS AND TO GIVE FORMAL APPROVAL FOR TWO LARGE SOUTH KOREAN DISSIDENT GROUPS TO ATTEND A RALLY SCHEDULED IN PANMUNJOM NEXT WEDNESDAY, THE OFFICIALS SAID.

IN ADDITION HE DEMANDED THAT THE SOUTH KOREAN GOVERNMENT ALLOW A NORTH KOREAN TEAM TO MEET IM SU KYONG, A COLLEGE STUDENT SENTENCED TO A 10-YEAR PRISON TERM BY A SEOUL COURT IN EARLY FEBRUARY FOR HER ILLEGAL VISIT TO NORTH KOREA.

IM MADE AN UNAUTHORIZED VISIT TO PYONGYANG IN LATE JUNE LAST YEAR TO TAKE PART IN A WORLD YOUTH FESTIVAL HELD IN THE NORTH KOREAN CAPITAL AS A REPRESENTATIVE OF A SOUTH KOREAN STUDENT ORGANIZATION. ON RETURNING TO SOUTH KOREA THROUGH PANMUNJOM ON AUGUST 15 SHE WAS ARRESTED BY SOUTH KOREAN AUTHORITIES FOR VIOLATING SECURITY LAWS.

-30- 2181

#90221m0001 08/09/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 9) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

U.S. stocks are flat in slow London trading ... The Nikkei continued its roller coaster ride, closing down 893.41 on arbitrage activity. named a new president and three vice-chairmen, and has adjusted its management committee, but says the move will not alter its strategy.

A "USA Today" poll shows more than 80% of U.S. residents support PRESIDENT BUSH's decision to send troops to the Middle East. ... PHILLIPS PETROLEUM cuts its wholesale gasoline prices and ATLANTIC RICHFIELD says it will freeze prices for at least a week.

GENERAL MOTORS is hit by a strike of 3,200 employees at its plant in Flint, Mich., that makes doors, grilles and gasoline tanks.

WHAT'S AHEAD:

OTS Director TIMOTHY RYAN will announce major enforcement action involving a failed S&L at 11 a.m. EDT. ... MICHAEL BOSKIN, Chairman of the Council of Economic Advisers, will speak on the S&L bailout before Citizens for a Sound Economy at Noon EDT. ... UAL CORP. agrees to give UNITED AIRLINES' unions until Oct. 9 to raise the $4.4 billion needed to buy the company.

FROM THE BULLS:

"I can't think of a reason not to buy stocks," says ROGER ENGEMANN, head of a Pasadena, Calif. investment firm that bears his name. "I welcome a recession as an investment manager. It will bring interest rates down." He says growth issues like PHILIP MORRIS and ELI LILLY are cheap and investors should buy. (WSJ, 8/9)

"When you fall 300 points in a straight line, you're going to rise," says LAWRENCE WACHTEL of PRUDENTIAL-BACHE SECURITIES INC. "The laws of physics suggest that." He also says the relative "calm in the Persian Gulf area" will help the market rise. (FNN "Marketwrap", 8/8)

FROM THE BEARS:

THOMAS BASSO of TRENDSTAT CAPITAL MANAGEMENT thinks yesterday's "rally lacked conviction." He says the gain was negligible given the recent fall, and counsels investors not to get too excited about a new rally. "The market is entitled to retrace even more," says Basso. ("Investor's Daily", 8/9)

The stock market's 25-point rebound is hardly impressive given the $2 plunge in oil, says bearish strategist RICHARD HOEY, chief U.S. economist at BARCLAYS de ZOETE WEDD. "There are three Bs for the bears: Baghdad, budget and banking system," says Hoey.

He believes escalating oil prices will raise mortgage rates, which will be a sharp blow to consumer confidence. Without consumer spending, economic growth will slow, giving U.S. budget negotiators a thorny dilemma: too many spending cuts will push the economy into a deeper recession; too few will cause long-term bond rates to shoot higher as the government finances a widening deficit.

Hoey also predicts that as the economy softens, creditors will cut back further on loans and other sources of funding that many businesses need. He is advising investors to sell stocks and raise cash." (WSJ, 8/9)

"You don't bottom fish in shark-infested waters," advises TED PECK, a broker at PRUDENTIAL-BACHE SECURITIES INC. He says it is no time to bet big on stocks and has slashed some of his clients' stock exposure to 40%. Noting the external forces playing on the stock market these days, he sighs and says, "This is in the laps of the gods." (WSJ, 8/9)

STOCK MARKET:

JOHN GRAY, associate editor of "Investor's Intelligence" says the recent fall in stock prices is only a correction and will reverse itself fairly soon, but not immediately. "It's probably too early to be buying," says Gray. "The market may need another week or two to settle down." He says

his major support levels, specifically one at 2600, are still intact. ("Investor's Daily", 8/9)

"We were down 300 points," says BRAD WEEKES of DONALDSON, LUFKIN & JENRETTE. "We were due for a rally." ("USA Today", 8/9)

"Confidence is a big factor in the stock market," says PETER GRENNAN, a senior vice president at SHEARSON LEHMAN BROTHERS INC. "It gives the market resiliency, which was evident [Wednesday]. So far the President's firm handling of the situation has been good for the market." (NYT, 8/9)

"The market essentially drew some strength from PRESIDENT BUSH's speech today," says GRUNTAL & CO.'s ALAN ACKERMAN. "The reaction overall has been subdued and easy." Ackerman thinks stocks are in a tenuous and difficult position, but still fairly stable. He says, "The market took the President's remarks in stride, and, frankly, is still cautious and very, very tentative." (FNN "Marketwrap", 8/8)

If the Iraqi invasion had not happened, "our markets would have been going down anyway," says MARK HOWARD, co-owner of JRO ASSOCIATES, a New York investment partnership. "This just speeded up the process. Recession is sort of becoming obvious to everybody." (WSJ, 8/9)

"We can live with rhetoric, but not poison gas bombs," says MICHAEL METZ, analyst at OPPENHEIMER & CO. "The market is sensing that there's not going to be an imminent invasion of Saudi Arabia by [Iraq].

The feeling is he may back down one way or another and that we're not going to see Armageddon in the Middle East." Metz believes that after the plunge in stocks last week, most selling pressure seems to have been washed out of the market. "Bargain hunters are coming in, but tentatively, and there seems to be a bias to buy at this juncture." (UPI, 8/8)

"Right now the market is hungry for any kind of glad tidings out there and it's getting a few tidbits today," says EUGENE PERONI JR., analyst at JANNEY MONTGOMERY SCOTT. The decision by PRESIDENT BUSH to send troops to the Middle East is viewed as a stabilizing factor. (Reuters, 8/8)

STOCK TIPS:

"I think the market will fall or rise on the events as they unfold in the Middle East," says GEORGE ZIMMERMAN, director of research at GRUNTAL & CO. He says the oils are overvalued and are not the only stocks that should do well. Zimmerman mentions SMITH-KLINE BEECHAM, GLAXO, BOEING, GTE and AT&T as issues that are "critical buys at this point." (CNBC "Market Wrap-Up", 8/8)

Bull markets go down with full elevators, says a bearish CHARLES ALLMON,

newsletter publisher and president of GROWTH STOCK OUTLOOK TRUST. "We're getting - right now - in our managed accounts, the same feedback we got in 1987."

Allmon says his clients tell him: "We pay you to manage our money. You're sitting on all this cash. We want some action." Among the stocks the very conservative Allmon does like: NESTLE ADR, CLOROX, HERSHEY FOODS, BRISTOL-MYERS, TSI INC. and PROGRAMMING & SYSTEMS. (CNBC "Smart Money", 8/8)

WOOLWORTH stock rose 1 1/2 to 28 7/8 yesterday even though the company reported only a slim increase in second-quarter profits. Analysts say investors had already bid the price down in anticipation of weak earnings, setting up an opportunity for bargain hunters. "It's a relatively recession-resilient stock," says DONALD TROTT of DEAN WITTER REYNOLDS. ("USA Today", 8/9)

DONALDSON, LUFKIN & JENRETTE analyst SCOTT SMITH upgraded his investment opinion on MICROSOFT to a buy from moderately attractive. He expects the company's new products and global marketing strategy will contribute to a 30% growth rate in fiscal 1992 and 1993, even if the U.S. economy enters a mild recession. CHARLES WOLF of FIRST BOSTON also raised his rating of Microsoft to a buy from a hold. The stock rebounded 2 1/4 yesterday to end at 63 1/2. (WSJ, 8/9)

"USA Today" casts its "Company Spotlight" on MEDCO RESEARCH this morning, cautioning that the pharmaceutical development stock "does as much bouncing on rumor as on reality."

The report says Medco is a "favorite target of Wall Street's short sellers." One is ROBERT DHOTI of DHOTI PARTNERS, who says the stock is likely to fall to five a share from 11 1/4 yesterday. But the stock also has its bulls, including analyst JOHN POETIZER of ROTA MOSLEM. ("USA Today", 8/9)

In the last few days bank stocks have fallen less than the market "as investors recognized the defensive characteristics of banks, such as their dividend yield," says THOMAS HANLEY, managing director at SALOMON BROTHERS.

If the threat of recession from higher oil prices causes the Federal Reserve to reduce short-term interest rates, as many economists expect, Hanley says, "We could have a trading rally in the bank group over the short term." But over the next several quarters, the risk of loss from bad loans is great enough to remain cautious on the outlook for bank stocks.

W. ANTHONY HITCHLER, chief investment officer at BRANDYWINE ASSET MANAGEMENT says bank stocks are so low that "a couple of years from now you could look back at this as an incredible opportunity. But for now, the

psychology for bank stocks is as bad for an industry as I have ever seen." (NYT, 9/8)

If the Iraqis back off their threats to Saudi Arabia and make some concessions in Kuwait, the market would be poised for a technical snapback of five to seven percent, says PETER DAPUZZO, co-director of worldwide equities trading at SHEARSON LEHMAN BROTHERS.

Dapuzzo would focus on growth companies with double digit earnings forecasts and companies with export businesses which will benefit from the weaker dollar. Also, he still likes the oil stocks. He looks for slowing consumer spending and weakness in the consumer stocks. (FNN "World Business Update", 8/9)

#90221p3600 08/09/1990 ~PR Newswire

PHILADELPHIA (AUG. 9) PR NEWSWIRE - An increasing number of human resource executives view investment in technology as one solution to the impending labor crisis.

This expansion in technology is suggested by surveys conducted in 1990 and 1989 by Right Associates(R), a career management consulting firm.

In 1989 human resource executives were asked if a labor crisis would lead to increased investment in technology to replace people. Ten percent answered yes. Replying to the same question in 1990, 33 percent responded affirmatively.

Right Associates is headquartered in Philadelphia and has more than 65 offices across the United States and around the world. It is one of the world's leading organizations specializing in outplacement counseling of executives and managers. Outplacement consulting services are designed to assist employers with termination issues, and, to help the separated employees develop skills and strategies to find new employment.

NORWALK, CONN. (AUG. 9) PR NEWSWIRE - Wanted: 129 billion pennies to end hunger. Pennies are a problem. All but worthless individually, they remain a necessary part of our modern, taxed and taxing world. According to the U.S. Mint, over 129 billion of them are in circulation nationwide, but the surprising fact is that an equal number -- nearly $1.3 billion worth -- are out of circulation in America's collective closet.

Now a New York area marketing company, Omnimark Inc., is using the problem of pennies to help solve a much bigger task -- bringing about an end to hunger -- with a campaign called "End Hunger a Penny at a Time."

Created in partnership with The Hunger Project, an international not-for-profit organization committed to ending chronic hunger by the end of the century, the campaign gives millions of Americans a simple way to make a difference by doing something good for the world and themselves in a simple way. It starts with taking the hassle out of getting rid of our excess pennies.

Omnimark is inviting banks and credit card companies to cooperate in making it as easy as possible for people to contribute their pennies -- frequently without advance counting or rolling. Individuals can simply drop them off with participating institutions where they are weighed and then automatically sent as donations to support The Hunger Project's worldwide efforts.

Consumer product brands, insurance companies, retail organizations and others are being invited to tie-in, too. A variety of promotional events are planned, including the distribution of personal penny containers carrying sponsor logos. Also planned are themed FSI's, retail events and a national PSA-based media campaign featuring celebrities and luminary citizens.

"The key to this campaign is that everybody wins," states Michael Hartel, Omnimark's president. "The consumer has an easy way to make a difference on an important national and global problem, and at the same time get rid of troublesome pennies. Sponsoring companies increase product sales and traffic, and enhance their image. And our client, The Hunger Project, receives the visibility and funding it needs to fulfill its mission."

Individuals and companies interested in more information or in becoming part of the "End Hunger a Penny at a Time" campaign are invited to contact Michael Hartel at Omnimark, Incorporated, 40 Richards Avenue, Suite 500, Norwalk, Conn., 06854 or call 203-855-3077.

#90221p3616 08/09/1990 ~PR Newswire

CHICAGO (AUG. 9) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) achieved record earnings for the fourth quarter and fiscal year ended June 30, 1990.

Net income for the year rose 14.6 percent to $470.3 million from $410.5 million reported in 1989. Primary earnings per share increased 9.1

percent to $1.91 from $1.75 a year ago. Net sales for the year decreased 1.0 percent to $11.6 billion from $11.7 billion in fiscal 1989, due to the disposition of a portion of Sara Lee's foodservice business at the beginning of fiscal 1990.

Reported earnings per share for fiscal 1989 included a net benefit of $.05 which occurred in the second quarter as a result of the gain on the sale of certain businesses, net of restructuring charges. Excluding the non-recurring gain, net income for fiscal 1990 increased 17.8 percent and primary earnings per share grew 12.4 percent. Excluding the effects of all acquisitions and divestments, sales for the year increased approximately 8 percent.

For the fourth quarter, net income rose 15.3 percent to $118.4 million from $102.7 million a year ago. Primary earnings per share increased 11.6 percent to $.48 from $.43 in 1989. Net sales were $3.0 billion, down 3.3 percent from $3.1 billion a year ago. Excluding the effects of all acquisitions and divestments, sales for the quarter increased approximately 8 percent.

"Sara Lee Corporation completed its 13th consecutive year of record earnings," said John H. Bryan, chairman and chief executive officer. "Higher margins in our coffee and grocery operations combined with continued strong profit and volume growth in our personal products businesses more than offset the lower earnings in our packaged meats and bakery line of business."

SUNNYVALE, CALIF. (AUG. 9) PR NEWSWIRE - Dionex Corp. (NASDAQ: DNEX) today announced the promotion of Dr. Richard Morris to vice president of International Operations. Morris is a 15-year veteran of Dionex. Commenting on this promotion, A. Blaine Bowman, Dionex president and chief executive officer, said, "Dr. Morris has been key to the success of our international operations, which now represent approximately half of our worldwide sales. This promotion recognizes not only his contributions over the past 15 years, but also the increasing importance of international markets to our continued growth." In his role of vice president, Morris will continue to manage all of the Dionex business outside of North America. This includes subsidiaries in Germany, France, the United Kingdom, Holland, Italy and Japan and a network of distributors and representatives serving more than 25 countries around the world.

Bowman also announced the appointment of Dr. Nebojsa Avdalovic as vice

president, Research & Development. Avdalovic will manage all research and polymer chemistry functions for Dionex. Avdalovic was most recently associated with the Spinco Division of Beckman Instruments. He obtained his M.D. degree and a Ph.D. in biochemistry at the University of Zagreb, Yugoslavia. "Dr. Avdalovic brings extensive research and technology experience to keep Dionex on the leading edge in the separations industry " said Bowman.

Dionex is a leading manufacturer and marketer of chromatography systems for chemical analysis. The company's systems are used in environmental analysis and by the chemicals, petrochemicals, life sciences, power generation and electronics industries in a wide variety of applications.

SAN DIEGO (AUG. 9) PR NEWSWIRE - GTI Corp. (AMEX: GTI) announced today that a special meeting of its stockholders will be held on Tuesday, Aug. 28 at 10 a.m. at its corporate office in San Diego to approve the sale of 2.5 million shares of GTI's common stock to Telemetrix plc for $7.5 million in cash. The sale proceeds will provide a portion of the funds required by GTI in connection with its previously announced proposed acquisition of approximately 91 percent of the capital stock of Valor Electronics Inc., for $18,457,272, consisting of $16,625,272 in cash and a promissory note for the remainder. The closing of the acquisition is expected to take place shortly after the stockholder meeting.

San Diego-based Valor Electronics develops, manufactures and distributes a variety of electronic component parts and subsystems. It operates manufacturing facilities in the People's Republic of China and Hong Kong. Gary L. Luick, president of GTI, stated that, "Valor Electronics' position in the electronics market complements GTI's position well by providing more technologically sophisticated products, primarily assembled using low cost overseas labor."

GTI manufactures and distributes a variety of electronic component parts, processing equipment and circuit boards for sale to manufacturers in the United States and abroad.

Telemetrix plc is a United Kingdom corporation which is listed on the London Stock Exchange and engaged in the manufacture, sale and distribution of advanced electronic products and components. As a result of the issuance of the 2.5 million shares of GTI's common stock to it, Telemetrix's voting interest in GTI will increase from 52.8 percent to 65.4 percent.

GTI today has mailed a proxy statement to its stockholders that describes the proposed transactions.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Carter Hawley Hale Stores Inc. (NYSE: CHH) today reported sales for the four weeks ended August 4, 1990 were $176.0 million, an increase of .9 percent from the $174.5 million recorded in the comparable prior year. The company also reported that sales for the 26 weeks ended August 4, 1990 were $1,214.3 million, an increase of .7 percent from the $1,205.8 million recorded in the same period last year. On a comparative store basis, sales were up .4 percent in July and up .3 percent for the 26 weeks.

Philip M. Hawley, chairman and chief executive officer, said, "Business trends were little changed during the month with the exception of strength exhibited in new Fall apparel."

Sales for the company's fiscal year ended August 4, 1990 were $2,857.9 million, an increase of 3.8 percent from the $2,752.2 million recorded in the prior year period. 1990 is a 53-week fiscal year compared with 52 weeks in 1989. On a comparative store basis, sales were up .8 percent for the period.

Sales comparisons for the four and 26-week periods are on a calendar basis. All periods exclude the Emporium store in downtown Oakland, which has been closed since the earthquake in the Bay Area.

Carter Hawley Hale operates 114 department stores under the names of The Broadway-Southern California, The Broadway-Southwest, Emporium, Thalhimers and Weinstocks.

PHOENIX, ARIZ. (AUG. 9) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL), operating as USAir Express, said today that an increase in fares is necessary to offset the increasing fuel costs it is encountering as a direct result of the Middle East developments. The 10 percent fare increase will be effective Tuesday, Aug. 14.

StatesWest said fuel costs are its second largest operating expense and the fare adjustment is made as an offset to the additional costs.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County, San Diego and Santa Barbara, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca and Laughlin, Nev./Bullhead City, Ariz. StatesWest will operate approximately 100 daily departures beginning Aug. 15 when service is added to the California cities of Bakersfield, Monterey, Sacramento and San Francisco.

PARIS (AUG. 9) PR NEWSWIRE - Compagnie de Saint-Gobain announced today that the $90 per share cash tender offer for all outstanding shares of common stock of Norton Company made by Saint-Gobain's wholly owned subsidiary, SG Acquisition Corp., expired at 5:00 p.m. on August 8, 1990. At that time, based upon a preliminary tabulation by Chemical Bank, the depositary for the tender offer, approximately 19.5 million shares, representing approximately 95 percent of the total shares outstanding, had been tendered.

All shares of Norton common stock validly tendered have been accepted for payment. Payment for shares validly tendered will be made as soon as practicable after receipt of all necessary related documents by the depositary.

Saint-Gobain also announced that it intends to complete a merger of SG Acquisition with Norton immediately following a special meeting of stockholders of Norton at which a vote will be held to approve the merger. Massachusetts law requires the affirmative vote of the holders of two-thirds of the outstanding shares of common stock to approve the merger. Saint-Gobain has agreed that the shares held by SG Acquisition will be voted in favor of the merger and therefore approval of the merger will not require the affirmative vote of any other Norton stockholder. It is anticipated that the special meeting will be held in early

September. Holders of Norton common stock who did not tender their shares in the tender offer will be entitled to receive $90 per share, without interest, following completion of the merger.

ATHLONE, IRELAND (AUG. 9) PR NEWSWIRE - Elan Corporation, plc (AMEX: ELN) announced today that Elan and Drug Research Corporation, plc, a newly formed Irish corporation, have filed a registration statement with the Securities and Exchange Commission relating to a rights offering to Elan shareholders.

Under the terms of the planned rights offering, holders of Elan American Depositary Shares and of Elan ordinary shares would receive one right for each share owned as of the record date. Four rights would be required to subscribe for one unit, and the subscription price is expected to be between $10 and $11 per unit. Each unit will consist of one American Depositary Share of Drug Research and one five-year Elan warrant to acquire an American Depositary Share of Elan.

The offering will consist of approximately 3.9 million units, and Drug Research will receive all of the net proceeds.

The record date to receive rights is expected to be one day before the U.S. Securities and Exchange Commission declares the registration statement effective, presently anticipated in the middle of September.

The rights and the prospectus for the offering are expected to be issued on the day after the record date, and the rights will expire four weeks later.

It is anticipated that the rights will trade on the American Stock Exchange during this four-week subscription period. It is also expected that the units will be listed on the American Stock Exchange upon closing of the offering. The Drug Research shares and the Elan warrants included in the units will trade only as units until two years after the closing of the offering. At that time, the shares and the warrants will trade separately and the warrants will become exercisable.

Drug Research has been formed to develop certain products based upon drug delivery systems incorporating Elan's proprietary ETDAS (Electro Transport Drug Absorption System) and IPDAS (Intestinal Protective Drug Absorption System) technologies, and to commercialize products based on these technologies. Drug Research will use the net proceeds of the offering to

make payments to Elan under a research and development agreement.

Elan and Drug Research will each have certain licensing rights with respect to the products being developed. Elan will have the option to acquire all of Drug Research's ADSs during a specified time period in the future.

STAMFORD, CONN. (AUG. 9) PR NEWSWIRE - Citicorp Information Resources announced today that First National Bank of Vicksburg, Miss., has selected the Comprehensive Banking System to handle its core bank data processing applications. The Comprehensive Banking System is Citicorp's in-house, integrated retail banking system, which runs on IBM's AS/400 computer. First National Bank of Vicksburg will also purchase IBM's 3892 reader/sorter for item and check processing.

First National Bank of Vicksburg is a nine-branch, $242 million asset community bank. This will be the sixth data processing conversion for First National Bank, which evaluated software from "all the top banking software vendors and a service bureau," according to Gwen Case, vice president of data processing. "We narrowed the search to an in-house

system because we wanted to be in control and to be able to change products fast."

One of management's reasons for selecting the Comprehensive Banking System is its ability to create and deliver new products quickly to meet specific and diverse banking needs of their customers, Vicksburg is home to several of the main offices of the United States Army Corps of Engineers, as well as several large industrial employers. Many of First National Bank's customers have sophisticated banking requirements for investment products, CDs, bonds, and home equity loans. At the same time, First National Bank wishes to serve other customers, many with very little money to save or invest. These customers have very basic banking requirements for products that do not require large sums of money, but need flexibility as their financial situations change.

"The Comprehensive Banking System is the most up-to-date in terms of what our bank needs," comments Gwen Case. "We looked at the software of eight top software vendors and decided that CBS was the best solution for the diverse needs of our customer base."

Citicorp Information Resources is a wholly owned subsidiary of Citicorp, which supplies data processing software and services to financial institutions: the National Service Product is Citicorp's online data processing service; the Comprehensive Banking System is Citicorp's in-house, integrated software for IBM's AS/400; Facilities Management is an arrangement whereby Citicorp operates a bank's proprietary software at a Citicorp data center.

#90221p3630 08/09/1990 ~PR Newswire

MANKATO, MINN. (AUG. 9) PR NEWSWIRE - The Board of Directors of Winland Electronics, Inc. today reported the results of the three and six month periods ended June 30, 1990.

For the second quarter ended June 30, 1990, Winland reported sales of $769,708 compared to $776,086 for the same period last year. The Company incurred a net loss of $24,974, or $(.012) per share during the current period compared to a net loss of $77,021, or $(.064) for the comparable period during 1989.

Winland's six-month year-to-date sales ended June 30, 1990 were $1,619,190 compared to $1,653,500 during the same period last year. For the six months ended June 30, 1990, the Company reported a net loss of $19,644, or $(.010) per share compared to net income of $3,918, or $.003 per share last year.

As a percentage of sales, the Company's gross profit was 25 percent during the second quarter of 1990, compared to 17 percent during the same period in 1989. As a percentage of total operating expenses, general and administrative expenses increased to 59 percent during the second quarter of 1990 from 41 percent during the same period in 1989. The increase in general and administrative expenses the result of several factors, including: the reallocation of certain salaries from the selling expenses category into the administrative category, additional staffing in the production and accounting departments and non-recurring professional fees in connection with the sale of Winland's line of automotive winter heating products.

Winland Electronics, Inc. designs, manufactures and markets electronic and electro-mechanical products and assemblies. The Company's common stock is traded over-the-counter in Minneapolis/St. Paul, Minnesota.

#90221p3632 08/09/1990 ~PR Newswire

CLEVELAND (AUG. 9) PR NEWSWIRE - The board of directors of The British Petroleum Company p.l.c. of London, England, today announced payment of a quarterly dividend which, with the addition of the tax credit and less the withholding tax described below, is worth 100.2 cents per American Depositary Receipt (ADR) to qualifying U.S. resident ADR holders. The record date for ADR holders is Aug. 31, 1990 with payment to be made on Nov. 7, 1990.

The current double tax convention between the U.K. and the U.S. includes provisions which entitle qualifying U.S. resident ADR holders to a refund of the 25/75 U.K. tax credit attaching to the dividend, less a 15 percent U.K. withholding tax charged on the sum of the dividend and the tax credit. The effect of these arrangements for qualifying U.S. resident ADR

holders is that the tax credit raises the value of the dividend announced by the board from 88.4 cents to 117.9 cents but the 15 percent withholding tax reduces it to 100.2 cents per ADR. Subject to certain limitations, the withholding tax, worth approximately 17.7 cents per ADR, may be treated as a foreign income tax that is eligible for credit against the ADR holder's federal income taxes.

The rate of exchange of $1.8660 to the pound used to translate BP's ordinary share dividend into U.S. dollars was that in effect at 5 p.m. London time on Aug. 8, 1990.

	1986	1987	1988	1989
Full year (U.S.$)	2.614	3.134	3.068	3.331

-- The above figures are adjusted to take account of the 2 for 1 share split that took place in April 1987.

-- One ADR represents 12 ordinary shares of BP traded in London.
-- The ex-dividend date on the New York Stock Exchange is expected to be Aug. 27, 1990.

PASADENA, CALIF. (AUG. 9) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced that it has been awarded a contract by the Foodservice Group of the Borden Grocery and Specialty Products Division to provide engineering, procurement, and construction services for two Borden production facilities.

The projects have a combined constructed value of more than $25 million, and will be located at Jackson, Miss., and Chatsworth, Calif.

The Jackson project involves construction of a new 440,000- square-foot food production operation within an existing structure that the previous owner had used for distribution. Jacobs will transform the site into a "hyperplant" -- Borden's term for a state- of-the-art, highly efficient facility with low-cost production economics -- for the manufacture and distribution of products for the food service industry.

Specifically, the facility will process or package individual portion products -- such as jelly, dipping sauces, dessert toppings, ketchup, mustard, mayonnaise, salad dressing, cream, sugar, and pepper. In addition, the plant will produce bulk-size, oil-based items -- such as mayonnaise, sauces, salad and other dressings, and syrups. The products are principally consumed at restaurants, fast- food chains, hospitals, schools, and other places where food is eaten or prepared away from the

home.

The work is being done on a fast-track basis. Initial operations in the Jackson facility are scheduled for October of this year, with final completion scheduled for March, 1991.

The Chatsworth project is an expansion of an existing Borden plant to increase production capacity for food products such as margarine, ketchup, sauces, mustard, salad dressings, and jams and jellies. The project also is being done on a fast-track basis, with initial occupation scheduled for November of this year and final completion scheduled for January, 1991.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

PRINCETON, N.J. (AUG. 9) PR NEWSWIRE - Rhone-Poulenc S.A., the international chemical company, today listed Contingent Value Rights (CVRs) on the American Stock Exchange under the symbol "RCV." The CVRs have been issued in connection with Rorer's assumption of $264 million in debt. The CVRs have been trading since July 2 on a when-issued basis.

Commenting on the listing of the CVRs, Igor Landau, member of Rhone-Poulenc S.A.'s executive committee and president of the health sector, said, "This final step in the merging of our human pharmaceutical business with Rorer attests to our confidence in Rhone-Poulenc Rorer's future. The CVRs further demonstrate our trust in the management of Rhone-Poulenc Rorer and their ability to meet the expectations of all shareholders."

On July 31, 1990, following merger approval at Rorer's annual meeting of shareholders, Rorer received approximately 20.9 million CVRs, a number equal to the number of remaining outstanding Rorer common shares held by Rorer's public shareholders. Pursuant to issuing the CVRs, Rhone-Poulenc transferred $264 million of debt to Rhone-Poulenc Rorer, the newly formed company.

As a final step Rhone-Poulenc contributed substantially all of its human pharmaceutical business to Rorer, in exchange for Rorer issuing approximately 24.2 million shares to Rhone-Poulenc, the assumption by Rorer of $1 million of Rhone-Poulenc indebtedness and a cash payment by Rorer of $20 million to a Rhone-Poulenc subsidiary.

Rhone-Poulenc S.A., an international chemical company ranking eighth worldwide, concentrates its activities in three major areas: life science applied to man, animals, and plants; specialty chemicals, performance products and advanced materials; and major organic and inorganic intermediates. Rhone-Poulenc's preferred investment certificates trade in Paris and in the form of American Depositary Receipts on the New York Stock Exchange. The company operates in 140 countries and has 86,000 employees. Rhone-Poulenc's U.S. subsidiary, Rhone-Poulenc Inc., is headquartered in Princeton, N.J. In 1989, U.S. sales represented approximately 13 percent of overall group sales.

SHELTON, CT (AUG. 9) PR NEWSWIRE - Data Switch Corp. (NASDAQ: DASW) has purchased $2 million face amount of its 15 percent subordinated notes, it was announced today by Rudolph G. Morin, executive vice president and chief financial officer.

Morin said that the repurchase was accomplished at a price below face and book value and, consequently, will result in a small gain, to be accounted for in the third quarter.

"This buyback is part of a continuing debt-reduction program that has allowed us to dramatically reduce our debt-to-equity ratio -- from 1.9 to 0.9 -- since the acquisition of T-Bar in late 1986," Morin said. "Fortunately, Data Switch's strong cash flow has made possible this buyback and previous repurchases of our convertible subordinated debentures."

Morin added that the company will "look for similar opportunities to buy back debt from time to time."

Data Switch is a leading manufacturer of management and control systems for data processing and data communications applications.

MELVILLE, N.Y. (AUG. 9) PR NEWSWIRE - Arrow Electronics, Inc. (NYSE: ARW) today announced the election to its board of directors of Carlo Giersch, the chief executive officer and majority shareholder of Spoerle Electronic Germany's largest electronics distributor.

A founder of Frankfurt-based Spoerle in the late 1960s, Giersch, age 53, has presided over the business' expansion for over two decades. Spoerle's annual sales, now in excess of $200 million, account for over 20 percent of Germany's total market for distributed electronic components. From sales offices located in ten cities throughout Germany, Spoerle distributes the products of such leading semiconductor suppliers as AMD, Harris, Intel, Motorola, Phillips and Texas Instruments.

In 1985, Arrow acquired a 40 percent interest in Spoerle and has since worked in close partnership with Giersch in developing and implementing plans to take advantage of expanded opportunities in European distribution arising from the European Economic Community's upcoming unification.

John C. Waddell, chairman of the board of Arrow, stressed the benefits to Arrow of Giersch's 22 years of experience in European distribution. "Our strategic partnership with Carlo Giersch and his widely respected company has proved exceedingly helpful to Arrow as we have sorted out the issues and opportunities that accompany our expanded presence in European distribution. Mr. Giersch's election to Arrow's board of directors formally recognizes the strength and further potential of our partnership and additionally acknowledges our high regard for the man and his company " Waddell said.

Arrow Electronics is one of the world's two largest distributors of electronic components, systems, and related products.

NEW YORK (AUG. 9) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) today reported that total sales for the four weeks ended Aug. 4, 1990, rose 14.6 percent to $703 million from $613 million in the comparable year-earlier period.

Domestic sales for the four-week period increased 8.7 percent to $389 million from $358 million, and foreign sales, expressed in U.S. dollars, rose 22.8 percent. If foreign exchange rates had remained constant, foreign sales would have increased 13.8 percent and total sales would have increased 10.8 percent. Domestic comparable store sales for the four-week period rose 4.9 percent.

For the cumulative 26 weeks ended Aug. 4, total sales rose 11.4 percent to $4,342 million from $3,899 million in the corresponding year-earlier period.

Domestic sales for the 26-week period increased 8.6 percent to $2,488 million from $2,290 million, and foreign sales, expressed in U.S. dollars, rose 15.2 percent. If foreign exchange rates had remained constant, foreign sales would have increased 9.0 percent and total sales would have increased 8.8 percent. Domestic comparable store sales for the 26-week period rose 5.4 percent.

Harold E. Sells, chairman and chief executive officer, stated, "Overall, July sales were satisfactory, although not up to plans. We were particularly pleased with the very strong comparable-store sales gains registered by our Kinney operations in the United States and by our Woolworth operations in Germany."

NEW YORK (AUG. 9) PR NEWSWIRE - Renault Vehicules Industriels S.A. ("RVI"), a wholly owned subsidiary of Regie Nationale des Usines Renault, announced today that the term of the tender offer (the "Offer") by ITM Acqusition Corp ("ITM"), an indirect wholly owned subsidiary of RVI, to acquire all of the outstanding shares of common stock of Mack Trucks Inc. (NASDAQ: MACK) not beneficially owned directly or indirectly by RVI, at $6.00 per share, net to the seller in cash, and related withdrawal rights had been extended to 9 p.m., New York City time, on Wednesday, Aug. 22.

The offer had previously been scheduled to expire at midnight, New York City time, on Aug. 8. RVI stated that it was extending the term of the offer in order to provide more time to satisfy the conditions to the offer including the expiration or termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

RVI also announced that ITM had amended the condition to the offer requiring receipt by Mack prior to Aug. 8 of an extension of the maturity of the Mack Financial Corp. revolving credit agreement to Dec. 31 and certain waivers from lenders to Mack through that date (the "Waiver Condition"). This condition, as amended, will require receipt by Mack of such an extension and such waivers prior to the expiration of the offer. Mack has advised RVI that discussions with its lenders and certain of the lenders to its subsidiaries are continuing. RVI does not yet consider the waiver condition to have been satisfied.

As of 5 p.m., New York City time, on Aug. 8, an aggregate of 625,372 shares of common stock of Mack (representing approximately 2.1 percent of the total outstanding common stock of Mack) had been tendered pursuant to the offer by either physicial or guaranteed delivery. The tendered shares together with the Mack shares beneficially owned directly or indirectly by RVI, represent approximately 46.6 percent of the total outstanding common stock of Mack.

#90221p3647 08/09/1990 ~PR Newswire

MORRIS TOWNSHIP, N.J. (AUG. 9) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) announced today it has reached agreement with the U.S. Environmental Protection Agency on the commercialization of a key substitute for chlorofluorocarbons (CFCs) used in foam insulation and solvent cleaning applications. Approximately 250 million lbs. of CFCs were used in these applications during 1989.

The substitute, HCFC 14lb, is currently being produced by Allied- Signal at a pilot plant at the company's Materials Research Center in Buffalo, N.Y. that has been operating since June, 1988. Allied-Signal plans to break ground later this year on a full scale commercial facility in Geismar, La. Start-up is expected in late 1991 or early 1992.

"This is another major step in our drive to commercialize a family of CFC substitutes," according to Fred Poses, president of Allied- Signal's Engineered Materials. "This new product will have a significant impact

on reducing the used CFCs in the insulating foam and solvent cleaning industries. The EPA agreement comes at just the right time as we are about to break ground for the new plant in Geismar."

The agreement was necessary because federal law requires EPA approval of new products before they can be commercially produced. Because HCFC 14lb has never been approved before, Allied-Signal submitted a variety of health and safety studies to the agency. The results of these tests demonstrated that there were no health or safety effects from exposure to HCFC 14lb that would preclude its general usage. Because of the expected widespread usage of HCFC 14lb, EPA and Allied-Signal have agreed on several additional tests that will be completed within four years.

Poses added that initial production quantities from the Geismar plant will support solvent applications. He anticipated that the use of HCFC 14lb in foam applications will be phased in later.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

CANTON, IL (AUG. 9) PR NEWSWIRE - Canton Industrial Corporation (BSE: CNI.B; OTC) today announced that it is in the negotiation process with Abbott Products, Inc. to consolidate both companies.

Abbott Products, Inc. is a Chicago based commercial, industrial and defense contractor owned by Nelson Carlo, the current CEO and majority stockholder in Canton Industrial Corporation. Because of Carlo's Hispanic heritage, both companies qualify as minority-owned, small disadvantaged businesses (SDB) by federal, state and city governments.

Abbott Products, Inc. has an immediate business backlog of more than $31 million along with contract options in excess of $16 million. Many metropolitan areas require developers and general contractors to earmark a certain percentage of their business to minority-owned enterprises. The U.S. government allots 5 percent of all money spent on defense- related products to small disadvantaged businesses.

To further the consolidation effort, both corporations have negotiated with the financial institutions who are creditors of Canton to sell all of Canton's equipment to Abbott thereby eliminating nearly $1 million of Canton's debt and securing the equipment for use by Abbott and Canton jointly.

The corporations are also renegotiating Canton Industrial's debt with the city of Canton and a resolution is imminent. Canton is confident that their proposal will bring about a substantial debt reduction for the Canton Industrial Corporation.

Carlo, president of both companies, said, "The natural synergies between the marketing skills of Abbott management and the manufacturing facilities of Canton present strong growth opportunities for the companies if combined."

CONTACT: Thomas Hacker, 312-247-6555, or Nelson Carlo, 312-890-9601, both of Canton Industrial.

#90221p3650 08/09/1990 ~PR Newswire

SEATTLE (AUG. 9) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today announced that an investigational new drug application for Interleukin-1 (IL-1) alpha has been approved by the U.S. Food and Drug Administration (FDA). Phase I/II clinical trials, to evaluate the drug's safety and effect on blood cell growth in patients with refractory cancers -- cancers that have spread and are not responding to treatment -- are scheduled to begin early next month.

Based on data from preclinical trials, Immunex scientists believe IL-1 alpha may be useful in treating or preventing myelosuppression, a condition in which the body's production of critical blood cells is depressed. Myelosuppression most often occurs in cancer patients who receive chemotherapy or radiation therapy, because both types of treatments can destroy bone marrow and blood cells derived from bone marrow, including infection-fighting white cells such as neutrophils, granulocytes and monocytes, as well as cells critical to clotting called platelets. Ultimately, if IL-1 alpha is able to protect a patient's bone marrow during cancer therapy, Immunex scientists believe that the drug may allow oncologists to increase dosages of chemotherapy or radiation.

Preclinical data has also demonstrated that IL-1 used in combination with other colony stimulating factors, such as granulocyte macrophage-colony stimulating factor (GM-CSF), may increase the effectiveness of standard chemotherapy regimens.

The term IL-1 is used to refer to two related, naturally occurring hormones: IL-1 alpha and IL-1 beta, which were identified by Immunex scientists in 1984. The two proteins are structurally different, but share similar biological activities.

Immunex began its work on IL-1 in 1982. In 1983 it entered into a collaboration with Syntex (U.S.A.) Inc., a subsidiary of Syntex Corp.,

based in Palo Alto, Calif. Work under that collaboration has produced several products which the parties are separately developing.

In addition to the IL-1 alpha IND announced today, Immunex is conducting Phase I/II trials of a wound healing product in which the active ingredient is IL-1 beta. This product is being tested for its ability to aid healing of pressure wounds (commonly known as bed sores) in patients in hospitals and nursing homes. The wound healing product is administered topically in gel form. Immunex has worldwide rights to the development, manufacturing and marketing of IL-1 beta as a wound healing agent.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products. The company has under develpoment one of the biopharmaceutical industry's largest proprietary portfolios of cytokines and cytokine receptors.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Earnings for Bell Industries Inc. (NYSE: BI) nearly doubled in the fourth quarter while increasing 80 percent for the fiscal year ended June 30, 1990, the company announced today.

Net income for the fourth quarter rose to $2,869,000, or $.49 per share, from $1,461,000, or $.25 per share, in the year earlier period. Pretax profit margins showed significant improvement, with income before taxes posting a 138 percent gain over the prior year. Sales were $102,867,000 versus $105,671,000 in the corresponding quarter last year.

For the fiscal year ended June 30, 1990, net income increased 80 percent to $8,202,000, or $1.40 per share, from $4,550,000, or $.75 per share, a year ago. Pretax income nearly doubled from the prior year. Sales were $395,774,000 compared with $418,198,000 in fiscal 1989.

Bell President Theodore Williams attributed the improved margins to greater overall efficiencies, reduced overhead realized from centralized purchasing and inventory control, and emphasis on higher margin sales, including more value-added services such as its growing Just-In-Time business. Operating income rose sharply in Bell's two largest business groups -- Electronics and Building Products -- despite slightly lower sales. The Electronics Distribution Group's gross profit margin continued to improve, increasing to 26.3 percent in 1990.

"We are extremely encouraged by the substantial gains in operating margins particularly in a year where Bell was influenced by sluggish sales, consolidation of facilities and equipment availability problems with a building products supplier early in the year," Williams said.

Operating results from Bell's other distribution businesses -- Graphic Arts and Motor Vehicle Parts and Accessories -- declined from the prior year, reflecting in large part costs associated with restructuring the operations, opening of new facilities and relocation of another.

Bell Industries Inc. distributes and manufactures products for the electronics, building and other markets.

CINCINNATI (AUG. 9) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced a 33 percent increase in earnings on sales growth of 13 percent for the fiscal year ended June 30, 1990.

Worldwide net earnings for the year amounted to $1,602,000,000, an increase of 33 percent over $1,206,000,000 for the previous year. The

increase was primarily due to unit volume growth. Also contributing to the increase in net earnings, but to a lesser extent, were a lower effective income tax rate and the manufacturing consolidation reserve established in June, 1989.

Earnings per share were $4.49, an increase of 26 percent over $3.56 for the preceding year. The growth in earnings was greater than the increase in earnings per share primarily due to the acquisition of Noxell in exchange for common shares of P&G stock. These per share figures have been adjusted for the two-for-one stock split effective October 20, 1989.

Worldwide net sales for the year amounted to $24,081,000,000, an increase of 13 percent over $21,398,000,000 for the previous year.

Dividends of $1.75 per common share were paid during the year. This compares to the previous year's dividend of $1.50 per share after adjustment for the stock split. The quarterly dividend was increased to an annual rate of $1.80 per share in November, 1989. This marks the 34th consecutive fiscal year of increased dividend payments.

For the April/June period, the last quarter of P&G's fiscal year, worldwide net earnings were $284,000,000, an increase of 66 percent over $171,000,000 for the same quarter of the previous year. Excluding the effect of the $78,000,000 after-tax reserve established in June, 1989, in connection with production facilities' consolidations, earnings would have increased 14 percent. Earnings per share were $.78 which compares with $.50 for the fourth quarter a year ago. Worldwide net sales were $6,216,000,000, an increase of 14% over $5,433,000,000 for the same three months last year.

P&G Chairman and Chief Executive Edwin L. Artzt and President John E. Pepper said, "This past year we achieved the largest year-to-year percentage increase in worldwide unit volume in 32 years. We generated broad-based volume increases not only geographically but also in product categories. New acquisitions and ventures contributed to the increase, but the majority of volume growth came from the company's established businesses, notably laundry products, hair care products, and disposable diapers."

#90221p3660 08/09/1990 ~PR Newswire

MALVERN, PA (AUG. 9) PR NEWSWIRE - Vishay Intertechnology Inc. (NYSE: VSH) reported a record 64 percent increase in net earnings on a 7 percent increase in sales for the second quarter of calendar 1990, Dr. Felix

Zandman, chairman and chief executive officer, announced today.

In the three months ended June 30, 1990, sales increased by 7 percent to $113,517,000 as compared with $106,160,000 in the year- earlier period. Net earnings increased by 64 percent to $6,563,000 or $.50 per share, compared to $4,002,000 or $.32 per share in the previous year's quarter. Earnings per share has been diluted by $.03 per share for the three months ended June 30, 1990, due to the effect of the assumed conversion of the convertible subordinated debentures.

In the six months ended June 30, 1990, sales increased by 8 percent to $229,382,000 as compared with $212,170,000 in the year-earlier period. Net earnings increased by 57 percent to $12,884,000 or $.99 per share, compared to $8,232,000 or $.66 per share in the year-earlier period. Earnings per share has been diluted by $.05 per share for the six months ended June 30, 1990, due to the effect of the assumed conversion of the convertible subordinated debentures.

Vishay Intertechnology Inc. is a leading U.S. and European producer of a wide range of electronic resistors and resistive sensors. It is also a major producer of other types of passive electronic components. The company's products are used in a broad range of industries.

VISHAY INTERTECHNOLOGY INC.
(Unaudited)

Three months ended June 30	1990	1989	Percent increase
Sales	$113,517,000	$106,160,000	7
Earnings before income taxes	9,546,000	5,875,000	62
Income taxes	2,983,000	1,873,000	59
Net earnings	6,563,000	4,002,000	64
Net earnings per share	$.50(A)	$.32	56
Average shares outstanding	14,677,000(A)	12,383,000	

Six months ended June 30	1990	1989	Percent increase
Sales	$229,382,000	$212,170,000	8
Earnings before income taxes	19,124,000	11,984,000	60
Income taxes	6,240,000	3,752,000	66
Net earnings	12,884,000	8,232,000	57
Net earnings per share	$.99(A)	$.66	50
Average shares outstanding	14,672,000(A)	12,433,000	

(A) Earnings per share is based on the weighted average number of common shares and dilutive common equivalent shares (from the assumed conversion

of convertible subordinated debentures) outstanding during the period. For periods where the assumed conversion of the debentures has a dilutive effect, net earnings used in these computations are adjusted for interest expense, net of income taxes on the convertible subordinated debentures. The effect of this is that earnings per share has been diluted by $.03 per share and $.05 per share for the three months and six months ended June 30 1990, respectively. Earnings per share is adjusted for the 5 percent stock dividend paid on June 11, 1990.

#90221p3661 08/09/1990 ~PR Newswire

GOTEBORG, Sweden (AUG. 9) PR NEWSWIRE - SKF (NASDAQ: SKFRY), the world's largest manufacturer of bearings, today reported interim results for the six months ended June 30, 1990. SKF Group income after financial income and expense for the first six months of 1990 rose 11 percent to SEK 1.343 billion, compared with SEK 1.211 billion in the corresponding period a year earlier. Sales increased 15 percent to SEK 14.707 billion, from SEK 12.768 billion for the same period in 1989.

SEK 832 million of the sales increase of SEK 1.939 billion was attributable to the newly acquired Chicago Rawhide (CR), which for practical reasons has been consolidated in the accounts already from Jan. 1, 1990. Income generated by CR, including goodwill amortization, largely offset the financial costs during the period for the acquisition.

Return on capital employed for the most recent 12-month period was 19.4 percent versus 20.0 percent for the full year 1989.

Bearings The favorable sales trend posted at the beginning of the year weakened at the close of the period. Several of the European companies reported a marked weakening in sales to the automotive industry in June. Sales to the capital goods sector also declined in June.

Demand in the United States continued at an unchanged level. Sales to the aftermarket were at the same level as previously reported.

Rolling bearings sales during the first six months were up 10 percent to SEK 11.795 billion, compared with SEK 10.761 billion in 1989. Income after financial net rose 12 percent, from SEK 977 million to SEK 1.095 billion.

Tools At the beginning of July, a decision was made to merge the companies in the SKF Tools business area with Gunther & Co. (Titex), a West German tool company. The newly formed company, CTT

Cutting Tools and Technology, with annual sales of slightly more than SEK 2 billion and nearly 5,000 employees, will be 70 percent owned by SKF and 30 percent by Gunther & Co. The transaction is contingent upon approval of the German cartel authorities.

SKF Tools also experienced a weakening in demand at the end of the period. This was particularly apparent in Sweden. In Brazil the market began a recovery despite the adverse impact of the strikes in their automotive industry.

Income for SKF Tools amounted to SEK 57 million for the first six months of 1990, compared with SEK 68 million in the same period a year earlier. Sales rose 12 percent to SEK 703 million (SEK 625 million).

Component Systems Continued favorable growth was noted by the SKF Component Systems business area during the first six months. However, developments in Eastern Europe had an adverse effect on demand for textile machinery components, which therefore met weakened growth in the market.

The acquisition of CR significantly strengthened the group's position as a manufacturer and supplier of seals. Organizationally, manufacturing and sales to large customers will be placed within the SKF Component Systems business area. Sales to the aftermarket, which is mainly the same market segment as for rolling bearings, will be placed within SKF Bearing Services.

In June, SKF acquired the oil seals activities of the Italian company, Gallino Gomma S.p.A. Gallino Gomma has annual sales of SEK 100 million and 250 employees.

Income for SKF Component Systems rose 13 percent to SEK 187 million (SEK 165 million) during the first half-year. Sales, excluding CR, climbed 17 percent to SEK 1.950 billion (SEK 1.668 billion).

Earnings SKF Group operating income, after depreciation according to plan, amounted to SEK 1.448 billion (1.304 billion). Net financial expense was SEK -105 million (SEK -93 million). Net earnings per share after taxes amounted to SEK 6.65 (SEK 6.90).

When AB SKF sold part of its real estate holdings in Goteborg, the SKF Group obtained a minority interest in the buying company. Most of this minority holding was sold during the second quarter of 1990, which yielded an extraordinary gain after taxes amounting to SEK 116 million. Earnings per share, after extraordinary items, amounted to SEK 7.70 (SEK 8.55).

Capital expenditures in plant and equipment during the period amounted to SEK 649 million (SEK 574 million). At the end of June, inventories

accounted for 34 percent of sales for the year, compared with 33 percent 12 months earlier. The group's financial assets totaled SEK 4.820 billion (SEK 4.422 billion) at June 30, 1990.

The average number of employees at work at the end of the first six months was 49,840 (46,164).

Parent Company The parent company, which only includes group and business area staff functions since the industrial operations have been transferred to separate companies, posted income after financial income and expense amounting to SEK 220 million (SEK 186 million). Liquid assets at the close of the period under review totaled SEK 511 million, compared with SEK 466 million at year-end 1989. There were no sales during the period (SEK 1.370 billion) and no capital expenditures (SEK 38 million). The average number of employees was 203 (3,371).

The total number of AB SKF shares outstanding, including conversion of the debenture loan, amounts to 112,999,556.

As payment for the acquisition of Chicago Rawhide, AB SKF issued a debt instrument loan amounting to US$149.8 million, with attached warrants entitling the holders to subscribe for a new issue of 11,000,000 restricted shares of series B. The subscription price was set at SEK 190.

Forecast SKF's forecast for 1990 of a sustained level of profitability was based upon a certain growth in industrial production. The consequences of the political development in the Middle East coupled with a slower than anticipated growth rate of industrial production in some countries make the group's possibilities to reach its forecast more difficult.

NOTE: As of June 29, 1990, one U.S. dollar equals SEK 6.0480.

LEXINGTON, MASS. (AUG. 9) PR NEWSWIRE - Interneuron Pharmaceuticals, Inc. (NASDAQ: IPIC/IPICU) announced the signing of an agreement with Ferrer Internacional, S.A. of Barcelona, Spain providing for a one-year period, during which Interneuron will have the exclusive option to license rights and know-how, in the United States and Canada, to Cytidil Diphosphocholine (CDP choline) for use in treating brain disease including Post-Stroke Syndrome and memory disorders.

CDP choline has been marketed in Spain by Ferrer and is being developed in Germany by Ferrer's local affiliate, H. Trommsdorff GmbH & Co., to treat syndromes involving damage to the brain such as Post- Trauma, Post-Stroke Syndromes and age-related memory disorders. CDP choline is currently undergoing market registration in Germany. Use of CDP choline in the United States will require FDA approval.

"The option to license CDP choline constitutes another important milestone in our continuing development of a strong product portfolio," said Charles J. Casamento, president and chief executive officer. "It fits perfectly into our strategy of marketing products for treating neurologic and psychiatric diseases and disorders".

Interneuron is a neuropharmaceutical company organized to research, develop and commercialize innovative pharmaceutical compounds or products. The company's efforts will focus primarily on investigating compounds which mimic or affect neurotransmitters or neurohormones to treat disturbances of sleep, appetite, memory or mood, or certain neurologic or

psychiatric disorders such as obesity, depression, spasticity, or Alzheimer's disease.

MINNEAPOLIS (AUG. 9) PR NEWSWIRE - Dayton Hudson Corporation (NYSE: DH) today reported that its net retail sales for the four weeks ended Aug. 4, 1990, increased 16.4 percent to $984 million from $845 million a year ago.

Comparable-store sales were up 4.4 percent from the same period a year ago.

Kenneth A. Macke, chairman and chief executive officer, said, "We continue to be pleased with the strength of our base businesses. Target's sales increase is again solid across all business categories and in all regions. Mervyn's results were satisfying and as expected, given their low clearance position and strong July a year ago. The Department Store Division had a good month with Dayton's, Hudson's and Marshall Field's all performing consistently well.

"Our inventories are in excellent shape in all our divisions as we enter the fall season. We are encouraged with early fall selling and we continue to feel good about the balance of the year, even in a difficult retail environment," Macke said. "We are on track for solid performance for the quarter and the year."

July sales by business segment for the four weeks were as follows: -- Target's total sales rose 10 percent while comparable-store sales were up 5 percent.

-- Mervyn's total sales increased 4 percent and comparable-store sales increased 2 percent.

-- The Department Store Division's total sales were up 84 percent and comparable-store sales (including Marshall Field's, this year and last) were up 8 percent. The total sales increase for July primarily reflects 4 weeks' sales from Marshall Field's.

The Corporation's sales for the 26 weeks ended Aug.4 were $6.15 billion, up 12.6 percent from $5.46 billion in the same period a year ago. Comparable-store sales for the 26 week period were up 5.6 percent compared to the same period last year.

As of Aug. 4, 1990, Dayton Hudson operated 695 stores in 33 states. NOTE:

1989 numbers exclude Lechmere, which was sold, effective Sept. 30, 1989.

MINNEAPOLIS (AUG. 9) PR NEWSWIRE - Best Buy Co., Inc. (NYSE: BBY) today reported sales for July 1990 (July 8 through Aug. 4), the fifth period of the company's 1990-91 fiscal year.

According to Allen Lenzmeier, senior vice president-finance, July 1990 sales of $48 million were 33 percent more than the $36 million achieved for the comparable four-week period last year. Year-to-date sales (Mar. 4 through Aug. 4) were $229 million, a 24 percent increase over $185 million for the comparable period last year. Comparable store sales increased 2 percent for July 1990. Due to a cooler summer in the Upper Midwest, the sale of air conditioners are down considerably and reduced the overall comparable store sales increase by 3 percent (41 of the company's stores are considered comparable).

Best Buy opened a new store in Springfield, Mo., on July 13, 1990, bringing the company's total number of retail locations to 53.

Best Buy reports sales on a 5-4-4 week basis. Net income and earnings per share are disclosed quarterly. Best Buy is the fourth- largest publicly held consumer electronics and major appliance retailer in the U.S. The company sells nationally recognized name-brand consumer electronics products, 35mm photographic equipment, home office products, entertainment software, and major appliances at 53 stores located in Minnesota, Iowa, Wisconsin, South Dakota, Illinois, Kansas, Missouri, Nebraska and Texas.

CINCINNATI (AUG. 9) PR NEWSWIRE - Meridian Diagnostics, Inc. (NASDAQ: KITS) announced today record net sales for the fiscal 1990 third quarter and nine month periods ended June 30, 1990, were $2,177,000 and $5,894,000 respectively, compared with $1,544,000 and $4,554,000 for the same periods during the prior fiscal year. Net earnings for the fiscal 1990 third quarter and nine month periods were $123,000 ($.03 per share) and $390,000 ($.08 per share) compared to $75,000 ($.02 per share) and $229,000 ($.05 per share) earned during the comparable periods of the previous fiscal year.

Net sales for the third fiscal quarter and nine months increased $633,000 (41 percent) and $1,340,000 (29 percent), respectively, over the comparable prior year periods. P%q1/41/2 earnings increased by 64 percent for the three month period and 70 percent for the nine month period over the prior year results.

Jerry L. Ruyan, president and chief operating officer, said, "We are excited with the progress of our operating results made through the nine month period, having earned more in that period than in all of fiscal 1989. We further anticipate strong sales and earnings through the rest of the fiscal year."

Ruyan went on to say, "This week an agreement was finalized between Index Diagnostics of Baltimore, Md. and Meridian Diagnostics Europe s.r.l. to distribute all of Index's diagnostic products throughout Europe. Meridian Diagnostics Europe s.r.l. is a Meridian subsidiary located in Milan, Italy distributing Meridian and other manufacturers products throughout Europe.

MERIDIAN DIAGNOSTICS, INC.

WILMINGTON, DE (AUG. 9) PR NEWSWIRE - Du Pont (NYSE: DD) and Molex Inc. (NASDAQ: MOLX) have settled a patent lawsuit through an agreement that prohibits Molex from producing retentive connector products which Du Pont says infringe its patent.

The companies also agreed that Molex may switch to one or both of two other retentive connector designs. Financial terms of the settlement were not disclosed.

Du Pont filed suit last November in U.S. District Court in Delaware. The patent covers the way an electrical connector is held in place on a printed circuit board until its terminals are soldered to the board. The invention offers manufacturing cost savings to printed circuit board users and gained rapid acceptance in the marketplace when Du Pont introduced it in its "Bergstik" and insulation displacement headers.

"We are pleased with the resolution of this action and believe that patent protection will continue to be a critical issue for the entire connector industry," said E. Norris Tolson, director of Du Pont Connector Systems. "If companies are going to make advancements in electronics, then they must be able to protect their investment in research and development. Between the time we applied for the patent and it was granted, competition began selling an identical product."

Du Pont's 1989 sales to the electronics industry exceeded $1.8 billion, making it one of the largest and most diversified suppliers of materials, components, and services to that industry. It serves the makers of integrated circuits, ceramic circuits, printed circuits, passive components, and users of connectors, subassemblies, and information storage media.

OAK BROOK, IL (AUG. 9) PR NEWSWIRE - Chemical Waste Management, Inc.

(NYSE: CHW) and the National Solid Wastes Management Association have been granted their court appeal to overturn the Alabama law which bans the importation of hazardous waste for disposal in Alabama from numerous states. The 11th Circuit Court of Appeals in Atlanta ruled on Aug. 8, 1990 that Alabama's "Holley Bill" and preapproval regulations unconstitutionally interfered with interstate waste shipments.

In addition, the ruling invalidated Alabama's new regulations that banned land disposal of certain types of waste material from Superfund sites and other cleanup projects even though federal regulations legally permit such disposal.

"Chemical Waste Management is pleased that it has prevailed in this matter " said a company spokesman. "We have believed all along that Alabama's actions were inconsistent with the interstate commerce provisions of the U.S. Constitution, would frustrate the federally mandated hazardous waste management system and would impair the timely cleanup and safe disposal of wastes from Superfund sites."

The company still has pending separate litigation challenging the imposition of recently enacted taxes by Alabama on the disposal of hazardous waste at the company's Emelle, Ala. facility.

#90221p3681 08/09/1990 ~PR Newswire

ARMONK, NY (AUG. 9) PR NEWSWIRE - MBIA Inc. (NYSE: MBI), holding company for Municipal Bond Investors Assurance Corporation (MBIA Corporation), today reported that second quarter net income increased 29 percent to $32.2 million, compared with $24.9 million in the second quarter of 1989. Second quarter earnings per share rose 28 percent to $.86 per share from

$.67 per share last year. For the first half of 1990 net income and earnings per share increased 26 and 25 percent, respectively, to $63.5 million or $1.70 per share, compared with $50.5 million or $1.36 per share in the same period a year ago. Book value per share at the end of June was $23.05, compared with $19.93 at June 30, 1989.

William O. Bailey, chairman and chief executive officer said, "Our strong second quarter and first half results reflect continued earnings growth and the additional positive contribution from the acquisition of Bond Investors Group (BIG). These results continue to demonstrate the company's ability to generate predictable and growing earnings. MBIA's gross premiums written for the quarter reached a record level, reflecting the increase in total municipal bond volume, the higher percentage of issues insured, MBIA's greater market share as well as strong growth in our secondary market business."

MBIA was the leading insurer of new municipal bond issues for the second quarter and first half, insuring $4.3 billion and $6.7 billion of par value, respectively. Based on data from The Bond Buyer, these amounts represent 43 percent of the industry total for the second quarter and 41 percent for the year to date. According to industry data, total new issue volume through June 30, 1990 was $60.0 billion, 6 percent ahead of the total for the first half of 1989. The insured portion of the market increased to 27 percent, compared with last year's 24 percent.

Gross premiums written rose 62 percent for the quarter to $59.3 million, compared with $36.5 million a year ago. For the first six months of the year, gross premiums totalled $102.3 million, up 42 percent from $72.2 million in 1989.

Premiums earned during the second quarter were $26.6 million, a 17 percent increase over 1989. This included $3.4 million from refundings, compared to $4.8 million the prior year. For the year to date, premiums earned rose 20 percent to $53.2 million, and include $6.9 million from refundings versus $9.5 million last year. The growth in premiums earned reflect the impact of the acquired BIG unearned premium reserve.

Net investment income for the quarter increased 48 percent to $28.6 million from $19.3 million a year ago and grew to $55.7 million for the first half of 1990 compared with $38.6 million in 1989. The increase in net investment income is primarily due to the acquired BIG investment portfolio and additions to investments from operating cash flow. At June 30, 1990, MBIA's investment portfolio totalled $1.6 billion and consisted mainly of intermediate-term bonds. This amount includes approximately $52 million in net proceeds from the June sale of 1.5 million shares of common stock by the company as part of its recent public offering.

Revenues for the second quarter of 1990 were $55.7 million, compared with

$42.2 million in the second quarter of 1989. For the first six months of 1990, revenues totalled $110.3 million, compared with $83.2 million in last year's first half. Total revenues are the sum of earned premiums and investment and other income.

Expenses for the second quarter and first half were $13.6 million and $27.6 million, respectively, compared with $9.0 million and $16.6 million last year. The primary reasons for these increases were interest expense and goodwill amortization arising from the BIG acquisition.

Computed on a statutory basis, MBIA Corporation's unearned premium reserve as of June 30, 1990 was $879.6 million, and its capital base (consisting of capital, surplus and contingency reserve) was $773.4 million, for an aggregate $1.6 billion of policyholders' reserves compared with $1.2 billion a year ago.

MBIA Inc., through its wholly owned subsidiary, MBIA Corporation, is a leading insurer of municipal bonds, including new issues and bonds traded in the secondary market. MBIA is rated Triple-A by Moody's Investors Service, Inc. and by Standard & Poor's Corporation and municipal bonds insured by MBIA receive these ratings.

#90221p3683 08/09/1990 ~PR Newswire

TRAVERSE CITY, MI (AUG. 9) PR NEWSWIRE - Ford Motor Company's modular engine program represents a new way of designing and building engines, according to David F. Hagen, general manager - Engine Division, Ford North American Automotive Operations.

In remarks delivered at the University of Michigan's 1990 Management Briefing Seminar here, Hagen said modular engine programs will be key to Ford's powertrain strategy in the 1990s and beyond, contributing to Ford's goal of becoming the lowest-cost producer of the highest-quality products with the best value in North America.

"We no longer have to dedicate a single line to a single engine as we have in the past. Instead, an entire family of engines can be built on a single assembly line in several configurations and different displacements but with common parts," he said.

Hagen said that in today's competitive environment, producing high-quality, world-class engines will be more critical than ever. "We like to think that if you make quality the number one priority, everything else takes care of itself," Hagen said in describing Ford Engine Division's quality initiatives which involve employees at all plant locations.

Hagen pointed out that the first member of this new engine family, an overhead cam 4.6-liter V-8, is being produced at Ford's new $780 million Romeo, Mich., Engine Plant and will be in the 1991 Lincoln Town Car this fall. Others of these engines, including a 32-valve high output V-8, will follow in the future, he added.

According to Hagen, a common approach is used to design a family of engines with similar combustion chambers, pistons and valvetrains so that components can be interchanged easily. Modular design also calls for the sharing of a number of similar components within engine families, such as cylinder blocks, aluminum cylinder heads, camshafts, water and oil pumps and connecting rods.

"By concentrating our efforts on these critical components, we can clone design expertise," he said. "Once we prove out a design, all our efforts can be focused on building a high-quality engine."

Hagen said the Romeo Engine Plant is as impressive as the engines themselves. Using a team-oriented labor agreement, the men and women at Romeo have set themselves the goal to be the "best engine builders in the world," he said, "and, with 100,000 hours of training under their belts, employees are responsible for making sure that not a single engine leaves the plant with a defect."

Romeo has the flexibility to produce a wide range of different V-8's off the same assembly line. New V-8 variations will cost about $60 million to develop compared to about $500 million for a typical new engine program.

Hagen estimated the new family of engines will share about 350 parts -- or 75 percent of the engine, adding that the new process has netted a 25-percent reduction in the number of parts used in the engine.

"That's a lot of parts as Romeo prepares to produce over a half a million engines annually," he said. Romeo has fewer suppliers as well with just 85 major material suppliers compared with 300 to 400 at typical engine plants.

He said Ford's modular approach offers flexibility and savings over more conventional technology. "Modular engines will be advantageous for several reasons," Hagen said "allowing for quicker response to changing market conditions, reduced engine development costs, shorter product development cycles, while improving overall quality and reliability."

Hagen acknowledged that even before last week's surprise developments in the Middle East, the industry faced tough challenges at home as Congress debated new CAFE and Clean Air legislation. Hagen cited the CAFE bill proposed by Senator Bryan, for example, as completely outside any

full-line manufacturer's capabilities -- domestic or foreign.

"We simply see no way to have a 40-45 mile-per-gallon fleet by the turn of the century, that is unless we are to have almost all compact and subcompact vehicles." Hagen added that customers are concerned about fuel economy, but they care more about their car's quality and the performance of their powertrain.

ROCHESTER, NY (AUG. 9) PR NEWSWIRE - A series of new, compact photography guides written for beginning and intermediate photographers is now available from Eastman Kodak Company (NYSE: EK).

The No Nonsense Photography Guides, published by Longmeadow Press, include six soft-cover books that answer the most commonly asked questions about photography. The series includes Photographing People, Composing Photographs, Using Existing Light, Using Creative Techniques, Photographing Your Vacation, and Using Accessory Equipment.

Each 8 1/4-inch x 5 1/4-inch guide can be easily carried in a purse, glove compartment, or camera case for use as a convenient reference. The easy-to-understand text gives a variety of situations and techniques for improved picture-taking.

Each 80-page guide contains informative charts, illustrations, and instructive color photographs. Every guide also contains a glossary of terms, a comprehensive index and helpful recommendations for films, lenses filters and other tools to add creativity to readers' photos.

Suggested retail price for the No Nonsense Photography Guides is $5.95 for each.

VINELAND, NJ (AUG. 9) PR NEWSWIRE - IGI Inc. (AMEX: IG) today reported record net sales of $5,145,317 for the second quarter ended June 30, 1990, up 9.3 percent from $4,706,800 for the second quarter 1989.

Net income for the quarter was $81,026, or 1 cent per share, vs. $89,757, or 1 cent a share, in 1989.

For the six-month period ended June 30, 1990, net income was $130,754, or 2 cents per share, vs. $125,238, or 2 cents per share in 1989. Revenue for the period increased 9 percent from $9,333,185 to $10,170,252.

IGI Inc. is a diversified profitable biotechnology company. Its majority-owned subsidiary Micro Vesicular Systems Inc. has created novel patented technologies for lipid vesicle ("Novasome" TM) microencapsulation (often called "liposomes") and biodegradable superabsorbents ("Ultrasponge" TM). These are being developed for a wide variety of commercial applications.

IGI's Vineland Laboratories, EVSCO Pharmaceuticals and Tomlyn Products divisions produce and sell poultry vaccines, small animal pharmaceuticals and pet care products worldwide.

PITTSBURGH (AUG. 9) PR NEWSWIRE - At a reconvened meeting of the shareholders of National Intergroup, Inc. (NYSE: NII) here today, it was reported that holders of approximately 11.1 million shares of common stock of the corporation, representing approximately 63 percent of the 17.6 million shares voted, have approved the election of Centaur Partners IV's director nominees.

Consequently, Joseph L. Hudson Jr., J. Clayburn LaForce and Howard M. Love will step down from the board, effective immediately. In addition, Centaur's proposals relating to confidential voting, NII's Rights Offering Plan, and compensation agreements with respect to directors, officers and employees of NII have also been approved. Votes cast in favor of Centaur's proposals were approximately 12.0, 12.1 and 11.0 million shares, respectively. NII's proposal to change the name of the corporation to FoxMeyer Corp. received more than 50 percent of the shares voted, but failed to achieve the two-third majority necessary to ratify the proposal.

Newly elected to the board of directors of NII for a three-year term are Melvyn J. Estrin, chairman of the board of Human Service Group, Inc., a private financial investment and management services firm; William G. Tull former president of American Security Bank, N.A., a commercial bank; and Robert J. Slater, former vice chairman of Crane Co., a conglomerate involved in distribution, manufacturing, building products and aerospace.

The preliminary report on the balloting was made by representatives of The Corporation Trust Co. who were appointed independent inspectors at the recessed shareholder meeting on July 25 to verify, tabulate and count all ballots. The final report is subject to receipt of official verification by The Corporation Trust Co.

A spokesperson for the company said, "While we are disappointed with the vote outcome, we plan to continue to implement the final steps of our restructuring program, focusing our resources on our wholesale pharmaceutical distribution business. We remain convinced that the continued growth and development of FoxMeyer Drug Co. is in the best interests of all of our shareholders."

#90221p3691 08/09/1990 ~PR Newswire

DALLAS (AUG. 9) PR NEWSWIRE - JCPenney stores and catalog sales for the four weeks ended Aug. 4, 1990 increased 3.2 percent to $1,005 million from $974 million in the comparable period a year earlier. On a comparative store basis, that is stores open at least a year, sales rose 2.0 percent.

Commenting on July results, William R. Howell, chairman of the board, said

that men's merchandise, most notably sportswear and athletic footwear, and children's apparel produced the largest sales gains. Increases were also recorded for women's casual sportswear and dresses. Offsetting these gains he added, was a softness in home furnishings.

For the company's fiscal 13 weeks ended July 28, 1990, sales of JCPenney stores and catalog increased 3.5 percent to $3,317 million from $3,205 million in 1989. On a comparative store basis, sales were up 2.2 percent. For the Company's fiscal 26 weeks ended July 28, 1990, sales of JCPenney stores and catalog increased 4.4 percent to $6,584 million from $6,309 million in 1989. On a comparative store basis, sales were up 3.3 percent.

MURRAY HILL, NJ (AUG. 9) PR NEWSWIRE - BOC Health Care, Inc. today announced the expansion of its Ohmeda anesthesia and patient monitoring business with the acquisitions of Albion Instruments and Raman Technology, Inc.

The merger agreements, signed June 28, were finalized July 31 following approval of the transactions by the respective shareholders of Albion and Raman.

Albion, which was purchased for $22 million, is a Salt Lake City company engaged in the development of unique molecular light scattering technology for medical applications. The technology is utilized in the manufacture of the RASCAL(R) anesthesia and respiratory gas analyzer, which provides anesthesiologists with comprehensive monitoring of all respiratory gases and anesthetic agents. The product's next generation, the RASCAL II, will be introduced later this year.

Raman, a Delaware corporation, is exclusively licensed by Albion to develop industrial applications of the patented scattering spectroscopy technology used in the RASCAL. Raman was purchased for $1.5 million by BOC Health Care.

"The continued growth and expansion of our health care business will be achieved through organic growth, licensing agreements and through acquisitions," said BOC Health Care President and CEO Desmond H. O'Connell Jr. "We are very pleased with these new additions and believe they will diversify and strengthen our current critical care equipment product line and offer our customers the latest in advanced monitoring technology."

While Albion and Raman remain in Salt Lake City, they become part of Ohmeda monitoring systems based in Louisville, Colo. Ohmeda, a division

of BOC Health Care, specializes in anesthesia systems, patient monitoring, critical care and medical engineering and communication systems.

BOC Health Care, Inc., through its companies, manufactures and markets a variety of critical care products and services worldwide. Each BOC Health Care business -- Anaquest, Glasrock Home Health Care, Ohmeda, and Viggo-Spectramed -- is a market leader, and collectively they generate revenues of $1 billion annually. BOC Health Care is part of the BOC Group.

MIDDLEFIELD, CT (AUG. 9) PR NEWSWIRE - Zygo Corporation (NASDAQ: ZIGO) today reported sales of $7,775,000 for the quarter ended June 30, 1990, an increase of $1,601,000 from the comparable prior-year period. Company Chief Executive Officer Paul F. Forman reported that the company had net earnings of $469,000, or $.19 per share, vs. net earnings of $147,000, or $.06 per share, for the three months ended June 30, 1989.

Net sales for the year ended June 30, 1990, were $26,461,000, an increase of $2,618,000 from the prior year. The company had net earnings of $935,000, or $.37 per share, vs. a net loss of $450,000, or an $.18 per share loss, for the year ended June 30, 1989.

The net earnings improvement in both periods of fiscal year 1990 reflects improved gross margins and higher sales. This improvement continues to reflect the results of the company's ongoing efforts to improve profitability while, at the same time, continuing to make investments for the future.

Zygo Corporation designs, develops, manufactures, and markets high-performance, laser-based, non-contact electro-optical measuring instruments and accessories and manufactures precision optical components. The firm is based in Middlefield.

COLUMBIA, MD (AUG. 9) PR NEWSWIRE - Dr. Martin B. Sherwin, an executive vice president of W. R. Grace & Co.'s (NYSE: GRA) Research Division, headquartered here, has been elected a Fellow of the American Institute of Chemical Engineers (AIChE). He was honored for his expertise in process design and development.

Dr. Sherwin has spearheaded Grace's efforts in the area of separation technology. In addition to his responsibilities at the Research Division, he has acted as general manager of Grace Membrane Systems, a successful new startup in this area.

Grace's membrane separation technology is primarily designed to remove unwanted gas contaminants from natural gas streams. It also recovers hydrogen from a variety of petroleum and petrochemical processes.

The recipient of the first Ph.D. awarded in engineering by City College of New York, Dr. Sherwin joined W. R. Grace & Co. in 1980 as director, engineering research. Since that time he has served as vice president, engineering research and was named to his present position at the Research Center in 1987. Prior to joining Grace he served with Chem Systems Inc., Halcon International, Inc. and Scientific Design Co.

A resident of Potomac, Maryland, Dr. Sherwin has authored 15 publications and holds over 26 patents.

CAMBRIDGE, MA (AUG. 9) PR NEWSWIRE - Advanced Magnetics, Inc. (NASDAQ: ADMG) announced today that it has received a $289,000 grant from the National Institute of Health (NIH) for magnetic resonance imaging (MRI) contrast agent research. The Small Business Innovation Research grant was awarded (on a competitive basis) for the research and development of a liver cell specific particulate MRI contrast agent and follows an earlier NIH grant for this project.

Dr. Lee Josephson, vice president of research at Advanced Magnetics, said, "The NIH grant recognizes our previous work and ensures that Advanced Magnetics will remain at the forefront of liver MRI contrast agent development."

Advanced Magnetics, using its proprietary magnetic particle technology, has developed contrast agents for use in magnetic resonance imaging of the liver, gastrointestinal (GI) tract and the lymphatic system. Phase III human clinical trials have been completed for the GI agent and the company is preparing its New Drug Application (NDA) for filing with the FDA. The company also expects to resume clinical trials for Feridex, its liver agent, in the near future.

Advanced Magnetics is a world leader in the application of colloidal magnetic materials to healthcare. The company is dedicated to the development and manufacture of diagnostic pharmaceuticals for use with magnetic resonance imaging as well as clinical and research products for in vitro testing.

AKRON, OH (AUG. 9) PR NEWSWIRE - Daniel J. Sullivan, vice president and group executive of Roadway Services, Inc. (NASDAQ: ROAD) announced today that J. Dawson Cunningham has been elected vice president-finance and administration of Roadway Express, the company's principal operating subsidiary, effective Aug. 12.

Cunningham, 43, joined Roadway Services in 1985 as assistant to the vice president and controller. He was elected assistant controller in 1986 and vice president and controller in 1987. He previously was a partner with the accounting firm of Ernst and Young.

Roy E. Griggs has been elected vice president and controller of Roadway Services, replacing Cunningham.

Griggs, 53, has served as assistant controller since 1987. He joined Roadway in 1972 as a financial analyst. He was promoted to director of cash management in 1979. He subsequently served as assistant to the treasurer during 1985 and was elected assistant treasurer in 1986.

Cunningham replaces Michael W. Wickham who succeeded J.T. Topping as president of Roadway Express, effective July 15. Topping was promoted to vice chairman of the parent company, a newly created position.

#90221p3706 08/09/1990 ~PR Newswire

MONTVALE, NJ (AUG. 9) PR NEWSWIRE - North American Ventures, Inc. (NASDAQ: NAVI) announced today its results of operations for the second quarter and six months ended June 30, 1990.

Net sales of NAVI from the operations of its wholly owned subsidiary, Butler Service Group, Inc., were $80.3 million for the second quarter, a 7 percent increase over the second quarter 1989 net sales of $75.2 million. Second quarter income from continuing operations and net income were $947,000 or $.037 per share. These results compare with a loss from continuing operations in the second quarter 1989 of $1,524,000, or ($.058) per share. The second quarter 1989 loss included $2,260,000 of non-recurring charges.

Net sales for the six months ended June 30, 1990 were $163.5 million, a 15 percent increase over the $142.5 million sales for the first six months of 1989. Income from continuing operations and net income for the first six months of 1990 were $1,812,000, or 7 cents per share, compared with a loss from continuing operations for the first six months of 1989 of $1,889,000, or ($.072) per share.

The improvement in net sales and income from continuing operations was primarily the result of higher billing rates. Billable hours for the first six months of 1990 were fairly constant with the 1989 comparable

period and down slightly in the second quarter 1990 vs. the second quarter 1989. Income from continuing operations and net income also benefited from significantly lower interest charges, as a result of lower debt and lower interests rates in 1990 compared with 1989.

1989 net income, which included both continuing and discontinued operations, was $3,990,000, or $.152 per share, for the 1989 second quarter, and $2,225,000 or $.085 per share, for the first six months. These 1989 results were heavily affected by income from discontinued operations of $5,514,000 and $4,114,000, respectively, primarily related to a $6,556,000 reversal of the previously expected loss on disposal of Butler Service Group booked in 1988. In 1990, there were no discontinued operations.

Edward M. Kopko, chairman of the board and president of NAVI, stated, "The second quarter performance was consistent with the plans established by management. Higher billing rates and a better mix of business enabled the company to achieve its earnings goal for the first six months even though certain industries we serve have been affected by the slowing economy."

Butler Service Group, Inc. is the second-largest contract technical services company in the United States. It is principally engaged in the location, recruitment and hiring of a wide variety of technical personnel and skilled engineers to provide services, on a temporary basis, to industrial corporations and other organizations throughout the U.S. and abroad.

LUMBERTON, N.C. (AUG. 9) PR NEWSWIRE - Longtime Lumberton banker Rod Bullard, who entered banking 23 years ago as a collector, has been named Southeast regional executive officer for Southern National (NASDAQ-NMS: SNAT), President Gary Carlton of the North Carolina bank announced today.

Bullard, who will assume his new post Nov. 1, replaces 43-year banking veteran Wayne Hughes, who announced his retirement earlier this year in his regional headquarters of Whiteville.

Headquarters for the Southeast Region will transfer to Lumberton where Bullard will direct the operations of 23 branch offices. Lumberton, also the site for corporate headquarters, is one of 12 cities and towns assigned to the Southeast Region, which stretches as far north as Wilson to as far south as Wilmington.

"Rod has consistently been among our top producers in the state," Carlton said. "He has a tremendous ability to manage people. That's one of the key characteristics we look for in choosing a regional executive."

A native of Whiteville, Bullard, 43, got his start in banking in 1967 at United Carolina Bank where he worked in his hometown as a collector. Two

years later, Bullard joined Southern National in Lumberton and worked as an installment loan officer until his promotion to installment loan manager.

Bullard worked his way through the ranks, as collector, installment loan officer, installment loan manager, commercial loan officer, branch administrator, and finally to his present position as city executive officer, a post he has held since 1981. He was promoted to senior vice president in 1983.

"Southern National has been extremely good to me," Bullard said. "I can honestly say I enjoy my work. Banking is a one-on-one business and I've met many fine people here. I'm thankful that with my new responsibilities, I'll be able to remain in Lumberton."

WARRINGTON, PA. (AUG. 9) PR NEWSWIRE - American Travellers Corp. (NASDAQ: ATVC) today announced its financial results for the second quarter ended June 30, 1990.

Total revenues increased 69.9 percent to $18,532,000 from $10,908,000 in the corresponding quarter ending June 30 of last year. Net investment income increased 23.6 percent to $953,000 from $771,000. Net income increased to $2,785,000 from $1,473,000 or 89.2 percent.

For the six months ended June 30, 1990, total revenues increased 77.6 percent to $37,151,000 from $20,926,000. Net investment income increased to $2,037,000 from $1,512,,000, an increase of 34.7 percent. Net income rose to $5,340,000 from $2,672,000, representing an increase of 99.9 percent. Earnings per share has increased 76.9 percent from $.20 to $.36 per share for the second quarter ending June 30, 1990, as compared to the corresponding quarter in 1989. For the six months ending June 30, 1990, as compared to the six months ending June 30, 1989, earnings per share has increased from $.37 to $.70 per share, an increase of 86.9 percent.

According to American Travellers' Chairman of the Board John A. Powell, these dramatic increases can be attributed to the company's expansion and marketing efforts, greater geographic penetration and introduction of new products. During the first half of 1990, the company wrote premium in 37 states as compared to only 30 states in the first half of 1989.

American Travellers Corp. is engaged through its subsidiaries in the underwriting and sale of individual supplemental accident and health insurance policies primarily covering long-term care (skilled,

intermediate and custodial nursing home care). The company also offers hospital care and Medicare supplement policies. The company, which has been admitted to 35 states plus the District of Columbia and the U.S. Virgin Islands, and has pending license applications in five additional states.

NEWARK, CA (AUG. 9) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today reported sales of $60 million for the four week period ended Aug. 4, 1990, a 13 percent increase above the $53 million in sales for the four weeks ended Aug. 5, 1989. Comparable store sales for the same period were even with the prior year.

Second quarter sales for the 13 weeks ended Aug. 4, 1990 were $193 million a 10 percent increase above $175 million in sales for the 13 weeks ended Aug. 5, 1989. Comparable store sales for the same period were even with the prior year.

For the six months through Aug. 4, 1990, sales were $364 million, an 8 percent increase above the $336 million in sales for the prior year's comparable period ended Aug. 5, 1989. Comparable store sales for the six month period were down 3 percent on a day-for-day basis from last year.

Ross Stores Inc. operates a national chain of off-price retail stores offering first quality, in-season branded apparel and apparel- related merchandise for the entire family. The company had 169 stores in operation at Aug. 4, 1990, compared to 146 stores at the end of the same period last year.

NEW YORK (AUG. 9) PR NEWSWIRE - Piedmont Management Company Inc. (NASDAQ-NMS: PMAN) today reported earnings of $0.42 per share for the quarter ended June 30, 1990. This compares with earnings of $0.85 per share for the 1989 period. For the first half of 1990, earnings were $0.71 per share compared to $1.25 for the six months ended June 30, 1989. Details follow:

-- RECO's underwriting results, paralleling the results of the reinsurance industry in general, continued to decline in comparison with prior year periods. The combined ratio for the second quarter of 1990, computed on a

generally accepted accounting principles basis, was 114.5 percent, compared to 110.5 percent in the prior year. Although loss activity declined in relation to the first quarter of 1990 as well as prior year periods, premium volume in virtually all classes of business remains flat or lower mainly due to higher retentions by primary companies and little, if any, increase in rates. In addition, the company has maintained a strategy designed to reduce its casualty reinsurance volume. For the six months of 1990, the combined ratio climbed to 122.0 percent in comparison with 110.8 percent for the six months of 1989, and 119.3 percent for the full year 1989.

Pre-tax net investment income increased 11 percent, to $13.1 million, when comparing the semi-annual periods of 1990 and 1989. For the quarter, pre-tax net investment income was $5.6 million, a 6 percent reduction compared to 1989. The 1990 quarter includes $1.1 million in foreign exchange losses recorded by RECO's London subsidiary.

-- Investment advisory pre-tax income was $208,000 in the second quarter of 1990, an 11 percent increase over the prior year period, but down 40 percent in relation to the first quarter of 1990. New business targets fell behind schedule and growth in assets under management slowed down during the second quarter. For the six months, investment advisory pre-tax income doubled in relation to the semi-annual period for 1989.

-- Consolidated assets rose to $437.8 million on June 30, 1990, and stockholders' equity was $111.6 million. Book value per share was $21.04 as of June 30, 1990, relatively unchanged from the end of 1989.

Piedmont Management Company Inc. is a financial services company whose principal subsidiaries include The Reinsurance Corporation of New York (RECO), a property and casualty reinsurer, and Lexington Management Corporation, an investment advisory and mutual fund distribution company.

#90221p3719 08/09/1990 ~PR Newswire

HAIFA, ISRAEL (AUG. 9) PR NEWSWIRE - Elbit Computers Ltd. (NASDAQ: ELBTF) an Israel-based manufacturer of computer systems and products for military and commercial applications and a subsidiary of Elron Electronic Industries Ltd. (NASDAQ: ELRNF), today announced its unaudited consolidated financial results for the second fiscal quarter and the six-month period ended June 30, 1990.

Consolidated revenues for the quarter ended June 30, 1990 were $87,922,000 as compared with $38,493,000 for the parallel quarter last year. Net income for the quarter was $5,341,000, or $0.35 per share, as compared with $2,938,000, or $0.21 per share, for the corresponding quarter in 1989.

On a year-to-date basis, consolidated revenues for the six months ended June 30, 1990 totalled $172,894,000, as compared with $75,041,000 for the parallel period last year. Net income for this six-month period was $10,409,000 or $0.70 per share, as compared with net income of $5,705,000, or $0.41 per share, in the corresponding period of 1989.

The company's board of directors declared a second quarter dividend of 6 cents per Ordinary Share, payable on Sept. 17, 1990 to shareholders of record at the close of business on Aug. 26, 1990. Under Israeli law, the company is required to withhold taxes at a rate currently estimated to be 15.2 percent, which a U.S. taxpayer may credit against U.S. taxes due in respect of the dividend.

Of the $173 million in consolidated revenues for the first half of the year, $74.5 million, were derived from Elscint Ltd. (NYSE: ELT), the company's medical diagnostic imaging subsidiary. Elscint's net income in the period under review amounted to $5.1 million, which contributed approximately $3.2 million to Elbit's net income in this six-month period.

Revenues deriving from Elbit's traditional business increased substantially in this six month period, and reached $98 million, as compared with $75 million in the corresponding period of 1989. This business yielded a net income of $7.2 million in the period under review, up from $5.7 million in the parallel period of 1989. Over 80 percent of consolidated revenues in the period under review derived from export and international sales. Approximately 50 percent of consolidated revenues represent U.S.-related business.

Revenues deriving from non-defense activities amounted to 55 percent of revenues, compared with 23 percent in fiscal 1989. This change should serve to offset the effect of decreasing defense expenditures worldwide.

The company's backlog of orders at June 30, 1990 was approximately $393 million, as compared with $335 million at June 30, 1989. The backlog figure for 1990 includes orders for sales of Elscint systems. Approximately 80 percent of such backlog represents orders deriving from outside Israel, mainly from the U.S.

Elbit Computers Ltd. designs, develops, manufactures, markets and services a wide range of advanced, often combat-proven electronic products and systems for airborne, shipboard and ground military applications. Through its Elscint Ltd. subsidiary, Elbit is engaged in the design, manufacture, distribution and servicing of computer-based medical diagnostic imaging

systems. Through other subsidiaries, it provides a variety of commercial products and services, as well as specialized infrared imaging equipment.

#90221p3724 08/09/1990 ~PR Newswire

ST. LOUIS (AUG. 9) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today reported preliminary sales from continuing operations of $606.8 million for the four-week period ended Aug. 4, an increase of 9.8 percent from sales of $552.7 million reported during the similar period last year.

Sales through the first six months of fiscal 1990 were $4.38 billion, up 9.8 percent from sales of $3.99 billion reported in the same period a year ago.

Department store sales for July were $516.2 million, an increase of 9.8 percent, or $45.9 million, from last year. Sales for Volume Shoe totaled $90.6 million, up 9.9 percent or $8.2 million. Sales were as follows:

JULY SALES (Millions)

	1990	1989	Percent Increase	Store-for-Store(A) Pct. Increase
Department stores	$516.2	$470.3	9.8	4.7
Volume Shoe	90.6	82.4	9.9	2.6
Total	606.8	552.7	9.8	4.4

YEAR-TO-DATE SALES (Millions)

	1990	1989	Percent Increase	Store-for-Store(A) Pct. Increase
Department stores	$3,693.3	$3,380.4	9.3	4.9
Volume Shoe	685.9	608.1	12.8	5.7
Total	4,379.2	3,988.5	9.8	5.0

(A) - Store-for-store sales represent sales of those stores open during both years.

The company's 1989 fiscal year included 53 weeks and, based on the 4-5-4 reporting calendar, the July 1990 period began one week later than the July 1989 period. On an adjusted basis aligning the 1989 calendar to 1990, sales would have been:

CALENDAR-ADJUSTED JULY SALES (millions)

	1990	1989	Percent Increase	Store-for-Store Pct. Inc/(Dec)
Department stores	$516.2	$493.6	4.6	(0.2)

Volume Shoe	90.6	81.6	11.0	4.1
Total	606.8	575.2	5.5	0.4

During July, May opened four department stores and 27 net new Payless ShoeSource stores. Lord & Taylor opened department stores at Monmouth Mall in Eatontown, N.J., Quakerbridge Mall in Trenton, N.J., and Freehold Raceway Mall in Freehold, N.J., and L.S. Ayres opened a department store at Castleton Square Mall in Indianapolis.

#90221p3726 08/09/1990 ~PR Newswire

WASHINGTON (AUG. 9) PR NEWSWIRE - Public Citizen issued the following: A star Notre Dame running back today sued the National Collegiate Athletic Association (NCAA) over eligibility rules that bar him from playing football in his final season this year.

Braxton Lee Banks filed the class action suit in federal district court in South Bend, Ind., challenging NCAA rules that prohibit football players from playing intercollegiate football once they have entered their names into professional football's annual draft.

The suit also names Notre Dame as a defendant so that the court will order the university to allow Banks to return to school and play football if the NCAA rules are overturned.

"I very much want to continue my education, complete my fourth year of eligibility at Note Dame, and play professional football, but none of these things is likely to happen unless the NCAA restores my eligibility," said Banks.

"I still believe that I am an amateur," Banks added, despite having participated in the April 1990 National Football League draft. Banks, along with 37 other players with remaining NCAA eligibility, took part in the draft, and 20, including Banks, were not selected.

Two NCAA rules are being challenged in the case. Rule 12.2.4 automatically excludes athletes who place their names in a professional sports draft, even if they are not chosen or do not sign a professional contract. Rule 12.3 makes players ineligible if they agree to retain an agent, even if that agent is a friend or family member and even if they receive nothing of value from the agent.

"We do not quarrel with the importance of keeping amateur and professional sports apart," said Alan Morrison, the lead attorney for Banks. Morrison is director of the Public Citizen Litigation Group, a public interest

advocacy group that he founded with Ralph Nader.

"However, the NCAA rules in question plainly violate U.S. antitrust laws, while serving no legitimate purpose of the NCAA. As a result of these rules, talented college athletes must either abandon crucial opportunities to explore pro-sports options or lose all of their future eligibility for intercollegiate football," said Morrison.

The lawsuit points out that most college athletes find it very difficult to evaluate their own potential in professional sports, yet are prohibited from contacting agents who can provide such athletes with information about their options.

Football practice at Notre Dame begins on Aug. 17 and the first game is scheduled for Sept. 15. Speedy court action is required in order to guarantee Banks' right to play football this year, said Morrison. He said that a motion for a preliminary injunction had been filed with the complaint, and they were hoping for a hearing next week.

#90221p3729 08/09/1990 ~PR Newswire

ENCINO, CA (AUG. 9) PR NEWSWIRE - Medical Properties Inc. (AMEX: MPP) today reported net income for the second quarter ended June 30, 1990, of $413,000, or $.17 per share. For the comparable prior year period, Medical Properties had net income of $541,000, or $.23 per share. The company said that lower additional rental income, as well as certain higher expenses, were responsible for the decline in net income.

Total income, primarily from rental properties, was $1,331,000 for the current second quarter, compared with $1,345,000 for the corresponding quarter a year ago.

For the six-month period ended June 30, 1990, net income totaled $848,000, or $.36 per share, on total income -- principally from rental properties -- of $2,665,000. For the comparable prior year period, net income was $1,038,000 or $.44 per share on total income principally from rental properties -- of $2,736,000.

The company said that it expects to continue the cash dividend policy of $1.20 per share annually, payable quarterly, and that cash available from operations should be sufficient to maintain this dividend rate.

Medical Properties is a real estate investment trust engaged in investing in income producing health care related facilities.

#90221p3740 08/09/1990 ~PR Newswire

DETROIT (AUG. 9) PR NEWSWIRE - Telephone customers don't think it makes sense that a call from Detroit to Ann Arbor costs more than a call to Los Angeles. Michigan Bell agrees, and today the company took steps to meet its customers' demands for greater equity in the prices they pay for telephone services and their expressed desires for new optional services.

Michigan Bell asked state approval for a repricing plan that includes a 15-percent reduction in the price of long-distance calls of more than 20 miles throughout a customer's LATA - a geographic calling area in which Michigan Bell provides long-distance service.

The plan also proposes new residential calling plans, including a new version of "Metro Service" - a popular option discontinued several years ago - that would offer deep discounts on calls to nearby suburbs, and

another discount plan for calling anywhere within a LATA.

Michigan Bell President Kenneth E. Millard said the company estimates that three of every four of its customers could see decreases in their total bills because of the long-distance price reductions and by taking advantage of the various optional plans it proposed.

The pricing package Michigan Bell submitted to the Michigan Public Service Commission in Lansing is not designed to increase the company's revenue. It couples the proposed rate reductions with offsetting increases in other services.

The increases would raise the cost of a public phone call by a nickel from 20 cents to a quarter, boost charges for frequent and heavy use of "Information" service, and raise the cost of operator assistance on calls such as person-to-person.

Michigan Bell also requested increases in the price of its premium residence service - unlimited flat rate calling. However, the company said 66 percent of its existing flat rate customers would avoid the proposed increase by switching to one of four new local calling packages included in Michigan Bell's request.

These packages, which base charges on the number of local calls customers make, give customers the opportunity to select an option that best meets their local calling needs. Each of the new calling plans has a built-in "safety net" which assures that a customer would pay no more than $15 in any one month for local calling. The greatest savings - $20, $30, $40 per month or more - would be possible for customers who make many long-distance or suburban calls.

#90221p3742 08/09/1990 ~PR Newswire

NEW YORK (AUG. 9) PR NEWSWIRE - British Telecom (NYSE: BTY) British Telecom announced today the first quarter's financial results for the period to June 30, 1990. A synopsis is:

-- Earnings per share increased to 0.80 pounds sterling ($1.40) per ADR which is a growth of 18.5 percent relative to the same period in 1989.

-- Pretax profit of 741 million pounds ($1,297 million), an increase of 16.7 percent over the first quarter last year.

-- Reduction of 2,300 UK employees. -- Call volume growth of 9 percent for

domestic and 12 percent for international calls on a twelve month moving average.

-- Number of business access lines increased by 9.1 percent and residential access lines by 2.5 percent over the year to June 30, 1990.

-- Revenues increased from 2,928 million pounds (Q1/89) to 3,208 million pounds ($5,614 million), an increase of 9.6 percent.

-- Operating costs increased by 7.1 percent to 2,344 million pounds ($4,102 million), well below UK inflation rate.

Ongoing reductions in the number of UK employees of 2,300 people reflect the company's commitment to overall cost reduction. The increase in operating costs was below the annual rate of inflation (9.8 percent) and reflected a tighter management control of costs in general.

The increase in net interest expense of 17.1 percent to 123 million pounds ($215 million) was in line with expectations taking into consideration the cash outflow in the preceding financial year, in particular the acquisition of the 20 percent interest in McCaw Cellular.

Capital expenditure at 634 million pounds ($1,110 million) was lower than the comparable period last year, due to changes in the ordering patterns over previous quarters. However, the modernization of the network continues unabated.

Access line rental revenues increased by 15.4 percent to 441 million pounds ($772 million) due to the price changes introduced in September 1989 and the system size growth of 4 percent over the 12 months to June 30 1990.

Overall revenue figures were also buoyed by other sales and services increasing 17.7 percent to 757 million pounds ($1,325 million) which included BT Tymnet, acquired in November 1989; Cellnet, one of the two national UK cellular operators and from private circuit revenues.

Chairman's Summary Commenting on the results, Iain Vallance, chairman of British Telecom, said:

"Improved cost control and growth in most of the markets we serve have benefited our financial performance. "The quality of our customer and network services has also shown further improvements. "The reorganization program to strengthen our commitment to customers is progressing according to plan."

British Telecom is the principal supplier of telecommunications services and products in the United Kingdom. It is one of the world's largest

telecommunications companies and is expanding its lines of business into a number of overseas countries.

This release summarizes a statement released in London today. Note: All comparative figures between US dollars and UK sterling are at the prevailing rate on June 30, 1990 of $1.75 to 1 pound.

#90221p3744 08/09/1990 ~PR Newswire

CAMBRIDGE, MA (AUG. 9) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) today announced plans to build a new $90 million plant in New Bedford, Mass., to manufacture advanced films for the company's new electronic imaging products.

The 250,000 square-foot facility, to be located at Polaroid's existing New Bedford manufacturing site, is expected to be in operation in late 1992. It will employ more than 100 people.

"This new facility represents the largest plant and facilities investment in the history of our company," said Polaroid President and Chief Executive Officer I. MacAllister Booth. "It is a key element in our long-term growth strategy, which includes production of systems and films for the exciting new market of electronic imaging."

Booth said, "The new plant will be capable of producing a wide range of new products, including advanced film for our new laser-based medical diagnostic imaging system known as Helios. Helios is one of several new product programs directed toward high-volume, high-growth markets."

Booth added that Polaroid was particularly pleased to undertake this major expansion in Massachusetts. "Polaroid was founded here 53 years ago, and the underlying strength and vibrancy of our basic economy has always helped us through the worst times and to prosper in the best," he said. "It is critical not to underestimate the importance of manufacturing to the health of our regional and national economy, and to the competitiveness of our products."

The plant will be an automated manufacturing facility, capable of producing a total product from raw materials to final packaging. It will house all facets of imaging media manufacturing, including: coating, finishing and warehousing.

Joseph R. Oldfield, vice president, worldwide manufacturing and product development said, "The new facility will give Polaroid strong competitive advantages in product quality and lower manufacturing costs. The modern tools of manufacturing science have been incorporated into the plant design. The plant will allow Polaroid to react more quickly to market demands and customer needs."

Polaroid has been manufacturing in New Bedford for 18 years. Its existing 500,000 square-foot plant, which employs approximately 500 people produces coated negatives for Polaroid's instant film products.

At a press conference at Polaroid's Microelectronics Laboratory here, a number of state and local officials praised Polaroid's plans. In a statement phoned into the press conference, Governor Michael S. Dukakis said, "Polaroid's new-tech initiative represents a dramatic move toward jump-starting our economy and it clearly enhances the Commonwealth's Building The Nineties Program. This is a terrific example of Massachusetts business at its competitive best."

Massachusetts Secretary of Economic Affairs Al Raine said, "The commitment Polaroid is making to Massachusetts and her residents demonstrates this great company's vision for the future and their strong sense of economic citizenship. This is good news for the Massachusetts economy and

particularly for the people of New Bedford."

Polaroid's U.S. manufacturing facilities are located in Freetown, New Bedford, Norwood and Waltham, Mass. Major international facilities are located in Mexico, the Netherlands and Scotland. In addition, the company has sub-assembly operations in the Soviet Union and in China.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in high-quality, hard copy instant imaging. The company supplies instant photographic cameras and film, and conventional and electronic visual communication products to the consumer, business, industrial and scientific markets.

MIAMI (AUG. 9) PR NEWSWIRE - Pan American World Airways will resume service between Miami and Port of Spain in Trinidad and Tobago tomorrow, Friday, Aug. 10, with daily round trip service.

Pan Am will operate a modified schedule to accommodate the night time curfew which is currently in effect in Port of Spain.

Flight 472 will depart Miami International Airport at 6:30 a.m. and arrive at Piarco International Airport, serving Port of Spain, at 10:10 a.m. The

return flight, 471, will depart Port of Spain at 11:10 a.m. and arrive in Miami at 2:45 p.m. The flights will utilize Boeing 727 aircraft with a seating capacity of 145.

Pan Am suspended service to Trinidad and Tobago on July 27, following an attempted coup in the Caribbean Island nation. The decision to resume service was made following an on-sight inspection of the airport and major thoroughfares between the city and the airport by Pan Am security officials and after consultations with the U. S. Department of State and the Federal Aviation Administration.

The modified daylight schedule will continue as long as the curfew remains in effect.

GOLDEN, CO (AUG. 9) PR NEWSWIRE - Robert Walker, president and CEO of Barringer Laboratories Inc. (NASDAQ: BALB), today announced the signing of a Protocol of Intentions with the All-Union Foreign Economic Association (Sojuzkarta) and the All-Union Scientific Research Institute of Geology for Foreign Countries of the Soviet Union as well as Central Trading Systems located in New York.

The Protocol contemplates the joining of compatible technologies for geological prospecting efforts for solid mineral deposits and the implementation of exploration and mining projects through the selling of information, services and licenses in investigated areas on an exclusive basis. Central Trading Systems has the exclusive right to market Sojuzkarta data in the United States and it is intended that high resolution satellite data of the Soviet Union be included in the data packages. It is also contemplated that the joint venture will consult with and facilitate contracts for mining and exploration with western companies desirous of conducting such projects in the Soviet Union.

Barringer has a long history of accomplishment in the minerals exploration industry with particular emphasis on the development of remote sensing geochemical and geophysical exploration systems, exploration management, and image processing.

The parties are in the process of identifying and quantifying the resources required to carry out the objectives of the contemplated joint venture. Once this process is completed, the parties anticipate completion of negotiations leading to the execution of definitive agreements. Various U.S. and Soviet government approvals may be required to consummate agreements.

Headquartered in Golden, Barringer Laboratories Inc., a 49 percent owned subsidiary of Barringer Resources Inc., provides analytical testing services for the environmental and minerals industries and image processing services for the hydrocarbon and minerals exploration industries.

CONTACT: Stanley Binder, 201-984-5760, or Robert Walker, CEO, 303-277-1687, both of Barringer; or Philip Y. Sardoff or Gordon H. Wolfe of Wolfe Lombard, 212-545-8400, for Barringer.

MIAMI (AUG. 9) PR NEWSWIRE - Cordis Corporation (NASDAQ-NMS: CORD) announced that it has concluded the sale of assets of its Theratek International, Inc. subsidiary and certain related Cordis assets to Dow Corning Wright Corporation. A definitive agreement between the parties was disclosed July 2.

The accord calls for Dow Corning Wright to pay a total of $3 million , with the proceeds allocated $1.2 million to Cordis and $1.8 million to Theratek. A portion of Theratek's receipts will go to Kensey Nash Corporation, Cordis' former partner in Theratek, which was operated as a joint venture from June 1986 to April 1990.

Cordis will reflect the sale in its recently concluded fourth quarter, which is scheduled to be reported in late August. The transaction's overall effect should be minimal, however, the company explained. Its share of the net proceeds will essentially offset Theratek's higher loss during the quarter and the added costs of disposal.

Cordis officials called the sale an important step in the company's continuing program to divest nonstrategic operations.

Miami-based Cordis Corporation manufactures and markets a variety of medical devices and systems for the angiographic and neurosurgical markets. Shares of the company's stock are traded on the NASDAQ National Market System under the symbol CORD.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Western Waste Industries (NASDAQ: WWIN) has named Mark D. Bozajian to the newly created post of vice

president and assistant to the president.

"Mark will assist me in a wide range of operational areas, bringing with him a wealth of knowledge in management, finance and administration," stated Kosti Shirvanian, the company's president and chief executive officer.

Bozajian joins Western Waste after several years as a consultant to a number of companies, including Mine Reclamation Corp., a privately held firm established to develop a waste-by-rail system. Prior to becoming a consultant, he was chief operating officer for Sur-Lite Corp., was with Arthur Young & Co., now Ernst & Young, and taught accounting and strategic planning at the University of Southern California (USC).

Bozajian earned a bachelor of science degree in business administration and a masters degree in accounting from USC. He is a certified public accountant, serves on the board of directors of USC's Accounting Circle and has been the recipient of many honors and awards.

Headquartered in Los Angeles, Western Waste is one of the largest publicly held integrated waste management companies, providing residential, commercial and industrial collection services, landfill and transfer station operations. The company has operations in California, Texas, Arkansas, Louisiana, Florida, Colorado and Arizona. Western Waste expects to report revenue of approximately $170 million for its fiscal year ended June 30, 1990.

WASHINGTON (AUG. 9) PR NEWSWIRE - Bresler & Reiner, Inc. (OTC) reported net income of $417,000 or 15 cents per share on revenues of $11,631,000 for the three months ended June 30, 1990, after an $800,000 estimated write down net of taxes, of short term commercial paper of a bank holding company.

In the 1989 second quarter, the company earned $1,365,000 or 48 cents per share on revenues of $9,841,000.

For the six months ended June 30, 1990, the company's net income was $1,689,000 or 60 cents per share on revenue of $20,854,000. In the 1989 six months the company earned $2,749,000 or 97 cents per share on revenues of $19,642,000.

The company holds $2.5 million of short-term commercial paper of Washington Bancorporation, which defaulted on the commercial paper and on Aug. 1, 1990, filed for protection under Chapter 11 of the Federal Bankruptcy Act. The company has included in its second quarter results an estimated charge of $800,000 (28 cents per share), net of income taxes, for partial uncollectibility of this paper. The company will continue to monitor the prospects for collection of this investment.

Burton J. Reiner, president of the company, said that after the write down the company at July 31, 1990 held over $7,600,000 of cash and cash equivalents, net of the Washington Bancorporation paper, which is ample for its liquidity needs. He said the write down would not materially affect the company's operations.

Bresler & Reiner, Inc. engages in residential land development and construction and operates a motel, apartment projects and a shopping mall/office complex in the Washington metropolitan area. The company also owns two nursing homes and operates an equipment leasing business.

#90221p3764 08/09/1990 ~PR Newswire

RESTON, VA (AUG. 9) PR NEWSWIRE - A Rolls-Royce designed Dynamic Signature Verification system, targeted at the point-of-sale market, has recorded a 99.1 percent acceptance level during a four-week trial conducted by Midland Bank plc in London, England.

Midland, in the trials at their Card and Electronic Products location in Cannon Street, London, found over a four-week period, that only 0.9 percent of the 5,694 visits to the system by the 150 staff taking part were rejected. Using a three-attempt system approach, 93.6 percent of the entrants were accepted at the first attempt, 4.5 percent at the second and 0.9 percent at the third attempt.

Although the system used was in the early stages of development, the trial has demonstrated the significant potential of the Rolls-Royce unit and has prompted Rolls-Royce Business Ventures Limited to continue the development towards a commercial project.

In parallel with the final two weeks of the final trial, a forgery trial was run to quantify the susceptibility of the system to forgeries and to collect forgery data for future analysis. Participation in this trial was disappointing, and no firm conclusions were drawn from the data obtained.

The DSV system under development by Rolls-Royce since 1974 is based on technology known as acoustic emission or high-frequency sound. The movement of the user's pen across paper generates a high-frequency sound signal which is unique to the individual. To operate the system the user supplies five signatures which form the original template. Subsequent signatures are compared against a continuously updated signature template.

The Dynamic Signature system is targeted at the point-of-sale market where it could be used in conjunction with smart-card technology although it is equally suited to other security applications.

Rolls-Royce Business Ventures Limited is to work on increasing the speed of operation of the DSV system and to improve the system's ability to detect forgeries, including a comprehensive forgery trial, and to improve user interface.

The successful trial of the Dynamic Signature Verification system by Midland Bank plc has resulted in the bank suggesting that the design warrants further development because of the high level of performance achieved.

CHICAGO (AUG. 9) PR NEWSWIRE - Commencing Oct. 1, Chicago-based Midway Airlines (NYSE: MDW) will inaugurate non-stop service between Midway Airport and Lambert Field in St. Louis and between Midway Airport and John Wayne Airport in Orange County, Calif.

In announcing service to Midway's 60th and 61st destinations, John P. Tague, vice president of marketing and planning, said this underscores Midway's commitment to offer the service and frequency to those cities that meet the needs of business and leisure travelers alike.

Midway's non-stop service to Orange County will use McDonnell Douglas MD-87 aircraft and will operate two daily round-trip flights. To Orange County, flights will depart daily at 8:45 a.m. and arrive at 11:10 a.m. The 7:25 p.m. flight, with an arrival at 9:50 p.m., will operate daily except Saturday. On Saturday only, there will be a flight departing at 3 p.m., arriving at 5:25 p.m.

To Chicago, the 7 a.m. flight, with a scheduled arrival at 1:05 p.m., will operate daily except Sunday. The 8 a.m. flight, arriving at 2:05 p.m., will operate on Sunday only. The 12:10 p.m. flight, with a 6:15 p.m. arrival, will operate daily.

In addition to service to Orange County, Midway Airlines currently offers five daily round-trip flights between Midway Airport and Los Angeles International Airport, service which began May 1, 1989. Eastbound flights continue with the same plane service to New York's LaGuardia Airport or Tampa International Airport.

Midway's non-stop service to St. Louis will operate five daily round-trip flights. To St. Louis, flights will leave at 7 a.m., arrive at 8:05 a.m.; depart at 11 a.m., arrive at 12:05 p.m.; leave at 1:30 p.m., arrive at 2:35 p.m.; depart at 5 p.m., arrive at 6:05 p.m., and leave at 8:55 p.m. with a 10 p.m. arrival.

To Chicago, flights depart at 7 a.m., with an 8:05 a.m. arrival; 8:45 a.m. with a scheduled arrival at 9:50 a.m.; 12:45 p.m., with a 1:50 p.m. arrival; 3:15 p.m., scheduled to arrive at 4:20 p.m.; and 6:55 p.m., arriving at 7:55 p.m.

Midway will offer convenient connections through Chicago to passengers who originate or who are destined to more than 50 business and leisure destinations throughout the Midway system.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's

close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

ATLANTA (AUG. 9) PR NEWSWIRE - In order to offset the higher price of jet fuel, Delta Air Lines (NYSE: DAL) will initiate a 5.3 percent fare increase for all domestic and international flights effective Aug. 15.

"This increase has become necessary as the result of a 10-cent per gallon increase in the cost of jet fuel since July 31," said Whit Hawkins, Delta's senior vice president - marketing. "We've taken great care to analyze the situation fully, to explore all avenues of fuel savings, and to work to keep these increases at an absolute minimum.

"And, we have made certain that this increase reflects only the impact of increased fuel prices -- nothing more," Hawkins added.

Delta, a major world airline, serves 177 cities and offers more than 2,400 flights each day.

NEW YORK (AUG. 9) PR NEWSWIRE - Johnston Industries, Inc. (NYSE: JII) today reported sales for the final quarter and the fiscal year 1990 of $34,597,000 and $118,891,000 compared to $31,055,000 and $116,307,000, respectively, for those periods in fiscal 1989. This represents an increase of 11 percent for the fourth quarter and 2 percent for the year.

Net income in the latest quarter totaled $958,000, equal to 19 cents a share, and accounted for more than half of the full year total of $1,868,000, or 37 cents a share. Comparable figures last year were $1,931,000, or 38 cents a share in the quarter, and $7,847,000, or $1.54 a share, for all of fiscal 1989.

"The results for both the quarter and the year have been adversely affected by the soft textile market which did not permit the complete recovery of raw material cost increases in selling prices. Other expense increases, including some of a nonrecurring nature, as well as underutilization of plant capacity have also had a detrimental effect," said David L. Chandler, chairman and chief executive officer. He also remarked that the increase in sales volume in the last quarter indicated a strengthening in the corporation's markets that should continue.

Johnston Industries, Inc. is engaged in the production and distribution of textile fabrics primarily for the industrial and home furnishings markets and, to some extent, basic apparel items.

BOSTON (AUG. 9) PR NEWSWIRE - XTRA Corporation (NYSE: XTR) today announced that the third quarter results (three months ended June 30, 1990) from continuing operations were an after-tax profit of $1,993,000 or 13 cents per share (after preferred dividends) compared to an after-tax profit of $1,050,000 or a loss of 3 cents per share (after preferred dividends) for the same period of the prior year. Third quarter revenues from continuing operations were $54,063,000 compared to revenues of $51,587,000 during the same quarter of fiscal 1989.

The current period earnings were reduced by an extraordinary charge of 849,000 after-tax, or 14 cents per share, relating to the redemption of the $88.5 million of Series A Medium Term Notes of XTRA, Inc., a wholly owned subsidiary. The after-tax charge is due to the write-off of unamortized costs associated with the registration and issuance of these

Notes which will be redeemed at par on Aug. 22, 1990. These notes were subject to a reset provision whereby the company was required either to begin paying a higher interest rate or to redeem the Notes at par. These fixed rate Notes are being redeemed principally with the proceeds from a new $80 million Term Loan, underwritten by The First National Bank of Boston and Continental Bank, N.A., as co-agents. Borrowings under this agreement are at floating interest rates. The balance of the financing will be provided by the company's existing Revolving Credit Agreement.

Robert Goergen, chairman of the board noted, "This new Term Loan, provided by two major bank lenders, facilitates the repayment of the Medium Term Notes which would have become expensive financing for XTRA. The willingness of two long standing lenders to promptly provide the financing at attractive rates is a sign of confidence in the company and its plans for the future."

XTRA Corporation is engaged in transportation services, primarily the leasing, on an ooperating basis, of intermodal equipment, including piggyback trailers and domestic containers and chassis, as well as over-the-road trailers.

DEARBORN, MI (AUG. 9) PR NEWSWIRE - Ford Division sold a record 133,156 trucks in July, breaking last year's July record sales of 131,422 units. This represents a truck market share of 30.1 percent for July, up from 29.7 percent for the same period last year.

"It's the best July sales period ever," said Philip M. Novell, Ford Division's general sales manager. "We outsold our nearest competitor by more than 14,000 trucks during July alone and with the success of our new Ford Explorer, we anticipate an even bigger lead by the end of the year."

The award-winning 1991 Ford Explorer outsold all of its competition in July by a substantial margin, contributing to an 84-percent sales increase over the same period last year in the segment. Ford expects to achieve overall compact utility leadership before the end of August.

Ford has held overall truck leadership for the last four years and 11 of the last 13 years.

SPOKANE, WA (AUG. 9) PR NEWSWIRE - After two years of planning, construction, training and production start-up, Boeing Spokane shipped its first part today, an environmental control system (ECS) duct destined for the 757 assembly line in Renton, Wash. Production officially began mid-July 1990.

Phil Kelly, Boeing Spokane general manager, said the first shipped part represents "The dedication and talent of a great group of people. I couldn't be more pleased with the efforts of everyone associated with the process of creating this new manufacturing plant, and in producing this first part."

The Spokane facility, to be fully operational in 1991, will produce environmental control ducts and floor panels for all Boeing commercial airplane programs.

The ECS ducts are the first production part produced; floor panels begin production this month.

Ground was broken April 28, 1990, at a 120-acre site located at the Lucas Airpark northwest of downtown Spokane.

Construction was started soon after, with September 1990 slated as the completion date.

"We've been on schedule, or ahead of schedule for almost every aspect of this project," Kelly said.

Boeing Spokane began applicant screening and testing in January 1990 with the goal of reaching a total population of 350 employees by 1991.

The first group of potential employees to receive job training entered classes in April 1990 and completed coursework in July 1990.

"With the first part shipped, we must focus on continuing to serve our customers by building 'world-class' parts, and we need to maintain the momentum that has brought us to this day," said Kelly.

JERICHO, NY (AUG. 9) PR NEWSWIRE - In support of President Bush's announcement regarding restraint to the escalation of gasoline prices,

Getty Petroleum Corp. (NYSE: GTY) announced that the company will freeze its gasoline prices for one week, effective today.

According to Leo Liebowitz, Getty's president and chief executive officer, "Getty is neither a refiner nor producer, and purchases refined petroleum products from domestic and international refiners. Although our cost is related to New York Harbor spot prices, we will agree to exert restraint. During this past week, the average spot gasoline price jumped by approximately 16.5 cents per gallon. In our endeavor to keep prices down, we raised prices by approximately 8 cents per gallon. We plan to reevaluate the situation at the end of the one week period."

Getty is hoping its customers will hold prices for this same period bearing in mind that its customers are independent business operators.

Getty Petroleum Corp., one of the nation's largest independent marketers of gasoline and petroleum products, markets in a thirteen state area, Maine through Virginia.

TROY, MI (AUG. 9) PR NEWSWIRE - Rockwell WABCO Vehicle Control Systems has been selected the supplier partner for heavy-duty anti-lock brake systems (ABS) by Volvo GM Heavy Truck Corporation based in Greensboro, N.C. The brake systems will be outfitted on the OEM's North American lineup of WHITEGMC trucks.

As part of the new relationship, Rockwell WABCO will be the sole published data book option for ABS for WHITEGMC trucks beginning with the 1992 model year, scheduled for availability in summer 1991.

According to Volvo GM Heavy Truck officials, the company selected Rockwell WABCO as its supplier partner due to its full product line and expertise in manufacturing, supplying and servicing both anti-lock and other brake system components.

Volvo GM Heavy Truck expressed confidence that the new supplier partnership between the two distinctly North American companies will provide U.S. and Canadian truck operators with integrated, heavy-duty anti-lock braking systems that are the finest in the industry.

Rockwell WABCO Vehicle Control Systems, a joint venture between Rockwell International Corp.'s Automotive Operations and American Standard Inc.'s WABCO Automotive Products Group, was formed in 1990 to supply vehicle control systems -- including truck, tractor, bus and trailer ABS and other

vehicle systems elements beyond brake actuation components -- to North American truck operators.

The computer-controlled anti-lock brake system was introduced in Europe in 1981 by WABCO Automotive Products Group and to the U.S. heavy- duty market in 1987. Since introduced, more than 150,000 WABCO ABS units have been sold worldwide.

Rockwell WABCO Vehicle Control Systems is the leading supplier of heavy-duty ABS to the North American truck market, supplying more factory-installed systems than all other systems combined.

LOS ANGELES, (AUG. 9) PR NEWSWIRE - American Plastics and Chemicals Inc. (NASDAQ: APAC) today announced that William Morris has been elected president, chief executive officer and director of the company. The election of two other new directors was also announced, including Edwin Matovich, president of MKR Inc., Costa Mesa, Calif., and Fritz Hostettler, Ph.D., president of Polymer Technology Associates, Princeton, N.J.

Morris is president and director of National Energy Development Corp., Dallas, a privately held oil and gas exploration and production company. He has also been an independent management and financial consultant since 1981. Prior to becoming a management consultant, he was an investment advisor with United States Trust Company of New York and Harris Upham & Co., Inc. He holds a bachelor of arts degree from Princeton University and is a director of B.D. Holdings and Inc., a private investment company based in Dallas.

Commenting on the new board members, Morris stated, "We are very fortunate in obtaining the talents on our board of two recognized industry professionals who have already contributed to APAC as consultants to the company. Mr. Matovich and Dr. Hostettler accompanied me on our most recent trip to China and made substantial contributions to our efforts to incorporate the company's proprietary technologies to the organic chemical industry in China."

Matovich, prior to becoming president of MKR, an engineering firm, was senior vice president of Thagard Research Corp. in Costa Mesa, where he was responsible for research, development, licensing and marketing. Previously he was senior research specialist to Rockwell International Corp. He is the inventor of more than 30 issued or pending U.S. patents and numerous foreign counterpart patents in solid state devices, optical

devices, chemical processes and chemical processing equipment.

Dr. Hostettler, before becoming president of Polymer Technology Associates had been a technical advisor to a Wall Street venture capital group and a principal of Plastics Technology Associates. Earlier he was assistant director of Research and Development at Union Carbide Corp. He holds more than 70 U.S. patents in the field of polyurethane.

American Plastic and Chemicals is a development-stage company engaged in demonstrating the commercial viability, licensing, and utilization of certain proprietary technology in the co-production of calcium carbide and fuel gases from raw coal and raw limestone.

#90221p3785 08/09/1990 ~PR Newswire

SPRINGFIELD, MA. (AUG. 9) PR NEWSWIRE -- Monarch Capital Corporation (NYSE: MON) today reported income from continuing operations was $0.9 million or $0.03 per share, compared to $2.3 million or $0.24 per share for the same period in 1989. Income for the six months ended June 30, 1990, was $3.5 million or $0.33 per share, compared to $3.9 million or $0.37 per share for the six months of 1989.

Net income for the second quarter of 1990, was $0.9 million, compared to $4.4 million for the second quarter of 1989. Net income for the six months was $3.5 million compared to $10.0 million for the six months of 1989. The 1989 six months results include $6.2 million -- $2.0 million for the second quarter -- of income from Monarch- Narragansett and the company's real estate operations, which are now presented as discontinued operations.

"Earnings for the second quarter were below expectations due primarily to factors that had a negative impact on the financial results of the disability income operation, including adverse claims experience. The company is also accruing the costs of a new reinsurance agreement," said Gordon N. Oakes, Jr., chairman and chief executive officer of Monarch. "Countering these results on the positive side were strong sales and improved earnings in our variable product operations."

Variable Products Business Pre-tax earnings for the variable products operation were $8.3 million for the quarter ended June 30, 1990, compared to $7.8 million for the same period last year, and $18.7 million for the six months, compared to $14.5 million for the six month period in 1989. Variable life assets under management were $4.26 billion at June 30, 1990,

up from $4.16 billion at March 31, 1990.

Variable life sales for the six months were $52.0 million, up from $34.4 million for the same period last year. Variable annuity sales for the six months increased more than three-fold from the same period in 1989 -- up to $54.6 million in 1990, from 14.9 million in 1989.

"During the second quarter, Monarch acquired Adair Brakovich, Inc., an annuity wholesaling operation, which greatly increased our variable annuity sales," stated Oakes. "This partnership will strengthen our sales and marketing abilities, and give us a competitive advantage in the variable products market."

Disability Business Pre-tax earnings for the disability income insurance operation for the second quarter of 1990 were 0.9 million, compared to 4.8 million for the same quarter in 1989. Pre-tax earnings for the first six months of 1990 were 3.4 million, compared to 7.8 million for the six-month period in 1989. Disability income sales were 15.4 million for the six months, compared to 18.6 million for the same period last year.

"During this quarter, we finalized a reinsurance agreement with a major U.S. reinsurance company," said Oakes. "Under this agreement, we will reinsure a portion of the risks related to our existing and future disability business, thereby enhancing Monarch's opportunities to expand its business and spread its risks. Pre-tax earnings in 1990 decreased by 1.7 million as the result of profits accruing to our reinsurance partners under this agreement."

"The implementation of our state-of-the-art disability income system is moving forward. The cost of implementation continues to be one of the factors that have lowered earnings of this line of business, but we expect that, when this system is fully in place, it will help increase future earnings," Oakes added.

Other Operations Pre-tax earnings from other insurance operations, including Monarch's supplemental insurance business, were 2.6 million for the six months of 1990, compared to 2.3 million for the same period in 1989, and for the second quarter, they were 1.1 million for 1990 and 1989.

Strengthened Management Team Oakes said, "Although financial results for the second quarter were disappointing, we have taken steps to strengthen our management team by naming Roger Servison, formerly of Fidelity Investments, Inc., as president of Monarch Capital, and by appointing Bill Adair to lead our variable products operation. These steps, as well as our combined efforts to reduce costs and increase efficiency, are all designed to improve future operations."

Monarch Capital Corporation is a financial services company that designs

disability income insurance and variable life insurance and annuity products. These products are distributed through a network of other financial service firms in regional and national markets.

#90221p3789 08/09/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (AUG. 9) PR NEWSWIRE - Hycroft Resources & Development Corp. (Vancouver: HYR) today reported a loss for the second quarter ended June 30, 1990 of $1,792,000 or $0.13 per share compared to a loss of $3,298,000 or $0.25 per share in the second quarter of 1989. The net loss for the six months ended June 30, 1990 was $1,697,000 or $0.13 per share compared to a net loss of $4,842,000 or $0.36 per share for the same period in 1989.

Although gold production was satisfactory in the second quarter, results were adversely affected by the low gold prices and higher stripping costs. However, near record production of approximately 9,200 ounces of gold in July, higher gold prices and continuing high production during August to date has improved results.

Three months ended June 30, 1990

Sales for the three months ended June 30, 1990 were $10,309,000 compared to $9,689,000 for the same period in 1989. The increase was largely due to the increase in gold production from 19,330 ounces in the second quarter of 1989 to 20,762 ounces in the second quarter of 1990.

The loss from mining operations in the second quarter of 1990 was $209,000 compared to $42,000 for the same period in 1989. This was a result of higher costs due to a higher stripping ratio, which is not expected to continue.

In addition to the operations factors discussed above, the decrease in net loss was largely due to a foreign exchange loss ($1,273,000) and income tax expense ($503,000) on repatriation of funds from a subsidiary corporation in 1989 which did not occur in 1990.

Six months ended June 30, 1990

Sales for the six months ended June 30, 1990 were $20,454,000 compared to $18,965,000 for the same period in 1989. The increase was largely due to the increase in gold production from 36,705 ounces for the six months ended June 30, 1989 to 40,570 ounces in the same period in 1990.

Earnings from mining operations were $981,000 for the six months ended June 30, 1990 compared to a loss of $438,000 for the same period in 1989.

The increase was largely due to higher gold production and a decrease in depreciation expense due to the extended life of the heap-leach pads.

In addition to the operations factors discussed above, the decrease in loss was largely due to a foreign exchange loss ($1,273,000) and income tax expense ($503,000) on repatriation of funds from a subsidiary corporation in 1989 which did not occur in 1990.

Appointment of Director
The company also announced that on May 24, 1990, Lee R. Broderick was appointed as a director of the company, and on Aug. 1, 1990, the company received the resignation, effective July 13, 1990, of Carlo G. Civelli as a director.

The Vancouver Stock Exchange has neither approved nor disapproved the contents hereof.

#90221p3790 08/09/1990 ~PR Newswire
HOUSTON (AUG. 9) PR NEWSWIRE - Trunkline Gas Company, a subsidiary of Panhandle Eastern Corporation (NYSE: PEL), today will begin providing natural gas transportation services on the Lebanon Lateral, formerly referred to as the Indiana-Ohio pipeline.

The Lebanon Lateral is located between Grant County, Ind., and Lebanon, Ohio. Trunkline owns the Indiana portion of the pipeline while the Ohio portion is jointly owned by Trunkline and ANR Pipeline Company, a subsidiary of The Coastal Corporation.

Trunkline will operate the 52-mile, 30-inch Indiana pipeline and the 61-mile, 36-inch Ohio pipeline that links Panhandle Eastern Pipe Line (PEPL) to the facilities of Texas Eastern Gas Pipeline, CNG Transmission Corporation and Columbia Gas Transmission Corporation.

Initial capacity will be 480 million cubic feet per day and will be equally shared by Trunkline and ANR. Capacity could be expanded to more than 1 billion cubic feet per day to meet future market demands.

Shippers requesting transportation services should ask for the Master Receipt Point List on their PEPL and Trunkline transportation agreements to provide maximum flexibility in their supply options. Shippers who plan to transport gas will need a PEPL transportation contract redelivering to Grant County, as well as a Trunkline agreement for each redelivery to Lebanon. For additional information or assistance, shippers should call

the Panhandle Eastern marketing services department at 713-627-4765.

Panhandle Eastern Corporation operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

CONTACT: John P. Barnett, 713-627-4072, or (investors) Dorothy M. Ables, 713-627-4600, both of Panhandle Eastern Corporation

#90221p3792 08/09/1990 ~PR Newswire

NEW YORK (AUG. 9) PR NEWSWIRE - Transmedia Network Inc. (NASDAQ: TMNI), which owns and markets a restaurant charge card offering 25 percent savings on meals, today announced record revenues of $2,045,270; earnings of $139,432 and earnings per share of 7 cents, for the quarter ended June 30, 1990, compared to $1,337,323, $41,752, and 2 cents, respectively, for the same period in 1989.

Revenues for the quarter included net sales of $1,944,864, compared to $1,263,631, a year earlier, and membership and renewal fee income of $100,406, compared to $73,692, for the same period in 1989.

Total revenues for the nine-month period were a record $5,386,590, compared to $3,503,255, in 1989. These figures included net sales of $5,108,525 and membership renewal fee income of $278,065, compared to $3,297,974 and $205,281, respectively, for the same period in 1989.

Third-quarter revenues resulted in earnings of $115,920, or 6 cents per share, for the nine-month period, compared to a profit of $167,549, or 9 cents per share, for the nine months ended June 30, 1989.

Latest quarterly results eliminated a six-month loss of $23,512, or a loss of 1 cent per share, remaining from completing the company's franchise development plan; establishing its Cardholder Service Center in Miami, and arranging a substantial bank credit line. These activities caused expenditures of $89,389, $79,961, and $21,825, respectively, for a total of $191,175.

Melvin Chasen, chairman, said, "Transmedia continued to achieve record-breaking monthly sales in the third quarter, as the rate of restaurants and cardmembers joining our program steadily increased.

"Growing numbers of finer dining establishments, as well as diners, are discovering Transmedia's value-added services: capital and patrons for restaurants, essential today with increasing competition and higher costs, and savings for diners."

Chasen went on to say, "In July, the company, as previously announced, awarded its first franchise -- most of the state of New Jersey -- which will commence operations after closing the transaction on Aug. 30."

Transmedia Network Inc., established in 1984, derives its income from membership fees and cardmembers' use of the Executive Savings Card which converts food and beverage credits issued to the company by restaurants in return for cash advancements used by these dining establishments for a wide variety of needs.

More than 600 New York metropolitan area restaurants and 29,000 cardmembers have joined the Transmedia program to date. A total of 35 markets is targeted by 1995 in the company's franchise program which began this year.

#90221p3794 08/09/1990 ~PR Newswire

CHICAGO (AUG. 9) PR NEWSWIRE - Playboy Enterprises, Inc. (NYSE: PLA) today reported net income of $6.2 million, or $.33 per share, on net sales and revenues of $167.7 million for fiscal 1990, which ended June 30, 1990.

These results represent a $10.0 million improvement compared to a net loss of $3.8 million, or $.20 per share, on net sales and revenues of $166.2 million for the previous fiscal year. The fiscal 1989 loss was attributed to higher-than-normal, non-recurring administrative expenses including the addition of a number of key executives, the corporate headquarters relocation and charges relating to the restructuring of the company's entertainment group.

Operating income of $265,000 in fiscal 1990 was significant when compared to a $6.6 million operating loss in the prior year. This improvement was attributable to the profitable and strong performance of the company's entertainment group and lower administrative expenses in fiscal 1990.

Playboy Chairman and Chief Executive Officer Christie Hefner also announced that the company intends to commence open market and negotiated purchases of up to 200,000 of its Class B non-voting common shares. She said that recent market activity and the price at which Class B common

shares currently are trading led the company to make the decision to purchase.

For fiscal 1990, in addition to the improvement in operating income, the company recognized a pre-tax gain of $4.8 million on the sale in the first quarter of the assets of Boarts International, Inc., which was a wholly owned subsidiary engaged in the international distribution of U.S. periodicals and paperbacks. Current year non-operating income also included $928,000 of expenses related to the company's recapitalization in the fourth quarter of fiscal 1990. Weighted average number of shares and per share amounts have been adjusted to reflect the recapitalization on a retroactive basis.

The company's entertainment group reported $3.0 million in operating income on $28.1 million in revenues, compared to the prior year's loss of $926,000 on $21.9 million in revenues. The strong performance was primarily due to the group's venture into foreign television. Playboy Late Night, a televised compilation of the best of Playboy programming, was sold successfully into 10 countries abroad during fiscal 1990.

Playboy Enterprises, Inc., is an international publishing and entertainment company that publishes Playboy magazine in 15 countries, newsstand specials, calendars, limited-edition graphics and catalogs; produces and markets programming for domestic and international television and home video; and licenses Playboy and other trademarks for consumer goods around the world. Its stock is listed on the New York and Pacific Stock Exchanges.

#90221p3797 08/09/1990 ~PR Newswire

GREAT NECK, NY (AUG. 9) PR NEWSWIRE - Avnet, Inc. (NYSE: AVT) today reported that net income for its fiscal year ended June 30, 1990 was $56.5 million or $1.57 per share as against $54.0 million or $1.51 per share for the prior year. Fiscal 1990 net income included a net after tax charge of $9.8 million, or $.27 per share, covering one-time disposition and restructuring expenses while fiscal 1989 net income included a net after-tax gain of $1.3 million or $.04 per share. Excluding such items fiscal 1990 earnings were $66.3 million, or $1.84 per share compared with $52.7 million, or $1.47 per share, in 1989. Sales for the 1990 fiscal year were $1.75 billion compared with $1.92 billion for the prior year.

Avnet's fourth quarter net income was $7.5 million, or $.22 per share, as against $19.8 million, or $.55 per share, for the prior year period. The fiscal 1990 fourth quarter net income included the after- tax disposition and restructuring expenses of $9.8 million or $.27 per share while the

fiscal 1989 fourth quarter included a net after-tax gain of $4.6 million, or $.13 per share. Excluding such items fourth quarter fiscal 1990 earnings were $17.3 million, or $.49 per share, compared with $15.2 million, or $.42 per share, in the prior year's fourth quarter. Sales for the fourth quarter were $447.9 million compared with $456.9 million for the last year's fourth quarter.

Leon Machiz, Avnet's chairman and CEO noted that despite the 9 percent sales decline the company's net income from operations, excluding the above mentioned disposition and restructuring items, rose 26 percent as its net operating margins increased about 40 percent from 2.7 percent last year to 3.8 percent in the current year. These increases were due principally to increased efficiency, higher gross margins, improved asset management and the elimination of losses incurred by Electronic Marketing Group units divested or reserved for in fiscal 1989. He added that due primarily to the improved asset management the company's cash and marketable securities portfolio increased by $107 million to $344 million at fiscal 1990 year end.

Machiz said that Electronic Marketing, Avnet's largest group, was the major contributor to the improved fiscal year results. The group's revenues of $1.41 billion, which were about 7 percent lower than last year's revenues, accounted for 80 percent of the company's consolidated sales. With Hamilton/Avnet and Time leading the way, the group's fiscal 1990 after-tax operating earnings, before a one-time $2.9 million charge for the restructuring of Avnet Computer Technologies and Harper S.I.D. operations, were $58.2 million, up 46 percent from last year's group after-tax operating earnings of $39.8 million. Group fiscal 1990 net operating margins were 4.1 percent compared with 2.6 percent last year.

The Video Communications Group's sales, which accounted for 8 percent of consolidated sales, were $134.9 million in fiscal 1990, down 29 percent from last year's $191.2 million. The group's after-tax operating earnings before a fiscal 1990 $6.9 million charge for the disposition of the Taiwan operations were $4.9 million, down 12 percent from the previous year's after-tax operating earnings of $5.6 million which were before a $7.5 million gain on the sale of a cable TV system.

The Electrical and Industrial Group contributed $208.4 million or 12 percent of consolidated sales in fiscal 1990, down 3 percent from the previous year's $214.9 million. Its earnings were $3.2 million, down 56 percent from last year's $7.3 million.

#90221p3798 08/09/1990 ~PR Newswire

OXNARD, CA (AUG. 9) PR NEWSWIRE - Ventura County National Bancorp (NASDAQ: VCNB), the holding company for Ventura County National Bank and Frontier Bank, N.A., today reported a 29 percent increase in net income for the quarter ended June 30, 1990, to $814,000 from $631,000 in the 1989 second quarter.

Earnings per share were $0.16 for the last quarter (on a larger number of weighted average shares outstanding), compared with $0.17 in the 1989 period. The sharp rise in earnings was attributed to increases in net interest and fee income and the acquisition of Frontier Bank, offset somewhat by higher expenses due to investment in expanding operations.

Net income for the first half of 1990 totaled $1.5 million or $0.31 per share, compared to $1.3 million or $0.36 per share for the same six months of 1989.

President and Chief Executive Officer William E. McAleer said, "We are very pleased with the continued growth in core earnings. Net interest income grew by 44 percent, to $4.9 million for the second quarter of 1990 from $3.4 million for the comparable 1989 quarter. In addition, Ventura's other income grew 45 percent, to $647,000 from $445,000 from the year-ago quarter, primarily due to an increase in loan fee volume."

Ventura's annualized rates of return on assets and equity were 0.86 percent and 13.86 percent, respectively, for the quarter ended June 30, 1990. The company's net interest margin for the second quarter was 6.70 percent, compared to 6.90 percent for the second quarter of 1989.

McAleer noted that Ventura's two newest divisions, Correspondent Banking and Insurance Premium Financing, have been operational since early in 1990 and have already made significant contributions to revenues. The Insurance Premium Financing division originated $9.4 million in loans for the first half of 1990. The Correspondent Banking division has initially provided loan participation services to small- and mid-size banks throughout Southern California.

Also during the recent quarter, Ventura County National Bancorp's subsidiary, Frontier Bank, N.A., completed its acquisition of Westco Savings Bank from the Resolution Trust Corporation. At the time of purchase, Westco had $102 million in total assets and branches in Wilmington, La Palma, Culver City and Harbor City.

The two new divisions and Westco acquisition were primarily responsible for increases in expenses of $1.5 million and $2.8 million in the 1990 second quarter and first half, respectively.

Looking toward the second half of 1990, McAleer stated, "We anticipate

increased income from our two new divisions. The Westco Savings acquisition has provided over $80 million of lendable deposits which will also be an important contributor to future net profits.

Credit quality continued to be excellent with nonperforming assets as a percent of loans totaling 0.59 percent at June 30, 1990. Net charge-offs as a percent of average loans were 0.02 percent for the second quarter.

Ventura's primary capital ratio was 6.16 percent at June 30, 1990. Shareholders' equity was $25.2 million, with a book value of $5.26 per share. Total assets at the end of the last quarter were $410.0 million, compared to $238.4 million for the same quarter in 1989. Net loans increased to $272.6 million from $185.2 million at June 30, 1989, while deposits grew to $356.3 million from $206.4 million during the same period. Major portions of these increases are attributable to the company's acquisition of Frontier Bank, and Frontier's subsequent acquisition of Westco Savings.

Ventura County National Bancorp is the holding company for Ventura County National Bank, founded in 1982, and the La Palma-based Frontier Bank, N.A. acquired in October 1989. These two commercial banks offer services to middle market businesses, their owners and select professionals in southern California through five offices.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Andrew J. Kaplan, senior vice president, office of the chairman, has been appointed to the newly created post of senior vice president, production, finance and administration overseeing CPT's physical production, film and tape facilities, division-wide budgeting and broadcast music activities, it was announced today by Gary Lieberthal, chairman and chief executive officer, Columbia Pictures Television.

Reporting directly to Lieberthal and Columbia TV President Scott Siegler, Kaplan will, additionally, serve as liaison to the departments of finance, administration, human resources and management information services of Columbia Pictures Entertainment.

Noted Lieberthal, "Andy Kaplan has made an enormous contribution to the office of the chairman and to the success of Columbia Pictures Television over the last three years. His appointment to this post enhances our ability to provide Columbia Pictures Television with the highest level of production, financial and administrative expertise."

Kaplan joined Columbia in 1987 as vice president and was promoted to senior vice president, office of the chairman in 1989. He was vice president, administration for Hal Roach Studios prior to joining Columbia. He also served as HRS corporate secretary and assistant treasurer.

From March 1984 to November 1985, Kaplan was director, theatrical acquisitions for Embassy Pictures. He joined Embassy Communications in 1982 as executive assistant to the president of pay television.

Kaplan was graduated from the University of California at Los Angeles in 1981 with a bachelor of arts degree in economics. In 1986, he received a

master's degree from the University of Southern California in business administration and corporate finance.

Columbia Pictures Television is a Columbia Pictures Entertainment Company.

#90221p3806 08/09/1990 ~PR Newswire

ROCHDALE, MA (AUG. 9) PR NEWSWIRE - The board of directors of The Rovac Corporation (OTC), declared on Aug. 3, 1990, that it will recommend a reverse split of its common stock to shareowners at the company's next stockholder's meeting. The board also recommended stockholder approval of a merger of the company's affiliate, Stafford Industries, Inc., into The Rovac Corporation through an exchange of common and preferred shares of Rovac for the common stock of Stafford. The Rovac directors agreed to a one-for-fifteen reverse split of the company's common stock subject to shareholder approval. They also voted to enter into an agreement in principal with Stafford Industries to merge Stafford's common stock into Rovac. This proposal is subject to approval by the directors of Stafford as well as the shareholders of both companies.

The one-for-fifteen reverse stock split will reduce the number of Rovac common shares currently issued and outstanding from approximately 37.7 million to approximately 2.5 million shares. The company also expects to ask its shareholders to approve the authorization of an additional 2 million shares of common stock, after giving effect to the reverse stock split. This will ensure that sufficient capital stock is available for future issue.

In addition to the more than 22.5 million shares of Rovac common stock held by Stafford, that company also owns real estate and other property which carries a current net fair market value of approximately $2 million.

Under the terms of the proposed merger, Rovac is to receive all of the shares of Stafford's capital stock and each shareholder of Stafford will receive a combination of Rovac preferred and common stock, which will be equivalent to the fair value of Stafford's assets, less any liabilities.

If the merger takes place, Rovac management anticipates that approximately 13,000 shares of preferred stock -- valued at $100 per share -- and, perhaps, as many as 1.6 million shares of Rovac's post- split common shares, depending upon the market price of the common stock prior to the merger, will be exchanged for Stafford's common stock. The company has already issued 12,000 shares of preferred stock, at $100 per share, to extinguish the intercompany debt.

Shea expects that the merger will be approved by the shareholders of both companies. If so, he believes that Rovac may have sufficient assets to qualify for filing an application to list its shares on a regional stock exchange, or with NASDAQ.

The company expects to file a Registration Statement with the Securities and Exchange Commission covering the shares of common and preferred stock of Rovac to be issued in exchange for the stock of Stafford. No date has been announced for a shareholder meeting to approve the merger, nor has a date been set by the directors of either company as to when the stockholders of record will be affected by the reverse stock split or the merger.

The Rovac Company is a small research and development firm, which is located just outside of Worcester, Mass. The company is engaged principally in designing, building and testing a number of products which eliminate the use of ozone-depleting chloroflourocarbons (CFCs) through its patented, low-pressure, rotating, gas-handling power technology.

In late May of this year, Rovac announced formation of a joint venture with Autocam Corporation to commence the immediate production and marketing of its ozone-protective, automotive air conditioning systems. Located in the Grand Rapids, Mich., area, Autocam is a major supplier to the automotive industry.

#90221p3807 08/09/1990 ~PR Newswire

SAN FRANCISCO (AUG. 9) PR NEWSWIRE - As part of on-going efforts to

improve financial performance, Chevron (NYSE: CHV) will offer for sale its four asphalt terminals in the Ohio Valley area. These terminals are located at Cincinnati and Marietta, Ohio; Louisville, Ky.; and Springdale, Penn.

While these operations have been profitable, they are not strategically critical to Chevron's core asphalt business, and the assets may be more valuable to others. Chevron will not make a final decision to sell the assets until all bids from prospective buyers have been carefully evaluated.

Chevron ranks No. 1 in asphalt sales in the United States, and that ranking will be unaffected if these terminals are sold.

"There are 42 employees at these four terminals, and we realize they're quite concerned about their future," said Juan Whitehead, general manager of the asphalt division. "We will keep them informed of all developments in this endeavor. In the event of a sale, we expect the buyer will fulfill all of Chevron's contractual obligations and commitments to employees and customers."

Chevron will ask prospective buyers to submit bids within a few months. Chevron expects to make a decision about the terminals' future by the end of the year.

#90221p3809 08/09/1990 ~PR Newswire

KAILUA-KONA, HAWAII (AUG. 9) PR NEWSWIRE - Cyanotech Corp. (NASDAQ: CYAN) today announced the first profitable quarterly results in the company's seven-year history, for the quarter ended June 30. Net income for the period was $24,813, versus a loss of $416,490 for the same quarter in 1989. The turnaround was fuelled by record revenues of $524,754, which represents a 140 percent increase over 1989 second-quarter revenues. Significantly, operating expenses were simultaneously cut by 43 percent from the previous year. According to Gerald Cysewski, president of Cyanotech, the profitability achieved by the company is a direct reflection of the new operating direction of the business.

The financial restructuring of Cyanotech, which was completed in April 1990, accomplished its two principal objectives of significant long-term debt reduction and provision of adequate working capital. Expressed as the ratio to total revenues, debt servicing declined from 33 percent in the second quarter of 1989 to 4 percent in the current quarter. Liquidity (current assets/current liabilities) improved from 0.32 as at Dec. 31,

1989, to 0.93 as at June 30, 1990. During the same comparative period, shareholders' equity increased from a deficit of $1,128,386 to a positive $1,548,195.

Management claims its decision to sharpen its marketing focus and rationalize production has resulted in Cyanotech becoming the second largest producer in North America of Spirulina, a nutritional product, and the world's largest producer of phycobiliproteins. These are used primarily for medical research purposes. The new dedication of the company's Hawaiian facility to Spirulina production has resulted in a near doubling of output and substantial cost reductions. Overall gross margins have more than doubled from the comparable period in 1989.

Coming at a time when Cyanotech's principal competitor in the Spirulina market is increasing its prices, the company is being presented with an opportunity to enlarge its market share, currently estimated at approximately 14 percent of the world market, according to Gerald Sherlock Cyanotech's marketing director.

The most important challenge now facing Cyanotech is further increasing Spirulina sales; Spirulina sales have, during the quarter, been aggressively driven to new record levels, but they have not kept up with the largely unanticipated step function increase in Spirulina production. As a consequence, Spirulina inventory is at a higher level than is required. This prevents the company from achieving its full cash flow potential. Management believes that Spirulina sales will catch up with Spirulina production by year end.

Cyanotech recently announced the imminent closure of its Woodinville, Wash., operation. This will consolidate all of the company's resources in Hawaii. This process is expected to be completed by the end of October. Besides organizational and efficiency gains, further material operating cost reductions are anticipated. Management believes that the costs associated with the consolidation will be recovered within a few months of its completion, and will have a positive net effect on operating results for the current fiscal year.

CONTACT: Dr. Gerald R. Cysewski, 808-326-1353, or John A.D. Weston, 416-652-5168, both of Cyanotech Corp.

ROCKFORD, IL (AUG. 9) PR NEWSWIRE - Pioneer Financial Services Inc. (NYSE: PFS), a national insurance and marketing company, today reported record income for the second quarter of 1990.

For the quarter, net income was $4,899,000, a 29 percent increase over

$3,794,000 in the second quarter of 1989. On a primary earnings per share basis, net income was $.65, up 14 percent from $.57. Fully diluted earnings per share were $.58. Net realized investment gains for the quarter accounted for $.01 per primary and fully diluted share. Total revenues for the quarter were $139,311,000, a 58 percent increase over $88,070,000 in 1989.

Total assets increased 74 percent to $915,173,000, against $524,687,000 at June 30, 1989. Stockholders' equity rose 21 percent to $89,756,000 from $74,101,000.

Pioneer, through its subsidiaries, principally underwrites and markets selected lines of accident and health benefits and insurance. The company's products are marketed in 49 states.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Unocal (NYSE: UCL) announced today it would freeze prices retail dealers and marketers pay for gasoline until midnight Aug. 16.

The company took the action in response to President Bush's request to the oil industry to avoid further gasoline price increases.

Unocal agrees with the President that gasoline pricing should be fair and responsible. The company has been following such a policy. Since the invasion of Kuwait by Iraq last week, spot prices for crude oil and gasoline, which reflect the volatile world market, have risen about 20 cents per gallon. During the period, Unocal has raised gasoline prices to its dealers four to seven cents per gallon in major markets on the West Coast. The company must maintain its normal pricing position to guard against a supply-demand imbalance for its marketing system.

The company will re-examine its price-freeze policy after Aug. 16. While Unocal gasoline prices are frozen, the company is confident that its dealers and marketers, who are independent businessmen, will be equally responsible in their pricing decisions.

ATLANTA (AUG. 9) PR NEWSWIRE - Shared Technologies Inc. (STI) (NASDAQ: STCH) announced today the signing of an agreement with Platinum Tower Associates, Ltd. to provide Shared Tenant Services (STS) to the tenants of Platinum Tower, a 17 floor, 305,000 rentable square foot office building. Platinum Tower, located in the heart of the Galleria Business District, serves to solidify STI's powerful presence in the Atlanta business community.

STI also provides its services to tenants in a number of other buildings throughout Atlanta; including, Atlanta Financial Center, Atlanta Plaza, Buckhead Plaza, Crown Pointe, and The Terraces.

"STI customizes communications packages for tenants of all sizes, providing them with discounted long-distance services and cost-effective local service, as well as a variety of voice and data communications systems designed to meet the diversity of today's business environment," said Richard Snyder, regional vice president. "The presence of an on-site STS provider eliminates the time and cost involved in confusing day-to-day telecommunications decisions. Tenants at Platinum Tower can concentrate in running their business while STI experts, located in the buildings, put together the right communications systems and services package need to fill their business communications requirements."

STI is a leading provider of shared tenant services nationwide, with its headquarters in Wethersfield, Conn. STI provides its services to 45 buildings and convention centers in Atlanta, Seattle, Boston, Los Angeles,

Phoenix, Chicago, New York, Hartford, Memphis, Nashville, New Orleans, Birmingham, Ala., and Mahwah, N.J. STI also provides shared services in the Jacob K. Javits Convention Center in New York City and the World Trade Center in Boston.

FORT WASHINGTON, PA. (AUG. 9) PR NEWSWIRE - Regal Communications Corp. (NASDAQ: RCOM), today announced that profits for the quarter ended June 30 1990, increased more than 500 percent to $544,407 compared to $90,366 for the third quarter 1989.

Revenue for the quarter was $3,527,553 compared to $1,705,266 in 1989, an increase of 107 percent. The company also reported record profits and revenue for the nine months ended June 30, 1990. Profits increased 570 percent to $1,735,424 compared to $258,964 in 1989, with revenue increasing 99 percent to $9,704,461 from $4,868,106, in 1989.

Regal operates 900 audiotex telephone services and publishes Lottery Players Magazine. In making the announcement, Melisa Hoffrichter, director of Investor Relations, attributed the results to strong growth in the "900 industry" in general which positively effected the company. Hoffrichter added, "The company sees tremendous opportunities in '900' as the product gains further consumer and business acceptance, and we are positioning the company to further participate in the industry's anticipated growth.

#90221p3831 08/09/1990 ~PR Newswire

PHILADELPHIA (AUG. 9) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) (Conrail) is expanding its transloading operations and formed a Transloading Services group as part of its Marketing and Sales organization.

Robert E. Mortensen heads the group as assistant vice president-Transloading Services.

"The Transloading Services unit will help Conrail's customers benefit from the cost and service advantages inherent in long-haul rail transportation and local truck delivery," said Gordon H. Kuhn, senior vice president-Marketing and Sales. "The array of services offered will provide customers with additional transportation alternatives and attract new business to the railroad."

"The level of service we provide will match the needs of the individual customer," Mortensen said. "This customized service allows Conrail's customers to enter new markets without huge capital investments in facilities."

Services being explored by the Transloading Services unit range from providing public-access "team-track" space for customers who can transload materials on an as-needed basis to full-service transloading operations including warehousing and inventory control. Opportunities involving transloading operations between rail and barge are also being explored.

The Transloading Services group is responsible for targeting new business opportunities involving transloading operations; managing Conrail's Flexi-Flo operations for shippers of liquid and dry bulk commodities; and Conrail's relationships with privately owned transfer facilities.

Mortensen had served as assistant vice president-Forecasting, Planning and Control since 1979. He began his railroad career in 1967 with the New York Central, a Conrail predecessor, and served in various marketing, forecasting and planning positions with the New York Central, the Penn Central and Conrail. Mortensen holds a bachelor of science degree in speech and a master of business administration degree, both from Rutgers University.

Conrail provides rail freight transportation service in 14 Northeastern and Midwestern states, the District of Columbia, and the Province of Quebec.

#90221p3833 08/09/1990 ~PR Newswire
MONTVALE, N.J. (AUG. 9) PR NEWSWIRE - Datascope Corp. (NASDAQ: DSCP) reported fourth quarter net earnings of $1.9 million or $0.37 per share. This compares with $2.8 million or $0.55 per share in the year-ago period. Sales in the fourth quarter were $35.7 million, up 15.4 percent from last year.

For the fiscal year ended June 30, 1990, net earnings were $9.3 million, or $1.80 per share, including net non-recurring income of $3.6 million, or $0.70 per share, reflecting the company's gain from the settlement of all patent litigation between Datascope and Kontron, Inc., net of certain non-recurring expenses. This compares with $10.5 million, or $2.02 per share, in the previous fiscal year. Sales advanced 6.2 percent to $120 million from $113 million in fiscal 1989.

As the company had anticipated, earnings in fiscal 1990 were adversely affected by substantial start-up costs of entering the PTCA business, and lower sales in the IABP business due to the return to the market of a principal competitor and a slowdown in market growth. Also, earnings were impacted by the costs of correcting previously reported monitoring production problems encountered in the second quarter. The company noted that sales of monitoring products continued to strengthen in the fourth quarter signaling an expected upturn in monitoring sales growth in fiscal 1991.

The company has filed a pre-market approval application with the FDA for its Integra (TM) PTCA catheter, and is hopeful that its application will be placed before an FDA Panel meeting in October 1990. Assuming no extraordinary delay in receiving FDA approval following a panel recommendation for approval, the company expects to begin marketing the Integra in the United States in early calendar 1991.

The company believes that the timely entry of the Integra catheter

enhances the opportunity to capture market share against fixed-wire competition. The Integra catheter offers functional advantages of both types of currently available catheters, having the low profile of the fixed-wire type catheter and the freely rotating guidewire of the over-the-wire type catheter.

Assuming only a modest contribution from its planned PTCA market entry, the Company foresees healthy growth in sales and earnings in fiscal 1991 based on expectations of reduced losses in its PTCA business, continued growth in monitoring sales, essentially flat performance of its IABP business, and contributions from rapid growth of its InterVascular subsidiary.

Datascope Corp. is a manufacturer of proprietary products for clinical health care markets in interventional cardiology, anesthesiology, and cardiovascular and vascular surgery.

SUMMARY OF OPERATING RESULTS

	Year Ended		3 Months Ended	
	6/30/90	6/30/89	6/30/90	6/30/89
Sales	$120,150,000	$113,150,000	$35,650,000	$30,900,000
Earnings before taxes on inc.	14,124,000(A)	16,005,000	2,687,000	3,860,000
Taxes on inc.	4,828,000	5,526,000	779,000	1,014,000
Net earnings	9,296,000	10,479,000	1,908,000	2,846,000
Fully diluted earns. per share	$1.80(A)	$2.02	$0.37	$0.55
Fully diluted shares outstanding	5,166,000	5,186,000	5,153,000	5,172,000

(A) -- Earnings before taxes on income includes non-recurring pre-tax income of $6 million, equivalent to after-tax income of $0.70 per common share. The non-recurring gain was due to the settlement of all patent litigation with Kontron, Inc., net of $1.5 million legal expenses and a non-recurring incentive compensation expense of $4.5 million arising from the acquisition of InterVascular, Inc.

#90221p3834 08/09/1990 ~PR Newswire

NEW YORK (AUG. 9) PR NEWSWIRE - Companies that rely on United Parcel Service to deliver their express packages are looking for alternative delivery services in the event that UPS workers go on strike, according to Marvin Stone, vice-president and director of Twilight Express, a Northeast overnight delivery firm. Stone said today that shippers are often turning to smaller, regional firms for their package delivery needs. He added

that many of his competitors, eager for a chance to win new clients, are scrambling to hire temporary workers and lease additional vehicles.

One factor that has prompted the move toward regional delivery services, according to Stone, is the recent announcement by UPS' largest competitor, Roadway Package Service (RPS), that it would no longer accept new accounts. RPS acknowledged it would be absorbing a substantially higher volume of packages from its current customers if UPS were to strike, and did not want to compromise service for its loyal customers.

In a letter sent to clients July 24, UPS informed its customers that its three-year contract with the International Brotherhood of Teamsters was due to expire July 31 at midnight, and if an agreement were not reached by that time, service "could be subject to considerable delay." UPS and the Teamsters Union since agreed to a ten-day extension to complete its balloting process. The counting of ballots will be completed Friday, and, should the union reject UPS' offer, wildcat walkouts or a strike could occur.

Stone said that the possibility of a strike has been a mixed blessing for Twilight Express. "We have been inundated with calls from people looking for an alternative delivery company in the event of a strike. Although many of these calls are from businesses that traditionally use UPS ground service, Twilight offers only overnight express service. But we are an alternative to UPS Next-Day and Second- Day Air, and since that market represents approximately 15 percent of UPS' total volume, we are welcoming any and all concerned shippers."

Founded last November, Twilight Express has grown rapidly by marketing itself as a low-cost alternative to larger overnight delivery services. Twilight Express currently serves some 1,700 communities from Northern Virginia to Maine, and both revenue and shipment count have increased an average of 15 percent a month since its inception. Recent clients include the Upjohn Corporation, Barclays Bank, R.R. Donnelley, Colt Industries, Liberty Mutual Insurance and the Loews Corporation.

Twilight Express is a wholly owned subsidiary of Choice Courier Systems, Inc., the nation's largest privately owned on-ground courier. By making use of its parent company's existing on-ground network, Twilight Express can deliver packages overnight within the Northeast for about half the price of its better known competitors, which include Federal Express and UPS Next-Day Air.

#90221p3840 08/09/1990 ~PR Newswire
VERNON, BRITISH COLUMBIA (AUG. 9) PR NEWSWIRE - Far West's (FWT) sales for the first six months of 1990 were $3,400,000. This represents a decrease of 27 percent over sales of $4,682,883 for the same period in 1989. The net loss for the first six months was $275,504 or $0.06 per share compared to a Net Income of $181,665 or $0.04 per share for the same period in 1989.

The current economic slow down in both Canada and the United States is expected to result in our sales and Net Income for the year ending Dec. 31 1990 to be less than the same period in 1989. This was discussed in our first quarter report to the shareholders and at our annual general meeting. Slow consumer demand has resulted in inventory carryovers at the retail level and we expect this situation to continue throughout 1990. In the event that consumer demand picks up during the Fall 1990 selling season our customers are aware that we have the capacity to accept orders for immediate delivery.

As announced at the annual general meeting we have established an International Export Department. The mandate for this department is to generate sales outside North America. At present the emphasis is being placed on establishing contacts in the United Kingdom, Europe, the Pacific Rim countries and Australia. This department is in the very early stages of development. Contacts have been made with distributors in Australia, Italy, Japan and England and negotiations are in the preliminary stages.

#90221p3844 08/09/1990 ~PR Newswire
HOUSTON (AUG. 9) PR NEWSWIRE - Energy Service Co. Inc. (ENSCO) (AMEX: ESV) reported a net loss of $2,974,000, or $0.05 per common share, on revenues of $41,576,000 for the quarter ending June 30, 1990. This compares to net income of $426,000, or a loss of $0.01 per common share, on revenues of $38,898,000 for the second quarter of 1989.

For the first half of 1990, the company's net loss was $1,961,000, or $0.05 per share, on revenues of $85,560,000. This compares to a net loss of $481,000, or $0.04 per share, on revenues of $75,549,000 for the first half of 1989.

Consolidated revenues for the three months ended June 30, 1990, increased by $2,678,000, or 6.9 percent, while operating margins declined by $573,000, or 10.2 percent, compared to the same period in 1989. Second quarter results were adversely affected by slower sales and reduced margins for oilfield tubulars and production equipment in the company's supply segment. In addition, in March 1990, the company sold two jackup

rigs, which, in the prior year, had made a positive contribution to operating results. In addition, the operating results in the second quarter were adversely affected as depreciation, depletion and amortization charges increased by $1,742,000, or 58.4 percent, and general and administrative expenses increased by $1,324,000, or 99.0 percent, compared to the second quarter of 1989.

Revenues and margins increased in three of the company's five operating segments during the second quarter of 1990, reflecting higher utilization, day rates and fleet size in the marine segment; increased demand for horizontal drilling in the technical services segment; and increased oil and gas production in the oil and gas segment.

The company's investment in Penrod Drilling Corp. is currently accounted for under the cost method and therefore did not have any impact on ENSCO's financial results during the first half of 1990. As previously announced, ENSCO and its partners, together with an unaffiliated group, have an agreement to purchase the remaining 31.3 percent of Penrod's equity and senior debt that they do not already own. Following the completion of such purchase, which is anticipated to occur prior to Oct. 31, 1990, ENSCO's financial results will reflect its approximate 20 percent interest in Penrod's losses or earnings under the equity accounting method.

ENSCO, headquartered in Houston, is engaged in providing contract drilling and related energy services to the international petroleum industry. ENSCO's common stock and preferred stock trade on the American Stock Exchange under the symbol ESV.

TROY, MI (AUG. 9) PR NEWSWIRE - Inacomp Computer Centers, Inc. (NASDAQ: INAC) has been named one of the nation's fastest-growing companies by Financial World magazine. In a listing of the Financial World Growth 500 published Aug. 7, Inacomp was ranked the 66th fastest- growing company in the country. By comparison, Apple Computer, one of the computer industry's "Big 3," ranked 81st. The listing is based on the companies' financial growth over the past five years.

"Inacomp is very proud and excited to have been recognized by Financial World," said Rick Inatome, Inacomp chairman, president, and chief executive officer. "Inacomp has achieved an average financial growth rate of more than 29 percent during the past five years, quite a feat in an industry as rapidly changing as ours."

Inacomp closed the books on its 14th fiscal year on July 28, 1990, and

plans to announce its final financial results within the next few weeks. Revenues for fiscal year 1990 are expected to reach nearly $500 million.

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through more than 200 company-owned, franchised, and affiliate locations across the country. The company provides system consultation, installation, classroom training, system maintenance and repair to its customers. Inacomp also provides short- term rental and long-term leasing of microcomputer systems. Corporate offices are in Troy.

NEW HYDE PARK, NY (AUG. 9) PR NEWSWIRE - Uniforce Temporary Personnel, Inc. (NASDAQ: UNFR) today announced its revenues and earnings for the second quarter 1990. Revenues were $28,136,115 for the quarter ending June 30, 1990, 2.0 percent over the second quarter of 1989. Net earnings for the quarter were $887,912, ($.19 per share) vs. $889,907 ($.19 per share) in 1989.

Reflecting on the company's second quarter performance, John Fanning, president and chief executive officer, stated,: "We're feeling the effects of a general economic flatness. However, we remain focused on achieving the financial goals we've established for 1990 through the strong pursuit of acquisitions and conversions of independent temporary services to the Uniforce system."

The company, under its trade name, Uniforce Temporary Services, is a national network of 108 predominately licensed offices providing temporary personnel in the general and automated office, marketing, accounting, technical, records management, hospitality and light industrial service categories. The Uniforce Common Stock is traded in the over-the-counter market.

PITTSBURGH (AUG. 9) PR NEWSWIRE - S. Kent Rockwell, chairman and chief executive officer of Astrotech International Corporation (AMEX: AIX) today announced that Astrotech reported net income of $102,000 on revenues of $6.4 million for the third quarter ended June 30, 1990.

This compares with net income of $248,000 on revenues of $4.8 million for the comparable quarter last year.

For the nine months ended June 30, 1990, Astrotech had net income of $775,000 on revenues of $18.6 million. This compares with net income of $164,000 on revenues of $7 million for the comparable period of last year.

After provision for preferred stock dividends, the net loss applicable to common shares was $216,000 or $.08 per common share for the third quarter of fiscal 1990, compared to a net loss applicable to common shares, after provision for preferred stock dividends, of $89,000 or $.04 per common share for the third quarter of fiscal 1989. After provision for preferred stock dividends, the net loss applicable to common shares for the nine-month period ended June 30, 1990, was $198,000 or $.08 per common share compared to a net loss applicable to common shares, after provision for preferred stock dividends, or $850,000 or $.43 per common share for the comparable period last year.

Astrotech is principally involved in the fabrication and installation of seals in oil storage tanks and also provides environmental compliance, inspection, engineering and design services for projects that involve either modification or repair to storage tanks.

Astrotech's common stock, $1.20 Cumulative Convertible Preferred Stock and Warrants currently trade on the American Stock Exchange under the symbols AIX, AIXpf and AIXws, respectively. The preferred stock is convertible into common stock at the option of the holder at declining rates through

Sept. 30, 1992. Any preferred stock outstanding on Oct. 31, 1992, will automatically be converted into 4.70 shares of common stock.

TEL AVIV, ISRAEL (AUG. 9) PR NEWSWIRE - Laser Industries Ltd. (AMEX: LAS) today reported financial results for the second quarter and six months ended June 30, 1990.

Net sales for the three-month period ended June 30, 1990, were $8,725,000 compared with $8,028,000 for the same quarter a year ago. The company incurred a net loss for the quarter of $66,000, or $0.01 per share, compared with net loss of $1,551,000, or $0.33 per share, for the second quarter of the prior year.

For the first six months of 1990, the company had net sales of $16,253,000 compared with $15,385,000 for the similar 1989 period. Year-to-date net loss amounted to $1,081,000, or $0.23 per share, compared with a net loss of $3,050,000, or $0.65 per share, for the comparable six-month period in 1989.

Net loss for the second quarter and six-month period ended June 30, 1990, includes a provision for income tax in the amount of $300,000 and an extraordinary income of $699,000 resulting from the purchase of $1,195,000 aggregate principal amount of the company's 8 percent convertible subordinated debentures due Sept. 15, 2006.

David Meridor, president of Laser Industries, commented that the second quarter reflects an upward trend in sales, resulting from the introduction of various new products and accessories and the growing number of approved applications for procedures carried out with the company's products.

Laser Industries Ltd. is a leader in the design, development, manufacture and marketing of medical laser systems and accessories sold under the trade name "Sharplan."

#90221p3867 08/09/1990 ~PR Newswire

CHICAGO (AUG. 9) PR NEWSWIRE - Foote, Cone & Belding Communcations, Inc. (NYSE: FCB), today reported a net income gain of 9.4 percent for the second quarter, and noted that the comparable year-ago period included a one-time income gain of $880,000. Second quarter revenues gained 6.4 percent; while first half earnings were off slightly compared to 1989.

Net income for the second quarter ending June 30, 1990, was $7,474,000 or $.73 per share, an increase of 9.4 percent from 1989 second quarter earnings of $6,833,000 or $.67 per share.

Revenues for the consolidated portion of FCB's operations totaled $84,720,000, up 6.4 percent from 1989 second quarter revenues of $79,627,000. FCB's proportionate share of European revenues also increased substantially to $51,785,000, compared to $41,262,000 in 1989.

Operating margins for consolidated operations were $7,553,000 or 8.9 percent of revenues compared to $7,004,000 or 8.8 percent of revenues in the prior year's quarter.

Equity income, primarily FCB's share of European operations resulting from its alliance with Publicis Communication, was $4,397,000 in 1990, compared to $2,909,000 in 1989. This reflects both improved European operating performance and a reduction in agency rationalization expenses connected with the alliance in 1989.

Second quarter 1989 results included a gain on the sale of Golin/Harris Communications Inc. and a charge to settle future lease obligations in Canada. On an after-tax basis, these items added $880,000 or $.09 per share to 1989 net income.

Net income for the six months ended June 30, 1990, was $8,815,000 or $.86 per share, compared to $9,118,000 or $.90 per share in 1989.

Revenues totaled $156,910,000 in 1990, compared to $156,965,000 in 1989 for the consolidated operations. After adjusting for the 1989 divestiture of Golin/Harris, revenues were up 3.4 percent from the prior year. FCB's proportionate share of European revenues increased from $74,414,000 in 1989 to $90,967,000 in 1990. Equity income increased to $5,285,000 compared to $2,752,000 in 1989 due to the improvement in Europe.

FCB is the fifth largest advertising agency in the United States and the seventh largest worldwide. Its network includes 153 offices in 40 countries, with worldwide billings totaling $4.6 bullion.

#90221p3870 08/09/1990 ~PR Newswire

GEORGE TOWN, Grand Cayman, British West Indies (AUG. 9) PR NEWSWIRE - The Florida Employers Insurance Company (NASDAQ-NMS: FLAEF) announced today that its earnings for the six months ended June 30, 1990 were $1,759,586 or 78 cents per share. Earnings for the three months ended June 30, 1990 were $943,616 or 42 cents per share. The earnings reported for the similar six month and three month periods in 1989 were $1,958,949 or 87 cents per share and $968,163 or 43 cents per share, respectively.

The company also announced its continued quarterly dividend of 7 cents per share, with the next dividend payable Aug. 31, 1990 to shareholders of record on Aug. 15, 1990.

In addition, the company has recently received updated information on the status of its funds on deposit with British and Commonwealth Merchant Bank (Guernsey) Limited (BCMB-Guernsey). As previously reported, these deposits, approximately $6.1 million, have been frozen and have been unavailable to the company since early June as the result of BCMB-Guernsey's parent company, British and Commonwealth Merchant Bank plc (BCMB-London) being placed in administration. The administrators of BCMB-London have prepared and released a report which contains unaudited financial information prepared by management of BCMB-London on a consistent basis with past years showing shareholders' funds of approximately 89.75 million pounds, as of June 30, 1990. The administrators report that, in accordance with the Administrative Order, they are currently negotiating with parties showing a serious interest for a sale of BCMB-London to enable all creditors and depositors to be paid in full. Interest continues to accrue on the company's deposit.

READING, PA. (AUG. 9) PR NEWSWIRE - Two new directors were elected to the Carpenter Technology Corp. (NYSE: CRS) board of directors today, bringing board membership to 15.

Elected to the board were: -- Dr. C. McCollister Evarts, senior vice president for Health Affairs, dean of the College of Medicine and professor of Orthopaedic Surgery at The Pennsylvania State University.

-- James A. Flick Jr., executive vice president, chief financial officer and director of USF&G Corp.

Paul R. Roedel, Carpenter's chairman and chief executive officer, said, "We are fortunate to have such qualified people join Carpenter's board. They bring a wealth of experience and diversity of knowledge that will be invaluable in helping Carpenter manage in an increasingly competitive world marketplace."

Evarts received a bachelor's degree in zoology from Colgate University and a medical degree from the University of Rochester School of Medicine and Dentistry.

Before joining Penn State, Evarts was professor and chairman of the Department of Orthopaedics and vice president for development at the University of Rochester School of Medicine and Dentistry. His special area of interest and expertise is adult reconstructive surgery. He serves on the board of directors for the National Association of Biomedical Research, the Hershey Trust and the Hershey Bank, and is a member of the board of managers of the Milton Hershey School.

Flick is a graduate of the University of Maryland with a bachelor of

science degree in accounting. After graduation, he joined Ernst & Whinney (now Ernst & Young), a public accounting firm, where he held a variety of positions, including managing partner of the Harrisburg office in 1971 and the Baltimore office in 1978.

He joined USF&G in November 1988 in his current position. Flick serves as a director of the Dome Corp. and serves on numerous community and educational boards of directors.

ATTLEBORO, MA (AUG. 9) PR NEWSWIRE - Marshall Tulin, president of Swank, Inc. (NASDAQ: SNKI) today reported sales and earnings for the second quarter and six months ended June 30, 1990.

Tulin indicated the decline in earnings for this period is attributable to the softness in retail sales during the first half of 1990. Cost-saving measures have been instituted in response to this sluggish retail outlook.

Swank manufactures and markets men's and women's jewelry, belts, personal leather goods, fragrances and gift items. The company distributes its products to retail outlets throughout the United States and in 50 foreign countries. These products which are known throughout the world, are distributed under the names "Swank," "Colours by Alexander Julian," "Royal Copenhagen," "Pierre Cardin," "L'Aiglon," "Anne Klein," "Richard Scott," "Etienne Aigner," "90 Park," and Anne Klein for Men," among others. Swank, Inc. also manufactures jewelry and leather items for distribution under private label.

SEMINOLE, FL (AUG. 9) PR NEWSWIRE - Gerald M. Benstock, chairman and CEO of Superior Surgical Mfg. Co., Inc. (AMEX: SGC), manufacturer of uniforms, career apparel and accessories, today announced that the board of directors had declared a quarterly dividend of $.18 per share, payable Sept. 6, 1990 to shareholders of record Aug. 23, 1990.

At the board meeting Benstock said: "Having just achieved the greatest sales and earnings results for any second quarter and first six month period in this company's history, and with a strong backlog of orders, we are confident that 1990 will surpass all previous records."

Superior Surgical manufactures and sells a wide range of uniforms, career apparel and accessories for the hospital and healthcare fields; hotels; fast food and other restaurants; and public safety, industrial, transportation and commercial markets.

SAN FRANCISCO (AUG. 10) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) announced Thursday that it has cited Michael Sadd, owner of Sadd Laundry and Dry Cleaning Supplies, for violations of federal hazardous waste management laws, and proposed civil penalties totaling $34,698.

This enforcement action resulted from an inspection of the facility, located at 1359 Colburn St., Honolulu, Hawaii, by the Hawaii Department of Health.

The complaint cited Sadd for violations of federal requirements for the transportation of hazardous wastes. Sadd ships wastes containing perchloroethylene, a hazardous material, from dry cleaners to its facility. The wastes are then transported to a treatment, storage or disposal facility in California. EPA regulations require proper manifests to accompany each load of hazardous waste transported. This documentation was lacking at the time of the facility inspection.

Sadd was also charged with storage of hazardous wastes without a permit. Federal law allows a transporter of hazardous wastes to store this material for up to 10 days without applying for a permit. The order cites Sadd for storing wastes for at least 390 days before moving this material offsite for transport to a disposal facility.

Sadd Laundry and Dry Cleaning Supplies must respond to the EPA order by Sept. 3.

PALMERTON, PA (AUG. 9) PR NEWSWIRE - Horsehead Resource Development Company, Inc. (NASDAQ: HHRD) today reported revenues of $12.5 million and net income of $4.5 million, or $.14 per share, for the second quarter ended June 30, 1990. For the comparable period last year, the company's revenues were $11.4 million with net income of $2.6 million, or $.08 per share, exclusive of a one-time gain on the sale of assets which added $3.5 million of net income, or $.11 per share, to 1989s results.

For the six months HRD reported revenues of $24.1 million and net income of $8.3 million, or $.26 per share. For the comparable period a year ago, HRD's revenues were $22.2 million with net income of $4.8 million, or $.15 per share, exclusive of the asset sale.

"Our EAF dust processing business continues at a strong pace," James H. David, president and CEO reported. "We were sold out throughout the quarter and were able to institute a price increase. Our capacity expansions at Rockwood, Tenn., and Palmerton, Pa., remain on schedule for start-up in the fourth quarter. Further, we signed new three-year labor agreements at our large Palmerton, Pa., facility."

HRD is a leader in specialized hazardous waste/resource recovery services emphasizing the recovery of zinc, lead and cadmium from electric arc furnace dust, and the recycling of these materials into useful products.

WASHINGTON (AUG. 9) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced a network management service that allows large corporations to route and control domestic and international toll-free calls on a virtually real-time basis to accommodate changing call volumes throughout the work day.

MCI is the first long distance carrier to extend this capability to customers using international toll-free inbound, as well as domestic 800

service.

Available now, MCI's 800 CM (Configuration Management) capability enables customers to access MCI's 800 network intelligence through an on-site customer terminal. Using either dial-up or dedicated access, customers can change their 800 network routing and, within an average time of five minutes, can activate alternative plans stored in the MCI 800 routing database.

This network management tool, offered as an advanced feature of MCI 800 Service, is designed to allow large corporations to more efficiently manage the flow of toll-free inbound traffic between multiple calling centers.

"This capability is critical to companies who use 800 service as a strategic business tool in key sales and service applications here and abroad," said Greg LeVert, MCI vice president for large accounts.

"In today's business environment, 800 customers require tools to maximize their call handling capacity and to balance traffic loads to ensure all calls are answered. MCI's 800 CM is designed to meet those needs and help our customers manage their business better," LeVert said.

"It also represents an additional step in MCI's overall network management strategy to provide customers with the ability to monitor, analyze and control their MCI inbound, outbound and data services worldwide," LeVert added.

MCI, with 1989 revenue of $6.5 billion, is headquartered in Washington. It is the world's second largest long distance company and provides a full array of domestic and international voice, data, telex and electronic messaging services to business, residential and government customers.

NEW ORLEANS (AUG. 9) PR NEWSWIRE - McDermott International, Inc. (NYSE: MDR), announced today that McDermott Marine Construction, through the company's McDermott Incorporated subsidiary, received contracts from Shell Offshore Inc. for deck fabrication, mating of the deck and hull, and installation of the Auger Project Tension Leg Platform (TLP), its mooring system, and deepwater pipelines off the coast of Louisiana in the Garden Banks area of the Gulf of Mexico. Total value of the work is approximately $200 million.

Shell's Auger TLP is the largest structure of its kind offshore and will be installed in 2,860 feet of water in Garden Banks Block 426. Installation is scheduled for completion in early 1993.

McDermott's fabrication yards in Morgan City and New Iberia, La., and Corpus Christi, Texas, will work on portions of the project. Its Derrick Barge DB 50, with dynamic positioning capability, will assist in mating the deck and hull portions of the TLP in the Gulf and in the installation of the completed platform.

The DB 50 will also lay the pipelines, which will start in 2,860 feet of water and end in approximately 1,200 feet, making them the deepest pipelines in the Gulf. They will be installed using the vertical J-laying technique, the first commercial use of this advanced pipelaying technology.

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

DOMINGUEZ, CA. (AUG. 9) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that its sales for the four weeks ended July 29, 1990 were $31,40,700, up 8.3 percent from $28,994,000 in the prior year. Sales for the 26 weeks ended July 29, 1990 were $231,642,100, up 15.7 percent from $200,281,400 in the prior year. Sales in comparable stores, excluding the 14 Job Lot Pushcart stores for the month of July and for the year to date, increased over the prior year by 2.7 percent and 5.3 percent respectively.

The company also announced that, as part of its previously announced restructuring program, it discontinued operation of its Job Lot Pushcart stores in New York and New Jersey on August 7 and 8 by conveying the facilities back to the former owner in accordance with the acquisitions agreement and by selling the inventory to a third party.

"Sales continue to be positive through the most recent month even against substantial seasonal clearance sales of discount store and department store retailers in our markets," said Lewis B. Merrifield, III, president and chief executive officer. "Although next month's sales comparison will be impacted as a result of cycling against extraordinary high sales in the prior year August from a special promotion program at that time, we continue to be very optimistic about the sales outlook for the September through December period."

The company, through its subsidiary, PNS Stores Inc. operates a chain of 176 retail stores in the Far West and the South. These stores all specialize in new, closeout, variety general merchandise which is sold at substantial reductions from original retail prices.

#90221p3917 08/09/1990 ~PR Newswire
WASHINGTON (AUG. 9) PR NEWSWIRE - The Air Line Pilots Association issued the following statement today in reaction to reports that Frank Lorenzo intends to sell his airline interests to SAS:

We welcome the news that Frank Lorenzo intends to divest himself of his airline interests and leave the industry. From the beginning, ALPA has maintained that Lorenzo is not fit to successfully operate an airline. His inability to sustain Eastern Airlines and Continental Airlines as viable, profitable operations in the midst of the biggest airline boom in history proves the point. We believe that the industry and the traveling public will be better served and safer with him gone.

Lorenzo, through his scorched-earth approach to labor and to other business dealings, has caused more disruption, rancor and hardship in the industry than any other individual in recent airline history. There is no way that he or anyone else can make restitution for the chaos and personal tragedies that he has inflicted in pursuit of personal gain for himself and his associates; but if the reports are correct, then we gladly accept his departure.

Nevertheless, in typical Lorenzo style, his exit leaves some troubling questions and loose ends. Lorenzo reportedly will keep a seat on the board of Continental Airlines Holdings, Inc., so his departure is not quite complete. Lorenzo appears to have relinquished control but has left his foot in the door.

The terms of his exodus and the nomination of his replacement raise questions of how much control SAS has exercised and will exercise over Continental Airlines Holdings, Inc. Many important details have yet to be revealed, but there are substantial questions over whether the stock ownership by SAS is within the limits prescribed by law. Furthermore, as the recent Discovery Airways case showed, the lack of majority ownership of stock in an airline is not always equivalent to a lack of actual control. We will be monitoring this transaction to assure that the spirit as well as the letter of the law forbidding foreign control of U.S. air carriers is not violated. The question of SAS control also could have ramifications for SAS if Eastern defaults on its pension obligation of as much as $800 million, because under the law Continental Holdings will be held liable for that obligation.

The Eastern pilots Master Executive Council will examine what effect Lorenzo's departure may have on their contract dispute. The pilot contract talks were declared at an impasse last month. The 30-day

cooling off period expires at midnight the evening of Friday, Aug. 10, after which Eastern would be free to impose its last offer and the pilots would be free to strike.

Finally, we note that Lorenzo bailed out with a golden parachute. This may raise some interesting questions for Eastern's unsecured creditors, who have yet to be paid the first dollar by the bankrupt subsidiary of Continental Holdings. Continental Holdings stockholders, who saw their shares plummet to today's $4.50 level from a high in excess of $40 a few years ago, may want to question why Lorenzo was able to sell his shares to SAS at more than triple the current street value.

#90221p3918 08/09/1990 ~PR Newswire

SAN ANTONIO, Texas (AUG. 9) PR NEWSWIRE - Lancer Corp. (AMEX: LANCER), a San Antonio-based leading manufacturer of fountain soft drink and other beverage dispensing systems sold worldwide, today announced results of operations for the second quarter and six-month period ended June 30, 1990. Lancer Corp., currently with 550 employees, was founded 23 years ago.

Revenues for the six-month period ended June 30, 1990, were $21,190,289 compared with $16,229,819 for the previous year's six-month total. Revenues for this year's second quarter amounted to $12,033,485 compared to $8,361,892 generated during last year's second quarter. These increases reflect renewed demand for the company's citrus dispenser and a overall increase in all other product lines.

Net earnings for the six-months and quarter ended June 30, 1990, were $708,215 and $542,682, respectively, as compared to the prior year's totals of $455,480 and $214,010.

The net earnings per share for the six months and second quarter ended June 30, 1990, increased to $.30 and $.23, respectively, from $.20 and $.09 for the comparable period in 1989.

Earnings as a percentage of sales have been lower in 1990 than 1989 due to the generally higher unit cost of inventory held at year-end in 1989 compared to 1988. Unit costs increased in 1989 due to assembly line relocations and reduced sales volume, but are expected to diminish in 1990 with improved manufacturing efficiency and inventory turns.

#90221p3922 08/09/1990 ~PR Newswire

MADISON, N.J. (AUG. 9) PR NEWSWIRE - Schering-Plough Corporation (NYSE: SGP) announced today that it is discontinuing its worldwide registration and marketing program for dilevalol hydrochloride (SCH 19927) in hypertension due to evolving evidence of isolated cases of liver toxicity.

"Although the actual number of hepatotoxicity cases was quite small in relation to the number of patients using dilevalol, our decision was taken in the best interest of the potential patient population for the drug," said Alexander Z. Lane, president, Schering-Plough Research.

The company is halting sale of dilevalol in the only two countries where it is marketed, Japan and Portugal, and is withdrawing applications to market the product worldwide. The company's dilevalol sales, for the first eight months since introduced overseas, totaled about $20 million.

Suspension of the company's effort to market dilevalol will have no material impact on its 1990 financial results or its projected 1990 earnings per share, which are still expected to increase by 18 to 20 percent over 1989 levels.

Dilevalol has been marketed in Portugal under the brand name 'Unicarde' since February 1990, and was introduced in Japan in December 1989 as 'Levadil' by the company's subsidiary Schering-Plough K.K. and as 'Dilevalon' by Shionogi & Co., Ltd. In the United States, the company's New Drug Application was filed in 1986. The designated brand name was 'Unicard.'

"We're obviously disappointed that this compound has encountered such a problem," observed Richard J. Kogan, president and chief operating officer. "It's part of the natural process of research and development on new therapeutic entities, though, that not all products succeed.

"Our product pipeline contains a number of important compounds in several therapeutic fields," Kogan continued. "We will continue to develop our many other compounds, a number of which are in an advanced stage of development."

Schering-Plough Corporation is a research-based company engaged primarily in the discovery, development, manufacturing and marketing of pharmaceutical and health care products worldwide.

KANSAS CITY, MO (AUG. 9) PR NEWSWIRE - Kansas City Power & Light Company (NYSE: KLT) announced today that the Kansas Corporation Commission has ordered that an Aug. 24, 1990, scheduling conference be held to discuss a procedural schedule and those issues which may arise as a result of Kansas City Power & Light's July 23, 1990, application to the commission for approval of its proposed merger with Kansas Gas and Electric Company (NYSE: KGE).

The Kansas Commission, in an Aug. 6, 1990, order, set a scheduling conference to commence at 9:30 a.m., on Aug. 24, 1990, at the commission's offices in Topeka, Kansas. The commission's order also provided that any interested parties wishing to intervene in this matter should file a petition to intervene on or before the scheduling conference convenes on Aug. 24, 1990.

On July 23, 1990, Kansas City Power & Light commenced an all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric. The offer price for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer.

Kansas Gas and Electric, headquartered in Wichita, Kan., is an electric utility which generates, transmits, distributes and sells electricity in the southeastern quarter of Kansas, including the Wichita metropolitan area. In 1989, Kansas Gas and Electric's revenues totaled $533.5 million with net profits of $47.5 million.

As of Dec. 1989, Kansas Gas and Electric has 1,330 employees and last year provided service to over 254,000 customers.

Kansas City Power & Light, headquartered in Kansas City, Mo., is a medium-sized public utility engaged in the generation, transmission, distribution and sale of electricity. In 1989, the company's revenues exceeded $730 million and its net income was $108.6 million. Kansas City Power & Light employs over 2,800 people and currently serves over 409,000 customers ranging across a 4,700 square mile area of western Missouri and eastern Kansas.

#90221p3925 08/09/1990 ~PR Newswire

CLEVELAND (AUG. 9) PR NEWSWIRE - Fabri-Centers of America, Inc., (NYSE:

FCA), today announced record high sales in both the second quarter and fiscal half ended July 28, 1990, as the seasonal loss generally experienced during this period was reduced.

Net sales in the quarter totalled $75,857,000, or 13 percent above the $67,320,000 recorded a year earlier. The net loss improved by 7 percent to $1,158,000, or 22 cents per share, compared to $1,251,000 or 24 cents per share for the second quarter of the prior year.

Through the first six months, sales of $155,995,000 were 10 percent above the $141,458,000 for the prior year. The net loss of $530,000 or 10 cents per share was 27 percent better than the prior year six month loss of $727,000, or 14 cents per share.

The reduced loss for the quarter and six months, was accomplished despite substantial startup costs associated with the relocation of the company's offices and distribution center complex from Beachwood to nearby Hudson, Ohio.

Fabri-Centers said the favorable sales results reflected significant volume gains from its strategy of shifting from small stores in regional malls to larger stores in strip shopping centers.

In the first half, the company opened 37 new prototype stores, and closed 35 smaller stores. To date the company has approximately 160 new larger prototype stores, or 26 percent of the store base. These larger stores carry a higher fixed cost and put some earning pressure on the company's weaker first and second quarters, but are anticipated to dramatically enhance profitability in the all important retail fourth quarter.

The company said that business trends are currently very good, and anticipates the full year results to be sharply improved over the prior year.

The company currently operates 617 fabric stores in 35 states, and 16 Cargo Express houseware stores.

DALLAS (AUG. 9) PR NEWSWIRE - Texas Instruments today said all semiconductor assembly and testing operations have been restarted at its Baguio, Philippines, facility. As previously announced, operations there were interrupted after the July 16th earthquake caused limited damage to the TI facility and disrupted local utility and support services in

Baguio. There were no TI injuries on site, and only a few minor injuries to employees in the Baguio area.

The majority of product at the facility was undamaged and shipments were resumed quickly. TI is working to replace lost production using expedited manufacturing schedules, subcontractors and other worldwide resources. TI expects to achieve pre-earthquake product output levels within the next two weeks, even though building and site repairs will continue for the next few months.

TI has been working closely with its customers to minimize the impact of this situation on their business activities. The third quarter financial impact to TI caused by the earthquake is still being assessed.

CLEVELAND (AUG. 9) PR NEWSWIRE - Alliance Bancorporation has been informed by the district director of the Internal Revenue Service in Anchorage, Ala. that no tax is due for 1987 and 1988. This action appears to resolve federal income tax issues described in the company's Form 10-K of Dec. 31, 1989. The decision was based on the fact that net operating losses exceed the proposed adjustment. Although the IRS could reconsider its decision, such action is not expected.

Resolution of the tax issues clears the way for a refund of approximately $2,234,000, including interest, from the IRS and the State of Alaska, payable to either the company or the Federal Deposit Insurance Corporation receiver for the company's former wholly owned subsidiary, Alliance Bank. The recipient of the refund has not been determined.

Shareholders have adopted a plan of liquidation which calls for distribution of all assets. The distribution will be made to shareholders of record on April 10, 1990. The company's board of directors will establish the amount and timing of the distribution.

ROCKFORD, Ill. (AUG. 9) PR NEWSWIRE - Sundstrand Corporation (NYSE: SNS) announced today entry into a settlement agreement to fully dispose of shareholder litigation currently pending in federal district court in Chicago and in Delaware state court. The shareholder actions were initially filed against certain current and former officers and directors of the company in the wake of Sundstrand's guilty pleas in October 1988 in connection with its federal government contracting procedures and a tax matter. In entering the settlement, the defendants continue to deny any liability to Sundstrand or its shareholders.

The terms of the settlement, which remains subject to court approval, include payment of $15 million to the company, from the proceeds of insurance policies, less the fees and expenses of counsel for the shareholder plaintiffs. Sundstrand has also agreed to implement certain corporate governance procedures as a condition of the settlement.

Harry C. Stonecipher, president and chief executive officer of the company said, "Sundstrand is extremely pleased that this litigation has been resolved without the need for protracted litigation. This development puts the company's past difficulties squarely behind it, and will enable Sundstrand to focus on meeting the challenges of the future."

Sundstrand Corporation, with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. Sundstrand's common stock is listed on the New York, Midwest, and Pacific Stock Exchanges.

UPPER SADDLE RIVER, NJ (AUG. 9) PR NEWSWIRE - Western Union Corporation (NYSE: WU) reported today that its net loss for the quarter ended June 30 was $27.6 million. This compares with a net loss of $4.9 million for the second quarter of 1989.

The second-quarter loss included $5.4 million of costs incurred in connection with Western Union's proposed recapitalization plan. The results for last year's second quarter included income of $5.6 million from settlement of claims relating to the purchase in 1987 of the former ITT World Communications, Inc., income of $5 million from termination of a pension plan, and $6 million of restructuring charges.

After giving effect to undeclared dividends on preferred shares, the 1990 second-quarter net loss amounted to 44 cents per common share (based on a weighted average of 89.1 million shares outstanding), compared with a net loss of 40 cents per share (based on a weighted average of 44.4 million shares outstanding) in last year's second quarter. The year-to-year increase in common shares was due mainly to conversions of Western Union Class B convertible preferred shares into common shares during the past 12 months.

For the first six months of 1990, the corporation had a net loss of $45.7 million, which amounted to 81 cents per common share (based on a weighted average of 84.9 million shares outstanding). The net loss reported for the first six months of 1989 was $5.1 million, or 72 cents per common share (based on a weighted average of 43.5 million shares outstanding).

Total revenues were $146 million for the second quarter of 1990 and $291 million for the first six months. This compares with 1989 revenue levels of $159 million and $317 million, respectively. The 1989 revenue totals included $4 million for the second quarter and $8 million for the six months from services which are no longer provided by Western Union.

RESTON, VA (AUG. 9) PR NEWSWIRE - Systems Center Inc. (NYSE: SMX) and UNITECH Software, Inc., both of Reston, today announced the signing of a definitive agreement regarding a planned merger.

Systems Center is a leading marketer and developer of systems and network management products for diverse computer environments. UNITECH provides UNIX systems utilities and network administration software.

Under the terms of the agreement, Systems Center will issue common stock in exchange for all outstanding UNITECH common stock. The actual value of the transaction will be fixed upon closing, and is expected to fall within the range of $4.5 million - $6.8 million. The transaction will be accounted for as a pooling of interests, and is subject to approval of Systems Center shareholders and certain other matters. Closing is expected in the fourth quarter of 1990.

UNITECH will become a wholly-owned subsidiary of Systems Center. Also, UNITECH employee stock options currently exercisable will be converted to similar options to purchase Systems Center common stock.

UNITECH President and Chief Executive Officer Paula J. Brooks, commented that "As customers increasingly seek a single-vendor solution, UNITECH looks forward to leveraging the benefits of Systems Center's size and reputation as a respected software vendor. UNITECH has a leading position in the UNIX systems and network administration market, and Systems Center's strategy includes expansion into diverse environments -- the timing was right for both parties in this transaction."

Systems Center, Inc. develops, markets and supports systems, network and relational database software. The company offers over 50 products, including NET/MASTER for network and systems management; Network DataMover for data transfer among multiple operating environments; VMCENTER II for IBM's VM operating system; and relational database products for IBM's SQL/DS and DB2.

UNITECH, founded in 1985, provides UNIX systems utilities and network administration software. Year-end revenues through May 31, 1990, were approximately $1.5 million. Estimated revenues for calendar year 1990 are $3.0 million. The company has over 300 customers at 2,000 sites, with a strong presence in the federal government. Products include a suite if UNIX stand alone systems utilities and BACKUP.UNET for management of networked UNIX systems.

LOS ANGELES (AUG. 9) PR NEWSWIRE - Carolco (NYSE: CRC) Chairman Mario Kassar announced today that Carolco has signed a first look development deal with Alan J. Pakula to write, a direct and produce motion pictures. Pakula's most recent film, "Presumed Innocent," stars Harrison Ford and Bonnie Bedelia. "Presumed Innocent," (based on the Scott Turow novel) directed and co-written by Pakula, has received great critical acclaim and has earned more than $28 million at the box office in only 10 days of

release.

Pakula's director credits inlcude the films "All the President's Men," "Sophie's Choice," "Starting Over," "Klute," "The Parallax View" and "See You in the Morning" among others. In addition to producing the above-mentioned titles, Pakula produced "To Kill a Mockingbird," "Love With a Proper Stranger," and "Up the Down Staircase" among others.

Pakula has won numerous awards including the New York Film Critics for Best Director for "All the President's Men," and the London Film Critics for best director for "Klute." Pakula has received Academy award nominations for directing "All the President's Men" and co-writing "Sophie's Choice."

Carolco's Kassar commented: "Alan Pakula is a unique talent and we are very pleased to have him joining Carolco. We look forward to a successful collaboration."

#90221p3953 08/09/1990 ~PR Newswire

MIAMI (AUG. 9) PR NEWSWIRE - Aero Systems, Inc. (NASDAQ: AESM) today announced that the federal appeals court in California has reversed the decision of the lower federal court in the SIPC action. A petition to the United States Supreme Court is being considered by the company's president.

Seven years ago in July 1983, the Securities Investor Protection Corporation (not a government agency) and trustees in liquidation for two securities broker-dealers filed suit in the U.S. District Court for the Central District of California against 12 companies and 22 individuals, including Aero and the company's president (SIPC action).

The complaint alleges manipulation of certain over-the-counter securities, including the stock of the company, violations of the Racketeer Influenced and Corrupt Organizations Act and the Securities Exchange Act of 1934 and other matters. Plaintiffs seek damages against all defendants, jointly and severally, in excess of $15,000,000, trebling of damages and punitive damages in an amount up to $100,000,000.

In October 1988, the court granted summary judgments in favor of the company's president with respect to all substantial claims asserted in the SIPC action. Summary judgement was granted upon the grounds that the president's conduct did not cause the failure of the securities brokerage firms and that neither SIPC nor the Trustees had standing to commence the action. The summary judgments awarded in favor of the company's president

were appealed by SIPC and the Trustees.

In its opinion dated Aug. 3, 1990, the 9th U.S. Circuit Court of Appeals in California reversed the favorable decision of the lower court. Robert Holmes, Aero's president, is contemplating petitioning the United States Supreme Court. At this time, it is not known whether the stay in the SIPC action will remain in effect and whether the United States Supreme Court will entertain jurisdiction of the dispute.

CONTACT: Robert G. Holmes Jr., president of Aero Systems, Inc., 305-871-1300.

TAUNTON, MA (AUG. 9) PR NEWSWIRE - GTE Government Systems today announced receipt of a $19.6 million contract from the U.S. Army to supply a Mobile Subscriber Equipment (MSE) communications-network simulator that will provide a realistic training environment while saving time and money.

Awarded by the Army's Communications and Electronics Command (CECOM), Fort Monmouth, N.J., the agreement calls for GTE to furnish a simulator that will train army personnel in operation and maintenance of the GTE MSE tactical-communications system. GTE's MSE system supplies secure voice, data and facsimile capability to U.S. Army communications personnel at corps and division levels. It replaces existing conventional battlefield-communications equipment. A secure digital system, MSE allows military personnel moving quickly through a battlefield to communicate without interruption.

"The simulator, consisting of student workstations that represent MSE shelters, instructor consoles and a network emulator, features a wide range of training capabilities without requiring MSE shelter equipment," said Armen DerMarderosian, vice president and general manager of GTE's Command, Control and Communications Sector.

"It offers flexible network configuration, a capacity for 'trouble shooting' that permits controlled introduction of faults, and cost-effective training," DerMarderosian added. "The simulator replicates the actual system while allowing instructor support that enhances training."

The simulator will be installed in the GTE resident school, which opened in March 1989 at Fort Gordon, Ga. Performance on the simulator agreement continues through August 1991.

Work on this contract is performed at GTE's Mobile Subscriber Equipment Division, headquartered here. The division, part of the Command, Control and Communications Systems Sector (C3), is prime contractor to the Army

for the MSE program. Total estimated value of the MSE contract is more than $4 billion.

GTE Government Systems is a leading supplier of command, control, communications and intelligence systems for defense, governments and industry in the United States and abroad.

GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications lighting and precision materials -- providing products and services worldwide.

DETROIT (AUG. 9) PR NEWSWIRE - U.S. car/truck output for this week is estimated at 190,710, Ward's Automotive Reports said today.

All U.S. passenger-car manufacturers were assembling cars this week. This week's total vehicle production was up 14.4 percent from last week's revised total of 166,571 cars and trucks, and 4.0 percent higher than same-week 1989's 183,292 units, Ward's reported.

Estimated U.S. car output for the week ending Aug. 11 is 122,969, bringing the year-to-date estimate for 1990 up to 3,763,822, 87.5 percent of like-1989's total of 4,297,827 cars, said Ward's.

Chrysler Corp.'s U.S. Jeep assembly came back on line this week, after several weeks of downtime for vacation and changeover. U.S. truck output is scheduled at 67,741 units this week, bringing the estimated year-to-date total to 2,414,951. This is equal to 92.16 percent of year-ago's 2,620,303.

Of this week's estimated U.S. car output, General Motors Corp.'s share was 39.1 percent; Ford Motor Co. produced 28.7 percent of all cars; Chrysler Corp. produced 11.3 percent; Honda, 7.5 percent; Toyota, 3.6 percent; NUMMI, 3.3 percent; Mazda, 3.0 percent; Diamond-Star Motors, 2.6 percent; Subaru-Isuzu Automotive, 0.5 percent; and Nissan, 0.4 percent.

Other exp., net	200,000	--	200,000	--
Inc. bef. inc. taxes	2,412,000	3,461,000	902,000	2,010,000
Prov. for inc. taxes	1,110,000	1,590,000	430,000	920,000
Net income	$ 1,302,000	$ 1,871,000	$ 472,000	$ 1,090,000
Earnings per share	$.18	$.26	$.06	$.15

During the second quarter of 1990, the company began the process of analyzing whether or not certain branch operations should be sold or spun off into joint ventures. Certain of these branches were acquired as part of the ADT acquisitions in December 1988. This decision was based primarily on the company's belief that such branches might be more effectively operated with significant local ownership. This review to sell or joint venture some of all or these operations will be made based upon further analysis, which will include the terms and prices available.

Other expenses, net, for the three and six month periods ended June 30, 1990, includes a provision for the anticipated expenses related to the proposed cash merger of the company with ISS A/S, net of a gain based upon the company's sale of certain security operations.

The 1990 and 1989 earnings per share have been fully diluted for the 25,000 shares of convertible preferred stock issued to ISS A/S in connection with the financing of the acquisition of ADT. If converted, the preferred stock would equal 3,333,333 shares of common stock. The total number of outstanding common shares used in the earnings per share calculation is 7,169,574, for both years.

The board of directors has declared a common stock dividend of $.06 per share to be paid on Sept. 21, 1990, to stockholders of record at the close of business on Aug. 31, 1990. The same record date will determine the stockholders eligible to vote on the proposed merger agreement, announced previously, whereby the company would become a wholly owned subsidiary of ISS A/S.

ISS International Service System, Inc. is a national service company providing cleaning, indoor environmental management services, landscape management, security, mechanical and other related maintenance services.

NORTHVALE, NJ (AUG. 9) PR NEWSWIRE - John H. Klein, president and chief

executive officer of Zenith Laboratories Inc. (NASDAQ: ZENL), a New Jersey-based pharmaceutical company, today announced that Zenith has finalized an agreement with Trimel Corp., a Toronto-based pharmaceutical and research company, for the development, manufacture, marketing and distribution of a major sustained release calcium channel blocker used extensively for the treatment of cardiovascular disease.

Under the agreement, Zenith and Trimel will manufacture the drug. Zenith will have the exclusive marketing rights in the United States for the sustained release anti-hypertensive and anti-anginal drug.

Zenith has agreed to pay Trimel periodic licensing fee payments in advance of FDA approval with final fee payments to be completed 90 days after the date of the first sale of the drug by Zenith. Zenith will also pay Trimel on an ongoing basis a portion of profits realized on the sale of the drug.

The product is in the final stages of development with innovator exclusivity expiring in 1992.

NEW YORK (AUG. 9) PR NEWSWIRE - Trans World Airlines and Philippine Airlines have sent the first of many shipments on behalf of New York area Filipino organizations which are providing assistance to those whose lives were devestated by the earthquake in the Philippines last month.

The first shipment contained medical supplies, blankets and clothing for the more than 3,000 injured in the earthquake which measured 8.0 on the Richter scale and killed more than 1700 people.

Shipments leave New York on TWA and are transferred to Philippine flights to San Francisco or Los Angeles.

TWA and Philippine Airlines also provided transportation for several Filipino bands who were flown to New York for a benefit concert in Central Park. The concert raised a significant amount of money for the earthquake victims.

This month TWA and Philippine Airlines celebrate the first year anniversary of their marketing agreement which brought Philippine Airlines back to the New York area after an absence of several years. Passengers traveling to Manila from New York fly TWA to Los Angeles or San Francisco where they transfer to Philippine Airlines' flight to Manila.

TWA and its commuter affiliates serve more than 125 cities throughout North America, Europe, the Middle East and Africa.

NASHVILLE, TN (AUG. 9) PR NEWSWIRE - GENESCO Inc. (NYSE: GCO) announced today that its board of directors has adopted a shareholders rights plan under which shareholders will receive rights to purchase shares of preferred stock.

William S. Wire II, chairman and chief executive officer of GENESCO, said, "While the rights plan was not adopted in response to any specific effort to acquire control of GENESCO, and the Company is not aware of any such

effort, the rights are designed to enhance the board's ability to protect shareholders from abusive and coercive takeover techniques."

When exercised, each right would entitle shareholders to buy one one-hundreth of a share of a new series of subordinated serial preferred stock at a price of $20.

The rights will become exercisable only if a person or group acquires 10 percent or more of GENESCO's common stock or announces a tender offer which would result in ownership by a person or group of 10 percent or more of the common stock.

If GENESCO were acquired in a merger or other business combination transaction, each right would entitle its holder to purchase, at the right's then-current exercise price, a number of the acquiring company's common shares having a market value of twice such price.

In addition, if a person or group acquires 10 percent or more of GENESCO's outstanding common stock, each right would entitle its owner, other than the acquiring person or members of the acquiring group, to purchase at the right's then-current exercise price a number of GENESCO's common shares having a market value of twice that price.

After a person or group acquires beneficial ownership of 10 percent or more of the Company's common stock and before an acquisition of 50 percent or more of common stock, the board of directors could exhange the rights, other than rights owned by the acquiring person or group, in whole or in part, at an exchange ratio of one share of common stock, or one one-hundredth of a share of the new series of preferred stock, per right.

Until a person or group acquires beneficial ownership of 10 percent or more of GENESCO's common stock, the rights will be redeemable for one cent per right at the option of the board of directors.

The rights will be distributed to shareholders of record on Aug. 22, 1990, and will expire on Aug. 21, 2000, unless earlier redeemed. The rights distribution is not taxable to shareholders.

CONTACT: Teresa N. Miller (Media), 615-367-8281, or James S. Gulmi (Financial), 615-367-8325, both of GENESCO, Inc.

CHICAGO (AUG. 9) PR NEWSWIRE - Amoco Oil Co. said today that it is temporarily freezing gasoline prices throughout the company's 30-state marketing territory.

The company is also freezing distillate and jet fuel posted prices. "The company will freeze gasoline prices to its dealers and jobbers through Aug. 15 as a continuation of its ongoing policy to set prices in a reasonable and responsible manner," said Robert J. Rauscher, Amoco marketing vice president.

"Amoco may lower prices in individual market areas during this period as market conditions dictate," he said.

Amoco was the first company to state that it supported President Bush's call for "restraint" by oil companies Aug. 8 and that it would continue its policy of responsible actions in the marketplace.

Amoco said that despite rapid increases in crude oil and refined product prices of about 20 cents per gallon in the Gulf Coast and spot markets, it has increased its wholesale gasoline prices on average only about 10 cents per gallon since Aug. 1.

"Amoco has been acting responsibly throughout this period and will continue to do so," he said. "And we have also encouraged our dealers and jobbers to do the same."

Amoco sells gasoline and other petroleum products to dealers and jobbers who operate approximately 10,700 gasoline outlets. Amoco marketers are independent businesspeople who set their own prices.

SAN MATEO, CA (AUG. 9) PR NEWSWIRE - Electronic Arts (NASDAQ: ERTS) today announced that it achieved very strong initial sales results with its first two videogames, Populous(TM) and Budokan(TM), both for the Sega(R) Genesis(R).

Retailer reaction has been very positive from leaders like Jeff Griffiths, vice president and general merchandising manager of Electronics Boutique, a leading software specialty retailer. He commented that, "Unit sales of Budokan and Populous have been as strong as any new release we've ever had for the Sega Genesis." He added, "We have been very pleased with the sales volume on our full range of Genesis products, too."

Babbage's (NASDAQ: BBGS), a leading software specialty retail chain, published what it believes to be the first all-format videogame sales chart by any retailer in the nation. Its Top 10 videogame chart for August, based on retail sales for the month of July, lists Budokan and Populous as the No. 1 and No. 2 best-selling titles for the Genesis, and the No. 2 and No. 3 videogame titles for all formats.

According to Gary Kusin, president of Babbage's, "We think it is very exciting to see two titles for the Sega Genesis selling as well as the best titles for the Nintendo Entertainment System(R) and Game Boy(R). We continue to be very excited about our Genesis business, and its potential for the second half of the year.

Electronic Arts previously announced that it will ship the three above-mentioned new videogames this fall.

LOS ANGELES (AUG. 9) PR NEWSWIRE - The Nestle/Carnation Food Service Company has been formed, according to Carnation President and Chief Executive Officer Timm F. Crull. Fred Hull, formerly senior vice president and general manager of Carnation's Food Service Division, was named president of the new company and will continue to report to Crull.

Crull said the company was formed to "begin the consolidation of food service operations of the various Nestle companies in the United States."

The Nestle/Carnation Food Service Company encompasses the foodservice organizations of Nestle/Hills Coffee Company, Nestle Foods Group and Carnation company. It will be located in Carnation's new Glendale, Calif. headquarters.

The consolidation will create a single focus on the food service industry for Nestle. The Nestle/Carnation Food Service Company will "take advantage of the synergies and critical mass" of the current Nestle-owned companies, said Hull.

For the nation's food service operators, the move will offer a "customer-focused, innovative and quality-oriented supplier that is built on the structure and demands of the industry," he said.

#90221p4021 08/09/1990 ~PR Newswire
CALGARY, Alberta (AUG. 9) PR NEWSWIRE - North Canadian Oils Ltd. (NASDAQ: NCD; Montreal, Toronto: NCO) has announced its results for the first half of 1990 reporting increases in revenue, cash flow, net earnings and natural gas and crude oil production.

Gross operating revenue net of royalties for the first half of 1990, increased 19 percent to $61.6 million due to increased deliverability and higher average sales prices. The average wellhead price received for crude oil and natural gas liquids was $19.35 per barrel, up four percent from the first half of 1989. The average wellhead price for natural gas was $1.46 per thousand cubic feet, up four percent from the first half of 1989. Investment and other income increased 38 percent to $16.8 million in the first half of 1990 because of higher interest rates and a higher average investment portfolio balance.

Cash flow from operations increased 23 percent to $46.1 million from $37.5 million while net earnings at $14.0 million were up 10 percent from $12.7 million in the first half of 1989. Net earnings attributable to common shares increased during the first half of 1990 by 53 percent to $9.3 million from $6.0 million after deducting preferred share dividends of $4.8 million and $6.7 million for 1990 and 1989 respectively. Net earnings per share were $0.26 to June 30, 1990 up 18 percent over 1989 first half earnings per share of $0.22.

Natural gas production reached an all time high of 223 million cubic feet per day for the month of April and averaged 210 mmcfd in the first half of 1990, a 17 percent increase over the corresponding 1989 production figure of 180 mmcfd. Increased deliverability from the Company's seven new facilities were responsible for these gains. Crude oil and NGLs production also increased in the first half of 1990 averaging 4,890 barrels per day versus 4,009 bpd in 1989, an increase of 22 percent. Workovers and 1989 drilling successes are credited for this improvement.

During the first half of 1990, NCO added 61 billion cubic feet of natural gas and 104 thousand barrels of crude oil and NGLs, before revisions, to its proven reserves, replacing first half production by 132 percent on the basis of 10 mcf equaling one barrel.

NCO's capital expenditures for the first half totalled $97.4 million compared to $61.6 million for the first half of 1989. The 1990 capital expenditures include $32.0 million spent on exploration and development; $39.9 million on the acquisition of the 26 percent minority interest of Bankeno Resources Limited; and $20.0 million on the cogeneration facility being developed by the Company in Ada, Michigan. Cogeneration capital expenditures will be refinanced in such a way that a minimal amount of equity capital will be required from NCO. The Bankeno acquisition was financed by the sale of short-term securities from NCO's investment portfolio.

Norm Gish, President of NCO, commented that the Company is gaining the benefit of its investment in natural gas marketing and a successful capital expenditure program for exploration and development.

North Canadian Oils Ltd. is a conservatively managed, financially and technically strong, Canadian oil and gas exploration, production and marketing company. NCO's common shares are traded on the Toronto and Montreal Exchanges in Canada and the American Stock Exchange in the United States.

CULVER CITY, CA (AUG. 10) PR NEWSWIRE - The following board of directors and executive appointments were made at a meeting of the board of directors of Fleet Aerospace Inc.

Cecil G. Cline joins the board as a replacement for A. George Dragone. Bruce W. Gowan has been added to replace John J. Ruffo who remains as deputy chairman of the parent company, Fleet Aerospace Corp.

The executive appointments made were Admiral Elmo Zumwalt as chairman of the board of directors and Cecil G. Cline as president and chief executive officer.

A member of the parent company's board of directors since 1987, Admiral Zumwalt is a retired officer of the United States Navy and is currently serving as a director of a number of major companies. Admiral Zumwalt has been a director of Fleet Aerospace Inc. since Sept. 21, 1987.

Previously responsible for the Fleet Industries and Aeronca operations, Cecil G. Cline assumes responsibilities for all Fleet's major operations.

Bruce W. Gowan, currently vice chairman finance and secretary- treasurer for Fleet Aerospace Corp., has served as both chief financial officer and secretary of Fleet Aerospace Inc.

A. George Dragone has resigned as chairman & chief executive officer of Fleet Aerospace Inc. and assumed the position of honorary chairman of the parent company, Fleet Aerospace Corp.

CONTACT: Bruce W. Gowan, CFO, 416-684-9477 or L. Dale Foster, treasurer & secretary, 213-649-4391, both of Fleet Aerospace Inc.

(AUG. 9) UPI - The Pentagon Thursday refused to disclose how many U-S troops or aircraft have arrived in Saudi Arabia... or how many are yet to come. Defense sources say the U-S presence could reach 50-thousand troops. Some 120-thousand Iraqi forces are located in Kuwait, with another 50-thousand reported by the Pentagon to headed to the conquered emirate.

Three people are reported dead following clashes between Peruvian security forces and rioters. The UNrest took place hours after the South American nation's new government announced drastic measures to help Peru's teetering economy. Police say army troops clubbed to death two people at a food line in Lima, while another person was fatally shot elsewhere in the capital.

Dry conditions and high temperatures provided optimal conditions for wildfires raging in four Western states. The blazes have consumed an estimated 200-thousand acres of forest, rangelands and brush. Officials in Oregon, Idaho, California, Wyoming and Nevada have issued ''red flag warnings''... indicating prime conditions for the spread of flames.

Among the fires burning is a 10-thousand-acre blaze at California's Yosemite National Park. The fire prompted officials to evacuate 500 residents from the town of El Portal, which is located at the one-Million acre park's western entrance. A partial evacuation is also reported in the town of Ravendale, where a six-thousand-acre fire was burning out of control.

(AUG. 9) UPI - The Port Authority of New York and New Jersey announced Thursday that it plans to spend one-point-three Million dollars to build a center for homeless people. The facility will be located near the Port Authority's Journal Square Station in Jersey Center. The center provide meals, showers and human services for the homeless.

The tenuous situation in the Middle East is affecting more than oil prices and the stock market. Also caught in the fray is an upcoming world atlas being put together by the National Geographic Society. The Iraqi invasion of Kuwait has caused Geographic's chief mapmaker to hold off printing the Middle East map for about two weeks to see if the situation becomes any clearer.

A spokesman for actor Charlie Sheen says Sheen has checked himself into a 30-day alcohol and drug rehabilitation program. The spokesman says 24-year-old Sheen will fulfill pending film commitments following the treatment. However, he refused to reveal when or where Sheen entered the program. He is the son of actor Martin Sheen.

Vietnam's state-run news agency says the communist government will ban the import and sale of foreign cigarettes. However, the move is NOT in the interest of securing better health for Vietnamese consumers... but instead is to protect domestic producers and save foreign currency. The ban takes effect October 1st.

(AUG. 9) UPI - A State Department official said late Wednesday that one of the 39 Americans being detained by Iraq at a Baghdad hotel has been released into the custody of U-S Embassy officials. The official identifies the freed American as 10-year-old Penelope Nabokov of Albany,

California. Embassy officials in Baghdad were allowed Wednesday to visit with the other 38 U-S citizens. The State Department is refusing to characterize them as ''hostages.''

Harrowing tales are beginning to filter out of the Middle East from Americans who managed to escape Iraqi-occupied Kuwait. Six Americans... including Jim and Phyllis Calvin of San Antonio, Texas... hid for about four days in the basement of their bombed-out apartment building before making their way back to the United States. Jim Calvin says he saw Iraqi troops shooting civilians.

NASA engineers hauled the leaking shuttle Atlantis off its launch pad late Wednesday to make room for the repaired shuttle Columbia. The Atlantis' slow trip back to the Vehicle Assembly Building was delayed six hours because of stormy weather at the Kennedy Space Center in Florida. Even so, officials say Columbia is still scheduled to be moved from the V-A-B out to the launch pad for Atlantis shortly before dawn Thursday for launch preparations.

Canadian Prime Minister Mulroney says Canada's armed forces will intervene in a month-long land dispute between Quebec police and Mohawk Indians. But he says there will be NO confrontation that will put lives at risk. Mulroney's statement is his first since the stalemate began a month ago. It follows the expiration of a Quebec government deadline aimed at forcing the Mohawks to resume negotiations over a golf course expansion near the Indian reserve, about 25 miles west of Montreal. The Indians say the expansion would intrude on their ancestral land.

(AUG. 9) UPI - The fourth tropical storm and sixth tropical depression of the Atlantic-Caribbean hurricane season has formed off the coast of Africa. Forecasters at the National Hurricane Center in Miami say Tropical Storm Edouard and its 45-mile-an-hour winds are expected to hit the Azores Islands sometime Thursday evening. At last report , Edouard was centered about 190 miles southwest of the Azores.

M-G-M U-A is suing C-B-S to block the network from airing a movie starring Kenneth Olin at the same time as the season premiere of ''thirtysomething''... the A-B-C series that also stars Olin. According to the lawsuit filed in Los Angeles Wednesday, C-B-S plans to run ''The Charles Stuart Murders'' September 18th in a time slot opposite the season premiere of ''thirtysomething.'' That's something forbidden by Olin's contract with M-G-M U-A. NO comment from C-B-S.

(AUG. 9) UPI - Diplomats at the United Nations say the Security Council met behind closed doors Wednesday night to discuss the latest actions of Iraqi President Saddam Hussein. But they say the 15-member group put off until Thursday a vote on a resolution that would declare Iraq's annexation of Kuwait ''null and void.'' The vote was postponed to allow members to consult their home governments.

In a development late Wednesday, a State Department official said one of the 39 Americans detained by Iraq at a Baghdad hotel was freed. The official says a 10-year-old California girl was released into the custody of U-S Embassy officials, who were allowed to visit with the other 38 U-S citizens held at the Hotel Rashid.

The head of the Senate Energy and Natural Resources Committee is asking President Bush to reverse his decision limiting offshore oil and gas development. Louisiana Democrat Bennett Johnston cites the Middle East crisis in urging Bush to ''re-visit'' his June 26th decision. Johnston's letter echoes recent remarks by oil industry officials and their political allies calling for a new assessment of the need for domestic offshore drilling in light of Iraq's invasion of Kuwait.

The jury in the drug and perjury trial of Washington, D-C, Mayor Marion Barry will resume deliberations Thursday for a seventh day. On Wednesday, jurors asked to see the videotape of the January 18th F-B-I sting operation on which Barry is seen taking two long puffs from a crack cocaine pipe. They had viewed the tape or portions of it numerous times throughout the trial, now in its 10th week.

(AUG. 9) UPI - Jury deliberations are to begin Thursday morning in New York courtroom in the trial of three youths charged in the April 1989 gang rape of a woman jogger in Central Park. During closing arguments Wednesday the parents of one of the youths stormed out of the courtroom when a prosecutor described- what she called- ''the spree of uncontrolled violence.''

A coalition of anti-abortion groups says it will urge its members to boycott companies that support Planned Parenthood, the NON-profit family planning organization. A spokeswoman for the Right to Life League in California says the targeting of companies such as Pillsbury, H-J Heinz, General Mills and Scott Paper is designed-in her words- ''to put Planned Parenthood out of business.'' An official with Planned Parenthood says similar tactics used in the past by anti-abortion groups have failed.

DETROIT (AUG. 9) UPI - The Chaldean Federation of America, whose members mostly have roots in northern Iraq, issued a statement expressing confidence in the policies being pursued by President Bush during the current Mideast crisis.

''Regarding the Iraqi invasion of Kuwait, we are U.S. citizens and we share the same concerns and feel the same economic consequences as all citizens living in this country,'' said Tom George, a spokesman for the federation.

''Furthermore, many U.S. Chaldeans have relatives still living in Iraq. This gives us cause for even greater concern,'' he said Wednesday.

''The Chaldean Federation of America does not condone any aggressive action. Our confidence is behind President Bush and the government of the United States of America. We are anxiously waiting and praying for a peaceful, speedy solution to this conflict in the Middle East,'' he said.

In an interview, George said there may be as many as 75,000 Chaldeans - Christians originating mainly from northern Iraq - living in the United States.

He said an estimated 66,000 live in the Detroit metropolitan area -

largely a result of the relatively high-paying jobs available in the auto industry in the early part of the century.

George said Chaldeans in Iraq have enjoyed reasonably good relations with the government there and, until recently, their relatives in the United States were free to visit.

He said the anxiety reflected in the statement results from the current ''lack of knowledge about what's happening right now.''

George said he saw no indication that American Chaldeans were facing any discrimination or harassment in the United States because of current tensions in the Persian Gulf and resulting gas price increases.

George said the statement was issued in part because ''we were getting calls from different media asking us questions about the war.'' He said comments being made by individual Chaldeans represented ''personal feelings'' and are ''not something that can be generalized for a community.''

Asked about his own attitudes toward Iraq and its leader, George said, ''I would like to withhold on that ... only for the reason that so much is going on I'm not sure how much you know is true.''

#90221u0391 08/09/1990 ~United Press International

(AUG. 9) UPI - Rarely does a solo homer in a one-sided loss generate so much interest.

The Chicago White Sox might want to forget their 5-1 loss to the Kansas City Royals Wednesday night, but Carlton Fisk will certainly remember his seventh-inning drive just inside the left-field foul pole.

Fisk's 12th homer of the year was his 327th as a catcher, tying him with Johnny Bench for the all-time home run lead at that position.

And just as he had had doubts about another famous home run of his at Fenway Park - which won the sixth game of the 1975 World Series against Bench's Cincinnati Reds - Fisk wasn't sure this one was going out either.

The ball hung on the line long enough to get past the foul pole. Even the usually stotic Fisk seemed moved by what it meant.

The veteran catcher was greeted after the home run with a hug from his son Casey.

''I got goose bumps watching him hug his boy,'' said Chicago Manager Jeff

Torborg. ''That was beautiful. More so than the home run or the record, it just meant so much to those two and the family. What an accomplishment.''

If tying Bench's mark wasn't enough to make it an historic shot, consider that it was also his:

- 186th since joining the White Sox in 1981, tying him with Harold Baines for first on the all-time franchise list.

- 44th since his 40th birthday, tying Boston's Ted Williams for fourth on that list.

- 348th overall in his 19 years in the major leagues, tying Cincinnati Reds' slugger George Foster for 44th on the overall home run list.

That's pretty impressive stuff for a contact hitter.

''I'm not your classic home run hitter,'' said the 42-year-old Fisk. ''I have always thought of myself as more of a line-drive hitter. You get a pretty good swing on the ball and make your contact, then it's got a chance to go.

''I'm not the classic home run hitter in the mold of Ted Williams or a Mike Schmidt or (Jose) Canseco or those guys who just bomb balls out of the ballpark. It's a nice feeling to be there with the top.''

Kansas City Manager John Wathan, who like Torborg is a former catcher, spoke highly of Fisk and his achievements.

During his 19-year career, Fisk suffered season-ending injuries in 1974, '78 and '84.

--- AROUND THE AL ---

Elsewhere in the American League: Baltimore stopped Oakland 4-1, Cleveland topped Texas 5-3, Toronto blasted Detroit 8-3, Minnesota edged Milwaukee 4-2, New York downed Seattle 6-4 and California topped Boston 8-6 in 11 innings.

Orioles 4, Athletics 1

At Oakland, Calif., rookie Ben McDonald won his fourth straight start with the help of a triple play and two RBI each by Brady Anderson and Bob Melvin. McDonald, 4-0, became the first Orioles pitcher in history to win his first four starts. Gregg Olson pitched the final 1 2-3 innings for his 26th save.

Indians 5, Rangers 3

At Cleveland, rookie Jeff Manto drove in two runs and Cleveland had five consecutive two-out singles during a four-run fourth inning. Jeff Shaw, 2-2, beat Texas for the second time this season and Doug Jones worked the ninth to earn his 29th save.

Blue Jays 8, Tigers 3

At Toronto, Pat Borders knocked in three runs, scored three more and joined Fred McGriff and Glenallen Hill with solo homers to help the Blue Jays take over the AL lead in home runs with 132. Walt Terrell, 0-1, took the loss in his second start since signing with Detroit as a free agent July 28th.

Twins 4, Brewers 2

At Minneapolis, rookie Scott Erickson pitched seven strong innings and Randy Bush stroked a two-run homer to lead Minnesota. Kirby Puckett had three hits and Nelson Liriano tripled and scored twice for Minnesota.

Yankees 6, Mariners 4

At Seattle, Jesse Barfield's two-run pinch-hit homer capped a three-run seventh inning to lift New York to its fourth straight triumph. New York has won four out of five games from the Mariners at the Kingdome this season as well as 10 of the last 12. Eric Plunk, 5-2, picked up the win.

Angels 8, Red Sox 6, 11 innings

At Anaheim, Calif., Lance Parrish, hitless in his previous 20 at-bats, delivered a two-run homer with two outs in the 11th inning to boost California. Parrish's 18th homer came off loser Dennis Lamp, 3-4. Willie Fraser worked one scoreless inning to even his record at 3-3.

#90221u0397 08/09/1990 ~United Press International

(AUG. 9) UPI - It took 11 pitchers, 30 hits, 15 innings, and a double-dose of Harry Caray's favorite song Wednesday afternoon before the Chicago Cubs engineered a 4-3 victory over the St. Louis Cardinals.

''It was a dandy,'' Cubs' Manager Don Zimmer said after the 4-hour, 52-minute marathon, the longest game of the season for either team.

Caray, the Cubs' broadcaster for a local Chicago television station, traditionally leads the crowds at Wrigley Field in singing ''Take Me Out to the Ball Game'' during the seventh-inning stretch. The extra, extra-inning game gave him the chance for a second rendition.

''That's the first time I've heard Harry sing the seventh-inning stretch twice,'' said Cubs' starter Mike Harkey, who pitched nine shutout innings before exiting the scoreless game.

''I pitched the first game of the double-header and we came away with a tie,'' Harkey said. ''We won the second game.''

''It had to end sooner or later,'' said Chicago pitcher Steve Wilson.

Andre Dawson ended it later, delivering a bases-loaded single in the 15th inning to hand the Cubs a hard-earned fifth-straight win.

''I think we owe ourselves a pat on the back,'' Dawson said. ''We didn't quit. We tied the ballgame twice. We won the ballgame in the late innings and that's a good sign considering the pitching duel that we had earlier.''

Bill Long, the Cubs' fifth pitcher, worked the 15th and improved to 5-0.

Cardinals' reliever Tom Niedenfuer, who entered in the 13th inning, suffered the loss to remain winless at 0-5.

Mark Grace paced the Cubs with a 4-for-6 performance. The first baseman extended his hitting streak to a personal-high 17 games, going 31 for 67 (.463) along the way.

The win also boosted Chicago ahead of Philadelphia in the NL East.

No runs were scored through nine innings, and each team scored two runs in the 10th and one in the 13th.

Both teams collected 15 hits and St. Louis stranded 15 baserunners.

St. Louis starter Jose DeLeon lasted eight innings allowing no runs before giving way to Ken Dayley in the ninth.

--- AROUND THE NL ---

Elsewhere in the National League, New York beat Philadephia 8-4, San Francisco topped Houston 8-4, Montreal downed Pittsburgh 6-2, Los Angeles dropped Cincinnati 4-2 and Atlanta routed San Diego 7-1.

Mets 8, Phillies 4

At New York, Gregg Jefferies and Darryl Strawberry each drove in three runs to help New York break a four-game losing streak. David Cone, 8-5, went 7 2-3 innings allowing four runs on five hits. Don Carman, 5-1, making his first start of the season, lasted only four innings, allowing

six runs on 10 hits and six walks.

Giants 8, Astros 4

At Houston, pinch-hitter Greg Litton sparked a three-run eighth inning with a two-run double to lead San Francisco. Trevor Wilson, 8-3, pitched seven innings, allowing four runs on seven hits and Mark Thurmond pitched two innings for his fourth save. Reliever Juan Agosto fell to 5-7.

Dodgers 4, Reds 2

At Cincinnati, Fernando Valenzuela tossed a seven-hitter and Mike Scioscia had four hits and two RBI to lead Los Angeles. Valenzuela, 9-9, struck out four and walked one in posting his fourth complete game of the season. Scott Scudder, 3-5, gave up four runs and eight hits in seven innings.

Expos 6, Pirates 2

At Pittsburgh, Tim Raines broke out of an 0-for-18 slump with two doubles and two RBI and Dave Martinez drove home two runs to lead Montreal. Dennis Martinez, 8-8, who lost four of his last six decisions, allowed two runs and six hits in pitching his fifth complete game. Pirates' starter Doug Drabek saw his personal six-game winning streak come to a close and his record drop to 14-5.

Braves 7, Padres 1

At Atlanta, John Smoltz and Kent Mercker combined on a six-hitter and Dave Justice stroked two home runs to lead Atlanta. Smoltz, 8-8, allowed six hits over seven innings while walking three and striking out nine. Dennis Rasmussen, 8-10, allowed six hits over six innings.

#90221u0399 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - A retired U.S. military officer working closely with the Saudi government in Riyadh said it was ''business as usual'' Thursday in the capital city despite the massing of Iraqi troops on the Saudi border, and Americans there were relieved U.S. forces had intervened.

''A few people were concerned at the time of the Kuwait invasion that if (Iraqi President Saddam) Hussein had pushed on, he would have had the element of surprise and initiative,'' the American said in a telephone interview with United Press International. ''But now he has given the whole world time to respond.

''Things are completely stable here,'' said the American, speaking on the condition of anonymity. ''There is no cause for concern. It's basically

business as usual here.

''The only thing that concerns me is the fact that he has chemical weapons and he has the means to deliver these,'' he said. ''To the extent that he could scatter a few chemical weapons around, he could on a very temporary basis cause problems.

''I think militarily, he has very few military options left,'' said the retired officer. ''I think he would be a complete fool to push it at this time. If he even sneezes, he's going to bring down the wrath of the entire world.''

Regarding President Bush's efforts to marshal military assistance for Saudi Arabia from other nations including Arab states, the American said, ''I don't see any evidence of this.''

''It's a very sensitive issue in the Arab world about Arabs fighting Arabs. All of the support is going to be very low-key. I don't think you will see any manpower. You are going to be seeing these people supporting us with other things, like base rights, supporting the boycott, doing all kinds of things.''

The American said Saddam is perceived in Saudi Arabia much like he has been portrayed in the United States: ''He's a bully and he's out in the schoolyard trying to take lunch money from the smaller kids. He didn't have any problem with Kuwait.''

Nevertheless, with U.S. forces now in the area, tension in Riyadh has eased considerably, the American said, although he said the State Department has recommended U.S. citizens stay away from the areas bordering Kuwait, which Iraq invaded and seized Aug. 2.

''We feel very, very good about what's happened. I feel totally safe, totally secure. I have no concern about my family.''

WASHINGTON (AUG. 9) UPI - Iraq released a 10-year-old girl who was among 39 Americans being held against their will in Baghdad, but there was no word on whether the others would be allowed to leave, the State Department said.

A State Department official said that Penelope Nabokov, of Albany, Calif., was released Wednesday to the custody of U.S. Embassy officials, who planned to ''expedite'' her return to the United States.

The official said that ''from all reports, she was (in good shape) and still had her blue backpack on.'' The State Department refused to identify the other Americans being held at the Hotel Rashid.

Nabokov was on a flight from London to India when the plane, a British

Airways jet, became stranded in Kuwait during a stopover in the emirate during the Iraqi invasion. All passengers were rounded up and bused to Baghdad.

Armed guards have prevented the Americans from leaving the hotel and it remained unclear if they were destined to become hostages in the confrontation over Iraq's aggression in the Middle East.

President Bush said he was cautiously optimistic about Iraqi reports of possible freedom. ''I want to see them out of there,'' he said of the Americans. ''But what he (Saddam) does, that's a big unpredictable.''

The president said he did not want to ''heighten tensions,'' and made no mention U.S. efforts to free the Americans. But he said, ''I consider the protection of American life fundamental to my job.''

U.S. officials refused to classify the Americans as hostages, describing them as being ''sequestered''. They have not been threatened or harmed and are free to move about the hotel, State Department officials said.

The initial 39 Americans included 11 oil field workers taken into Iraqi custody at the outset of last Thursday's invasion, 25 Americans who were among 155 foreigners rounded up from three hotels in Kuwait City days later, and three others who already were in the Baghdad area, State Department officials said.

About 350 Americans reside in Iraq, according to State Department officials, but there were no signs that they were being detained or prevented from leaving.

In addition, more than 3,000 Americans were in Kuwait at the time of the invasion and many are reported to have crossed by land into Jordan.

#90221u0435 08/09/1990 ~United Press International

BANGKOK, THAILAND (AUG. 9) UPI - Official Burmese radio, countering earlier reports, said troops fired in the air during a scuffle between Buddhist monks and security forces that left four people wounded in Mandalay.

Western diplomats in Rangoon said four demonstrators were shot and killed Wednesday in the incident 300 miles north of Rangoon.

The protests came amid tension between the military government and the National League for Democracy, the opposition political party that swept general elections in May, but has not yet been allowed to form a government.

The demonstrations marked the second anniversary of massive pro-democracy marches in 1988 that led to the downfall of the one-party government. The demonstrations were crushed a month later by military repression that left 500 to 1,000 people dead.

''Some monks, students, and youths created noisy disturbances in Mandalay this morning and efforts by the responsible security personnel to control the crowd were to no avail,'' the radio said Wednesday. ''A commotion broke out with rocks being thrown at security personnel, while some tried to wrest their weapons from them.''

It said three security personnel and a novice monk were wounded in the incident, which involved more than 900 protesters.

The three security men were struck by rocks and the 15-year-old novice monk was wounded in the shoulder, it said.

The radio said the crowd finally dispersed when the security forces fired in the air.

Western diplomats, however, said the rock-throwing prompted the troops to fire into the crowd, killing two students and two monks and wounding two other demonstrators.

A separate radio report said police seized explosives, 2,000 detonators, a sawed-off shotgun, a rifle and a submachine gun in raids in Mandalay.

The radio also reported that small groups of youths in Rangoon hung wreaths and chanted anti-government slogans in several areas of the city, but were dispersed by security forces without violence.

''Authorities concerned are investigating the people behind these instigations,'' the radio said.

Diplomatic sources also said there were small demonstrations in the capital, as the military patrolled in force and the National League for Democracy called on party members to avoid any action that could lead to bloodshed.

The party, although angered by the military resistance to transfer power, appears determined to avoid any repetition of the 1988 violence.

The military has said the only duty of the elected legislature will be to write a constitution that must be satisfactory to the military and approved by the people before it can take effect.

The National League for Democracy has rejected the military restrictions,

demanding the military hand over power to the elected representatives and release all political prisoners, who include top leaders of the party.

#90221u0445 08/09/1990 ~United Press International

CAPE CANAVERAL, FL (AUG. 9) UPI - The shuttle Columbia, inching past its grounded sistership Atlantis, was hauled to the launch pad Thursday for blastoff around Sept. 1 on an astronomy flight that NASA hopes will end a summer of frustrating launch delays.

Atlantis was rolled off launch pad 39A late Wednesday to make way for Columbia, which began its glacial, 3.5-mile trip to the oceanside firing stand at 5:47 a.m. EDT, two hours behind schedule.

With Atlantis parked 60 feet from the cavernous assembly building, Columbia, mounted atop a giant crawler-transporter, was slowly hauled toward the pad in an unprecedented shuttle shuffle marking NASA's latest bid to get the nation's manned space program back on track after a four-month hiatus caused by frustrating hydrogen fuel leaks.

The move marked the first time in shuttle history that two of NASA's $2 billion orbiters have passed in the night, as it were, on the crawlerway to the launch pad.

Once on the pad, Columbia will be readied for blastoff early next month on a long-delayed astronomy mission that was grounded May 30 by a hydrogen fuel leak.

Atlantis, meanwhile, will be removed from its external tank for repairs to fix a similar leak that grounded the ship's planned launch last month on a secret military flight.

Columbia now is equipped with a new 17-inch-wide ''disconnect'' fitting to replace the one that leaked in May and if all goes well, the ship's seven-member crew will blast off around Sept. 1 on a mission to explore high-energy ultraviolet emissions from deep space.

Launch is unofficially targeted for Sept. 1 at 1:17 a.m. EDT, although shuttle engineers typically lose a day of work per week at the launch pad because of minor problems, which would push the flight to around Sept. 4 or 5.

Assuming Columbia makes it into orbit on schedule, the shuttle Discovery will carry the European-built Ulysses solar probe into space Oct. 5 followed by launch of the presumably repaired Atlantis around Oct. 26 to kick off a secret military mission originally planned for last month.

Tentative launch plans show the next shuttle flight will not be attempted until around Jan. 9 followed by flights Jan. 31 and March 15.

Columbia's roll out had been planned for Friday, but NASA managers decided Tuesday to advance the move one day and to postpone critical tests of the assembled spaceplane until the ship reaches the launch pad.

Agency officials also decided to cancel a planned fueling test for Columbia that would have delayed a long-awaited astronomy flight another five days or so to around Sept. 5 at the earliest.

Columbia is equipped with a hydrogen disconnect fitting that was taken from the new shuttle Endeavour.

Small bits of Teflon ''debris'' and tiny glass beads were found in the area of critical seals inside the original disconnect assembly, and while they likely caused the leak that grounded the ship in May, it may not be possible to prove it one way or the other.

Columbia had been scheduled for another fueling test Aug. 23 to make sure the leak has been eliminated once and for all. But the test was eliminated to save time.

Top agency officials said NASA had little to gain from another fueling test because regardless of when another leak might be detected - during a fueling test or the night before launch - Columbia would have to be hauled back to its hangar for repairs.

And that would prevent any chance of launching the ship before Discovery's high-priority Oct. 5 flight to carry the Ulysses probe into orbit.

#90221u0446 08/09/1990 ~United Press International

JERUSALEM (AUG. 9) UPI - A Palestinian attacked by Jewish rioters died Thursday, the fourth day of anti-Arab violence set off by the stabbing deaths of two Israeli teenagers.

Izzat Halhala, 40, was critically wounded Tuesday when he tried to avoid Jewish stone-throwers and his car turned over. Angry Jews reportedly dragged him from his car and beat him until Border Police intervened. Halhala's wife and two childrens also were wounded in the incident.

Halhala, a resident of the Arab district of Silwan, died Thursday in Hadassah Hospital, police said.

The anti-Arab revenge attacks in Jerusalem began Monday when two Jewish teenagers were found stabbed to death near an Arab neighborhood. Police

said they believed the slayings were the work of Arab nationalists.

Since the discovery of the killings, large groups of angry Jews, shouting ''Death to the Arabs,'' have gathered on main roads to stone Arab-owned cars and sometimes assault the passengers. Several nights this week, residents of adjacent Arab and Jewish neighborhoods have thrown stones at each other.

Despite the repeated calls by authorities for restraint, the revenge attacks continued Thursday with two Arabs being wounded by stones thrown at their car in south Jerusalem, police said.

Police have stepped up patrols in Jerusalem, but have not responded harshly with tear gas, truncheons or rubber bullets to end the violence.

As many as 50 Arabs have been wounded in the disturbances and dozens of cars damaged. The rioters, calling for a ''Jewish intifada,'' also have attacked reporters and photographers as well as police trying to restrain them.

Police have arrested dozens of Jewish youths, but Police Commissioner Ya'acov Turner said Wednesday they may be released without charge.

Most of the violence has occurred in residential areas away from the center of the city, which has remained relatively quiet.

#90221u0454 08/09/1990 ~United Press International

SEOUL, SOUTH KOREA (AUG. 9) UPI - South Korea and the Soviet Union may agree before long on details of economic cooperation and possible normalization of relations, a top government official said Thursday.

Kim Chong-in, senior presidential secretary on economic affairs, returned home after heading a 12-member Seoul delegation to the first face-to-face talks held in Moscow, and said the two sides shared common views on pending issues between them.

''If the second round of our government-to-government talks to be held in Seoul progresses smoothly, six agreements including one on guaranteeing investments will be signed and more could be agreed on,'' Kim said at an airport news conference.

Kim said he expected the second-round meeting would take place in Seoul late this month or next month. He did not elaborate on what he meant by ''more'' to be agreed on, but Seoul has been pushing rapprochement with the Soviet Union, with which it has had no diplomatic ties.

''Through the Moscow talks, both sides shared common views on pending issues,'' he said. ''There had been concerns that economic cooperation and rapprochement were two separate things but we confirmed the concerns dispelled.''

Kim said he cannot tell exactly when full agreement will be reached on economic cooperation and normalization of relations, but many things could be wrapped up at the forthcoming Seoul meeting.

''At the Moscow meeting, I presented a true picture of our economy to Soviet officials,'' he said. ''Loans to the Soviet Union were never raised.''

#90221u0476 08/09/1990 ~United Press International

BANGKOK, THAILAND (AUG. 9) UPI - Twelve Asian nations have agreed to create an regional information network to help protect children's rights, a coordinator of a meeting on the issue said Thursday.

''Tens of millions children all over the world are suffering from violation of child rights,'' said Vitit Muntarbhorn at the end of a three-day meeting on the Rights of the Child Thursday.

Vitit said delegations from the 12 Asian nations agreed to create a regional network to support children's rights through an exchange of ideas and information.

''This is a way to overcome the problems,'' he said.

He said the agreement was reached even though some countries, including host Thailand, have not yet ratified the U.N. Convention on the Rights of the Child.

''They have shown their will to review monitoring of the laws to implement the rights of the child,'' he said.

Supattra Masdit, minister of the prime minister's office, said Thailand is expected to sign the convention ''very soon''.

''There are some minor problems remaining,'' she said.

Thailand fears ratification could affect national security. The convention would grant Thai nationality to anyone born in Thai territory, including the offspring of more than 300,000 Cambodian and Lao refugees.

The Bangkok meeting was meant to pave the way for expanded adoption of the convention at a Sept. 29 meeting in New York.

Participants in the Bangkok meeting included representatives from Bangladesh, Burma, Indonesia, South Korea, Laos, Malaysia, Nepal, Pakistan the Philippines, Thailand and Vietnam.

(AUG. 9) UPI - Iraq says it has NO intention of attacking Saudi Arabia, but says it has to prepare for any possible ''aggression against Iraq.'' The Iraqi ambassador to the United Nations reacted to the arrival of U-S troops in the region, saying his country does NOT want to fight with America. But he says Iraq has to defend itself. Saudi television says King Fahd will speak to his nation today about the Persian Gulf crisis.

News that Saudi Arabia will pump an extra two-Million barrels of oil a day caused a drop in crude oil prices of nearly four-dollars a barrel on world markets. The Saudi move is aimed at making up oil output lost because of the U-N embargo of Iraq and Kuwait. In Japan, Tokyo's blue-chip stock indicator fell to its lowest close in more than nine months today, as investors grew more concerned about the Persian Gulf situation.

This is the seventh day of jury deliberations in the drug and perjury trial of Washington, D-C, Mayor Marion Barry. Yesterday, the panel members were given permission to review the F-B-I videotape of Barry smoking crack cocaine at a downtown hotel earlier this year. He was later arrested. The mayor faces 14 federal counts in the trial, which is now in its 10th week.

If your housing costs leave you little money for other expenses, you're NOT alone. A new study says 27-Million households, or one-third of the nation, is ''shelter-poor.'' Michael Stone of the University of Massachusetts in Boston says a combination of INadequate incomes and high housing costs puts 32 percent of the population in a squeeze that leaves little money for NON-shelter costs.

(AUG. 9) UPI - A retired F-A-A safety consultant testified for the defense yesterday in the Minnespolis trial of three former Northwest Airlines pilots accused of flying while drunk. Robert Collette says the pilots landed their jetliner without incident on March 8th, despite heavy air traffic and adverse weather conditions. The defense says the pilots were NOT impaired during the flight.

The Soviet news agency Tass says two Soviet cosmonauts returned to Earth today after spending six months aboard the Mir space station. Tass says a Soyuz T-M-9 transport spaceship carrying the two cosmonauts made a soft

landing at the edge of the desert in Soviet Central Asia. Two other cosmonauts who arrived at the space station last week are expected to stay in orbit for 132 days.

A Texas-based grocery chain is urging consumers to boycott 24 so-called ''ugly cosmetics'' companies that conduct tests using live animals. The Whole Foods Market chain says Millions of animals die each year in such tests. The company, which has stores in California, Texas and Louisiana, is sponsoring a ''compassionate cosmetics exchange'' to encourage consumers to buy body care products from firms that do NOT engage in animal testing.

A Seattle thief UNdoubtedly got a surprise when he opened the package he took from a motorist's car. Police say the theft occurred while the motorist was sitting at an intersection. But the motorist doesN'T feel too bad about the loss, and police say they didN'T bother to investigate. The package contained doggy-doo the good-citizen driver had picked up off the street.

CAMBRIDGE, MA (AUG. 9) UPI - The Rev. Jesse Jackson plans to meet this weekend with a brother of Saudi Arabian King Fahd to discuss the Iraq crisis and to decide if Jackson should try to mediate, officials said.

Jackson and Prince Turki Bin Abdul Aziz Saud plan to meet at the Charles River Hotel in Cambridge, where the prince has been staying in a 40-room suite.

A time for the meeting has not been set but ''we are working for Sunday,'' said May Louie, an assistant to Jackson's Rainbow Coalition office in Washington.

A statement issued by the Saudi prince Wednesday said the two had ''had some informal exchange of views'' and ''agreed in the meanwhile that they will keep in contact if developments in the Middle East so required.''

A spokesman for the prince said among the issues to be discussed is the possibility that Jackson could mediate in the crisis that began when Iraq invaded its neighbor Kuwait.

Jackson has become involved in Middle Eastern affairs in the past and is well-liked by a number of Arab leaders, the spokesman said.

Jackson said earlier this week he had no plans to travel to the Middle

East.

(AUG. 9) UPI - Stock prices on the Tokyo Stock Exchange tumbled Thursday in slow trading as concerns about the Middle East situation left the market defenseless against index-linked selling.

The blue chip Nikkei Average of 225 selected issues, which rebounded 856.07 points Wednesday, plummeted 893.41 points - or 3.1 percent - to 27,615.73, its lowest closing level since Oct. 28, 1989.

The key Nikkei Average has lost 29.0 percent of its book value since it set a record high of 38,915.87 last Dec. 29.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares fell 31.61 points to 2,068.41 following a gain of 53.60 points Wednesday.

Declines hammered advances 623 to 318, with 155 issues remained unchanged.

Trading was slow as an estimated 380 million shares changed hands, down from 577 million shares Wednesday.

Elsewhere in Asia, stocks posted losses in thin trading on the Hong Kong Stock Exchange following poor performances by Hong Kong shares in London's stock market on Wednesday. Activity was concentrated in the blue-chip sector.

The key Hang Seng Index, which rebounded 46.88 points Wednesday, dropped 54.45 points to 3,091.12.

Among the narrower indexes, financials lost 18.42 points, oil sensitive utilities dropped 66.80, industrials fell 45.18 and interest rate related properties plunged 129.44 points.

Volume amounted to 1.8 billion shares, down from the brisk 2.9 billion shares changing hands Wednesday.

In Bangkok, stock prices lost more than 5 percent of the value on the Stock Exchange of Thailand in slow trading.

The Stock Exchange of Thailand (SET) Index, which surged 35.52 points Wednesday, fell 54.10 points or 5.65 percent to 903.77.

An estimated 3.5 billion shares changed hands, compared with 6.07 billion on Wednesday.

In Taipei, stock prices on the Taiwan Stock Exchange plunged to a 26 month low in moderate trading.

The Taipei Weighted Index, which fell 133.68 points Wednesday, fell 302.35 points - or 6.67 percent - to 4,232.21, its lowest closing level since May 1988.

Stock markets, banks and most major businesses in Singapore were closed due to the National Day holiday. Trading on the Singapore Stock Exchange is expected to resume Friday.

In Australia, stock prices on the Sydney Sharemarket closed lower in moderate trading.

The key All Ordinaries Index, which gained 20.9 points Wednesday, eased 5.4 points to 1563.0.

Losses were confined to the industrial end of the market where the All Industrials Index fell 15.6 points to 2,349.4, while the All Resources Index gained 1.2 points to 952.2.

Gold issues attracted only modest support in line with a weaker global bullion price. The Gold Index rose 4.7 points to 1,483.9.

#90221u0707 08/09/1990 ~United Press International

ANKARA, TURKEY (AUG. 9) UPI - Secretary of State James Baker met with Turkish leaders Thursday, reportedly to assure the NATO nation that the alliance would lend support in case of Iraqi aggression.

Turkey abided by a U.N. embargo against Iraq earlier this week and cut off oil shipments from two Iraqi pipelines that run through Turkey to the Mediterranean.

Ankara, apparently jittery over possible retaliation from its militaristic neighbor, put its air force on partial alert and moved an undisclosed number of F-16 jet fighters from a base near the capital to Incirlik, a southern city closer to the Iraqi border, sources said.

Baker met with Foreign Minister Ali Bozer and later with Prime Minister Yildirim Akbulut. He was scheduled to hold discussions with President Turgut Ozal before leaving for Brussels, Belgium.

Baker made no statement on his arrival but the Istanbul newspaper Huriyet said he was ''expected to give Turkey assurances of support from the North Atlantic Treaty Organization in case of Iraqi aggression'' and to

''request Turkey's assistance for military operations against Iraq.''

Turkey is the only Moslem member of NATO.

Ozal ordered the pipelines effectively shut off Tuesday after the U.N. Security Council approved the far-reaching trade and arms embargo against Iraq, which invaded the oil-rich emirate of Kuwait last week and annexed it Wednesday.

Iraq had issued a veiled threat to Turkey over the weekend, urging it to resist Western pressure and keep the pipelines open.

TOKYO (AUG. 9) UPI - Asian Pacific nations, notably member states of the Association of Southeast Asian Nations, will play a major role in developing world trade in the 1990s, the government-financed Japan External Trade Organization said Thursday.

The organization, in a report on World Trade for 1990, described "the remarkable development" of the Asian Pacific economies, as one of major themes of the global economy in the 1990s.

The report said four newly industrialized economies - South Korea, Taiwan, Hong Kong and Singapore - ranked among the world's top 20 economies in terms of exports and imports in 1989.

"Their positive economic influence, centered on export-led industrialization, has already spread to the ASEAN countries and is also expected to be felt in Western Asia during the decade," the report said.

Citing statistics of the General Agreement on Tariffs and Trade, the report said world trade in 1989 grew 7.5 percent over the preceding year to $3.09 trillion, topping the $3 trillion-mark for the first time.

The report said imports of industrial goods by South Korea, Taiwan and Hong Kong continued to grow at a high pace in 1988 while those by Singapore declined. It said imports of industrial products by the six-nation ASEAN in 1988 grew an estimated 34.7 percent, following a 39.5 percent rise in 1987.

"The share of world trade accounted for by Japan, the United States and the European Community increased to 60.9 percent in 1988, up sharply from 54.4 percent in 1980.

"Neighboring economies benefited from this growth: Trade within and between the regions of the Asian Pacific, North America and Western Europe accounted for 72.1 percent of world trade in 1988," the report said.

TOKYO (AUG. 9) UPI - Ford Motor Co., Mazda Motor Corp. and Sanyo Electric

Co. announced plans Thursday for a $75 million joint venture that would manufacture automotive radio products in Malaysia. The new company will be built in the state of Penang in Malaysia and is expected to begin production in June 1992, the companies said.

Ford indicated it plans to use the radios produced in vehicles built and sold in the Asia-Pacific region. Mazda said it would use the output in most of its vehicles made in Japan while Sanyo indicated the venture would expand its automotive audio business. The three companies will each own an equal share in the venture and will provide audio design and technology for the new products.

Malaysia was chosen for the company's site because of its favorable investment environment and access to an electronics supply base, the companies said. The plant would initially have about 500 employees, with expectations that more than 2,000 would be employed by the mid-1990s.

"We feel this is another great step to enhance business globalization which, in turn, will also help boost imports into Japan," said Norimasa Furuta, president of Mazda Motor Corp. The companies have projected an annual sales capacity of $200 million from the venture.

PARIS (AUG. 9) UPI - France said Thursday the freeing of a Swiss hostage held in Lebanon was related to the recent release of an Iranian terrorist from a French jail and that Iran has indicated another European hostage will be released in a few days.

Syrian authorities, because of the tense Middle East situation, decided to forego the publicity that usually accompanies hostage releases and send home the Swiss Red Cross worker ithout fanfare.

Emmanuel Christen, held hostage for 11 months was freed Wednesday in Lebanon and sent to Syria where government sources said he would be flown home quickly.

Journalists have not seen Christen but he appeared thin and haggard in a photograph released by the kidnappers in Beirut late Wednesday.

A spokesman for the French Foreign Ministry said France has ''reasons to believe'' the release was connected to President Francois Mitterrand's recent release of Anis Naccache.

Naccache, convicted in a failed 1979 assassination attempt on former Iranian Prime Minister Chapour Bakhtiar that resulted in the death of a police officer, was released July 27 with four accomplices. The four had

been in prison for 10 years.

Christen was captured 10 months ago with another Swiss International Red Cross worker, Fritz Kuhni, who Christen said was in good health.

The French spokesman said Foreign Affairs Minister Roland Dumas received a letter from Iranian Foreign Minister Ali Akbar Velayati, thanking France for the release of Naccache and saying that two Europeans would be freed in coming days, the spokesman said.

Christen is believed to be one of the two hostages referred to in the July 29 letter.

''That same day,'' the spokesman added, ''the Iranian government notified our ambassador in Tehran that Iran would continue its efforts to insure the liberation of all hostages still being in Lebanon.''

The kidnappers, in a statement signed by ''the Palestinian Revolutionary Cells Organization'' on Wednesday, said they would release the two Swiss nationals after appeals by Arab leaders.

It was not known why only one man was released but Palestinian sources hinted at complications over a $3 million ransom demand.

With Christen regaining freedom, the number of Western hostages in Lebanon was reduced to 15, including six Americans.

U.S. citizen Terry Anderson, who was chief Middle East correspondent for the Associated Press, has been captive the longest. He was abducted March 16, 1985, in Beirut.

CALHOUN, GA (AUG. 9) UPI - Two Norfolk Southern freight trains collided at a switch track near the Blue Ridge Mountains Thursday, killing three crewmen and injuring four others.

Sgt. Bob Patterson of the Gordon County Sheriff's Department said the trains were carrying lumber and other cargo.

Norfolk Southern Corp. spokesman Bob Auman said three engines and a rail car loaded with lumber caught on fire and witnesses reported at least five explosions. Auman said those fires were extinguished.

''One train ran through a siding and onto the main track, striking the other train,'' Auman said. ''We're trying to deal with a massive cleanup. Each train had two engines. Three of those engines were destroyed, and one

was heavily damaged. Fourteen or 15 cars derailed.''

Three of the crewmen were killed in the collision, which occurred around 3:30 a.m. between Georgia Highway 136 and the community of Hill City.

Clifford Free, president of the Gordon County Emergency Medical Service, said rescue crews found the four injured crewmen walking out of the woods.

They were carried to a hospital for treatment. Gordon County Hospital spokeswoman Jean Spradley said three were treated and released, while a fourth was being held for observation.

The cause of the crash was not immediately known, Auman said, but it was possible the rail line switch was thrown the wrong way or the train ran through the switch.

Patterson said the explosions could have come from diesel fuel in the engines.

Free said Highway 136 was closed because of the wreckage.

Auman said the train on the side track had 25 loaded rail cars and 45 empty cars, while the train on the main track had six loaded cars.

The identities of the dead and injured were withheld until relatives could be notified.

LONDON (AUG. 9) UPI - Thousands of Libyans are prepared to fight U.S. troops that were ordered to the Gulf to guard against a possible attack by Iraq on Saudia Arab, Libyan Radio said Thursday.

''Thousands of citizens and brother Arabs, residing in the great Jamahiriyah (Libya), converged towards the Iraqi Embassy in Tripoli and announced their readiness to volunteer and travel immediately to the Arab Gulf region to face up to the U.S. and foreign presence and intervention in matters of the Arab nation,'' the radio said, according to a monitor by the British Broadcasting Corporation.

President Bush ordered the biggest U.S. defense buildup since the Vietnam War after Iraq invaded and took control of Kuwait, then massed troops on the border with Saudi Arabia.

MORAINE, OH (AUG. 9) UPI - A strike at a General Motors Corp. parts plant in Flint, Mich., hit Ohio's Miami Valley on Thursday, with 3,000 workers being laid off at GM's Moraine assembly plant.

Tom Tatham, a spokesman for GM in the Dayton area, said the workers were being furloughed because the plant depends on GM's AC Rochester West plant in Flint for fuel tanks for pickup trucks and light utility vehicles.

"The truck and bus plant will work through four hours (Thursday) morning on its first shift and then it will be shut down," Tatham said. Workers at Moraine build two four-door utility models, Chevrolet Blazers and GMC Jimmys, and two pickup truck models, the Chevrolet S-10 and GMC S-15.

About 3,200 hourly workers - members of United Auto Workers Local 659 - struck Wednesday in Flint to protest what the union said were work speed-ups, subcontracting and a lapse in health and safety conditions at the plant.

General Motors operates on a streamlined inventory system called "just-in-time" manufacturing, which cuts costs and improves quality, but makes the automaker's assembly plants more vulnerable to strikes at components facilities like Flint. "Certainly that makes the pipelines much shorter than they used to be," said Tatham.

The Flint strike could also affect General Motors' local parts plants in the Miami Valley - Delco Moraine, Delco Products and Harrison Radiator - if it continues, Tatham said. "(There is) no immediate impact, but they will have to reassess next week based on how this spreads to their customers," he said.

Talks between General Motors and the union in Flint were scheduled to resume Thursday. GM spokesman John Maciarz in Detroit said that so far the walkout has not affected the steady pace of the national contract talks that began in mid-July. Those talks are aimed at reaching a new agreement covering about 330,000 GM workers. The current three-year pact expires Sept. 14.

#90221u0835 08/09/1990 ~United Press International

(AUG. 9) UPI - It's NOT clear whether Iraqi President Saddam Hussein will attend today's emergency summit of Arab leaders in Cairo, Egypt. The

Kuwaiti crown prince, who fled when Iraq invaded his country last week, is expected to attend the summit aimed at defusing the Persian Gulf crisis.

U-S troops are being deployed in Saudi Arabia to defend against a possible Iraqi attack against the Saudis. Today, Saudi King Fahd addressed his nation about the crisis and the gathering of Iraqi troops along his border. Fahd says U-S and other foreign troops will be in Saudi Arabia only temporarily.

The U-N Security Council meets in emergency session today in New York to consider Iraq's annexation of Kuwait. A resolution to be submitted by the six Arab nations of the Gulf Cooperation Council calls for the annexation to be declared ''null and void.'' Kuwait is a member of the Gulf Cooperation Council.

The shuttle Columbia is inching toward the launch pad at Cape Canaveral, in preparation for next month's launch on a long-delayed astronomy mission. The grounded shuttle Atlantis was moved off the pad yesterday to make room for Columbia, which was repaired after a fuel leak that grounded its May flight.

The fourth tropical storm of the Atlantic-Caribbean hurricane season is swirling in the North Atlantic. Tropical Storm Edouard pelted the Azores Islands with 45-mile-an-hour winds today. At last report, Edouard was 80 miles west-southwest of the island of Terceira, moving east-northeast at close to 12 miles an hour.

-30- 1705

#90221u0856 08/09/1990 ~United Press International

CAIRO, EGYPT (AUG. 9) UPI - Iraq agreed Thursday to participate in an emergency Arab summit called to forstall further foreign involvement in the Persian Gulf crisis while U.S. forces took up positions in Saudi Arabia.

Iran, Libya and other hard-line Arab nations indicated that while they were unhappy with Iraq's invasion of Kuwait last week, they were equally concerned about the presence of troops from Europe and the United States gathering in the gulf.

Arab leaders, including Syrian President Hafez Assad and Libyan leader Moammar Gadhafi, arrived in Cairo Thursday for the evening emergency summit, where Egyptian President Hosni Mubarak was expected to call for a joint Arab peace-keeping force and an Iraqi withdrawal from Kuwait.

The deposed emir of conquered Kuwait, Sheikh Jaber al Ahmad al Sabah, planned to lead a delegation to the summit, Egypt's Middle East News Agency reported.

The news agency also said Taha Yassin Ramadan, Iraq's first deputy prime minister, would attend the emergency Arab session along with three other delegates, including Iraqi Foreign Minister Tariq Aziz. Aziz had disappeared from public view last week at the same time as reports surfaced that said Baghdad had executed more than 100 military officers.

The United Nations was expected to meet Thursday to declare the annexation of Kuwait unacceptable and urge member nations to refuse to recognize the action.

Jordan seemed to shift alliance from Iraq to the more moderate Arabs and the West.

''We are wrongly described as an ally of Iraq. We are not an ally of Baghdad,'' Crown Prince Hassan, brother of Jordan's King Hussein, told London's Independent in an interview published Thursday.

Tension in the region mounted despite the moves toward finding a solution to the crisis, which was touched off last week when Iraq invaded neighboring Kuwait and exacerbated Wednesday when President Saddam Hussein said he was annexing the oil-rich emirate.

President Bush ordered U.S. troops into Saudi Arabia because of concern that the Iraqi force that took Kuwait so easily would advance into Saudi Arabia. The Americans began arriving in Saudi Arabia Wednesday and sources said the U.S. force could grow to 50,000 troops.

Jordan set off air raid alarms and Secretary of State James Baker reportedly told Turkish leaders in Ankara that NATO would be willing to defend Turkey if Iraq attacked across the Turkish border. A Western diplomat based in Cairo said Iraqi troops also were massing on the Iraq-Turkey border.

The gulf also was the scene of multinational military movement, with U.S. troop deployments to Saudi Arabia reportedly expected to reach 50,000. Saudi King Fahd appeared on television to tell his nation that the foreign troops on Saudi soil were necessary to maintain security in case Iraqi troops massed at the Kuwaiti border attacked.

Turkey beefed up security along its border with Iraq, wary that Baghdad will retaliate because Ankara has honored a U.N.-imposed embargo against Iraq by cutting off shipments of oil from two Iraqi pipelines that cross Turkey to the Mediterranean.

The Soviet Union said it would consider joining a multinational military force in the Middle East only if it was set up by the U.N. Security Council. Two Soviet military ships passed through the Suez Canal, but

their mission was not clear.

The Iraq News Agency said Palestine Liberation Organization Chairman Yassir Arafat met with Saddam Thursday and sources said the PLO leader went to Baghdad to convince his ally to participate in the Arab summit.

Iraq's old foe Iran - with which it fought for eight years before a truce in 1988 - warned the massive presence of American military forces in the gulf was ''more dangerous ... on developments in the region than Iraq's military occupation of Kuwait,'' the Iranian News Agency said in a dispatch monitored in Washington.

Mohsen Rezaei, commander of the battle-hardened Islamic Revolution Guards Corps, said the United States was using the incident in Kuwait as an opportunity to tighten its control on the flow of oil in the gulf.

But Iran also warned that as a major power in the region, it would not tolerate an ''alteration in the political geography of the region.''

(AUG. 9) UPI - Syrian authorities plan to avoid publicity during the tense situation in the Middle East and send a former hostage home today with NO fanfare. Emmanuel Christen, a Swiss Red Cross worker held 11 months in Lebanon, was released yesterday and sent to Syria, where sources say he will be flown home quickly.

A jury of 10 men and two women begins deliberations this morning in New York City in the trial of three youths accused of raping a Central Park jogger last year. Closing arguments yesterday focused on confessions made by the three defendants, and on the lack of physical evidence linking them to the so-called ''wilding'' attack.

The Soviet Union and South Korea apparently may agree soon on details of economic cooperation and possible normalization of relations. That's according to a top South Korean official who just returned to Seoul after heading a delegation to talks in Moscow. The official says the two sides share common views on issues pending between them.

Anti-Arab violence continued for a fourth today in Israel as angry Jews threw stones at Arab-owned cars in revenge for the stabbing deaths of two Israeli teen-agers. Police say two Arabs were hurt by rocks thrown at their car. Also today, a Palestinian died after being attacked by Jewish rioters Tuesday.

It was 45 years ago today that the southern Japanese city of Nagasaki became the second city hit with a nuclear bomb. About 25-thousand people

gathered today in Peace Park for a memorial service marking the anniversary. The mayor urged Japan to aid foreign survivors of the nuclear attack.

WASHINGTON (AUG. 9) UPI - U.S. paratroopers, the first of an American military force that defense officials said could reach 50,000 men, and F-15 fighter jets were taking up defensive positions in Saudi Arabia Thursday.

''It obviously is a major commitment of U.S. forces,'' Defense Secretary Dick Cheney told reporters a day earlier, declining to predict how long U.S. troops will be deployed in Saudi Arabia to deter a possible Iraqi attack.

''The situation's uncertain,'' he added. ''We don't know how long it will last. We don't know when it will end. We don't know exactly how events will unfold over the next few months.''

Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, appeared at a Pentagon news conference Wednesday for the first time since President Bush ordered U.S. troops and warplanes to Saudi Arabia.

The two men refused to disclose the number of U.S. aircraft or troops already in Saudia Arabia or how many American military forces would ultimately be sent there, but senior defense officials confirmed reports Thursday that troop levels could reach 50,000 - larger than the U.S. ground force in South Korea.

At the news conference, Powell expressed confidence that U.S. troops could defend the oil kingdom.

''Even though there may be 1 million people in the Iraqi army, it is not an army that is currently postured to come storming across any border with 1 million people,'' Powell said. ''I am confident of our ability - when we have finished our deployments - to accomplish the mission the president gave us.''

Defense officials who asked not to be identified said about 2,300 paratroopers from Fort Bragg, N.C., and 48 F-15 jet fighters from Langley, Va., were in the first wave of the ''ongoing'' U.S. operation.

''Because we want to ensure the safety of our troops and because we want to ensure operational security ... I will be limited in what I can tell you,'' Powell said at the beginning of the briefing.

Bush issued the order Monday night to send U.S. troops and aircraft to Saudi Arabia, after Cheney had obtained an agreement from King Fahd to allow U.S. forces to use Saudi bases for the first time.

''Early advance party elements lifted off the ground at 7:35 yesterday (Tuesday) morning and the flow has continued, with the major part of the flow beginning last night (Tuesday night) with the departure of F-15s from Langley Air Force Base,'' Powell said.

The F-15 Eagle fighter jets were from the 71st and the 27th Tactical Fighter Squadrons at Langley, sources said. There are 24 planes in each squadron.

Powell said the F-15s began leaving Tuesday night and were continuing to leave Wednesday.

''The first planes have landed in Saudi Arabia and are taking up positions at various locations in Saudi Arabia,'' he said.

In addition, Powell said, paratroopers of the Division Ready Brigade of the 12,800-member 82nd Airborne Division from Fort Bragg started leaving at 3 a.m. EDT Wednesday and were due to arrive in Saudi Arabia late Wednesday.

Sources also said members of the 101st Airborne Division from Fort Campbell, Ky., and the 24th Infantry from Fort Stewart, Ga., were earmarked to go to Saudi Arabia, along with F-16 fighter jets and B-52 bombers.

Powell said five AWACS early-warning reconnaissance radar planes were sent to Saudi Arabia, apparently to bolster the five AWACS it already operates.

Also, he said, the nuclear-powered aircraft carrier USS Eisenhower and escort ships passed through the Suez Canal and were now stationed in the Red Sea, off Saudi Arabia's west coast, where one Iraqi oil pipeline ends.

A total of about 34 U.S. warships, including the aircraft carrier USS Independence, were in the region. The Independence was stationed in the northern Arabian Sea, at the mouth of the Persian Gulf.

The aircraft carrier USS Saratoga, which left the United States Tuesday, will take up position in the eastern Mediterranean, Powell said. That will put three carriers, with about 240 fighter and attack jets, in the region.

Powell said U.S. troops and aircraft arriving in Saudi Arabia were ''pretty secure. ... The Independence is in a position to provide support now, as is the Eisenhower battle group.''

Powell expressed concern with Iraqi chemical warfare capability, but added that the U.S. troops were being sent in had protective masks and body

garments and medicine.

Cheney said he told Saudi officials during his visit Sunday and Monday that Bush would waive the congressional ''Metzenbaum Amendment'' that limited the size of the Saudi Arabia F-15 fleet to 60 at any one time.

NEW YORK (AUG. 9) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 74.00-78.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 141.40 c-lb.

Lead, common, U.S. primary producers 50.00-52.00 c-lb.; U.S. non-primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $260.00-$265.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $114.50-$118.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $492.00-$494.00; dealer-approx., $488.00-$496.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $118.00-$119.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 287.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 77.50-87.75 c-lb.

#90221u0920 08/09/1990 ~United Press International
WASHINGTON (AUG. 9) UPI - Iraq's invasion of Kuwait, rising oil prices and the fear of recession could prompt budget negotiators to slash a planned $50 billion deficit reduction package by up to 50 percent, an aide to a key negotiator said. "The size of the package is in real jeopardy," said the aide, who requested anonymity.

The aide said Wednesday the expected $50 billion deficit cut for fiscal year 1991 could be reduced by one-third to one-half if the world situation in Sepember makes it harder to trim defense spending or increase energy taxes.

Asked how large the deficit cut might be next year under those circumstances, the aide said "$25-35 (billion)." Budget talks resume in September, while the next fiscal year begins on Oct. 1.

The aide said if budget negotiators feel the Iraqi invasion of Kuwait and the U.S. military response makes it harder to cut Pentagon spending by as much as expected, that would make it tougher to take the bites planned from domestic spending and federal benefit programs.

And if a gasoline or broader energy tax is also off the table, negotiators may not be able to agree on a replacement to bring in as much money, the aide said.

"If anything's taken off the table, then I think it's going to be tough to get $50 billion (in deficit cuts) ... if we can no longer cut defense deeply and if we can no longer get energy taxes," the aide said.

But Sen. Bob Packwood, R-Ore., a budget negotiator, said he still thinks a $50 billion package can be achieved. "I hope we don't lower our sights," Packwood said. "Right now, I think a $50 billion cut would be helpful. I think that would do far more to help the economy than hurt it."

He said the main consideration for budget negotiators is "whether we are tipping into a recession." If the economics are right for cutting $50 billion from the deficit next year, he said, "then we ought to do it." "I don't think the activity in the Middile East is going to make a difference on the budget summit," he said.

House Budget Committee Chairman Leon Panetta, D-Calif., said in a telephone interview that "I think we ought to try to get as close to the $50 (billion) as we can so that would mean we ought not to drop below $40 (billion.)"

Senate Republican leader Robert Dole of Kansas told reporters that, because of the Middle East situation, "we might want to be a bit more reasonable on defense (cuts)." And, he said, "we certainly won't see a gas tax in the picture."

House Armed Services Committee Chairman Les Aspin, D-Wis., told reporters that the the Middle East situation might cause budget negotiators to "breathe a big sigh of relief and reluctantly conclude that for good reasons for our economy we really shouldn't get a $50 billion reduction package ... that would strangle the economy."

He said negotiators may decide the cuts "might only have to be $30 or $40 (billion) and that means, of course, less defense cuts and less need to raise taxes and less need to cut domestic spending."

"In other words ... this thing might just let 'em all off the hook," Aspin said of the budget negotiators.

"Can you believe that? After they've been sitting there all this time, not being able to settle anything and, by God, like manna from heaven, all of a sudden they don't have to solve the problem. Boy, oh boy. That's going to be a big celebration - champagne corks over in that (budget) summit."

Budget negotiators, who began meeting May 15, have set an unofficial deadline of Sept. 10 to agree on a package that would cut the government's red ink by $50 billion next year and by $500 billion over five years.

However, as negotiators prepared late last month to put specific plans on the bargaining table, talks bogged down. Negotiators are expected to resume meeting - possibly in seclusion - early next month when Congress returns from its summer recess.

Negotiators have until Oct. 1 to reach and implement a deficit reduction package. Failure would trigger about $100 billion in automatic spending cuts, split between defense and domestic programs.

(AUG. 9) UPI - Authorities in Calhoun, Georgia, say three crewmen were killed and four others injured early this morning when two Southern Railway freight trains collided at a switch track in the Blue Ridge Mountains. Officials say the crewmen died in the collision. Rescue crews found the four injured crewmen walking out of woods. The trains were carrying lumber and other cargo.

The jury in the case of New York's Central Park jogger rape trial begins deliberations today. During closing arguments yesterday, attorneys focused on confessions made by the three youths accused in the bloody ''wilding'' rampage... as well as the lack of physical evidence linking the defendants to the attack. The jury received two hours of final instructions yesterday.

A University of Massachusetts professor says nearly one-third of American households are shelter poor. Michael Stone says that 78-Million people... about 32 percent of the population... face inadequate incomes and high housing costs. He says that after paying for their housing... they are unable to meet their NON-shelter needs at even a minimum level of adequacy.

In Florida, a report says a plastic surgeon used 35 fat, black leeches to successfully restore blood circulation in a Fort Lauderdale woman's mangled fingers. The report says Chanel Giordanno injured her fingers when her boyfriend accidentally slammed a door on her hand. The leeches stayed on her hand for seven days and saved her thumb.

#90221u0948 08/09/1990 ~United Press International
VIENNA (AUG. 9) UPI - Eastern European countries, traditional trading partners withIraq as well as arms suppliers, are reluctantly agreeing to a U.N.-issued trade embargo against Baghdad despite worries about its effect on the region's shaky economies.

Czechoslovakia and Bulgaria decided late Wednesday to suspend trade with Iraq and Hungary was expected to announce a similar move Thursday, official news reports said.

''The ministers are not in an easy position,'' the Hungarian daily Nepszabadsag said of a scheduled meeting at which the government was to take a position on the sanctions imposed Monday by the U.N. Security Council.

The newspaper said the issue was ''extremely sensitive for Hungary,'' which ''must purchase oil from that region.''

Hungary and its neighbors have become increasingly dependent on oil imports from the Middle East because of a cutback in Soviet oil deliveries announced last month. Faced with having to shut its main refineries, Hungar made an emergency purchase of 3 million barrels of oil from Libya and Algeria on July 24.

Also at stake are $6 million owed to Hungary by Baghdad and up to $30 million a year in Hungarian exports to Iraq and Kuwait.

Hungary has sold arms to Iraq in the past but there have been none this year, the official MTI news agency said.

In Sofia, the Bulgarian government announced it ''accepts and will strictly observe'' the terms of the U.N. sanctions against Iraq, the state-run news agency BTA said.

''Even before the beginning of the crisis, all Bulgarian military supplies to Iraq have been stopped,'' BTA said. ''The government is taking other concrete steps ... nothwithstanding the serious difficulties the Bulgarian economy may have to face.'

Deputy Foreign Minister Filip Ishpekov summoned Iraq's ambassador to Bulgaria to the ministry heaquarters Saturday to notify him personally of the decision to honor the U.N. sanctions, the news agency said.

In Prague, the Czechoslovak government voted Wednesday in favor of ''joining the economic embargo against the Iraqi republic and the puppet government of Kuwait,'' the official news agency CTK said.

Hungary and Bulgaria also were pressing Baghdad for the evacuation of their citizens in Kuwait and Iraq. Budapest was trying to arrange the repatriation of about 200 Hungarians in Kuwait after receiving assurances from Iraq that they would be allowed to leave.

But five Hungarians working in Kuwait were reportedly missing and ''it is supposed they have been taken captive by the Iraqi army,'' MTI said.

#90221u0951 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Despite its huge oil reserves, Mexico can do little to rapidly make up for the loss of petroleum exports from Iraq and Kuwait, analysts said.

Mexico's oil producing capacity has declined over the last few years and, without some innovative mechanisms to allow massive foreign investment in production and exploration, the country could become a petroleum importer in a few years, the observers said Wednesday.

With nearly five million barrels a day of combined Iraqi and Kuwaiti oil exports to world markets in jeopardy, oil importing nations are looking to other producers - especially those in the politically calmer Western Hemisphere - to increase their exports.

Yet, according to analysts, only Venezuela, which claims to have a spare output capacity of one million barrels daily, can substantially boost its petroleum production.

Venezuelan President Carlos Andres Perez Wednesday said his country could lift its oil output by 400,000 to 500,000 barrels a day, but would do so only within the framework of an agreement with other producing nations. Venezuela exports about 1.6 million barrels a day, with 60 percent going to the United States.

Other Western Hemisphere oil exporters - Canada, Colombia, Ecuador, Mexico Peru, and Trinidad and Tobago - are already pumping "close to full capacity," said Rafael Quijano, an analyst with Petroleum Finance Co., a Washington consulting firm.

Quijano noted that Ecuador and Colombia could raise their output by up to 20,000 and 30,000 barrels a day, respectively, not enough to make a dent in the international demand for fuel. In the case of Venezuela, part of the added production would be heavy crudes of lower quality than Middle Eastern oil.

Mexico, with over 49 billion barrels in proven oil reserves, could barely manage 100,000 additional barrels a day and could only sustain a higher output level for a few weeks, Quijano said. Other analysts estimate that the additional capacity would merely be 15,000 to 20,000 barrels a day.

George Baker, the Berkeley, Calif.-based executive secretary of the Consortium for Research on Mexico at the University of California, said Mexico has become a victim of years of underinvestment in oil due to the debt crisis that broke out in 1982, the inefficiency of its oil state company, and the tradition of economic nationalism enshrined in the country's constitution, which prohibits the activities of foreign oil enterprises on Mexican soil.

Quijano pointed out that Petroleos Mexicanos, the state company, has dramatically dropped its investments in exploration and production since 1986, resulting in a 500,000 barrel-a-day drop in production capacity, to the current 2.5 million barrels.

Mexican officers who asked not to be identified told United Press International in Mexico that their country needs to invest $13 billion to $14 billion until 1994 just to maintain and marginally increase its current oil output.

An internal study of the state company Petroleos Mexicanos - known as Pemex - calculated that without new investments in oil production, the country could become a petroleum importer by 1997.

Quijano estimated that during this decade Mexico needs to invest about $2 billion a year to keep pace with an internal demand rising about five percent a year and maintain its present level of oil exports of between 1.2 million and 1.3 million barrels daily. About 55 percent to 60 percent of Mexico's oil exports go to the United States and the rest mainly to Japan, Spain, Western Europe, and Israel.

Baker said that Mexico could receive a windfall of more than $1 billion during 1990 from higher world oil prices due to the Iraqi invasion of Kuwait. That added revenue would not necessarily benefit Pemex, "which has no authority whatsoever over oil export revenues, which go directly to the Central Bank" and are coveted by many, Baker cautioned.

Both Baker and Quijano said cash-starved Pemex simply does not have the resources needed to invest in production and exploration. To make things worse, private banks are reluctant to lend to Mexico after the losses they suffered by their recent agreement to reduce the country's foreign debt. Mexico's debt still stands at $95 billion and and its service siphons off large resources that cannot be devoted to investment.

Those circumstances leaves official lenders such as the U.S. Export-Import Bank, or its Japanese counterpart, as virtually the only sources of credit for the Mexican oil company. The analysts emphasized that official lending can not cover the oil investment needs of Mexico.

Baker and Quijano believe Mexico will have to find innovative ways to incorporate foreign private companies into the oil sector. "They do not have to resort to production or exploration agreements with foreigners" that would run against traditional Mexican economic nationalism, Quijano said.

#90221u0957 08/09/1990 ~United Press International

DETROIT (AUG. 9) UPI - Ford Motor Co. announced Thursday yet another extension of its buyer incentive program, this time cutting finance rates on several mid-sized cars - including its Taurus and Sable - to as low as 4.8 percent on 48-month loans.

Ford also said it will subsidize special financing rates on its recently introduced 1991-model Escort and Tracer subcompact cars in regions where dealers believe sales are slow.

Those low rates, to be offered for about three weeks through its Ford Credit subsidiary, will be determined by each dealer group and advertised locally, company spokesman Bill Carroll said, noting that an incentive program paying dealers cash to sell those cars expired this week.

Ford's new overall program, which runs until Sept. 26 or the end of the 1990-model year, is also offering 4.8 percent rates on its Thunderbird and Cougar coupes. Cash rebates of $1,000 may be chosen in lieu of the discount financing on those models as well as the Taurus and Sable. Ford last offered 4.8 percent financing on 48-month loans in December, a company spokesman said, but different models were eligible.

Several other vehicle lines carry rebates little changed from before, now ranging from $600 to $2,000, with $1,000 offered on a total of 11 car lines. Most have financing alternatives with rates as low as 7.9 percent on 48 month contracts.

The latest revisions are aimed more at undercutting recently extended offers on mid-sized cars like General Motors Corp.'s Chevrolet Lumina than to spur sales of larger, relatively less fuel-efficient cars in the wake of the Persian Gulf crisis, which resulted in steep price increases at the gas pump during the last week.

"With all the gains made in fuel economy since the last oil shock, some of these mid-sized models now get almost as good fuel economy as our smaller models do," one company spokesman noted.

Ford also said it is offering incentives on its smallest cars, including a $750 rebate on its Festiva subcompact and $1,000 back on leftover 1989 and 1990 Escorts.

Some industry analysts believe buyers will shy from the market while they wait to see how widespread an effect the Iraqi invasion has on fuel prices and the nation's economy in general.

"I think the macro-economic implications for the auto market are a lot more significant than changes in the behavior as to what kind of car people buy," one Ford sales analyst said.

Automakers are apparently conncerned that the inflationary effect of higher pump prices could cause the Federal Reserve not to ease interest rates, which would hurt overall new vehicle sales. "That's the much bigger concern in terms of the potential impact on sales," he said.

#90221u0972 08/09/1990 ~United Press International

AMMAN, JORDAN (AUG. 9) UPI - Jordanian youths staged anti-American protests and demanded Thursday they be allowed to join the Iraqi army to ''fight external aggression,'' and authorities sounded air raid alarms amid general war hysteria sweeping the kingdom.

King Hussein, who throughout the Kuwaiti invasion dispute has backed Iraq's President Saddam Hussein, departed for Cairo to join other Arab leaders in a summit aimed at finding a regional solution to the crisis.

Egyptian television reported the monarch was considering whether to adhere to a tough sanction package imposed by the U.N. security council against Iraq.

But Jordan's crown prince tried to reassure Westerners concerned Jordan is closely allying itself to Iraq.

''We are wrongly described as an ally of Iraq. We are not an ally of Baghdad,'' Crown Prince Hassan, brother of Jordan's King Hussein, told London's Independent in an interview published Thursday.

Amman said it did not recognize the ''Provisional Free Kuwait government '' which was installed by Iraq after the invasion. Baghdad announced Wednesday it was annexing the oil-rich emirate, making the new government obsolete after only four days of rule.

Despite enjoying sound relations with the West, the nation of 2.8 million has supported Iraq in regional and international forums and is allied through the Arab Cooperation Council because Baghdad is its major defense against Israel.

A civil defense official said air raid sirens sounded across the kingdom at about noon were to warn of the approach of an unidentified aircraft, which he inferred was Israeli.

However, Civil Defense Director Afif al-Ghul said on state-run radio that the sirens were ''blown off for reasons of experiment and to see if they work.''

Alarms at all government departments, schools and hotels were similarly tested, he said. The kingdom is reported to have placed its military in a high state of alert, with officials saying they fear Israel may exploit Iraq's diverted attention and invade.

In Israel, Prime Minister Yitzhak Shamir said his nation would not attack

any neighbors, but vowed to defend against any aggression.

Amid the mounting pro-Iraq sentiment, Jordanian politicians from across the spectrum voiced their support of Saddam and congratulated King Hussein for siding with the strongman.

A message sent from a left-wing party hailed the monarch for ''not letting down your people and for supporting Iraq, which is being subjected to imperialist hostility.''

More than 50 youths protested outside a building that houses the ''Committee for the Solidarity and Defence of the Arab Kuwaiti people,'' a body that backs the Iraqi invasion of Kuwait and has registered thousands of Jordanians and Palestinians who want to join the Iraqi army.

''We demand to be given the opportunity to defend Iraq against any external aggression,'' one protestor shouted.

Others chanted ''Down with America,'' and ''Allah Akbar,'' or ''God is Great,'' before the group marched to the Iraqi Embassy to demand entry permits to Iraq.

Government officials reported some foreigners were trickling into Jordan overland from Baghdad, where at least 400 Britons, West Germans and Americans have been housed in a hotel since being shipped to Iraq from Kuwait during the weekend.

Officials said that early Thursday 15 Japanese, six Britons, five Americans, five Canadians, one Tanzanian and one Paksitani crossed the border along with hundreds of Arab nationals.

The U.S. Embassy would not comment on reports by government officials that about ''two dozen'' Americans and some Britons had arrived on an Iraqi Airways flight Wednesday.

In Washington, the State Department said Baghdad had freed a 10-year-old girl, but 38 other U.S. citizens remained ''sequestered'' in the Iraqi capital.

Saddam's requests for Arab backing, particularly now that Saudi Arabia has accepted U.S. forces on its soil to defend against his formidable force in Kuwait, have struck a deep chord among Jordanian fundamentalist groups.

''Saddam has become the hero of nationalism and revived pan-Arabism,'' said politician Kamel Abu Jaber. ''He has alleviated Arab dignity at a time when Arabs were suffering from humiliation at the hands of the Americans and Western hegemony.''

#90221u0977 08/09/1990 ~United Press International
(AUG. 9) UPI - World crude-oil prices were mixed in light trading early Thursday as traders awaited the outcome of an Arab summit meeting and possible reaction by Iraq to the movement of American military forces into Saudi Arabia. "Everyone is waiting until they see what (Iraqi President) Saddam Hussein's next move is," said Peter Beutel of New York's Merrill Lynch Futures Inc.

The United States began moving military forces into Saudi Arabia Wednesday in an effort to dissuade a possible Iraqi attack from its positions in occupied Kuwait. Saudi Arabia is the world's largest crude-oil exporter.

"Depending on what comes out of the Arab summit meeting, the market will receive its next direction," said Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York.

Leaders of Arab nations were meeting in Cairo to discuss a possible Arab solution to Saddam's Aug. 2 invasion of Kuwait. Iraq announced Wednesday it had annexed its oil-rich Persian Gulf neighbor.

On the European cash markets, Dubai light, the key Mideast crude produced by the 13-nation Organization of Petroleum Exporting Countries and shipped mainly to the Far East, was being unchanged from late Wednesday at $21.80 a barrel.

It had fallen $3.95 Wednesday on reports that Saudi Arabia had agreed to raise its daily output by 2 million barrels to help make up for the 4.6-5 million barrels lost by the world embargo of Iraqi and Kuwaiti exports. Britain's widely traded North Sea Brent crude was down ten cents to $24.65 a barrel after losing $3.65 a barrel Wednesday.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for September delivery was up 45 cents at midday to $26.40 a barrel after trading as low as $25.35 a barrel earlier. It fell $2.35 to $25.96 a barrel Wednesday.

Unleaded gasoline for September delivery, which nosedived 6.18 cents Wednesday, was up 1.54 cents a gallon to 77.75 cents a gallon in early trading on the Merc.

September heating oil, which dropped 5.01 cents Wednesday, was gaining 1.12 cents to 71.25 cents a gallon. On the U.S. Gulf Coast cash market, prompt delivery WTI was virtually unchanged at $26 a barrel.

Beutel said, "The market is trying to adjust itself to where it wants to be. Some traders feel in their hearts that Saddam Hussein is going to do

something that will cause problems."

Barakat said Merc crude prices were moving lower earlier when rumors hit the trading floor that Iraq was moving troops toward its border with Turkey and had closed all its borders.

Joseph Tovey, a New York energy consultant, raised the possibility that Iraq could easily swing troops along its Turkish border down into Syria and gain a Mediterranean outlet for its oil exports. Syria, which sided with Iran during the eight-year Iran-Iraq war, closed down a oil pipeline from Iraq in 1982.

#90221u0981 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - In a move that could further drive up the price of diesel fuel but which promises to virtually eliminate the belching black smoke from diesel engines, the Environmental Protection Agency Thursday ordered an 80 percent cut in the sulfur in the fuel over three years.

The new rule will add between 1.8 cents and 2.3 cents per gallon to the cost of the fuel, heavily used within the transportation industry as a fuel for trucks, buses and locomotives. Some passenger cars also have diesel engines.

Although the price of fuel will go up, the EPA also said the prospect of lessened engine wear and cheaper emissions controls could offset some or all of the higher per-gallon price.

EPA Administrator William Reilly said the measure marks ''an important step for cleaner air and protection from the harmful effects of particulates.''

Reilly said the cut will have the largest effect in urban areas where particulate levels are the highest and where more people are exposed to the emissions.

''This action, along with the stringent heavy duty particulate reduction standards for 1991 and later vehicles will virtually eliminate the black smoke from diesel tailpipes, cutting particulates by 90 percent,'' Reilly said in a statement announcing the change.

In addition, the move should help reduce the contribution of diesel exhausts to acid rain, the EPA said.

The EPA said it was especially concerned about the minute size of the particulates in diesel emissions. The fine particles can be inhaled and

pose a greater health impact because they can remain within the respiratory system for a long time. Their effect is compounded because they are typically emitted at ground level in heavily populated areas.

Diesel exhaust has been identified as a potential cause of cancer.

The cost of the new rule will depend upon the volume of diesel fuel controlled, and it requires refiners to reduce the sulfur content of diesel fuel used on the road from 0.25 percent by weight to 0.05 percent.

The EPA said small refiners have until 1995 to phase in the new standards, but they will be required to meet interim standards as they install equipment necessary to remove the sulfur.

To protect 1994 and later model-year engine designs, which will require the low-sulfur fuel, diesel fuel produced under the two-year extension may be sold only for vehicles equipped with pre-1994 engines or for off-highway use.

The new rule also is expected to help diesel engine manufacturers meet tighter particulate exhaust standards in 1991 and 1994.

Tne EPA said that the lower sulfur fuels also will cut secondary formation of particulates in the atmosphere. The majority of the sulfur in the fuel is emitted as sulfur dioxide, and much of it later is oxidized into sulfuric acid and ammonium sulfates, both contributors to acid rain.

The federal environmental watchdog said particulates should be reduced by 190,000 tons per year by 1995. Sulfur dioxide levels, it said, should fall by 580,000 tons per year.

The agency said the annual costs to refiners will range from $380 million to $910 million in 1995 and from $540 million to $1.3 billion by 2010.

However, the agency said that partially offsetting that cost will be manufacuturers' ability to use less costly emission control devices, resulting in consumer savings of $60 to $325 per vehicle. Total savings, including expected fuel savings from the use of catalytic devices, which use less energy than technology that otherwise might have been used, will be $200 million in 1995 and $465 million in 2010.

And the agency said that if the diesel fuel sulfur cuts result in reduced engine wear, as some information suggests, consumer savings could outweigh the increased costs per gallon for the low-sulfur fuel.

#90221u0987 08/09/1990 ~United Press International

BOSTON (AUG. 9) UPI - A newly discovered gene that causes a disorder once called Elephant Man's disease apparently is among a family of genes that may play a key role in the development of some cancers, researchers said Thursday.

The gene for the often-disfiguring disease neurofibromatosis appears to be a member of a family of genes called GAP that might act to hold cancerous tumor growth in check, or when flawed to help trigger cancer, said Raymond White of the University of Utah.

Last month, research teams led by White and by Dr. Francis Collins of the University of Michigan announced they had independently identified the long-sought gene that causes neurofibromatosis 1, or NF 1. The disease is one of the most common genetic disorders, affecting about 100,000 Americans and one in 4,000 infants worldwide.

NF 1, which has no cure, causes uncontrolled growth of nerves and other tissue. Most people with the disease develop light brown skin splotches and many have tumors of the nerve network. The disease had been called Elephant Man's disease because John Merrick, a 19th century Englishman whose life was the subject of a play and a movie, was thought to have suffered from it. Doctors now believe he actually had another disorder.

It appears the NF 1 gene is in the GAP family because of the ''striking similarity'' between the way certain proteins are formed at the gene's direction and the way other proteins are made by a known GAP gene, White and co-researchers reported in the scientific journal Cell.

Genes are blueprints that cells use to make proteins that have a large variety of functions in the body. In the process of making proteins, substances called amino acids are linked together in a certain sequence to form a polypeptide chain.

''Whenever you have a new gene, you look to see whether there are any similarities in the amino acid sequences the gene produces'' and the sequences formed by previously identified genes, White said.

The close similarity in amino acid sequencing the Utah researchers found between the NF 1 gene and the GAP gene they compared it to lends support to scientists' suspicions that the NF 1 gene might help trigger cancer under certain circumstances, White said.

The NF 1 gene is a flawed version of one of about 100,000 genes on 23 pairs of chromosomes that humans get from their parents. People with neurofibromatosis have inherited the abnormal gene, but in some people the gene is thought to change, or mutate, after birth, White said.

He said researchers think that in their normal form, GAP genes may be

beneficial by helping prevent cancer-causing genes called oncogenes from setting off out-of-control cell reproduction. But if GAP genes are damaged or mutated, they seem to lose their tumor suppression capabilities and give oncogenes the green light for cancer cell growth, White said.

White said the latest discovery should ''drop the NF 1 gene right into the hotbed of research on oncogenes'' and may further the understanding of interactions between oncogenes and other genes that may function in part as traffic signals, giving cancer-triggering genes stop or go signs.

Previously, White led a team that identified the gene for retinoblastoma, a cancer of the retina of the eye that affects up to one in 15,000 infants. That gene also is thought to play roles in both inhibiting and triggering tumor growth.

#90221u1018 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - Continental Airlines Holdings Inc. announced Thursday that Frank Lorenzo will sell most of his investment in the company and will step down as its chairman and chief executive officer in efforts to bolster Continental.

The controversial Lorenzo, frequently portrayed as a villian by labor unions, said in a statement issued in New York by the company that he will retain his duties as a board director but is selling most of his investment to the company for $17 million. He kept an existing option on 783,333 shares.

"In building Continental over these many years, changes were clearly required to allow Continental's people to develop the successful company that we are today, and I have obviously become a lightning rod.

"By stepping aside, as part of these arrangements, the hard work and dedication of our people can continue, and we can accelerate our progress toward excellence," his statement said.

Scandinavian Airlines System, which acquired a 9.9 percent share of Houston-based Continental Holdings in October 1988, will spend about $50 million to increase its interest in Continental to 16.8 percent of the equity and 18.4 percent of the voting stock.

Delta Airlines President Hollis Harris, 58, was named Continental Airlines chief executive. Lorenzo called Harris "one of the industry's most experienced and highly regarded executives with an outstanding reputation."

The Continental board of directors said Jan Carlzon, SAS president and chief executive officer, had agreed to consider accepting the post of

non-executive chairman. Carlzon already is a board member.

"Carlzon is one of the most respected international executives and our board believes he would add enormous credibility to Continental's already strong product credentials," Lorenzo's statement said.

The proposal awaits approval from the Department of Transportation and the Justice Department. Federal laws limit a foreign carrier to owning 25 percent of a U.S. airline, but the deal falls within those guideines. SAS is based in Stockholm.

The proposal calls for SAS to acquire Jet Capital Corp. for $21 million or about $4.60 a share. Lorenzo and other Jet directors own more than 80 percent of Jet Capital. Jet Capital shareholders also have yet to approve the deal. SAS also will buy from Continental 2.25 million shares of common stock at $14 a share.

In addition to Carlzon, Continental's board invited SAS to nominate two additional representatives to serve on the board. SAS indicated one nominee will be a U.S. citizen.

"This is a sound investment opportunity for SAS, and a logical development of the investment we made in 1988," said Carlzon. "Since we teamed up with Continental almost two years ago, we have seen a steady growth in our North American traffic ... the alliance between Continental and SAS has been to the benefit of the passengers and a success for both airlines."

Continental Airlines Holdings was known as Texas Air Corp. until June, when it changed its name. It is the parent company of Houston-based Continental Airlines and of beleaguered Eastern Airlines, based in Miami.

Lorenzo served as chief executive officer of both Continental Airlines and Texas Air as well as the latter's predecessor, Texas International Airlines.

Controversy is nothing new to the 50-year-old executive who was embroiled in a bitter battle with Eastern's unions over his attempts to lower labor costs. A strike that begun in March 1989 sent the carrier into Chapter 11 bankruptcy, from which it has yet to emerge.

Despite the former Texas Air's June name change, the parent remains responsible for Eastern's pension debt, which could total nearly half a billion dollars.

Continental made a dramatic financial turnaround from last year and the year before, but much of its net income comes from one-time gains such as lawsuit settlements and asset sales. Its debt service costs remain high.

Lorenzo was chief executive officer of Continental Airline Holdings and its Texas-based corporate predecessors for 18 years. Texas Air took over Continental Airlines in 1981; in 1983, Lorenzo became CEO of the airline for a seven-month stint after the carrier filed for Chapter 11 protection in September 1983. He was replaced by Philip Bakes and then resumed leadership of the airline in July 1987.

Lorenzo was considered a union-busting enemy by the unions representing airline workers following his moves in 1983 to abbrogate union contracts in conjunction with Continental Air's bankruptcy filing, and his subsequent replacement of union labor with lower-paid non-union employees.

#90221u1019 08/09/1990 ~United Press International

JERUSALEM (AUG. 9) UPI - Prime Minister Yitzhak Shamir said Thursday Israel was not planning an offensive action in the wake of the gulf crisis but warned it would defend itself aggressively against any hostility.

On Wednesday, Iraq charged Israel was planning to attack it with military planes disguised as American aircraft and on Thursday Jordanian officials said they sounded an air raid siren in Amman to warn against an unidentified plane they believed was Israeli.

Israeli officials have denied the charges as well as any involvement in the Western military buildup in the Gulf, but stressed that Israel was taking the Iraqi threat seriously.

Iraq invaded and then annexed the tiny oil-rich emirate of Kuwait and massed troops along Kuwait's borders with Saudi Arabia. The United States has deployed thousands of troops to the kingdom to guard against a possible Iraqi attack and other European nations have sent military support to the region.

''This is another lie by Iraqi President Saddam Hussein intended to promote his violent aims,'' the Israel army spokesman said of the charge that Israel was camouflaging its planes.

Speaking to a group of Israeli mayors, Shamir said Israel was facing threats to its security and would not ignore them.

''Anyone scheming to attack Israel must know that it has the ability to defend its security and that whoever tries to attack will bring upon himself a great tragedy,'' he said. ''Israel has no intentions of attacking any of its neighbors, but it knows how to deal with anyone who tries to attack it.''

#90221u1036 08/09/1990 ~United Press International

(AUG. 9) UPI - Summer markdowns figured heavily into sluggish-to-moderate July sales gains reported Thursday by the nation's largest retail chains, which may suffer pinched profit margins as a result.

Continuing a months-long trend, specialty and department stores fared better in July than merchants whose mix includes big-ticket appliances and hard goods shunned by consumers who fear a recession is looming.

Standouts for the month included The Gap, a boutique-style casual wear retailer, Dayton Hudson department stores, and Woolworth Corp., which has recently shifted its focus from five-and-dimes to specialty shop operations such as Foot Locker and Champs. At the same time, general merchandise giants such as Sears, Roebuck & Co. and K mart Corp. posted sluggish July results.

Nationwide, retail sales were up 6.3 percent from a year earlier on a seasonally adjusted basis, according to an index prepared by Prescott, Ball & Turben.

"Discounts were deeper than they usually are in July, which is a clearance month," said Kurt Barnard, publisher of Barnard's Retail Marketing Report in New York. "The figures demonstrate the results of intense sales promotions that hurt margins."

Chicago-based Sears, the nation's largest retailer, said on a comparable-store basis - stores open at least one year - sales rose 3.1 percent, while gross revenues of $2.52 billion were up 3.7 percent from $2.43 billion a year earlier.

Earlier this week, Sears demoted the head of its general merchandise group, Michael Bozic, who was responsible for the retailer's shift last year to an "everyday low price" policy that has failed to catch on with consumers.

K mart, the nation's second-largest retailer based in Troy, Mich., said comparable or same-store sales - generally considered the best measure of a retailer's performance, were up 2.2 percent. K mart's total July sales increased 12 percent to $2.27 billion from $2.02 billion a year earlier. "We are pleased with July results considering the relatively weak retail environment," said Chairman Joseph Antonni.

Even fast-growing Wal-Mart Stores Inc. of Bentonville, Ark., showed some symptoms of sluggish consumer spending. Same-store sales were up eight percent - a strong showing compared to other retailers but off the mark from Wal Mart's typical double-digit increases - while net sales increased 21 percent to $2.4 billion from $1.98 billion a year earlier.

Among the bright spots, The Gap Inc. of San Francisco reported comparable store sales increased 28 percent, while total sales of $114 million represented a 36 percent increased over sales of $84 million a year earlier.

"The Gap continues to have a grip on casual America," said Janet Mangano, a stock analyst for Jesup, Josephthal & Co. in New York. "They do not have to be especially promotional because their clothes are selling themselves."

Minneapolis-based Dayton Hudson Corp. said its department store division - including Marshall Field's, which was acquired by the company earlier this year - had a same-store sales increase of eight percent in July. Comparable store sales at the company's Target's and Mervyn's discount divisions rose five percent and two percent, respectively. Dayton Hudson said total sales increased 16.4 percent in July to $984 million from $845 million a year earlier.

New York-based Woolworth said its same-store domestic sales were up 4.9 percent in July, while its total domestic sales increased 8.7 percent to $389 million from $358 million.

Among other retailers, Dallas-based J.C. Penney Inc. said comparable-store sales rose 2.4 percent, while total sales were up 3.8 percent to $1.09 billion from $1.05 billion a year earlier.

May Department Stores Co. of St. Louis said same-store sales were up 4.4 percent. Total sales rose 9.8 percent to $606.8 million from $552.7 million a year ago.

Some retailers choose not to report their monthly sales revenues or do not do so because they are privately held. Among those not reproting: Federated Department Stores Inc., Allied Stores Corp., R.H. Macy & Co., Nordstrom Inc. and Montgomery Ward & Co.

Other results: The Limited Inc. of Columbus, Ohio, said same-store sales increeased 6 percent, while net sales were up 19 percent to $348.9 million from $292.5 million a year earlier.

The Neiman Marcus Group Inc., of Chestnut Hill, Mass., reported a 6.6 percent rise in comparable-store sales. Total revenues rose 10 percent to $116 million from $105.5 million.

Los Angeles-based Carter Hawley Hale Stores Inc. said same-store sales rose 0.4 percent, while total sales of $176 million were 0.9 percent ahead of $174.5 million a year earlier.

Hills Department Stores Inc. of Canton, Mass., said same-store sales increased 19 percent, while total sales of $157.3 million were up 22

percent from $128.9 million a year ago.

(AUG. 9) UPI - The word from official Burmese Radio is that government troops shot in the air... NOT at demonstrators... during a pro-democracy scuffle in Mandalay, which is about 300 miles north of Burma's capital of Rangoon. Western diplomats in Burma said yesterday that government troops shot and killed four demonstrators in the incident.

Lightning touched off more wildfires in Western forests, where about 75-thousand acres of brushland, timber and recreational areas have burned. Three-thousand firefighters are working in scorching heat to douse lightning-ignited fires in central and eastern Oregon. Fire crews mopped up earlier fires, including one that destroyed 22 homes and caused five-Million dollars west of Bend.

#90221u1072 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - Americans are watching their diets more carefully than ever but southerners take a more laid-back view of salt and cholesterol than Yankees, a survey reported Thursday.

In the Roper Organization Poll commissioned by USA Weekend, 2,000 persons around the country named salt as the biggest diet villain, with 18 percent saying they avoid it completely, and 46 percent saying they use it only sparingly.

Nineteen percent said they avoid foods high in cholesterol and 41 percent said they only eat them in small quantities.

Sixty percent said they also try to shun alcoholic beverages, 57 percent said they tried to avoided sugar, 56 percent named fried foods, 53 percent foods with nitrites, 53 percent deserts and sweets, 52 percent sugar substitutes.

Forty-six percent said they also avoid foods sprayed with pesticides, 46 percent named red meat, 41 percent caffeine, and 35 percent starches.

New Englanders were the most diet conscious, with 30 percent saying they don't touch salt. Seventy-two percent said they tried to avoid foods containing chloesterol.

Only 13 percent of southerners said they avoided salt and 46 percent were concerned about cholesterol.

Along the Gulf Coast, only 15 percent said they avoided salt and 58 percent said they watch their cholesterol intake.

Fourteen percent of Prairie states residents said they shunned salt and 58 percent said they were cholesterol wary.

On the West Coast, 19 percent said they avoided salt and 67 percent said they they watched cholesterol in their diets.

-30- 1776

#90221u1079 08/09/1990 ~United Press International

CAIRO, EGYPT (AUG. 9) UPI - Iraq agreed Thursday to participate in an emergency Arab summit called to forestall further foreign involvement in the Persian Gulf crisis while U.S. forces took up positions in Saudi Arabia.

The summit had been scheduled to begin Thursday evening in Cairo but was postponed until Friday morning to give Arab leaders more time to travel to the Egyptian capital.

Tension in the region mounted Thursday despite the moves toward finding a solution to the crisis, which was touched off last week when Iraq invaded neighboring Kuwait and exacerbated Wednesday when President Saddam Hussein said he was annexing the oil-rich emirate.

Iran, Libya and other hard-line Arab nations indicated that while they were unhappy with Iraq's invasion of Kuwait last week, they were equally concerned about the presence of troops from Europe and the United States gathering in the gulf.

Arab leaders, including Syrian President Hafez Assad and Libyan leader Moammar Gadhafi, arrived in Cairo Thursday for the emergency summit, where Egyptian President Hosni Mubarak was expected to call for a joint Arab peace-keeping force and an Iraqi withdrawal from Kuwait.

The deposed emir of conquered Kuwait, Sheikh Jaber al Ahmad al Sabah, planned to lead a delegation to the summit, Egypt's Middle East News Agency reported.

The news agency also said Taha Yassin Ramadan, Iraq's first deputy prime minister, would attend the emergency Arab session along with three other delegates, including Iraqi Foreign Minister Tariq Aziz. Aziz had disappeared from public view last week at the same time as reports surfaced that said Baghdad had executed more than 100 military officers.

Also Thursday, the United Nations declared Iraq's annexation of Kuwait was null and void and urged member nations to refuse to recognize the action.

President Bush ordered U.S. troops into Saudi Arabia because of concern that the Iraqi force that took Kuwait so easily would advance into Saudi Arabia. The Americans began arriving in Saudi Arabia Wednesday and sources said the U.S. force could grow to 50,000 troops.

Jordan set off air raid alarms and Secretary of State James Baker reportedly told Turkish leaders in Ankara that NATO would be willing to defend Turkey if Iraq attacked across the Turkish border. A Western diplomat based in Cairo said Iraqi troops also were massing on the Iraq-Turkey border.

The gulf also was the scene of multinational military movement, with U.S. troop deployments to Saudi Arabia reportedly expected to reach 50,000. Saudi King Fahd appeared on television to tell his nation that the foreign troops on Saudi soil were necessary to maintain security in case Iraqi troops massed at the Kuwaiti border attacked.

Turkey beefed up security along its border with Iraq, wary that Baghdad will retaliate because Ankara has honored a U.N.-imposed embargo against Iraq by cutting off shipments of oil from two Iraqi pipelines that cross

Turkey to the Mediterranean.

The Soviet Union said it would consider joining a multinational military force in the Middle East only if it was set up by the U.N. Security Council. Two Soviet military ships passed through the Suez Canal, but their mission was not clear.

The Iraq News Agency said Palestine Liberation Organization Chairman Yassir Arafat met with Saddam Thursday and sources said the PLO leader went to Baghdad to convince his ally to participate in the Arab summit.

Iraq's old foe Iran - with which it fought for eight years before a truce in 1988 - warned the massive presence of American military forces in the gulf was ''more dangerous ... on developments in the region than Iraq's military occupation of Kuwait,'' the Iranian News Agency said in a dispatch monitored in Washington.

Mohsen Rezaei, commander of the battle-hardened Islamic Revolution Guards Corps, said the United States was using the incident in Kuwait as an opportunity to tighten its control on the flow of oil in the gulf.

But Iran also warned that as a major power in the region, it would not tolerate an ''alteration in the political geography of the region.''

#90221u1082 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Non-fuel commodity prices fell in June by 2.6 percent in dollar terms on world markets, partly offsetting a cumulative price increase of 4.2 percent registered in the preceding four months, the International Monetary Fund said Thursday.

The multilateral organization noted the monthly fall was broad based, reversing earlier signs of a possible uptrend in prices.

During June, the sharpest price declines were recorded for: fine wool, 15 percent; bananas, 14 percent; sugar in the free market, 11 percent; coconut oil, 10 percent; wheat, 9 percent; cocoa, 8 percent; and copper, 6 percent.

At the end of June, the IMF's index of non-fuel commodity prices was 7.3 percent below year-earlier levels.

#90221u1116 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - The Royal Dutch/Shell Group of Companies reported Thursday second-quarter earnings fell 43 percent compared to a year ago,

largely as a result of falloff in U.S. and crude oil production profits.

Earnings for the three months ended June 30 were $940 million, off from $1.64 billion earned in the same period in 1989. For the first six months, earnings fell to $2.29 billion from $3.88 billion in 1989, Shell said.

The group is made up of Royal Dutch Petroleum Co. and Shell Transport and Trading Co., each of which is separately traded on the New York Stock Exchange.

Royal Dutch's second-quarter earnings declined to $1.11 a share from $1.93 a share in 1989. Earnings for the first half dropped to $2.70 a share from $4.57 a share in 1989, a company statement said.

Shell Transport's quarterly earnings fell to 62 cents on its American Depositary Receipts from last year's $1.09 an ADR. First-half earnings dropped to 1.53 an ADR from 1989's $2.59 an ADR.

ADRs are issued by U.S. banks to facilitate the trading of foreign securities by easing their transfer overseas and conversion to foreign currencies.

Royal Dutch/Shell Group's second-quarter revenues increased to $27.86 billion from 1989's $26.17 billion, while first-half revenues reached $56.99 billion from last year's $51.19 billion.

Shell said second-quarter earnings fell largely as a result of lower world crude prices.

Exploration-and-production earnings dropped to $396 million in the second quarter from last year's $556 million, with the U.S. sector recording a $72 million loss as opposed to a $98 million profit in 1989.

Second-quarter earnings from the company's chemicals business fell $93 million to $175 million. Most of the falloff came from U.S. operations.

#90221u1137 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - In a move that underscores the uncertain cost of his show of force in Saudi Arabia, President Bush will protect those troops from budget cuts that could occur Oct. 1 to reduce the deficit, the White House announced Thursday.

White House press secretary Marlin Fitzwater said Bush will order military personnel exempted ''as necessary'' from across-the-board cuts that would be triggered by the failure of budget negotiations between the administration and Congress.

Under the Gramm-Rudman-Hollings balanced-budget law, Congress must take action by Oct. 1, the start of the new fiscal year, to cut the projected deficit for 1991 by more than $100 billion to escape the automatic cuts.

Fitzwater said Bush, who must decide by Aug. 15 whether to include military personnel in preparations for such reductions, will ''exempt whatever forces are necessary to ensure that (the defense of Saudi Arabia) is not impeded.''

The order, to be reflected in initial budget-cutting orders due Aug. 25 from the Office of Management and Budget, most likely would be selective in scope and not exempt all military personnel from the law, Fitzwater said.

Bush said Wednesday that he asked the Pentagon for a cost estimate of his massive deployment of combat aircraft, warships and as many as 50,000 troops to Saudi Arabia and the Persian Gulf, ordered Monday to defend against possible aggression by Iraq and pressure its withdrawal from Kuwait.

Fitzwater said Bush discussed that issue, which further complicates the budget impasse between the administration and Congress, with his top advisers Wednesday evening, but emphasized no conclusions were reached.

Fitzwater acknowledged, however, that the Persian Gulf crisis has forced the administration to reassess its position on how to trim as much as $50 billion from the projected deficit for next year through spending cuts, tax hikes and fees.

With budget negotiations scheduled to resume in September, he said the administration ''may alter'' its proposals ''to reflect new realities'' such as the unknown costs of the open-ended U.S. military commitment in the gulf.

In contrast to suggestions that the gulf crisis, which has led to a rise in oil prices, may push the country so close to recession as to make major spending cuts and tax increases too big a risk for a shaky economy, Fitzwater said Bush still wants to cut ''as much as possible'' from the deficit.

''We will continue to support the budget negotiations. We will continue to press the Democrats to present a proposal and we will work to that end,'' he said.

The Gramm-Rudman-Hollings law requires that any across-the-board spending cuts needed to reach deficit-reduction targets, a process known as sequestration, be divided equally between military and non-military

programs.

In a July 16 mid-year review of the budget situation, the administration calculated that a $100 billion sequestration - based on projections that the fiscal 1991 deficit will hit $168.6 billion, compared with a target of $64 billion - would require a uniform cut of 25.1 percent in military programs with personnel included and 41.3 percent with all personnel exempted.

That would mean a more severe impact on civilian Pentagon employees and other defense programs. Bush has the legal authority to exempt only manpower and not equipment or other costs associated with the Persian Gulf deployments.

An aide to a key Congressional budget negotiator said Wednesday that the gulf crisis and fears of a recession could prompt House and Senate negotiators to slash the budget deficit reduction package by up to half.

The aide said any inability to slash Pentagon spending because of the Persian Gulf would make it harder to cut domestic spending and federal benefit programs.

House Budget Committee Chairman Leon Panetta, D-Calif., said in a telephone interview, ''I think we ought to try to get as close to the $50 (billion) as we can so that would mean we ought not to drop below $40 (billion.)''

Senate Republican leader Robert Dole of Kansas told reporters that, because of the Middle East situation, ''we might want to be a bit more reasonable on defense (cuts).'' He also said a gas tax hike is now unlikely.

House Armed Services Committee Chairman Les Aspin, D-Wis., told reporters that the Middle East situation might cause budget negotiators to ''breathe a big sigh of relief and reluctantly conclude that for good reasons for our economy we really shouldn't get a $50 billion reduction package ... that would strangle the economy.''

#90221u1149 08/09/1990 ~United Press International
BANGKOK, THAILAND (AUG. 9) UPI - A Cambodian resistance leader said Thursday U.S.-Vietnam talks on Cambodia this week could induce Vietnam to harden its position on a political settlement to the 11-year-old conflict.

''I would welcome the American new stand towards my homeland if it could really contribute to making Vietnam more flexible,'' said Prince Norodom Ranariddh, military commander of one of the three resistance groups fighting the Vietnamese-backed Cambodian government.

The United States announced last month it was reversing its policy and would hold talks with Vietnam to ensure against a return to power in Cambodia of the Khmer Rouge, one of the three resistance groups. The Khmer Rouge has been accused of killing up to 1 million Cambodian during its three years in power during the mid-1970s.

The resistance is worried that Vietnam leaders will take advantage of the new U.S. policy to harden their stand, Ranariddh said in a press statement.

He said Vietnam, which invaded Cambodia in late 1978, toppled the Khmer Rouge and installed the Phnom Penh regime, would interpret the American policy shift as a Vietnamese victory.

In the policy shift, the United States ended its diplomatic support for the resistance at the United Nations and offered to hold talks with Vietnam and, possibly, the Vietnamese-installed government in Cambodia.

Both the United States and Vietnam said the first round of talks in New York on Tuesday were ''useful.''

JERUSALEM (AUG. 9) UPI - Israel successfully launched an Arrow missile Thursday in the first test flight of the weapon, which is being developed as a defense against short- and medium-range missiles like those in the Iraqi and Syrian armories, Israel Radio reported.

The anti-missile missile was launched in the afternoon, flew several miles and was destroyed in mid-flight as planned, the radio said. The experiment was observed by defense officials, Israel aircraft industry officials and U.S. representatives.

The test launch, although previously scheduled, came as tension mounted over the Iraqi invasion of Kuwait and was likely to be seen by Israelis and Arab nations as a sign of Israel's technical and military prowess.

However, the Arrow anti-missile program offers no real protection in the immediate future, experts say.

It is not expected to be completed for several years, and Defense Minister Moshe Arens said Israel had not made a final decision whether to include the missile in its armed forces.

The purpose of the Arrow missile is to intercept incoming medium- and short-range missiles. It could be used against Iraq's medium-range al-Hussein missiles and al-Abbas missiles.

The Arrow project is part of the United States's Strategic Defense Initiative. The United States has paid for 80 percent of the the first phase of the project, which has cost $158 million and is expected to be completed by next year.

Last month, the United States agreed in principle to fund the second phase of the program, which is expected to last four years and cost $200 million.

Thursday's test flight had been planned before the Iraqi invasion of Kuwait, but the date had not been publicly announced.

#90221u1162 08/09/1990 ~United Press International
LONDON (AUG. 9) UPI - Britain will send two squadrons of jet fighters to the Persian Gulf to join a U.S.-led multinational military effort to prevent further aggression by Iraq, Defense Minister Tom King said Thursday.

King said the force was bound for Saudi Arabia ''and other threatened gulf states.''

The minister said he hoped other countries, particularly those in Europe, would join the military effort spearheaded by Washington.

Britain was second to the United States in responding to a Saudi request for military aid made after Iraqi troops moved to its border with Kuwait. Iraq invaded Kuwait last week and announced its annexation on Wednesday.

King emphasized that Britain had no aggressive intentions in the Gulf but was seeking to defend the region's states against Iraqi hostilities.

The British deployment was described by military observers as ''small but powerful.''

Twelve Tornado fighter-bombers now in Cyprus were ordered to Saudi Arabia, which has Tornados of its own. They will be protected by air defense units equipped with Rapier ground-to-air missiles, the Ministry of Defense said.

A dozen Jaguar strike-fighters were dispatched from Britain to unnamed place - the British Broadcasting Corporation speculated Oman. The jets could be used to destroy Iraqi tankers.

Three British mine-hunting vessels are headed to the Gulf, to join the destroyer HMS York, frigates Jupiter and Battle-Axe, and support vessel Orangeleaf. They will be assisted by Nimrods, the British equivalent of the U.S. AWAC, and VC-10 tankers.

#90221u1175 08/09/1990 ~United Press International
(AUG. 9) UPI - Iraq has agreed to send a delegation to today's emergency Arab summit in Cairo, but Iraqi leader Saddam Hussein won't personally be attending. Egyptian President Hosni Mubarak called the meeting as a last-ditch diplomatic effort to try to head off a potentially disastrous military stand-off between Iraq and U-S-led multi-national forces. Mubarak is expected to call for a joint Arab peace-keeping force and an Iraqi withdrawal from Kuwait.

A 10-year-old American girl detained by Iraqi authorities in Baghdad has

been released. Penelope Nabokov of Albany, California, was turned over to U-S Embassy officials in Baghdad yesterday after she was taken off a plane that stopped to refuel in Kuwait. There is NO word on whether the 38 other Americans taken from the plane will be freed.

Libya reportedly is ready and willing to help Iraq. Libyan Radio reports that thousands of Libyans marched to the Iraqi Embassy in Tripoli to let Iraq know they are prepared to help in a possible fight against U-S troops stationed in Saudi Arabia. Radio reports say the Libyans are ready to-quote- ''face up to the U-S ... intervention.''

The Reverend Jesse Jackson says he's prepared to mediate the Middle East crisis. Jackson plans on meeting with the brother of Saudi Arabian King Fahd in Massachusetts this weekend to decide if he should step in to spearhead negotiations. A spokesman for the prince says Jackson is well-liked by a number of Arab leaders.

The Chaldean Federation of America... whose members are mostly Christian Iraqis... today came out in strong support of President Bush's decision to send American forces to Saudi Arabia. Chaldean spokesman Tom George says the organization does NOT condone Iraq's conquest and annexation of Kuwait.

(AUG. 9) UPI - Jurors in the drug and perjury trial of Washington, D-C, Mayor Marion Barry are in their seventh day of deliberation after taking a look at an F-B-I videotape. A federal judge yesterday allowed the jury to view a tape of the federal cocaine sting in which Barry was allegedly caught smoking crack cocaine.

Four days of rioting and looting in mixed-race townships in the South African city of Port Elizabeth have left at least 23 people dead. Police confirm that an officer shot and killed a baby yesterday, but officials could NOT explain why. Authorities say riots first erupted on Monday in a protest over rent hikes approved by the mixed-race house of South Africa's parliament.

Two Norfolk Southern freight trains collided in Georgia's Blue Ridge Mountains, killing three crewmen and injuring four other trainmen. The trains carried lumber and other cargo. Police say three engines and a rail car loaded with lumber caught fire, and witnesses reported at least three explosions. The accident occurred near Hill City, Georgia.

A Philadelphia jury is deliberating on the death penalty or life in prison for five Hispanic men convicted in the racially motivated slaying of a policeman's son. Police say Rafael Droz got up to 15 youths from his neighborhood to look for a group of white youths who harassed him.

17-year-old Sean Daily died after being beaten and shot last May.

#90221u1197 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Federal thrift regulators, saying they do not believe Charles Keating is broke, Thursday sought $40.9 million in restitution from the Arizona executive and demanded he account for every penny of his assets.

Keating, who once earned more than $1 million annually as chairman of the bankrupt American Continental Corp., has said recently that he has run out of money.

''It's up to him to prove to us that he's broke. We don't believe he is,'' said OTS Director Timothy Ryan. ''We have reason to believe the funds are available.''

Assistant Attorney General Stewart Gerson, who is in charge of the Justice Department's civil division, said regulators will take apart Keating's ''magic pyramid brick by brick'' to learn what happened to the executive's financial empire.

The OTS also announced it is seeking an order to remove Keating and five other officers and directors from Phoenix-based ACC, parent of the failed Lincoln Savings and Loan Association. The order also would ban Keating from ever working at a federally insured financial institution.

''We believe Mr. Keating and his associates profited from improper use of depositors' funds, and we want that money returned to Lincoln,'' Ryan said.

The restitution order is the largest ever sought by the agency, surpassing the $24 million sought two months ago from Thomas Spiegel, former chairman of Columbia Savings and Loan Assocation.

Ryan said the agency is giving Keating five days to present a complete accounting of his assets, prepared by a certified public accountant. The order also requires Keating to give the agency two-days notice before transferring any funds or assets more than $5,000.

Keating could not be reached immediately for comment.

The order is seeking restitution not only from Keating, but from Judy Wischer, a former ACC president; Charles Keating III, the executive's son; Robert Kielty, Robert Hubbard and Robert Wurzelbacher, all ACC executives and Keating's sons-in-law.

''We just want the money returned,'' Ryan said. ''The source could be any

one of the respondents.''

Lincoln, of Irvine, Calif., was placed under government control in April, 1989. Keating has challenged the takeover in federal court and U.S. District Court Judge Stanley Sporkin is expected to rule on the case later this month,

Keating also is the subject of a $1.1 billion fraud and racketeering lawsuit brought by the government.

Ryan said the OTS based its restitution demand on three transactions involving Lincoln and ACC.

The deals include a $24.2 million loss to Lincoln from providing financial support to the Hotel Ponchartrain, a Detriot hotel from which regulators claim Keating, his associates and family members received tax benefits at Lincoln's expense.

Also cited was a $12.3 million loss to Lincoln from the misuse of an employee stock ownership plan. The OTS said the plan borrowed money backed by Lincoln to buy ACC stock from Keating and his associates.

The third deal, involving a complicated swap of 1,000 acres of raw desert land outside of Phoenix, resulted in a loss to Lincoln of $4.4 million, regulators said.

The transactions show a ''blatant disregard for the sfety and soundness of Lincoln,'' said Richard Delliveneri, deputy district counsel in the OTS San Francisco office, which is investigating other deals involving the failed thrift.

The OTS has filed a notice of charges and a federal court hearing on the order is scheduled for October in Los Angeles.

#90221u1218 08/09/1990 ~United Press International

BATON ROUGE, La. (AUG. 9) UPI - Louisiana's efforts to ban abortions this year were apparently dealt a death blow Thursday when the Legislature voted against a special session to override Gov. Buddy Roemer's veto of a tough anti-abortion bill.

Speaker Jimmy Dimos told reporters at least 56 of the 105 members of the House of Representatives voted against a veto session that would have begun Aug. 18.

Senate President Sammy Nunez, in Nashville for a legislative conference, said at least 21 members of the 39-man Senate voted against the session.

Louisiana law requires the Legislature to decide whether it wants to call itself back in veto session when a governor vetoes legislation. Lawmakers had until Aug. 13 to vote on it but Thursday's action was definitive.

Roemer vetoed the anti-abortion bill July 27 on grounds it did not have broad enough exceptions for rape victims. It was his second veto of an anti-abortion bill during the legislative session.

Dimos said he urged the House to vote against the veto session, noting that it would have cost tens of thousands of dollars per day for five days.

''Obviously, the legislators don't feel we should be spending dollars on a veto session,'' Dimos said.

He also said the dubious constitutionality of the measure may have been a factor in the House's reluctance to return to Baton Rouge.

''Overriding a bill that may defective is not the way to make law,'' he said.

The Senate upheld Roemer's first veto of a measure that would have prohibited all abortions, except if a woman's life were threatened by the pregnancy, but amended another bill to create the latest anti-abortion measure, which allow some exceptions for victims of rape or incest.

The constitutional factor was introduced because the amended bill initially was on a non-related subject. Roemer vetoed that bill, too.

Louisiana was a battleground for anti-abortion forces and abortion-rights activists, who fought bitterly over the measures. Anti-abortionists said they wanted to use a Louisiana law to test the Supreme Court's willingness to ban abortion on demand in the country.

Dimos said he expected the Legislature to work with Roemer to find common ground on an abortion measure that all could support in 1991.

#90221u1254 08/09/1990 ~United Press International

FORT BRAGG, NC (AUG. 9) UPI - Pawn shop cash registers along usually bustling Bragg Boulevard fell silent Thursday and teary-eyed women fretted over soldiers ordered to Saudi Arabia to prevent an invasion by Iraqi troops massed at the border.

Fort Bragg is home to 41,000 troops, including 14,000 in the Army's crack 82nd Airborne Division. Preident Bush Wednesday mobilized 2,300 82nd Airborne paratroopers, the first of 50,000 soldiers reported bound for the

Mideast.

The president's get-tough posture won acclaim among U.S. allies but did not win any points with young Army wives.

Teresa Ford, 23 and four months pregnant, said she has not heard from her husband, Sgt. Dwayne Ford, since Monday, when Fort Bragg was placed on full military alert and all personnel ordered to the base.

''I don't know where he is,'' she said, fighting back tears. ''They're not saying anything. They say they can't let me know anything about him. He called Monday and I haven't heard from him since.

''I don't know if he's in Saudi Arabia or if he's still at Pope Air Force Base,'' she said. ''If they would just tell me where he is, I'd be fine. It's just not knowing, that's the problem. If they'd just tell me, I'd be OK.''

Ford, who has lived in Fayetteville less than a month and works at a K mart, said she is running up a big telephone bill trying to relieve the stress of not knowing where her husband is.

''I call his family every night, and my family. I call his mother, my mother, his sister, my sister. I just call everyone in the family. I know my phone bill will be high, but at least I'm talking to someone.''

Bawdy Bragg Boulevard, the main drag that runs through the military base, is mile-after-mile of pawn shops, dime stores, fast food joints, adult book stores and topless bars. Commerce along the strip had come to a halt Thursday.

''Right now, people aren't going to let go of their money because they don't know what's going on,'' said Mark Munns, manager of the American pawn shop, where the only jingle was the jangle of a bell above the shop door.

''With gas prices like they are and with all the people worried, it's putting a big dent in the retail businesses,'' Munns said. ''It will take a couple of months before people start buying things again.''

In Washington, senior defense officials at the Pentagon confirmed reports Thursday that troop levels could reach 50,000.

The officials said 2,300 paratroopers from Fort Bragg and 48 F-15 jet fighters from Langley, Va., were sent to Saudi Arabia Thursday and members of the 101st Airborne Division from Fort Campbell, Ky., and the 24th Infantry from Fort Stewart, Ga., were earmarked to go to Saudi Arabia, along with F-16 fighter jets and B-52 bombers.

But officials at Fort Stewart said the base is not on alert.

''Anytime you have an emergency deployment readiness training exercise it becomes synonymous with alert. It's kind of a misinterpretation,'' said Capt. Steve Hart. ''It means soldiers did have to report in and get their gear together, but we're not to the point of standing in formation ready to get on a ship.''

But at Fort Bragg, a full stage alert is in progress and the troops are under lockdown orders, meaning they must stay on the base in case their units are shipped out.

''I just hope he doesn't go,'' said Chanda Bryant, 18, whose husband, Patrick Bryant, 27, is on standby alert at Bragg. ''I don't want him to go. There are a lot of wives who don't want their husbands to go and I agree with them. It's too far away and they'll be gone too long.''

Bryant's complaint came while she was working the line at Hardee's, but her lament did not set too well with a customer.

''That's what they get paid to do, honey,'' said the customer, who refused to give her name. ''If you don't want to do this, get out of the damned Army. My husband's been in the Army 17 years.''

#90221u1260 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - The defect that blurred the Hubble space telescope's view of the heavens apparently was caused by a flaw in an instrument used to measure the observatory's mirror as it was being built, officials said Thursday.

Preliminary results of tests conducted on a testing device called a "null corrector" found one spacing in the instrument was about one millimeter off from specifications, which would account for the deficiency, officials said.

"This is certainly the smoking rifle," said NASA project scientist Edward Weiler. "There may be a few peashooters around. But this is the rifle."

The null corrector was used to measure very precisely the surface of the telescope's primary mirror when it was being ground by what was then Perkin-Elmer Corp. in Danbury, Conn., in 1981.

Officials were uncertain how the error in the null corrector occurred and withheld any final conclusion until the possibility of additional problems was eliminated.

Although upset that such an error occurred, Weiler said he was pleased the probable cause of the telescope's defect was found because it will enable engineers to be more certain repairs being planned will correct the problem.

"I think it's incredible that such a mistake could have been made. On the other hand finding it is incredibly good for us. Once we measure it very accurately it will give us a much better handle on the prescription we need," he said.

Engineers are developing a "prescription" for mirrors that will be built into a replacement camera officials hope to install in the telescope in 1993 to restore the telescope to full capability.

The long-awaited, highly publicized $1.5 billion telescope was expected to revolutionize astronomy by peering more deeply and with greater clarity into space than ever before from its perch high above Earth's atmosphere.

But after the 12-ton instrument was ferried into space in April, engineers discovered the telescope's supposedly perfect optical system was seriously flawed because its 94-inch primary mirror suffered from spherical aberration, meaning it was curved slightly incorrectly.

The observatory can still conduct valuable research but the flaw sharply reduced the telescope's abilities by preventing the device from bringing starlight to a sharp focus.

The blunder, combined with the grounding of the space shuttle fleet due to fuel leaks and other problems at the space agency, set off a storm of criticism of NASA.

A NASA investigative team led by Lew Allen of the Jet Propulsion Laboratory in Pasadena, Calif., found the null corrector in its original form at the factory, which is now Hughes Danbury Optical Systems Inc., and ordered the tests.

"Over the past two weeks tests have been run, systematically checking various aspects of this device," a NASA statement said. "Preliminary results of a test conducted ... (Wednesday) to look at the spacings of the elements in the corrector have revealed a clear discrepancy of approximately 1 millimeter between the design of the null corrector and the device as it now exists," the statement said.

One millimeter is about 1/25 of an inch, or about the diameter of the point of a ball-point pen, it said. "Preliminary analysis indicates that a discrepancy of this magnitude could cause spherical aberration similar to that observed in the (telescope) primary mirror," it said.

The panel was not ready to conclude that the defective equipment is the definitive cause of the defect and planned to conduct more tests, review the findings and meet again next week, said spokeswoman Sarah Keegan. "We found something that is significant and we need to look at it further," she said. "We need to make absolutely certain that we didn't miss anything."

Although the null corrector flaw is enough to account for the problem, officials want to make certain other, smaller errors also were not made, Weiler said.

"This is the largest cause of the problem, there's no question about that. What we've got to be sure now is this is the only mistake that was made," he said.

#90221u1268 08/09/1990 ~United Press International

ATLANTA (AUG. 9) UPI - A government program using former drug addicts to help curb the spread of AIDS appears to be reducing high-risk behavior among scores of intravenous drug users, federal health officials said Thursday.

Preliminary figures from five of 41 cities in the program showed participants were sharing and borrowing needles less often, cleaning drug injection equipment more and getting off drugs, the U.S. Centers for Disease Control said in its Morbidity and Mortality Weekly Report.

The CDC report cites the first results of the National Institute on Drug Abuse project begun in 1987, focusing largely on black male drug addicts who have never entered a drug treatment program.

The figures are based on followup interviews of 1,584 drug addicts from Chicago, Houston, Miami, Philadelphia and San Francisco six months after being coached on the dangers of AIDS and unprotected sex.

The program, employing former drug users and others familiar with inner-city neighborhoods as recruiters and counselors, is succeeding not only in teaching more caution among drug users, but also in halting drug use, the CDC said.

The CDC said the importance of the project stems from the large number of patients with acquired immune deficiency syndrome who contract the disease annually through intravenous drugs or having sex with a drug user.

Of the 117,781 people with AIDS in 1989, 36,356, or 30.8 percent of the total were in risk-behavior categories directly or indirectly related to

intravenous drug use. The only groups with more AIDS victims were homosexual and bisexual men.

According to the initial results accumulated as of January, 14 percent to 35 percent of the drug users had entered a drug-treatment program. Forty-nine percent to 75 percent reported stopping or decreasing their frequency of drug injection during the six months and 16 percent to 47 percent reported halting all use of drugs, the CDC said.

In all five cities, the percentage of drug users who reported not sharing drug-injection equipment with friends increased, as did the percentage of the subjects who reported not borrowing previously used equipment.

The Chicago participants - 59 percent - showed the greatest progress in decreasing needle-sharing during the six months between the initial interview and a follow-up meeting with program counselors. The Houston subjects at 34 percent showed the least progress on the same behavior, the report said.

The borrowing of drug equipment decreased among the San Francisco participants the least at 22 percent and the Chicago participants the most at 37 percent.

Between 20 percent and 39 percent of the participants who continued to use drugs and old needles reported using bleach more often to clean drug equipment, the CDC said.

The program was less successful in persuading the subjects to change sexual behavior such as abstaining from sex and wearing condoms more often.

Regular condom use by participants who reported having a steady sexual partner increased slightly in Miami, Houston and San Francisco, with Miami posting the greatest increase, from 2 percent to 16 percent.

Condom use among participants with multiple sexual partners increased in Miami, Philadelphia, Houston and San Francisco between 7 percent and 17 percent, with the highest rate of compliance of 27 percent recorded in Miami.

''Intravenous drug users are difficult to reach and influence with traditional public health education and other prevention techniques,'' said Mona Brown of the National Institute on Drug Abuse.

''These preliminary results, which show an overall reduction in high-risk behaviors of intravenous drug users, suggest that participation in outreach and intervention programs can influence entry into drug-treatment programs and reduce drug-injection behaviors associated with increased risk for (AIDS virus) transmission.''

The ongoing program as of July 1 has drawn more than 30,000 participants in 41 cities. The government will continue the effort nationwide ''if the results at other sites prove to be consisent with these preliminary results,'' the CDC said.

#90221u1272 08/09/1990 ~United Press International

MIAMI (AUG. 9) UPI - Tropical Storm Edouard pelted the Azores Islands with win gusts up to 70 mph in the North Atlantic Thursday.

Edouard's maximum sustained winds were near 45 mph, but Lages reported winds up to 50 mph with gusts to 70 mph, forecasters at the National Hurricane Center in Miami said.

At noon EDT Thursday, Edouard was located near latitude 40.1 north, longitude 27.8 west, or about 95 miles the island of Terceira in the Azores.

Edouard was moving northeast near 15 mph and was expected to continue that motion for the next 24 hours. Tropical storm conditions were expected to continue over the Portuguese archipelago Thursday.

Little change in strength was expected during the next 24 hours. Tropical storm force winds extend outward up to 115 miles.

Eduoard is the fifth tropical storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30. It formed from a tropical depression east of the Azores Wednesday.

Diana, the second to reach hurricane strength, dissipated Wednesday after slamming Mexico's Gulf coast with 110 mph winds, killing three people. Torrential rains flooded rivers and whipping winds felled trees and knocked over houses, leaving about 3,500 people homeless.

Forecasters also monitored a pair of tropical waves, one southwest of the Cape Verde Islands off the coast of Africa, and the other midway between Africa and the Lesser Antilles. They said development, if any, was expected to be slow.

#90221u1289 08/09/1990 ~United Press International

PASADENA, CA (AUG. 9) UPI - NASA's Magellan probe, launched 15 months ago from the shuttle Atlantis, was on course Thursday for a make-or-break rocket firing Friday to put the craft into orbit around Venus to map the cloudy planet's hidden surface.

If the rocket fails to fire, the costly spacecraft will sail beyond Venus on a trajectory that will not carry it past the planet again for more than 100 years. But engineers said Thursday the spacecraft is in excellent health and that no problems were expected getting it into proper orbit.

If all goes well, Magellan will begin firing radar pulses at Venus around Sept. 1, producing photograph-like images that may help determine what caused Venus, similar to Earth in many ways, to end up the 900-degree inferno it is today, the apparent victim of a runaway ''greenhouse effect.''

The 2 1/2-ton spacecraft, built by Martin Marietta Astronautics Group of Denver, was built to map at least 90 percent of Venus's surface during a planned 243-day mission, photographing features as small as a football field to revolutionize knowledge about Earth's sister planet.

''Magellan is the beginning of a new era in planetary exploration,'' said W.T. Huntress, director of solar system exploration for NASA. ''It really starts off a whole new decade of planetary exploration into the next century.''

But first, Magellan must get into orbit around Venus. The rocket firing Friday, then, is the most critical maneuver for the $550 million project since Magellan was launched from Atlantis on May 4, 1989, and one that has to work perfectly for the mission to succeed.

Hurtling through space at 24,600 mph, the solar-powered probe was scheduled to sail over the north pole of Venus at 9:28 a.m. PDT Friday, plunging behind the planet as viewed from Earth - 142 million miles away - and out of contact with ground controllers at the Jet Propulsion Laboratory in Pasadena.

On computer command, an on-board 4,721-pound solid-fuel braking rocket is scheduled to fire for 83 seconds starting at 9:32 a.m., slowing Magellan down by about 6,000 mph and putting it into an orbit tilted 86 degrees to the equator with a low point of 171 miles and a high point of about 5,000 miles.

If the rocket fires correctly, Magellan will sail back into contact with Earth at 9:53 a.m. About 13 minutes later, at 10:06 a.m., radio signals from the craft will reach Earth to confirm a successful maneuver.

If the rocket fails to fire, however, the signals will reach waiting scientists on Earth five minutes earlier, at 10:01 a.m., as the spacecraft hurtles beyond Venus, not to return for more than a century.

Such a failure would be a devastating blow for NASA, which has been under

intense criticism in recent weeks because of problems with the $1.5 billion Hubble Space Telescope and the agency's planned space station project.

But engineers are confident the spacecraft will work as advertised, recalling how an alert technician discovered a wiring foul up before launch that, had it not been corrected, would have prevented the rocket from igniting.

''We're all looking forward to the drama we expect around 10 o'clock (Friday) morning,'' Huntress said. ''We are confident now we are ready for Venus orbit insertion.''

Magellan, named after the 16th century explorer, is expected to revolutionize knowledge about Venus.

''Venus is of special interest to the geologist for the contrast it presents with Earth and for the clues it provides concerning Earth's origin and evolution,'' wrote Michael Carr and Magellan project scientist Stephen Saunders in a book titled ''The Geology of the Terrestrial Planets.''

''Both bodies are of similar size, composition and distance from the sun yet they have evolved to remarkably different states; one developed into a prolific haven for life, the other into a sterile inferno. Unfortunately, we are far from understanding why this happened.''

Radar data beamed back to Earth from Magellan will be processed by powerful computers to create photograph-quality images of Venus's surface, showing features as small as 350 feet across - about the size of a football field - and 10 times better than the best previous data.

Magellan also will be used to learn more about the planet's interior by precisely monitoring how the spacecraft's orbit is affected by the planet's gravity, which provides an indication of interior mass distribution.

The end result will be a detailed map of Venus's surface between 67.2 degrees south latitude and the north pole, enough data to fill some 500,000 library books on a shelf 10 miles long and enough to keep researchers busy for years to come.

But if the spacecraft remains healthy, and if NASA gets another $169 million from Congress, the mission will be extended to include coverage of the planet's south pole region.

#90221u1307 08/09/1990 ~United Press International
(AUG. 9) UPI - Iraq says it will participate, after all, in today's emergency Arab summit in Cairo. Egypt's Middle East News Agency reports that Iraqi President Saddam Hussein finally agreed to send a delegation to the meeting, which also will be attended by a Kuwaiti delegation. Egyptian President Mubarak called the emergency session in an 11th-hour attempt to defuse escalating tensions between Iraq and U-S-led multi-national forces in Saudi Arabia.

While Iran, Libya and other hard-lined Arab nations are critical of Iraq's invasion of Kuwait, they have indicated that they are equally concerned about the build-up of American and other foreign troops in the region. Jordan seems to be moving diplomatically away from Iraq to the more moderate Arab nations and the West. A London report quotes Jordan's Crown Prince as saying his country is NOT an ally of Baghdad.

The semi-official news agency in Turkey reports a build-up of Iraqi forces near the Turkish border... but NO immediate evidence of large-scale military activity. This, as U-S Secretary of State Baker met today with Turkish leaders in Ankara, reportedly to reassure officials that NATO will lend support in the case Iraqi forces strike. Baker is scheduled to travel from the Turkish capital to Brussels later today to brief NATO officials on the situation.

The first U-S paratroopers and F-15 fighter jets are taking up defensive positions in Saudi Arabia today. Secretary of Defense Cheney has refused to disclose for security reasons how many troops would be sent into the oil-rich nation. But senior defense officials have confirmed reports that up to 50-thousand troops could be deployed. That is larger than the U-S ground force in South Korea.

#90221u1323 08/09/1990 ~United Press International
EAST LYME, CT (AUG. 9) UPI - A couple who faced eviction from their wildlife rescue quarters will be able to continue to help injured animals thanks to sympathetic donors, including actress Katharine Hepburn.

''It's great,'' said the actress Thursday of the reprieve won by Gloria and Robert Salvatore, who were able to obtain a $40,000 mortgage for the refuge.

Hepburn, 80, recently donated one of her paintings that will be offered at a fund-raising auction for the North American Wildlife Association.

She has supported the organization since its directors rescued a sea hawk from her home in the affluent Fenwick section of Old Saybrook on Long Island Sound, across the Connecticut River from East Lyme, where the

refuge is located.

The organization will receive a $40,000 mortgage from the Connecticut National Bank to buy the home and one acre of property, which is adjacent to its 25-acre preserve.

The association is run by the Salvatores, who live in the home and rely on donations to keep their 24-hour-a-day operation going.

''I think these people are doing a good job,'' said Hepburn.

Gloria Salvatore's mother, Waltina Greene, had allowed the Salvatores to live rent-free on the property. In June, however, she put it on the market for $134,000 and served the couple with an eviction notice.

''She was kind of appalled at the lifestyle we were living here,'' said Robert Salvatore.

Greene had moved in with the couple before they had built an adjacent clinic and the animals were still kept in the house, he said.

''We work around the clock and she thought it was a horrible life,'' he said.

Somehow, attorneys for both sides reached an agreement to have the Salvatore's purchase the home and lot for $50,000, said Salvatore.

''We rescued a sea hawk from Miss Hepburn's (Fenwick) home about two years ago with a broken wing,'' said Salvatore.

The couple nursed the bird back to health at the refuge after it was treated at the Norwich Animal Hospital.

''We brought the sea hawk back to her home and it was released and she was emotionally moved,'' said Salvatore.

Hepburn recently gave the refuge a boost by donating a picture she had painted.

''It's the only painting of her collection that she has offered for public view or auction,'' said Salvatore.

#90221u1326 08/09/1990 ~United Press International

(AUG. 9) UPI - France says Iran has hinted that another European hostage in Lebanon will be released in a few days. News of another possible release follows the quiet transfer of Lebanese-held Swiss hostage Emmanuel

Christen to Syrian authorities yesterday. French authorities say Iran might have pushed for the release after France released an imprisoned Iranian terrorist last month. There are 15 Western hostages... including six Americans... still believed held in Lebanon.

West German Chancellor Helmut Kohl ran into a snag in trying to get a parliamentary O-K to advance the date for all-German elections to coincide with unification. Also today, East Germany's prime minister failed to gain a two-thirds majority among lawmakers to ratify a key treaty setting up procedures for the elections. Kohl and East Germany's premier both favor October 14th as the date for all-German elections.

#90221u1343 08/09/1990 ~United Press International

BOSTON (AUG. 9) UPI - Gov. Michael S. Dukakis said Thursday he supports President Bush's response to the Middle East crisis but called on the federal government to protect consumers from soaring energy prices.

The Massachusetts Democrat wrote Bush, his opponent in the 1988 presidential election, and said, ''First, let me say that the people of Massachusetts and all Americans stand together in your effort to protect American citizens and the nation's economic and security interests in the Middle East.''

But Dukakis - noting that gas and oil prices had risen between 4 and 6 cents per gallon in the Bay State following Iraq's invasion of Kuwait - urged Bush to take steps on the federal level to protect consumers.

''Consumers deserve an explanation about why they must bear the brunt of the price incrase at the gas pump and in their furnaces before suppliers have run out of the lower-priced oil,'' Dukakis wrote. ''The federal government must do more than simply urge oil companies to show 'restraint' in passing along price increases.''

Dukakis urged Bush to consider using the nation's vast Strategic Petroleum Reserve to soften price impacts and to create a petroleum products reserve for regions hardest hit by increases in oil prices.

The governor also said that new sources of natural gas supplies to the Northeast should be expedited to ''enhance the diversification of energy resources available to the region.''

Dukakis also called on the president to order the Departments of Justice and Energy, along with the Federal Trade Commission, to monitor price-increases and prosecute anti-trust violations.

He also asked Bush to increase federal fuel assistance for low-income

households.

EVERETT, MA (AUG. 9) UPI - Police acting on anonymous telephone tips arrested a man Thursday in last weekend's defacement of a newly dedicated statue of John F. Kennedy in front of the Statehouse, officials said.

The suspect was arrested at about 1:30 p.m. after an investigation in the city located across the Mystic River north of Boston, according to Capitol Police Capt. Paul Mahoney.

The man's identity was not released but the arresting officer, Capt. Dennis Sullivan, said it ''appeared'' he was the same man who telephoned police to claim responsibility for the vandalism shortly after it occurred.

That man told police he defaced the statue with splotches of white spray paint and the word ''murderer'' because he considered the late president responsible for the death of actress Marilyn Monroe.

The defacement took place on the 28th anniversary of the actress's death.

The arrest came as workers prepared to remove the 8-foot bronze statue to its foundry in New York for cleaning. The process was expected to take four to six weeks.

#90221u1439 08/09/1990 ~United Press International

CARSON, CA (AUG. 9) UPI - Negotiators in Southern California's supermarket contract dispute, faced with the threat of a strike deadline only hours away, returned to the bargaining table Thursday in hopes of hammering out a settlement.

The United Food and Commercial Workers union, which represents 80,000 clerks and meat cutters employed by six major supermarket chains, imposed a settle-or-strike deadline of 7 p.m. PDT Thursday after little progress was made in the wake of a marathon 18-hour session. The talks resumed

shortly after 10 a.m. after having broken off Wednesday morning.

"I'd have to say that it is quite possible that we will not have a settlement by 7 p.m. (Thursday)," said Frank Allen, the federal mediator at the talks. "I'm encouraged that both sides are still willing to talk, but they are going to have work very hard to reach a settlement."

The union has promised to strike Lucky Stores, the No. 2 chain in Southern California, if the talks fail. But a walkout is expected to quickly spread to the other five chains involved in the negotiations - Albertson's, Alpha Beta, Ralphs, Stater Bros. and Vons - who have said they would lock out union workers. The chains operate about 800 stores between San Luis Obispo and San Diego.

The union has held on and off talks with the Food Employers Council, which represents the chains, since June 18. Over that time, the union has twice threatened to strike, but backed off as a result of movement toward a settlement.

But frustration that followed the last round of negotiations prompted the union Wednesday to vow it would no longer extend the settlement deadline. "After several days of marathon bargaining, we have reached a crisis situation," said Tom Vandevelt, president of the union's San Diego Local 135, which represents about 12,000 of the workers. "There will be no more extensions," Vandevelt said.

Allen said that the mood at the talks was "somewhat hopeful," and added, "Both sides appear to still be willing to look at modifications of their positions." He added, however, that "we have been assured by the union that there is no possibility of another extension in the negotiations."

Both sides have imposed a news blackout on the negotiations, and officials refused to comment Thursday on the talks. The union's previous three-year contract expired July 30.

Some of the key issues that may bog down the talks include supermarket demands for a cheaper and less flexible medical benefit package and union demands for more guaranteed hours of work and for restrictions on the supermarkets' use of non-union vendors.

Union officials said previous offers would have meant unacceptable cuts in health benefits and contained problems with job security, allowing lower-paid workers to do jobs currently performed by higher-paid employees. The supermarket clerks currently earn between $4 and $13.05 per hour, while the meat cutters earn between $9.31 and $14.33 per hour.

#90221u1458 08/09/1990 ~United Press International

SANTA MONICA, CA (AUG. 9) UPI - Bail for actor Marlon Brando's son, Christian, was reduced Thursday from $10 million to $2 million and he was expected to be freed pending trial for the murder of his half-sister's boyfriend.

With his father in court, Brando, 32, also surrendered his passport, a condition of his release. He was expected to be freed after the family posted the bail.

Superior Court Judge David Perez ordered Brando's bail reduced after deciding the $10 million bond set by a Municipal Court judge ''is high.''

''I will reset it at $2 million,'' Perez said.

Brando's lawyer, Robert Shapiro, had argued his client should be ''treated like any other person.''

Brando was ordered last month to stand trial following a two-day preliminary hearing in Municipal Court.

If convicted of first-degree murder, he could be sentenced to 25 years to life in state prison. Prosecutors are not seeking the death penalty.

Brando is charged with shooting to death Dag Drollett, 26, the boyfriend of Christian's half-sister, Cheyenne Brando, 20, in Marlon Brando's 12-room estate in the Santa Monica Mountains on May 16.

Prosecutors said the shooting was premeditated. They claim Christian Brando accused Drollet, the son of an influential politician in Tahiti, of beating his half-sister.

Drollet was shot in the head at point-blank range while watching television. His body was found with a television remote control in one hand and a cigarette lighter in the other.

Christian Brando told police he accidentally shot Drollet while they were wrestling for the .45-caliber handgun.

''I shot him, man, but not on purpose,'' police quoted Brando as telling them after the incident. ''Please believe me. I wouldn't do it my father's house.''

However, prosecutors say Cheyenne Brando in mid-June gave a statement to police in which she indicated that Christian planned the slaying. Shortly after giving that statement, Cheyenne returned to Tahati, where she is a citizen, apparently to avoid testifying against her half-brother.

She has since given birth to Drollet's child.

Marlon Brando was home at the time of the shooting but was in a different room. He telephoned police after hearing the gunshot.

GREELEY, CO (AUG. 9) UPI - Denver Broncos head coach Dan Reeves, who admitted himself to the hospital with chest pains, will undergo treatment for hardening of the arteries and will be unable to work for as much as a month, his doctor said Thursday.

Reeves, 46, was admitted to the North Colorado Medical Center Wednesday night after becoming concerned about the chest pains. Reeves was riding his bicycle at the time.

Doctors at the hospital determined Reeves had not suffered a heart attack but that he does have hardening of the arteries restricting blood flow.

The Broncos are currently in training camp at the University of Northern Colorado in Greeley, preparing for a Saturday preseason game at Indianapolis.

At a news conference at training camp, Reeves' physician, Dr. Randy Marsh, a cardiovascular specialist, said the coach was resting comfortably and likely would not have to undergo surgery.

Reeves checked out of the Greeley hospital to transfer to another, undisclosed hospital and will remain hospitalized for another four-to-five days, a Broncos spokesman said. There were reports that Reeves had checked into a clinic in Redwood City, Calif., that specializes in arteriosclerosis, the medical term for hardening of the arteries.

Defensive coordinator Wade Phillips will be acting head coach during Reeves' absence.

Phillips said Reeves would not be involved in any decisions about the Broncos until he returned, including any player moves.

Reeves' doctor said tests showed ''blockages in the blood vessels that supply his heart. At my recommendation, Dan is going to go ahead and have this problem dealt with immediately.''

Marsh said Reeves was in no danger.

''His health is excellent. He simply has some blockages that need to be dealt with,'' he said. He said the plan was to deal with the blockages without surgery but that Reeves would be unable to work for three to four weeks.

''The absolute decision (about surgery) has not been made and will not be made for another day or so,'' Marsh said. ''There are a number of procedures to get rid of these blockages.''

The physician said he was confident the problem would not affect Reeves'

career.

''I anticipate him being back running this team in better condition than before,'' he said.

Reeves is one of the winningest active NFL coaches and is entering his 10th season with the Broncos. During those 10 years he has compiled a regular record of 85-50-1, taking the Broncos to the playoffs in five of the last seven years and to the Super Bowl three of the last four years.

LONDON (AUG. 9) UPI - Construction workers on North Sea oil platforms Thursday staged their third 24-hour walkout since a dispute over union recognition and safety standards started a week ago, labor and business leaders said.

For the first time, more than 3,000 contruction workers involved in the oil industry on the mainland also staged a 24-hour strike to show their solidarity with the offshore workers, a spokeswoman for the mainland workers said.

Shell and British Petroleum said oil production had not been affected by the strike but important maintenance work was postponed on platforms in the North Sea, one of the world's richest offshore oil reserves.

The construction workers, estimated by their representatives to number 20,000, are seeking to form a union and want an improvement in what they termed poor safety conditions.

The scale of the industrial action was difficult to determine because the offshore platforms are inaccessible to the media. Meanwhile, labor and industry representatives made conflicting statements about the dimensions of the strike.

Lorna Robertson, a spokeswoman for the Offshore Industry Liaison Committee which is coordinating the wildcat action, said 16 platforms were affected by the strike.

But Ewan Hunter, of the Offshore Contractors Council, an umbrella organization representing about 200 companies, said his group was aware of only seven installations affected by the strike. Hunter said 746 employees were on strike Thursday, and 450 were continuing a sit-in begun Aug. 2.

Robertson said the latest round in the dispute was sparked by the dismissals of more than 1,000 workers who participated in a 24-hour strike Aug. 2. "We would like them to be reinstated," she said. An estimated 4,000 to 5,000 workers employed by construction firms to maintain offshore oil platforms staged their first 24-hour strike Aug. 2.

Oil companies including Shell and BP flew strikers back to the mainland the following day at the request of the contracting companies. Some strikers refused to return to the mainland, claiming they wanted to return to work but were locked out.

OILC supporters held a mass meeting Thursday in Glasgow, Scotland, and later about 500 workers marched through the city to deliver a list of their grievances to BP, Robertson said.

Robertson said the OILC wanted to sit down at the bargaining table with the OCC, but feared this might not be an option. "There's a strong possibility they (the strikers) will be fired. They may be in a lockout situation," he said,

OCC Chairman-designate David Odling said, "The contractors will not consider cooperation in the implementation of an official union ballot until the unofficial offshore strikes cease."

The warring parties may be in a deadlock. The workers went on strike to force industry to negotiate, but industry has refused to talk until the strikes end. "There is a kind of chicken-and-egg situation developing," said BP spokesman Ian Stewart.

(AUG. 9) UPI - The trouble with the Hubble space telescope's near-sighted mirrors has been traced to a flaw in the device used to measure them when

they were built. NASA says preliminary tests conducted on a device called a ''null corrector'' found spacings in the instrument were about one-25th of an inch off from design specifications. The NASA panel says a Connecticut-based contractor used the faulty measure when building the mirrors.

Two Soviet cosmonauts on the Soyuz T-M transport spaceship landed safely today in the Soviet central Asian desert. The cosmonauts emerged from the craft smiling and gave a thumbs-up sign to the recovery team at the landing site about 12-hundred miles southeast of Moscow. They had an hour-long medical exam before the trip back to the Star City space complex near Moscow. The spacemen were aboard the orbiting Mir space station for six months.

A New York jury is deliberating the fate of three youths charged in the beating and rape of a woman jogger in Central Park last year. Deliberations began this morning. Prosecutors say Antron McCray, Yusef Salaam and Raymond Santana were in a group of up to 30 youths in a park crime spree that included the attack on the Wall Street investment banker.

Florida authorities say a man arrested in Hamilton, Ohio, is a suspect in last Friday's killings of four men in Floral City, Florida. Police say John Barret is charged with shooting and beating deaths of four men in a home being remodeled in Floral City. But police say the motive for the slayings remains uncertain. Authorites say Barrett is in an Ohio jail awaiting extradition to Florida.

#90221u1501 08/09/1990 ~United Press International

TRAVERSE CITY, MI (AUG. 9) UPI - A Ford Motor Co. executive in charge of engine operations said Thursday the company sees no way the United States will have a vehicle fleet with fuel efficiency of 40 or 45 mpg by 2000.

David F. Hagen, general manager of Ford's engine division, said despite the recent rise in fuel prices because of the Persian Gulf crisis, buyers still seem to care more about engine performance and quality than fuel economy.

Hagen made his remarks at the University of Michigan's annual management briefing seminar in Traverse City in response to a bill proposed by Sen. Richard Bryan, D-Nev., asking for sharp increases in mandated fuel economy levels by the end of this century.

"We simply see no way to have a 40-45 mpg fleet by the turn of the century that is unless we are to have almost all compact and subcompact vehicles " Hagen said, adding that the bill proposed by Hagen "is completely outside a full-line manufacturer's capabilities - domestic or foreign." The current corporate average fuel economy (CAFE) level is 27.5 mpg.

In his remarks, Hagen highlighted Ford's new $780 million engine plant in Romeo, Mich., now producing a new 4.6 liter V8 engine for the company's 1991-model Lincoln Town Car luxury sedan due this fall. Other versions of this engine, including a 32-valve design, will be offered later.

Hagen called the new Romeo plant and its operations "the cornerstone of Ford's powertrain strategy," adding that its modular assembly techniques will allow the carmaker to produce several configurations of the same engine on a single assembly line.

"Modular engines will be advantageous for several reasons," Hagen said, like providing quicker response to changing market conditions and reduced development costs.

While Ford analysts say there are no signs so far of a sales dropoff or market shift to small cars because of last week's Iraqi invasion of Kuwait a company analyst said the Romeo plant could conceivably build relatively more fuel-efficient V6 engines if the market for V8-powered cars dried up.

"We see no need to change our current engine cycle plan," company spokesman Bill Carroll said, "but we have the capability and latitude at Romeo to get into various kinds of engines."

Despite opposition to higher CAFE levels, both Ford and Chrysler Corp. support a gasoline tax increase. Many industry executives see it as a less painful alternative that might not directly hurt sales of their larger and more profitable models.

Still, industry analysts believe a continued rise in gas prices could push even more prospective buyers to the sidelines. "We could see a lowering of industry sales in general," Chrysler Vice Chairman Robert S. Miller said during Wednesday's session of the U-M seminar. "But our research shows that when you have a negative economic event such as we've seen recently, it's the buyer at the lower end who is most likely to come out of the market."

That could hurt Chrysler's efforts to sell its Dodge Shadow and Plymouth Sundance "America" cars now on sale. They are low-priced versions of those compact cars that bowed in 1987. Billed by Chrysler as the lowest priced car now built in America with a driver's-side air bag as standard equipment, they start at $7,599.

#90221u1514 08/09/1990 ~United Press International

RALEIGH, N.C. (AUG. 9) UPI - Sen. Jesse Helms, R-N.C., said Thursday he opposes sending U.S. soldiers alone to respond to Iraqi's threats against the world's oil source and called for the allied countries to carry their

own weight.

''If we have any contemplation of doing it alone, I say no,'' Helms said. ''If France, Germany, England, Japan and others are not willing to help out on this thing, I have serious reservations about placing the lives of 5,000 to 10,000 Americans in danger.''

President Bush this week ordered thousands of U.S. troops to the Persian Gulf and Saudi Arabia's border, threatened by Iraqi leader Saddam Hussein's forces that include a million-man army and chemical weapons.

''My fear is without a lot of backup we could see that madman send poison gas to our troops,'' Helms said.

Helms, the ranking Republican on the Senate Committee on Foreign Relations said he will use his influence to pressure allied nations to join the U.S. effort to secure economic interests in the Middle East.

There are ''efforts being made to make these people realize they can't afford to let their country sit this out,'' he said.

''I'm not in favor of this country ever again to send American fighting men to fight a war they'll never be able to win. I'm not in favor of putting them in danger when the French and British say 'I can't manage that right now,'' Helms said.

Britain has pledged to send troops and ships to help defend Saudi Arabia from Iraq and France has committed ships to the effort.

Helms made his comments in a news conference at which retired war veterans pledged their support for him in his bid for a fourth term this November.

#90221u1524 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - The Iraqi military machine assembled by Saddam Hussein is 1 million strong and equipped with sophisticated weaponry, but military analysts said Thursday it lacked experience in air warfare that might be critical in a confrontation with the United States.

Several U.S. military experts inside and outside of the government also agreed that despite Iraq's nearly decade-long war with neighboring Iran, the Iraqi armed forces showed possible weaknesses in sustaining long individual battles.

In the week since Iraq rolled over tiny Kuwait, much attention has been focused on Iraq's 1 million-man army, its armored tank forces, its experience with desert warfare and its willingness to use chemical weapons.

But despite those military assets, Iraq is also the nation that was able to manage only a stalemate with an ill-equipped Iran and several experts said it was likely that in an air war, U.S. forces would dominate, largely because of a lack of experience by most Iraqi pilots.

Except for about 50 pilots trained by the French, said several analysts, the Iraqi air force was poorly trained.

''The saying in the Iraqi armed forces is that they were just as happy when the Iraq air force was not above them because they were never sure what they would hit,'' noted a congressional military expert.

''The Iran-Iraq war was notable for its lack of air-to-air combat,'' added Greg Grant, a military analyst for the Center for Strategic and International Studies. ''I would say the quality of the Iraqi (pilots) is suspect.''

What is not suspect is the quality of aircraft in the Iraqi arsenal.

During the 10-year war with Iran, Hussein built up a 513-plane air force, including large numbers of high-quality Soviet MiGs and about 94 French-made Mirage jets, which are capable of carrying Exocet missiles, such as the one that hit the USS Stark in 1987.

But even that incident raised questions about the Iraqis ability in the air.

Some analysts said the attack on the Stark was believed to be an accident and showed a lack of command control in the Iraqi air forces. But others said the attack proved a certain degree of ingenuity because the Mirage jet that hit the Stark was equipped with two Exocet missiles - an arrangement the French had said would be impossible.

The current deployment of U.S. naval, air and ground forces to the region indicates the United States will rely heavily on air power should the Iraqis cross the border into Saudi Arabia.

The analysts add that a main weapon for the United States in such an event will be the AWACs aircraft, which can detect enemy troop movements and aircaft placement and properly guide U.S. warplanes into combat. The Iraqis lack such a capability.

But while most experts are confident in U.S. superiority over the Iraqis in the air, there are differing opinions over whether air power alone would be enough to defend the oil-rich kingdom.

''If the Iraqis attack us, we're in a ground war,'' added the

congressional analyst, who spoke on condition of anonymity. ''We will hit them very heavily from the air, but air power alone cannot win a war.''

And it is on the ground where the Iraqis enjoy their greatest strengths.

First of all, analysts said the Iraqi military of 1990 is much larger and different than the one that invaded Iran in 1980.

Its size more than tripled in the past 10 years and Hussein also has acquired large quantities of very sophisticated Soviet tanks and surface-to-surface missiles.

In addition, Iraq is known to have stockpiled artillery shells, rockets and bombs containing mustard gas and nerve agents. The Iraqis are unafraid to use the chemical weapons, having done so against Iran and rebellious Kurds in Iraq.

#90221u1527 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Environmentalists called Thursday for the automobile industry to build more fuel efficient cars to reduce pollution and U.S. dependence on foreign oil.

Daniel Becker of the Sierra Club said the automobile industry's refusal to use existing technology to produce more fuel efficient cars put the United States at the mercy of "trigger-happy nuts" such as Iraq President Saddam Hussein. "America is being held hostage not only by OPEC, but by Detroit," Becker said at a news conference.

Becker, joined by representatives from other environmental groups, urged the Senate to enact legislation that will require all automobiles built in the United States to get at least 40 miles per gallon of gasoline by the year 2000.

More fuel efficient automobiles would reduce air pollution, which is believed to contribute to the dangerous warming of the temperature of the Earth's atmosphere, they said.

Officials from the Automobile Manufactures Association of the U.S., Inc., oppose the legislation, saying it would reduce the availability of family-sized cars and hurt U.S. auto-workers without reducing pollution.

#90221u1567 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - U.S. electronics sales rose 4.4 percent in the first half of 1990 but new orders failed to keep pace, the American Electronics Association reported Thursday.

Sales of U.S. electronics and services increased to $149.7 billion in the first half, up from $143.4 billion in the first half of 1989, the AEA reported. Orders rose to $148.1 billion from $140.4 billion in the year-ago period.

"In the final month of the first half, sales increased in all segments of the industry except for consumer products, which represents a relatively small portion of total sales," said J. Richard Iverson, AEA president and chief executive officer. "However, in the same time-frame, orders were up only in the telecommunications segment. This is a cause for concern."

In the second quarter, sales rose almost three percent to $76.4 billion from $74.2 billion in the same period of 1989, the AEA reported. Orders rose seven percent, to $75.5 billion from $70.6 billion in the year-earlier period.

#90221u1574 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - A diabetic juror at the trial of Mayor Marion Barry was hospitalized Thursday ''deeply depressed'' and with a fever, halting deliberations for the day as the cocaine and perjury case neared the end of its 10th week.

Juror Deborah Noel, 34, was taken to Providence Hospital at about noon with a fever and for treatment by her endocrinologist, Dr. El Khodary, who has treated her for diabetes, said U.S. District Judge Thomas Penfield Jackson.

Noel, a clinical clerk at Howard University Hospital, was expected to be hospitalized overnight but released in time for the jury to resume deliberations for an eighth day at 9:30 a.m. Friday, said Jackson.

But Jackson later said through a pool reporter that, if Noel's condition worsened, he would consider asking attorneys for both sides if they would accept an 11-person jury to deliberate.

The jury has been sequestered since June 18. Friday will mark the eighth day of deliberations on 14 cocaine and perjury charges facing Barry.

''(Khodary) tells me he can find nothing wrong,'' Jackson told attorneys in the courtroom. ''She is, however, deeply depressed, overwrought and under great stress.''

A U.S. Marshal was assigned to stay with Noel to ensure she did not have access to news about the trial, said Jackson.

The jury of nine women and three men has deliberated more than 32 hours over seven days, reaching a verdict on at least one of the 14 counts.

The jury told Jackson on Tuesday it had reached a conclusion on Count 12, one of 10 misdemeanor possession counts, but did not announce the verdict.

In addition to the possession charges, Barry faces three felony counts of perjury and a single misdemeanor count of conspiracy to possess cocaine.

He could be sentenced to 26 years in prison and fined $1.85 million if convicted of all counts.

#90221u1585 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Yields jumped on 30-year Treasury bonds Thursday to an average of 8.87 percent - the highest level in more than a year - on the final day of the government's quarterly refunding auctions.

Analysts were generally pleased after anemic bidding on three-year and ten-year Treasury notes earlier in the week, blamed mainly on investor concern over the Iraq crisis and a souring of the U.S. economy.

"It went well. It went well," said Robert Dederick, chief economist at Northern Trust in Chicago. "The market had this horrible showing (Wednesday) and you had a lot of people taking cautious stands."

But "the world didn't come to an end in the interim, and there was a little better feeling about the escalation in the Middle East, that it won't happen," Dederick said.

The government also auctioned $10 billion in 36-day cash management bills Thursday at an average discount rate of 7.79 percent and an average investment rate of 7.96 percent. The average price was $99.221.

In the 30-year auction, the Treasury Department said it sold $10.3 billion of the 8 3/4 percent interest rate bonds at an average of $98.747. At the last quarterly refunding May 10, the average yield on the 30-year bonds was 8.84 percent. The yield on the bonds Thursday was the highest yield on a 30-year offering since the 9.11 percent yield on May 11, 1989.

"A yield approaching nine percent was very, very attractive," said Samual Kahan, chief economist at Fuji Securities in Chicago. "People finally thought, 'Hey it looks good."' But Kahan noted, "It's still a risky bet. But for those who have the time and the patience it should pay off."

Fresh cash is raised through the three-day quarterly refunding marathon to give the federal government funds to pay debts and settle Treasury securities reaching maturity.

Late last week, Congress passed short-term debt limit leislation granting $72 billion in additional borrowing authority through Oct. 2 and clearing the way for the sale of the bills, notes and bonds.

Nonetheless, the crisis in the Arab world, the threat of an oil shock, a surge in inflation, worry over a U.S. recession and higher rates overseas kept many investors on the sidelines.

On Wednesday, yields fell on ten-year Treasury notes to an average of 8.77 percent. The Treasury Department auctioned $10.5 billion of the securities at an average of $99.869.

On Tuesday, yields also fell on three-year Treasury notes to an average of 8.10 percent. The government sold $11.53 billion of the three-year notes at an average price of $99.738. All the issues sold at the refunding will settle Aug. 15, officials said.

#90221u1596 08/09/1990 ~United Press International

PARIS (AUG. 9) UPI - France said Thursday it will immediately reinforce its naval forces in the Gulf region and will send arms and technicians to the area to help defend Saudi Arabia and other countries against a possible Iraqi attack.

President Francois Mitterrand said France hoped that the current crisis in the Middle East could be resolved by the Arab countries themselves, ''but if this proves to be impossible France will assume its own responsibilities.''

Defense Minister Jean-Pierre Chevenement said the aircraft carrier Clemenceau and its accompanying ships will be sent immediately to the area.

There was no word on whether Paris would dispatch ground troops to join the multinational force being established by President Bush in Saudi Arabia, which so far includes only Britain.

''France has maintained friendly relations with Iraq for a long time, and it is well-known that we helped her during the war against Iran,'' Mitterrand said. ''All of this gives France the authority to say clearly that we do not accept either the agression against Kuwait or the annexation that followed.''

The French president made his comments following an emergency meeting with Prime Minister Michel Rocard and key government officials at the Elysee Palace.

Only Wednesday French officials said Paris had no intention of participating in the multinational force because it had not been asked to do so.

But in his statement Mitterrand said that Saudi Arabia and other unnamed countries in the Persian Gulf region had asked for French help, including armaments and technicians, in order to stave off a possible attack by Iraq.

Political observers said the French decision does not necessarily mean that it will formally join U.S. and British ships patrolling in the Persian Gulf, although some coordination is likely.

France currently has two warships in the Gulf of Oman, the Protet and the Commandant Ducuing. A third vessel, the frigate Dupleix with sophisticated Exocet and Crotale missiles aboard, is on its way to the Gulf.

''The menace has now extended to other countries in the region,'' Mitterrand said. ''Under these circumstances France has hoped and continues to hope that the problem can be resolved by the Arab community.''

Mitterrand said he was strengthening French naval and air forces in the Persian Gulf ''so they will be able to intervene at any time it proves to be necessary.''

Mitterrand said that the estimated 420 French citizens being held in Kuwait and Iraq can be considered to be ''prisoners'' even though they have not been subject to physical violence or threats. He said the government could send an emissary to Iraq within several days to negotiate their release.

The French president said Saudi Arabia had not asked France to join the multinational force, but added that ''unofficial conversations'' with Washington and Riyad had evoked the possibility of French participation.

The aircraft carrier Clemenceau that will head the French naval deployment weighs 32,000 tons and has a crew of 2,000 men. It can carry between 30 to 40 helicopters and airplanes. It is expected to take two weeks to reach the Gulf.

France also maintains about 7,000 soldiers in the Indian Ocean, mainly based in Djibouti.

#90221u1599 08/09/1990 ~United Press International

GALVESTON, TX (AUG. 9) UPI - The Texas Commissioner of Health Thursday reopened the entire Galveston Bay to shrimping effective 12:01 a.m. Friday and state officials questioned the completeness of the oil spill cleanup

efforts.

The entire bay was briefly closed to all types of fishing after a 700,000-gallon crude oil spill caused when a Greek tanker collided with three barges near Redfish Island July 28.

On Aug. 4, Dr. Robert Bernstein, state health commissioner, reopened the bay to finfishing. But portions of the bay still remain closed to the taking of crabs and oysters.

The Houston Ship Channel has been open to one-way ship traffic only since Aug. 3 as salvage crews work to remove a badly damaged barge from the waterway.

The West Gulf Maritime Association, an organization that represents shipping lines, has estimated the channel closing cost shipping lines between $15 million to $20 million.

Coast Guard spokesman Rich Muller said cleanup crews continued working Thursday on a few small patches of oil along the shore in the northern reaches of the bay. He said the cleanup efforts would be completed soon.

Meanwhile, a special governor's committee on the state's response to oil spills met for a regularly scheduled meeting in Austin.

Texas Water Commission Chairman B.J. ''Buck'' Wynne and Land Commissioner Garry Mauro questioned the Coast Guard assessment, saying it exemplified the urgent need for the state to take a leadership role in spill cleanups.

''I don't think we ought to declare victory yet. I think we ought to be doing everything we can to continue to clean up that oil spill, and I'm concerned that we are shutting down too soon,'' Mauro said.

He has long called for a strong state plan that includes the use of oil-eating microbes, or bioredmediation, to clean up spills.

''They sent the bioremediation team home this morning, I think that's outrageous,'' he said.

Water Commission Chairman Buck Wynne said he would return to Galveston this week to ''make a judgement on whether it is cleaned up.''

However, he said, the state has few resources to continue the cleanup if necessary. The $1 million oil spill response fund set up in 1977 has only $460,000 left in it.

''If I find it is not, what am I going to do? I've got $460,000, that doesn't go very far,'' Wynne said.

Late Wednesday, salvage workers finished cutting through the hull of a barge that has hampered traffic in the Houston Ship Channel. The first of two pieces of the barge was towed to Galveston Thursday.

The ship channel will be reopened to normal traffic once both pieces are removed, Muller said. The other two barges and the tanker were removed from the scene quickly after the accident.

But the badly damaged Apex 3417 barge had been almost completely submerged until it was re-floated and moved to the side of the ship channel.

All deep-water traffic through the channel was stopped between July 28 and Aug. 3. Since then, the channel has been open for one-way ship traffic. The direction of traffic through the channel is alternated on a 12-hour basis.

Ted Thorjussen, president of the West Gulf Marine Association, said shippers arriving at the same time can lose a day both coming and going.

''I think it's outrageous that the channel is still restricted,'' he said Thursday, blaming an ''overly cautious'' Coast Guard.

(AUG. 9) UPI - An Arab summit to discuss the face-off in the Middle East has been delayed until tomorrow. The meeting had been scheduled for today but was postponed to give Arab leaders time to get to Cairo. Egypt's Middle East News Agency reports that Iraq is sending two top officials to the session.

Tension in the region mounted today. Iran, Libya and other hard-line Arab nations indicate that they are NOT happy with Iraq's invasion of Kuwait a week ago. But they express equal concern about the gathering in the region of U-S and European troops. Iran said the U-S presence is ''more dangerous'' than the Iraqi occupation.

The U-N Security Council today voted unanimously that Iraq's annexation of Kuwait is ''null and void.'' The 15-0 vote approved a resolution by the six Arab nations of the Gulf Co-operation Council. The statement demanded that Iraq rescind its announcement yesterday of an ''eternal merger'' with Kuwait.

Two ships passed in the night at Cape Canaveral, Florida. The shuttle Atlantis was rolled off a launch pad to make way for the shuttle Columbia. Both crafts have been grounded all summer due to unrelated fuel leaks... but NASA says Columbia has been fixed and is ready to blast off around the 1st of September.

The Environmental Protection Agency has taken steps to eliminate all that belching, black smoke from diesel engines. The agency today ordered an 80 percent cut in the sulfur content in diesel fuel during the next three years. While the new rule will clean up the air, it could boost diesel fuel costs by as much as two-point-three cents a gallon.

#90221u1667 08/09/1990 ~United Press International
MORRISTOWN, NJ (AUG. 9) UPI - An appeals court judge Thursday reversed a decision by the state Casino Control Commission that would have made public the details of Donald Trump's recent bank bailout.

Judge Arnold Stein of the Appellate Division of Superior Court ruled that Trump can keep secret the documents that spell out the terms of his financial restructuring - at least until next week.

The commission will hold a special hearing Monday at 2 p.m. in Lawrenceville, N.J. to consider which of the documents should remain sealed. It will be up to Trump's lawyers to convince the commission which documents could jeapordize the deal worked out in June, in which Trump borrowed $65 million to refinance more than $1 billion in loans. The commission will then decide, page by page, and if necessary, word by word, which documents remain sealed, Stein ruled.

The commission had voted Wednesday to make all the documents public, but Trump's attorneys quickly obtained a court order keeping them sealed until Thursday's hearing.

But a document released to reporters before the order was obtained revealed that Trump will pay no interest for up to five years on the $1.08 billion he owes to 55 banks, an arrangement that will save him $85 million a year in interest payments. The document also indicated that Trump used his

Atlantic City casinos as collateral to obtain the new loans.

The commission is in the process of reviewing the deal Trump worked out in June to keep his Trump Castle Resort from defaulting. Under restructuring of his debt, Trump borrowed $65 million from the banks for three to five years to help pay off his interest payments.

The commission, which issued a license to Trump's Taj Mahal Casino Resort on March 31, must now decide whether Trump has the financial resources to operate his three Atlantic City casino hotels. Trump's attorneys assured the commission prior to the licensing that Trump had the financial stability necessary to run the casino.

Trump's financial problems came to light a short time after the Taj Mahal opened in April. In addition to the nearly $2 billion debt to various banks, Trump also owes more than $70 million to dozens of contractors who performed work on the Taj Mahal. The contractors are still negotiating with Trump's lawyers in hopes of getting paid.

As part of the restructuring deal, the banks have limited Trump to $450,000 a month for his personal expenses. Trump has reportedly been trying to sell his luxury yacht and his Trump Shuttle airline, which has been losing money.

#90221u1672 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - Long-time Iraqi Foreign Minister Tariq Aziz resurfaced Thursday after a week's disappearance that fired rumors that he had been purged for opposing his country's invasion of Kuwait, sources said.

A longtime companion of President Saddam Hussein, Aziz had been conspicuously absent from official pronouncements since Iraqi troops stormed across the Kuwaiti border last Thursday and installed a puppet regime.

But the Iraqi government said he would be part of the Iraqi delegation to an Arab League summit in Cairo, due to begin on Friday.

In diplomatic activities before the military action, Aziz had signed a letter accusing Kuwait of profiting unfairly from Iraq's involvement in the war with Iran, and demanding that Kuwait pay $2.4 billion in indemnities.

But he did not represent Iraq at a meeting of the Islamic Conference Organization meeting in Cairo last week. Other countries were represented by their foreign ministers, but Iraq was represented by its interior minister, Samir Abd-al-Wahhab or other officials.

Aziz is known by American officials who have dealt with him to be a hard-liner, tough and sometimes extreme, but always interested in working through diplomatic channels.

His name was absent from the official Kuwaiti annexation announcement, which included a list of Iraqi officials who supported the invasion.

Diplomats in the Middle East said Aziz dropped out of sight Friday about the time Iraq announced it had executed the military officials for allegedly plotting a coup against Saddam at the instigation of an unnamed foreign power.

Initially, Baghdad Radio reported the officers were executed for refusing to participate in the invasion of a fellow Arab nation but later cited the alleged coup plot.

Baghdad's diplomatic blitz to bring other Arab nations into line with its stand on Kuwait has been conducted by Ezaat Ibrahim, vice chairman of Baghdad's secretive ruling Revolutionary Command Council.

Aziz is regarded as third in line from Saddam after First Deputy Prime Minister Taha Yassin Ramadhan, who leads the delegation to the Cairo Arab League summit. But his disappearance during the crisis suggested to diplomatic sources that he has been downgraded in the Iraqi hierarchy under President Saddam Hussein.

He is a Protestant, unlike most other senior figures in the Islamic republic. Aziz also has served as a right-hand man to Saddam after helping him in the 1958 revolution that brought the Ba'ath Party to power.

#90221u1688 08/09/1990 ~United Press International

(AUG. 9) UPI - A rash of explosive wildfires burned out of control across four Western states Thursday, scorching roughly 200,000 acres of tinder-dry forest, rangelands and brush.

The worst of the fires, in Oregon and Idaho, were moving quickly across thousands of acres, fueled by dry weather and hot, swirling winds.

Most of the fires burning in those states as well as in California and Utah hit sparsely populated or wilderness areas and no major injuries were reported.

Weather officials issued ''red flag warnings'' for Northern California, the Sierra Nevada - which stretches from California into Nevada - and for parts of Oregon, Idaho and Wyoming, where predictions of more dry lightning strikes and low humidity levels made for dangerous fire conditions. Similar watches were issued for central Oregon and Montana.

Officials said any rain or humidity generated by thunderstorms would be driven far south, leaving dry lightning to the north.

Oregon Gov. Neil Goldschmidt invoked a state Conflagration Act for the second time in a week Thursday so more crews could be sent to a fire burning perilously close to the community of Burns and other eastern Oregon towns.

Goldschmidt also invoked the act late Saturday in response to a 3,300-acre fire west of Bend that consumed 22 homes and caused $5 million damage.

Meanwhile, more than 3,500 firefighters struggled in yet another day of scorching heat and erratic winds to dig lines around Oregon blazes that have blackened more than 106,000 acres.

Gusting winds aggravated conditions Wednesday night for crews fighting several blazes sparked by lightning Monday night in the Ochoco and Malheur national forests north and west of Burns, about 250 miles southeast of Portland.

After a sleepless night, Burns Police Chief Aaron Richardson said: ''If we get any more high winds, it certainly could develop into a real bad situation.''

In southern Idaho, attempts to contain two large range fires that had charred more than 50,000 acres since Wednesday were hampered by a shortage of firefighters and equipment.

The largest fire, believed to be man-made, was burning 17 miles north of Gooding, about 100 miles southeast of Boise. It was reported at 3:30 p.m. Wednesday, and by Thursday morning, it had grown to 47,000 acres, said Dale Chatterton of the Shoshone District of the Bureau of Land Management.

''It's still cooking along and we're just trying to backfire it to keep it from getting any bigger than it is,'' Chatterson said.

''We're a little short-handed,'' said BLM spokeswoman Marti Sharp. ''We've got 70 people on the fire and that's all we can get - everyone else is committed throughout Idaho and the West.''

Southern Idaho has experienced record high temperatures this week and Thursday's forecast again called for highs above 100 degrees.

In California, a dozen major wildfires had consumed more than 45,000 acres by Thursday morning. Although firefighters were gaining the upper hand by digging breaks around the fires, forecasters predicted more electrical storms for later in the day.

About 1,900 firefighters were battling a single fire in North Central California that had consumed 29,200 acres.

The Pine Creek fire, which had spread from the Sierra foothills east of Red Bluff into Lassen National Forest, was about 30 percent contained by Thursday. About 20 homes in the tiny community of Campbellville on the Butte County border were evacuated.

In the Sierra National Forest east of Fresno, eight of 61 lightning-caused blazes that have erupted since Sunday were still burning Thursday, said Michael Brionez, a forest spokesman.

The forest's only large fire remaining out of control was the 200-acre Lily fire in the Ansel Adams Wilderness, about 65 air miles northeast of Fresno.

Lightning was blamed for more than two dozen wildfires in Yosemite National Park. The fires prompted officials to evacuate some 70 cabins in the community of Forestra and to shut down Highway 41, the southern entrance into the park.

A park spokeswoman said firefighters were concentrating on the fires that posed the greatest threat to park facilities and were letting others burn.

In Utah, the lightning-sparked, 5,350-acre Florence Creek fire south of Fort Duchesne was 80 percent surrounded at the beginning of its ninth day. Fire officials said with more than 375 firefighters on the lines, the fire was expected to be completely contained Friday.

The rash of Western fires has drawn help from around the country. Renee Snyder, a spokeswoman for the Boise Interagency Fire Center, said crews have been sent from Arizona, Colorado, Georgia, Maryland, New Jersey, New Mexico, Pennsylvania, Tennessee and Wisconsin.

The California Department of Forestry reported that wildfires nationwide have blackened more than 3.1 million acres, compared to 1.4 million a year ago.

WASHINGTON (AUG. 9) UPI - Eleven U.S. Embassy employees and relatives of

American diplomats from Baghdad tried to cross from Iraq into Jordan Thursday but were turned back at the border by Iraqi authorities, U.S. officials said.

The Iraqi Foreign Ministry later announced the convoy of U.S. diplomatic dependents and personnel would be permitted to cross the border, and the 11 Americans plan to try again Friday, State Department spokesman Richard Boucher said.

The incident was the latest example of contradictory behavior by the Baghdad government, which has prevented thousands of Americans and other foreigners from leaving Iraq and Iraqi-occupied Kuwait while it avoids saying they are being held against their will.

Thirty-eight Americans rounded up by Iraqi forces since the invasion of Kuwait remained confined Thursday to a Baghdad hotel, which was surrounded by armed guards, State Department officials said.

A 10-year-old girl, Penelope Nabokov of Albany, Calif., who was among those detained at the Hotel Rashid, was released to the custody of the U.S. Embassy in Baghdad Wednesday, and U.S. officials were seeking to get her out of the country.

The State Department estimates that about 3,000 Americans remain in Kuwait and another 580 U.S. citizens in Iraq, most of them in Baghdad.

''These people are stuck, just like the people who are stuck in the Rashid Hotel,'' Boucher said. ''I can't adequately explain their (Iraqis') actions.''

U.S. officials, seeking to avoid inflaming the situation, have refused to characterize any of the Americans as hostages

''We have told the Iraqis that all the Americans should be permitted to depart,'' White House press secretary Marlin Fitzwater said Thursday. ''Iraq is enforcing their requirement of a seven-day advance notice of travel by embassy personnel. We are sure that similar actions for private citizens are adding to the departure delay.''

The Iraqis have told U.S. officials that the 38 Americans at the Hotel Rashid were being held separately because they were picked up in ''sensitive areas'' of Kuwait, Boucher said. But he said there was no indication this was a precursor to charging them with security offenses.

The 38 include 11 oil field workers who were taken into custody in Kuwait at the outset of the invasion, 24 Americans rounded up from three hotels in Kuwait City days later, and three Americans who were already staying at the Rashid, State Department officials said.

Foreign residents of Iraq who have been in the country for more than 30 days have been told they need exit visas in order to leave, but Iraqi authorities are not issuing any such documents and the airport in Baghdad remains closed, Boucher said. However, foreigners have been permitted to move freely throughout the capital, he said.

Under Iraqi law, short-term visitors to Iraq are not generally required to have exit visas to depart the country, but they also have not been permitted to leave since the invasion, Boucher said.

Diplomatic staff and their dependents have been told they can leave, but with enforcement of the seven-day waiting period, they could not depart before next Wednesday.

Although both the Iraqi and Kuwaiti borders appear to be sealed, there have been numerous reports of Americans departing both countries, including five U.S. citizens who arrived by car in Jordan Wednesday, Fitzwater said.

The U.S. Embassy in Kuwait has set up a ''warden system,'' in which certain Americans have been assigned to report to the embassy daily on the well-being of a group of people in their neighborhood or in their company.

The State Department called in the Iraqi ambassador to Washington, Mohamed al-Mashat, Thursday to urge that the Americans be permitted to leave, and to reiterate international calls for an Iraqi withdrawal from Kuwait.

Boucher said al-Mashat had earlier given his government's commitment to protect the security of the Americans.

BOGOTA (AUG. 9) UPI - Newly inaugurated President Cesar Gaviria said Thursday his government will not let up in its fight against a warring cocaine cartel and will continue extradition of suspects to the United States, at least for now.

Gaviria, who took office Tuesday, also said a cease-fire declared two weeks ago by the Medellin Cartel of cocaine traffickers will not influence the policies of his government.

''This government is not going to change its position or its attitude because of terrorism,'' Gaviria said at a news conference. ''This has to be clearly established, that we are dedicated to a struggle of this type.''

Colombia has been wracked for the last year by a series of car bombs and

airline bombings and the assasinations of three presidential candidates, police officers, and other officials.

The actions are blamed by police on the Medellin Cartel of cocaine traffickers and their armed hit squad, which calls itself The Extraditables in statements to the news media.

Hundreds of people have been killed in the war that began after a series of assasinations in August of 1989 when then then-President Virgilio Barco declared a state of siege.

He used his emergency powers to reinstate extradition, which had been voided by the Supreme Court.

In the past year some 20 cocaine suspects have been sent to the United States.

Two weeks ago The Extraditables sent a statement to Colombia news media saying they were halting the bombings and killings, but they made it clear they also wanted a halt to extradition.

Gaviria said in his inauguration speech that the use of extradition would be ''discretionary'' but only when the acts of terror stop and the Colombian system of justice was rebuilt from its present state of near collapse.

That seemed to mean that extradition in the future would be considered on a case-by-case basis, with perhaps some of the extradition requests being turned down.

U.S. authorities are anxious to continue the extradition proceedings, believing that drug traffickers are more likely to be convicted in the United States than in Colombia, where judges are subject to threats of murder and and other violence by the cocaine dealers.

Gaviria made it clear Thursday that the conditions he offered to make extradition ''discretionary'' had not been met.

''It appears to me the disappearance of terror is very far from being a sufficient condition to speak of this discretionary use,'' he said.

He added emphatically, ''The president of the republic is not an enemy of extradition.''

The rebuilding of Colombia's paralyzed justice system is a long term project that ''will not be resolved from one day to the next,'' he said.

''We can not let down our guard,'' Gaviria said. ''I am convinced we must

continue combatting and persecuting the criminal organizations dedicated to terrorism.''

WASHINGTON (AUG. 9) UPI - A diabetic juror at the trial of Mayor Marion Barry was hospitalized Thursday ''deeply depressed'' and with a fever, halting deliberations for the day as the cocaine and perjury case neared the end of its 10th week.

Juror Deborah Noel, 34, was taken to Providence Hospital at about noon with a fever and for treatment by her endocrinologist, Dr. Ashraf El-Khodary, who has treated her for diabetes, said U.S. District Judge Thomas Penfield Jackson.

The hospital released a statement saying Noel was in ''good condition'' and was admitted for ''overnight observation to monitor her blood sugar.''

Noel, a clinical clerk at Howard University Hospital, was expected to be released in time for the jury to resume deliberations for an eighth day at 9:30 a.m. Friday, said Jackson.

But Jackson later said through a pool reporter that, if Noel's condition worsened, he would consider asking attorneys for both sides if they would

accept an 11-person jury to deliberate.

The jury has been sequestered since June 18. Friday will mark the eighth day of deliberations on 14 cocaine and perjury charges facing Barry.

''(El-Khodary) tells me he can find nothing wrong,'' Jackson told attorneys in the courtroom. ''She is, however, deeply depressed, overwrought and under great stress.''

A U.S. Marshal was assigned to stay with Noel to ensure she did not have access to news about the trial, said Jackson.

The jury of nine women and three men has deliberated more than 32 hours over seven days, reaching a verdict on at least one of the 14 counts.

The jury told Jackson on Tuesday it had reached a conclusion on Count 12, one of 10 misdemeanor possession counts, but did not announce the verdict.

In addition to the possession charges, Barry faces three felony counts of perjury and a single misdemeanor count of conspiracy to possess cocaine.

He could be sentenced to 26 years in prison and fined $1.85 million if convicted of all counts.

#90221u1740 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - A strong majority of senior executives at the largest U.S. companies support President Bush's handling of the Iraqi crisis and many favor an even stronger military response, according to a business survey released Thursday.

"The American government has the solid approval of the nation's corporate leaders," said the survey, conducted by Research & Forecasts Inc. just after Washington's decision to send troops to Saudi Arabia.

Bush's handling of the crisis was viewed as "good or excellent" by 78 percent of the executives polled at 100 companies ranking among the top 1,000 U.S. businesses.

But a virtually similar number, 77 percent, said the United States should not act alone but seek joint military action with other countries because the interests at stake - including oil supplies - have a global impact.

A strong 50 percent of the respondents favored limited air strikes against Iraq if Baghdad were to move against Saudi Arabia, but only 12 percent said they would support a full-scale war against Iraq. A 53 percent majority believed that Iraq was likely to attack Saudi Arabia.

Virtually all executives said they were closely following developments in the Middle East, although most expected the crisis to have no significant impact on their operations.

U.S. corporations with operations in Kuwait or Iraq said that they were closely monitoring the situation and that their concern focused on the safety of employees - including a number of U.S. nationals - rather than on a loss of business.

United Technologies Corp., which is strongly represented in Kuwait and Saudi Arabia through its Carrier air-conditioner and Otis elevator subsidiaries, said it has not asked employees to leave the region but

recommended they stayed in close contact with U.S. officials.

The company declined to give a specific figure on employees in Kuwait but said it was employing 700 people in the emirate and Saudi Arabia, including 130 U.S. nationals who have 50 U.S. dependents. "We are not being specific for security reasons," said spokeswoman Peg Hashem. "We are staying in close touch with our employees."

Texaco Inc. announced earlier this week it was closing down its Kuwait refinery because storage tanks were full as a result of the international embargo ordered against Iraq and Kuwait.

Texaco said it was offering transportation for the dependents of its U.S. employees in Saudi Arabia who wanted to leave. But none of the oil company's 50 American workers have left. Texaco also said its 17 U.S. employees in Kuwait were safe.

Avis Inc. said that it was only employing Kuwaiti nationals in the emirate and that its operations were extremely scaled down because there were no travelers going to Kuwait since the invasion.

According to the survey, the crisis in the Middle East has had only a moderate effect on business projections, with 39 percent of the executives polled projecting lower profits but 43 percent saying the crisis will not have a real impact on their businesses. Ten percent considered putting off expansion plans.

At the same time, 54 percent of the executives said all U.S. citizens should be required to perform some form of mandatory national service, including military service. The poll was done as part of a broader survey, the "Chivas Regal report on American Business Leaders: Executive attitudes in a time of upheaval."

#90221u1743 08/09/1990 ~United Press International

MANAGUA, NICARAGUA (AUG. 9) UPI - An internal crisis erupted in the Nicaraguan military Thursday when the chief of the air force was fired, reportedly for revealing military secrets to the pro-government newspaper La Prensa.

The Sandinista Popular Army, in a written statement, announced that Col. Javier Pichardo had been removed from his post by armed forces commander Humberto Ortega, and was replaced by Col. Manuel Salvatierra.

An army spokesman refused further comment, but the Sandinista-owned radio station La Primerisima said the main reason for the action was an allegation that Pichardo revealed ''military secrets'' to Cristiana

Chamorro, director of La Prensa and daughter of President Violeta Chamorro. The president owns La Prensa.

The radio also said differences between Pichardo and Ortega over the transfer of power to Chamorro also influenced the dismissal.

Pichardo could not be immediately reached for comment, and La Primerisima said he was in army custody.

The information Pichardo gave to Cristiana Chamorro involved a split in the armed forces over the handover from Sandinista rule to Violeta Chamorro. No further details were available.

La Primerisima also said the army had asked national police chief Rene Vivas to jail Pichardo, but Vivas had rejected the request saying it was an ''internal army problem.''

The Sandinista army has been going through a process of reduction since Chamorro took office Apr. 25 after defeating Sandinista President Daniel Ortega, brother of Humberto, in elections.

Presidential Minister Antonio Lacayo said Wednesday that the reductions had brought the army down from 96,500 troops last December to less than 40,000 by the end of July.

Chamorro's retention of Humberto Ortega as head of the army has been a sticky point within her National Opposition Union, or UNO, coalition.

Humerto Ortega, in apparent rejection of extremist sectors within the Sandinista Front, sided with Chamorro during a violent nationwide strike by Sandinista workers last month and ordered the army and police to maintain order and refrain from using firearms.

WASHINGTON (AUG. 9) UPI - President Bush will nominate Jeanne Archibald, a Treasury Department lawyer since 1986, to be general counsel of the department, the White House announced Thursday.

Archibald, 39, who has been serving as deputy general counsel at the Treasury Department, would succeed Edith Holiday, who recently was named a top aide to President Bush at the White House.

-30- 576

#90221u1757 08/09/1990 ~United Press International

WASHINGTON (AUG 9) UPI - The United States moved ahead on a global strategy Thursday of isolating Iraq economically and politically, blocking the Iraqis militarily and encouraging international pressure to bring about an Iraqi withdrawal from Kuwait.

The three-pronged strategy got a boost Thursday when the United Nations Security Council, in its third action in a week against the Iraqi invasion voted, 15-0, to declare Iraq's annexation of Kuwait ''null and void,'' without any standing in international law.

In Cairo, members of the Arab League, including Iraq, gathered for a meeting, delayed until Friday, to hear a plan by Egypt's President Hosni Mubarak to arrange an Iraqi pullback under the auspices of an Arab multinational force.

But Iraq's announced annexation of Kuwait - described Wednesday by a Baghdad spokesman as ''eternal'' - appeared to block that plan before it could be put into effect.

French President Francois Mitterrand dispatched an aircraft carrier and support ships to the region. England contributed Jaguar and Tornado aircraft and tanker planes.

State Department spokesman Richard Boucher said, ''The U.S. effort to isolate Iraq'' will go on a parallel track with the efforts by other nations and international organizations.

In Ankara, Turkey, Secretary of State James Baker talked with Turkish officials, including President Turgut Ozal, about further cooperation to contain Iraq.

A Pentagon spokesman said he could not confirm a report, originating in Turkey, that Iraqi forces had begun to mass near the Turkish border.

Assistant Secretary of State John Kelly was to travel to Damascus to discuss further means of isolating Iraq and to prevent its life-blood - oil exports - from going to the outside world.

Baker is to go Friday from Ankara to Brussels to report to NATO foreign ministers on the American strategy.

The Soviet ambassador in Brussles, named by his government to be liaison for the western effort against Iraq, was also scheduled to receive a briefing by Baker Friday.

The American campaign, according to Boucher, included communications with another long-time U.S. adversary, Iran. He said there had been regular communications with the Iranian government, which is still technically in a state of war with Iraq, even though a truce has been called in their 8-year armed struggle.

The United States and Iran, which do not have diplomatic relations, communicate through Switzerland or Algeria.

Iran has publicly condemned the Iraqi takeover of Kuwait, but has not said what it will do to back up that condemnation.

White House spokesman Marlin Fitzwater said, ''This is pretty much of a waiting game now.''

He said that Iraq has already begun feeling the pinch of the U.N.-ordered trade embargo and cutoff of arms supplies, including spare parts from its former principal suppliers, France and the Soviet Union.

Fitzwater said, ''I think the President feels confident that he has done the right thing for the right reason. ... He feels very good about it.''

Bush continued his flurry of telephone conversations with world leaders, including the heads of the United Arab Emirates, Oman and Turkey and British Prime Minister Margaret Thatcher. He planned to call Australian Prime Minister Robert Hawke.

At the State Department senior officials called in foreign ambassadors to give a series of briefings on the attempt to isolate Iraq and to suggest ways that other countries could help tighten the ring.

NEW YORK (AUG. 9) UPI - The judge in the Central Park jogger trial, in an apparent setback for the defense, told the jury Thursday that parents do not ''automatically'' have to be present during police questioning of juveniles.

''It hurts my case with the jury,'' said Peter Rivera, a lawyer for defendant Raymond Santana, 15. ''This is a central issue of our case. I'm very dissapointed.''

The judge's legal opinion came on the first day of deliberations in the rape and attempted murder trial of three youths charged in the attack on a woman jogger in Central Park on Apr. 19, 1989.

Santana, Antron McCray, 16, and Yusef Salaam, 16, were all under 16 and therefore considered juveniles at the time of their arrests in the hours after the rampage.

The jury sent a note to Justice Thomas Galligan asking for a ''clarification of circumstances when statement of a minor is acceptable ... particularly when a parent or guardian should be present for the interview.''

Galligan told the jury that it is proper for police to question a juvenile without a parent present as long as they made a ''reasonable effort'' to notify the parent.

''The fact that a parent was not present during the questioning of a juvenile does not automatically mean that a statement was involuntary,'' the judge told the jury of 10 men and two women at state Supreme Court in Manhattan.

''There is no requirement for a parent or guardian to be present. You may consider if the police made a reasonable effort to contact the parents or guardian,'' Galligan said.

The judge's ruling, Rivera said, could undermine Santana's defense case, which was based on a narrower interpretation of law governing the questioning of juveniles.

Rivera urged the jury to disregard Santana's confession, arguing that a parent or legal guardian must be present during police questioning.

Santana's father was contacted by police, but the youth was left at the precinct with his grandmother - who is not his legal guardian - when he initially confessed.

The state Family Court Act says parents should be present during the questioning of juveniles but in recent years there have been a number of exceptions to the rule, said Peter Reinharz, Manhattan's chief prosecutor at Family Court.

The exceptions are made when police ''have made all reasonable efforts to get in touch with the parents or person legally responsible,'' Reinharz said.

Late Wednesday, the jurors listened to two hours of legal instruction from Galligan to guide them to a verdict in the highly publicized case.

TALLAHASSEE, FL (AUG. 9) UPI - Iraq's Saddam Hussein has been nominated for a solar energy industry group's annual "Solar Man of the Year Award," the group's director said Thursday.

Ed Glenn of the Florida Solar Energy Industries Association said the award is given to the person who has contributed most to the development and use of solar energy in the Sunshine State.

Iraq's invasion of Kuwait, and the subsequent shock to the world oil markets, has shaken the public's complacency about energy, Glenn said. He said the Iraqi leader's nomination for the award was a "tongue-in-cheek gesture," but that the United State's dependence on imported oil is no laughing matter.

"It is unfortunate that a crisis is so often required to get people's attention, but the good news is that we can use this warning signal to our advantage by finding ways to cut energy demand and to shift many of our energy uses from limited fossil fuels to renewable energy resources," Glenn said.

WASHINGTON (AUG. 9) UPI - President Bush formally laid to rest a diplomatic dispute between the United States and Nicaragua on Thursday that became all but moot with the installation of a democratically elected government in April.

Bush repealed an October 1988 executive order signed by President Reagan that limited the entry of officers and employees of the Nicaraguan government, at that time headed by the Marxist-led Sandinista regime of Daniel Ortega.

Reagan imposed the restrictions in retaliation for the expulsion of American diplomats from Nicaragua. The proclamation signed Thursday by Bush restores freedom of travel to the United States for officials of the American-backed government of President Violeta Chamorro.

#90221u1881 08/09/1990 ~United Press International

CAIRO, EGYPT (AUG. 9) UPI - Iraq agreed Thursday to participate in an emergency Arab summit called to forestall further foreign involvement in the Persian Gulf crisis, even as U.S. troops took up positions in Saudi Arabia and France deployed forces to the region.

The summit was postponed from Thursday evening to Friday morning to give delegates from Yemen and Tunisis time to travel to cairo to join other delegates of the 21-member Arab League for the emergency meeting, spokesmen said.

Egyptian President Hosni Mubarak was expected to try to convince Iraq to accept an Arab peace-keeping force and withdraw from the tiny emirate of Kuwait, which it invaded last week and annexed Wednesday.

Iraqi President Saddam Hussein agreed to send a high level delegation to the summit, giving Arab leaders a chance to negotiate an Arab solution to the Kuwait conflict before Western forces dig in.

''The summit looks like a last chance for peace,'' a Western diplomat based in Cairo said.

But Saddam gave no indication he was ready to back down, tightening his grip on the emirate by announcing Iraq would assume Kuwait's financial obligations and ordering foreign missions in Kuwait city to relocate to Baghdad.

The United Nations ruled in a special session in New York that the annexation was ''null and void'' and urged member states not to recognize the Iraqi action.

Jordan tested its air raid sirens and Turkey moved F-16 fighter jets to its border with Iraq, where Iraqi troops were reported to be massing. An Iraqi ambassador in Athens caused alarm when he announced Iraq would not hesitate to use its deadly arsenal of chemical weapons.

The State Department in Washington also reported that dozens of Americans were being held against their will in a Baghdad hotel, stopping short of calling them hostages. The Iraqis did release a 10-year-old American girl.

The United States, which hopes to assemble a united international military force off Iraq just as it organized an international oil and trade embargo against the country, had limited success Thursday.

France agreed to join U.S. and British forces in the Gulf region but efforts to convince Arab nations and Turkey to join the burgeoning military display were fruitless.

The Soviet Union said Thursday it would only consider participating in a multi-national force or naval blockade if such measures were established by the U.N. Security Council.

NATO officials in Brussels, Belgium said the alliance would come to the aid of Turkey, its only Moslem member, if Iraq invaded, but said there were no immediate plans to send forces to the Gulf.

But President Francois Mitterrand said France would immediately bolster its forces in the Gulf region and would send arms and technicians to the area to help defend Saudi Arabia and other countries against a possible Iraqi attack.

King Fahd of Saudi Arabia, in an address to his kingdom, said the deployment of U.S. troops on Saudi soil was necessary in light of the Iraqi troop buildup along the Kuwaiti border, but stressed the measure was only temporary.

The presence of foreign forces in the Gulf was denounced by several hard-line Arab states, most notably Libya and Iran, which charged the U.S. troops posed a greater threat to the Arab world than Iraq's invasion of Kuwait - which it also denounced.

Saddam, who has appealed for backing from nationalist Arabs, struck a chord in his ally Jordan, where youths demonstrated against the U.S. troops in Saudi Arabia and begged to join the Iraqi army. Students in Libya and Yemen also protested against the U.S. forces, news agencies said.

Arab leaders, including Syrian President Hafez Assad and Libyan leader Moammar Gadhafi, arrived in Cairo Thursday for the emergency summit, which was also to be attended by deposed Kuwaiti emir, Sheikh Jaber al Ahmad al Sabah.

The Middle Eastern News Agency, MENA, said Taha Yassin Ramadan, Iraq's first deputy prime minister, would attend the emergency Arab session along with three other delegates, including Iraqi Foreign Minister Tariq Aziz. Aziz had disappeared from public view last week at the same time as reports surfaced that said Baghdad had executed more than 100 military officers.

The Iraqi Foreign Ministry announced Thursday foreign missions of the ''former regime'' in Kuwait ''no longer have official status and became illegal'' with Baghdad's proclamation Wednesday of a merger of the nations.

Kuwait and Iraq combined produce 10 percent of the crude oil on the market but the extensive international economic boycott spearheaded by President Bush and mandated by the U.N. Security Council has reduced the flow of oil

from the two nations to a trickle.

Turkey contributed to the boycott earlier this week by stopping shipments of oil from two Iraqi pipelines that run under the country to the Mediterranean. Secretary of State James Baker met in Ankara with Turkish leaders Thursday morning to assure them that NATO would come to Turkey's aid if Iraq attempted to retaliate.

Not all Kuwaitis took the loss of their country as a fait accompli. A clandestine organization in Beirut reported Kuwaiti nationalists had thrown a hand grenade at Iraqi guards in Kuwait city, but the report could not be confirmed. Members of the Kuwaiti delegation to the Arab summit cried at the Cairo airport when their national anthem was played.

Before leaving Baghdad, Iraqi delegation leader Ramadan said Iraq wanted to stress ''the importance of giving precedence to pan-Arab interests over narrow parochial interest to confront overt U.S. threats to the Arab nation.''

Earlier Thursday, Iraq's U.N. Abdul Amir al-Anbari told the British Broadcasting Corp. Baghdad ''didn't want to fight with America'' and had no plans to attack Saudi Arabia.

''America is a great country, much more powerful than Iraq or anyone else in the region, but however ... when you are at home you have to defend yourself by any means,'' he said.

Also Thursday, the British Foreign Office in London said Iraq had sealed its borders and would only allow diplomats to leave the country.

A Foreign Office spokesman confirmed that a flight attendant on a British Airways jet seized in Kuwait had been raped at gunpoint by an Iraqi soldier. The incident occurred when some of the jet's 367 passengers and crew were being transferred by bus from one hotel to another 48 hours after the Iraqi invasion.

Diplomats said they hoped the Arab summit could achieve a settlement and a confrontation between the foreing troops and Saddam's 1 million-strong battle-hardened soldiers could be avoided.

In Washington, White House officials described the situation as a waiting game.

-30- 7024

#90221u1886 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - About 50,000 Iraqi troops in armored and infantry units appear to be headed to Kuwait to join the 120,000 Iraqi

soldiers already there who are digging in and improving air defenses, the Pentagon said Thursday.

''This morning we see the Iraqi military consolidating its forces in Kuwait,'' Pentagon spokesman Pete Williams said, citing U.S. intelligence reports. ''It would seem to us that they are working to hold on to what they've acquired.

''They seem to be in a defensive posture, but nonetheless, Iraqi forces are still capable of offensive action.

''And at the same time, more Iraqi military units appear to be heading south, from Iraq into Kuwait,'' he said. ''It's difficult for me to go much beyond that. It's a mixture of forces, both armored and infantry units.''

The Pentagon said later that if all of the Iraqi troops going south move into Kuwait, there will be a total 170,000 Iraqi soldiers in the occupied country. About 120,000 Iraqi forces are already in Kuwait, Williams said.

At the same time, the United States continued sending troops and aircraft to Saudi Arabia to help deter a possible Iraqi invasion from occupied Kuwait. Defense sources said the U.S. force there could grow to 50,000 troops.

The mission was also given a formal name: Operation Desert Shield.

A senior administration official who asked not to be identified said no U.S. decision had been made yet whether to conduct a naval blockade of Iraqi oil exports.

But, he added, ''I would anticipate that we would take some steps to interfere with the export of petroleum products. ... We're working out the details now of how the sanctions, voted by the U.N., should be applied. ... We are working with other countries.''

In New York, the U.N. Security Council unanimously passed a resolution condemning Iraq's annexation of Kuwait and declaring the armed action ''null and void.''

At the White House, President Bush was reported pleased with the United Nation's official repudiation of Iraq's annexation of Kuwait and he used the telephone to try to rally global isolation of Baghdad.

''We're very satisfied with the events in the past 24 hours,'' said White House press secretary Marlin Fitzwater, referring to the biggest U.S. military operation since the Vietnam War and a U.N-backed embargo against Iraq.

Bush called British Prime Minister Margaret Thatcher, who has committed naval and air forces to the Persian Gulf, the leaders of the Gulf nations of United Arab Emirates and Oman, and the leader of NATO's only Moslem member, Turkey.

Fitzwater said the leaders of Oman, the UAE and Turkey ''all expressed satisfaction regarding the efforts of the international community.''

Turkey, Iraq's northern neighbor, closed an Iraqi pipeline that runs through its country and there were unconfirmed reports Thursday of a possible Iraqi military buildup on the Turkish border.

But Williams said he had not seen any U.S. intelligence to indicate an Iraqi military buildup on the border of Turkey.

The United States has at least 14 F-111 fighter-bombers at Incirlik Air Base in Turkey, within easy reach of Baghdad. F-111 aircraft were used in the U.S. air attack on Libya in 1986.

Although Arab leaders have yet to develop a joint ''Arab solution'' to last week's Iraqi invasion of Kuwait, Fitzwater said, ''We note that Jordan has indicated it intends to abide'' by the U.N. trade embargo of Iraq.

''This is a positive step,'' he said. ''We hope this also indicates that King Hussein recognizes the threat that Iraqi President Saddam Hussein represents to the Arab World.''

Fitzwater said there had been no change in the status of 38 Americans being held against at a hotel in Baghdad. He said the hotel is surrounded by armed guards, but ''to our knowledge no American has been threatened.''

''We have told the Iraqis that all Americans should be permitted to leave '' he said.

Fitzwater said the president ordered Assistant Secretary of State John Kelly to go to Syria to discuss possible coordinated action and made indirect contact about the situation with Iran, a longtime foe.

The press secretary said the United States sought to assure Iran that the U.S. forces were in the Persian Gulf in a defensive mode only, and also wanted to better understand Iran's position.

Pentagon spokesman Williams said that not only are the Iraqis digging in in Kuwait, but Iraqi forces ''are improving their air defenses ... in Kuwait.'' He declined to elaborate, though the Iraqis are believed to have more than 300 surface-to-air missiles in their arsenal.

The Pentagon declined to officially disclose how many U.S. troops or aircraft were in Saudi Arabia or how many were going to be sent or from where.

Williams said the 82nd Airborne Division's Ready Brigade, which sources said totaled about 2,300 paratroopers, were continuing to arrive in Saudi Arabia for a second day from Fort Bragg, N.C.

In addition, all 48 of the F-15 Eagle fighter jets the United States planned to send to Saudi Arabia were in the oil kingdom Thursday, along with five AWACS early-warning radar planes.

''They're unloading equipment, setting up defensive positions and perimeters,'' Williams said of the U.S. troops in Saudi Arabia. ''And they are also working with the Saudi forces to improve their military'' and conduct training.

The Pentagon was expected to continue to send more troops and other aircraft including F-16 fighters and bombers.

''I cannot speculate on how much more will go,'' Williams said. ''There'll be more. There's much more to come. This is an operation that is going to continue for several days, one might say many days.''

Williams said the Pentagon said its policy is that ''we're not going to discuss deployment of forces until those forces are substantially in position, well on their way.''

The senior administration official who spoke of a possible blockade also said the United States remains concerned that Saudi Arabia could be attacked because Saddam's forces ''are in a position now where they could certainly attack with, we think, less than a day preparation.''

Asked if reports were true that U.S. troops were now within 7 miles of the Kuwaiti border, the official said, ''I can't tell you precisely but it wouldn't surprise me.''

The week-old Persian Gulf crisis is also causing a U.S. financial crunch.

Gasoline prices have already risen more than 12 cents a gallon, raising fears that the action will push the sluggish economy into recession.

Fitzwater said Bush planned to begin a three-week vacation as scheduled Friday at his seaside estate in Kennebunkport, Maine. He said Bush would monitor events from there with a bolstered travel staff.

#90221u1892 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - The dollar treaded water but remained mostly firm Thursday in New York trading as players, fatigued from days of volatility spawned by threats of Mideast warfare, stood by for further news.

Foreign exchange dealings were "choppy and frustrating" as the United States continued to build up ground, air and sea forces in Saudi Arabia and the Persian Gulf region without incident, said one New York trader.

"The reality is we're sort of marking time, awaiting developments," said Valerie Walker, a currency adviser with Harris Trust and Savings Bank in New York. "It's very cautious trading." She said the dollar traded in an extremely narrow price range as participants settled for small profits and avoided taking risky positions.

In late New York trading, the dollar was quoted at 1.5955 German marks, up from 1.5925 late Wednesday, and at 149.75 Japanese yen, down from 149.85.

"Most of the news has all been digested as far as the Middle East situation is concerned," said chief trader Dominick Errichetti of French bank Societe Generale's New York branch.

Errichetti said the foreign-exchange market shrugged off Thursday's Treasury Department auction of 30-year bonds. Credit-market analysts said the auction went better than they had expected given current volatile market conditions.

The Treasury sold $10.3 billion of the 8 3/4 percent bonds an average price of $98.747 and average yield of 8.87 percent - the highest at-auction yield seen on a 30-year U.S. bond in more than a year.

Other New York dollar rates: 1.3425 Swiss francs, up from 1.3385; 5.3525 French francs, up from 5.3380; and 1,166 Italian lire, up from 1,165. The British pound eased to $1.8680 from $1.8700.

In Europe, the dollar closed marginally lower in nervous trading against all major currencies but the lira.

Analysts said the dollar traded in very narrow ranges as buyers and sellers waited to see what would happen in the U.S.-Iraqi standoff.

"The dollar has done very little," said Kit Juckes, a currency economist with Warburg Securities in London. "The market is really quite quiet waiting to see how things develop." "Until there are any shots fired, I cannot see the dollar moving much in the short term," another analyst said.

Juckes and other analysts said they believe the dollar may be increasingly

replaced by the Swiss franc as the currency regarded by investors as a "safe haven" because of fears the U.S. economy may be weakening. "The Swiss franc has probably been the best performer because of its higher interest rates," Juckes said.

The dollar eased slightly in Frankfurt, at 1.5930 German marks vs. 1.5940 marks Wednesday, and was lower in Zurich, at 1.3405 Swiss francs vs. 1.3435. In London, the pound sterling moved up to $1.8710 from $1.8675.

The dollar softened in Paris, to 5.3435 French francs from 5.3480, and in Brussels, to 32.74 Belgian francs from 32.7775, but moved slightly higher in Milan to end at 1,166.90 Italian lire against 1,165.25.

Earlier in Tokyo, the dollar fell against the yen in quiet trading that reflected dealers' caution. The dollar closed at 149.68 yen, down from Wednesday's 150.

Gold closed higher in Zurich, at $384 an ounce vs. $383.10, and in London, at $385 an ounce vs. $382.25.

Republic National Bank in New York closed cash gold at $386.25 an ounce, up from $383.25 Wednesday. The New York Commodity Exchange settled contract gold at $385.80 an ounce, ahead from $383.20.

Silver closed lower in Zurich, at $4.85 an ounce compared with $4.87, but was unchanged in London at $4.87 an ounce.

Republic closed cash silver at $4.875 an ounce, up from $4.865. Comex silver also strengthened, to $4.857 an ounce from $4.843.

-30- 3942

#90221u1932 08/09/1990 ~United Press International

(AUG. 9) UPI - U.S. crude-oil prices eased downward and foreign prices remained unchanged Thursday as quiet prevailed in the Mideast with Iraq electing to attend an Arab summit rather than make a feared military move against Saudi Arabia.

"In the absence of any bellicosity, the market kind of eased lower," said Peter Beutel, vice president of New York's Merrill Lynch Futures Inc. "Everyone is waiting until they see what (Iraqi President) Saddam Hussein's next move is," the trader said.

"Iraq has not struck and the United States has not struck," observed Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York.

Traders awaited the outcome of an Arab summit meeting to give direction to

the market and a possible reaction by Iraq to the movement of American military forces into Saudi Arabia.

The United States began moving military forces into Saudi Arabia Wednesday in an effort to dissuade a possible Iraqi attack from its positions in occupied Kuwait. Saudi Arabia is the world's largest crude-oil exporter.

Iraq, which had not been expected to attend the Arab emergency summit in Cairo on an Arab solution to Saddam's Aug. 2 invasion of Kuwait, decided to participate. Iraq announced Wednesday it had annexed its oil-rich Persian Gulf neighbor.

Scheduled to begin Thursday evening, the summit startup was postponed until Friday morning. Barakat viewed the delay and the decision of Iraq not only to attend the summit but send a high-level delegation as a positive development.

"The postponment of the Cairo meeting indicates there is some serious horse-trading going on," he said. "The Iraqis weren't going to send anyone, but now they're sending a delegation headed by Saddam's right-hand man, Izzat Abrihim," Barakat said.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for September delivery fell 29 cents on the day to $25.67 a barrel after trading as high as $26.60 a barrel earlier. It fell $2.35 to $25.96 a barrel Wednesday.

On the European cash markets, Dubai light, the key Mideast crude produced by the 13-nation Organization of Petroleum Exporting Countries and shipped mainly to the Far East, was unchanged from Wednesday at $21.80 a barrel.

It had fallen $3.95 Wednesday on reports that Saudi Arabia had agreed to raise its daily output by two million barrels to help make up for the 4.6-5 million barrels lost by the world embargo of Iraqi and Kuwaiti exports.

Britain's widely traded North Sea Brent crude was unchanged from late Wednesday at $24.75 a barrel after losing $3.65 a barrel Wednesday.

Unleaded gasoline for September delivery, which nosedived 6.18 cents Wednesday, gained 0.21 cent to 76.42 cents a gallon on the Merc after trading as high as 78 cents a gallon. Beutel said gasoline prices were influenced by a report that Brazil was going to reduce its gasoline exports to the United States.

September heating oil, which dropped 5.01 cents Wednesday, lost a mere 0.36 cent to 69.77 cents a gallon. On the U.S. Gulf Coast cash market, prompt delivery WTI fell 25 cents to $25.70 a barrel.

Barakat said Merc crude prices moved lower earlier when rumors hit the trading floor that Iraq was moving troops toward its border with Turkey and had closed all its borders.

Joseph Tovey, a New York energy consultant, raised the possibility that Iraq could easily swing troops along its Turkish border down into Syria and gain a Mediterranean outlet for its oil exports. Syria, which sided with Iran during the eight-year Iran-Iraq war, closed down an oil pipeline from Iraq in 1982.

In Paris, an emergency meeting of the International Energy Agency of 21 oil-consuming industrialized nations concluded that current world oil supplies and expected production increases by countries such as Saudi Arabia and Venezuela were sufficient to offset losses from the embargo of Iraqi and Kuwaiti exports.

Venezeula said, however, that it would not raise its output without the approval of the 13-nation Organization of Petroleum Exporting Countries.

"We're not in a crisis situation," said U.S. Assistant Energy Secretary John Easton following the IEA meeting. "Practically all the countries reporting felt that stocks around the world and in their countries were adequate to meet the present situation."

In Washington, White House spokesman Marlin Fitzwater said there was "no intention" at this time for the United States to draw from its Strategic Petroleum Reserve containing nearly 600 million barrels of crude.

#90221u1936 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - The government, in one of its most significant reports of the year, forecast Thursday a bumper corn crop of 7.85 billion bushels, up a strong four percent from last year, and a soybean crop of 1.84 billion bushels, down four percent.

The Agriculture Department also raised its estimate of the wheat crop to 2.7 billion bushels, an increase of seven million bushels from July's forecast that would make the harvest 33 percent larger than last year. It would be the third largest wheat crop ever, including a record 543 million bushels of spring wheat.

Corn, wheat and soybeans, the three major U.S. field crops, are the basis for much of the food consumed by Americans. Corn and soybeans are used in beef, pork, poultry and dairy production and also have food uses of their own. Wheat is used primarily for bread, rolls, pastries and other bakery products.

The August crop report contained the first official government estimates of the corn, soybean, sorghum, rice and cotton crops. The crops were worth $34 billion last year and represented 44 percent of all crop production.

But the bountiful crops were unlikely to have a direct impact on consumer food prices, an analyst said, because of the time needed to process the crops and the relatively small role crop prices play in food prices.

Food prices rose an unusually sharp 5.8 percent during 1989. An increase of three percent to five percent initially was forecast for this year, but sustained high meat prices were expected to force a revision.

Market prices for wheat were expected to average at least 50 cents a bushel below the price paid for last year's crop, thanks to an abundant crop that will allow some rebuilding of drought-depleted reserves. Soybean and corn prices were expected to hold steady or rise. Demand was forecast to exceed U.S. production, keeping supplies tight.

At 7.85 billion bushels, the corn crop would average 117.7 bushels an acre, compared to 116.2 last year. For the second year in a row, Iowa was tabbed as the No. 1 corn state with a likely crop of 1.57 billion bushels.

Soybean growers were projected to average 32.5 bushels an acre, compared to the 32.4 bushels harvested in last year's total crop of 1.93 billion bushels. Illinois, for the second year, was projected to lead the nation with a crop of 327.6 million bushels. The sorghum crop was forecast at 546.8 million bushels, down 11 percent from last year.

Soybean acreage is down five percent this year to 57.7 million acres. Corn acreage is up three percent to 74.4 million. At 77.3 million acres, wheat acreage is up one percent.

A wet spring delayed planting in the central states. Crops generally are in mostly good to fair condition nationwide, but development is lagging behind the normal rate in the Midwest, the heart of the corn and soybean crop.

"Late plantings in the Corn Belt have been offset by excellent growing conditions during July," the government said. "Dry conditions in the Southeastern states have reduced yields in most areas from the record levels of 1989."

#90221u1943 08/09/1990 ~United Press International

WARSAW, POLAND (AUG. 9) UPI - President Wojciech Jaruzelski will visit the United States in October at the invitation of President George Bush,

Jaruzelski's office said Thursday.

Spokesman Wlodzimierz Lozinski said the White House tentatively set the date of the visit for Oct. 11, but it may be changed because of the international situation caused by the Iraqi attack of Kuwait.

Rumors have been circulating in the capital that Jaruzelski might resign in September under growing social pressure. The planned U.S. visit has been seen as a denial of the rumors.

The Center Alliance, the political group pushing Solidarity founder Lech Walesa to run for president this fall, has urged Jaruzelski to step down and call early elections.

Democratic Action, which reflects the views of Prime Minister Tadeusz Mazowiecki has also called on Jaruzelski to resign, as have 100 members of Parliament who accuse him of hampering reforms and of being the last represenative of the former communist regime.

Jaruzelkski has not hidden his sympathy for communism.

He laid a wreath on the Tomb of the Unknown Soldier on July 22, which marks the installation of the communist regime by Moscow in 1944.

Lozinski said that former U.S. ambassador John Davis passed on Bush' invitation to Jaruzelski in mid-July.

He said Jaruzelski will stay in Washington for one day and than will travel to New York and to one midwestern state.

#90221u2050 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - British Petroleum Co. reported Thursday second-quarter earnings fell 21 percent from a year ago as a result of lower crude prices and a drop in chemicals profits.

The London-based company said second-quarter earnings declined to $478 million, or $1.07 an American Depositary Receipt, from $604 million, or $1.38 an ADR, in 1989's quarter.

ADRs are certificates issued by U.S. banks to ease trading in foreign securities and in converting them into foreign currencies.

Quarterly revenues rose to $12.2 billion from $12.0 billion in the 1989 period, the company said.

A drop in crude prices combined with a ''substantial'' decline in BP's chemicals results to lower overall income, the company said.

North Sea Brent crude prices averaged $15.95 a barrel during the quarter, considerably less than the $18.79 average of a year ago, according to BP.

Consequently, BP's earnings from exploration and production dropped to $479 million in the latest quarter from $638 million in the 1989 period. Chemicals experienced a bigger drop, to $65 million from $305 million.

BP said first-half earnings slipped 15.3 percent to $1.07 billion, or $2.42 an ADR, on revenues of $25.5 billion from 1989's $1.27 billion, or $2.72 an ADR, on revenues of $23.4 billion.

#90221u2086 08/09/1990 ~United Press International

(AUG. 9) UPI - The White House says it's ''very satisfied'' with events in the Middle East in the past 24 hours. U-S troops are pouring into Saudi Arabia for the second straight day as Iraqi troops dig into newly annexed Kuwait.

Massachusetts Governor Michael Dukakis says he supports the actions of President Bush in the Middle East... but he called on his 1988 election

opponent to protect consumers from soaring energy prices. Dukakis said the government must do more than urge ''restraint'' by oil companies.

The International Energy Agency says global oil supplies and expected production increases will be enough to make up for the embargo against Iraqi and Kuwaiti oil. The 21-nation agency says there is NO need for it to draw on its oil reserves.

The White House says President Bush will protect troops stationed in Saudi Arabia against budget cuts that could occur on October 1st. White House spokesman Marlin Fitzwater admits, however, that the Persian Gulf crisis has forced the administration to re-assess its budget policy.

President Bush plans NOT to let the confrontation in the Persian Gulf spoil his vacation. Bush intends to leave the White House as scheduled tomorrow for three weeks in Kennebunkport, Maine.

Louisiana legislators today voted against convening a special session to try to over-ride Governor Buddy Roemer's veto of a tough anti-abortion law. The refusal could deal the death blow to the controversial measure.

South African police report that four days of riots and looting in the mixed-race townships of Port Elizabeth have left at least 32 people dead. They also say they are investigating why an officer shot and killed an infant during riots yesterday.

Israel successfully launched an Arrow missile today in the first test flight of the weapon. Israel Radio reports that the Arrow is being developed as a defense against short- and medium-range missiles like those in Iraqi armories.

#90221u2087 08/09/1990 ~United Press International

AUSTIN, TX (AUG. 9) UPI - If utilities in the Midwest and Northeast began using Texas' immense supplies of natural gas, daily oil imports from the Middle East could be cut by 160,000 barrels almost immediately, a member of the Texas Railroad Commission said Thursday.

Commissioner John Sharp outlined a four-point plan that will be presented to President Bush to ease the fuel-oil crisis now and in the future by using domestic natural gas supplies. The plan could immediately replace almost one-fourth of the nation's oil imports from Iraq and Kuwait, he said.

''While everyone else seems to be looking to other Arab nations to supply our national thirst for fuel oil, we believe the answer is literally under our noses - Texas natural gas,'' Sharp said at a Capitol news conference.

Texas produces about 6 trillion cubic feet of gas each year, about one-third of the nation's total supply, but huge reserves remain unused because of the reliance on imported oil.

The Railroad Commission, which regulates oil and gas production in Texas, has determined that the state has excess natural gas supplies of 1 billion cubic feet per day. Sharp said some of that gas could be used to replace fuel oil, cutting the nation's reliance on oil from the troubled Middle East.

Sharp said Kenneth Lay, a close friend of President Bush and chairman of Enron Corp., one of the nation's largest natural gas producers, is in Washington to present the White House and Administration officials with the Texas' plan for a natural gas switch-over.

The first part of the plan calls for the president to urge electric utility and industrial facilities that can switch to fuel oil to begin burning natural gas immediately. To make the switch, a facility must have dual-fuel capability and the pipeline capacity to transport gas.

''We have identified a number of facilities in the Northeast and Midwest that are now burning some 160,000 barrels per day of fuel oil, and they could make the switch tomorrow,'' Sharp said.

He added that the current average price for natural gas - $1.25 per million cubic fee - makes it ecomomically competitive with the price of crude oil, and that natural gas will be even more competitive as oil prices rise.

The three remaining parts of the plan focus on ways to avoid a future crisis. It calls for:

-Congress to give the president the authority to require fuel-switching to natural gas where it is possible in times of national emergency.

-The Federal Energy Regulatory Commission, FERC, to expedite applications for new pipeline projects, some of which have been delayed for years in a tangle of bureaucratic red tap.

California and Florida, for example, have dual-fuel plants that now burn 180,000 barrels of fuel oil each day. These facilities could switch to natural gas but do not have the pipeline capacity to bring it it.

-Reinstatement of non-conventional fuels tax credit for tight sands gas, providing gas producers with the economic incentive to drill in high-cost, hard-to-get gas formations.

Sharp said he believed the plan is necessary because of the volatile situation in the Middle East and the fact the United States now imports more than half of its oil.

If (Iraqi President) Saddam Hussein were to take over the Saudi oil industry, he would control 45 percent of the world's crude oil proved reserves and nearly 20 percent of world oil production,'' Sharp said. ''Obviously, this would destroy the economies of Western nations and imperil our own national security.''

Domestic natural gas supplies, on the other hand, will never have to be defended by expensive military action, and natural gas customers are largely removed from the sudden price shocks that accompany oil supply interruptions, he said.

WASHINGTON (AUG. 10) UPI - American Express Bank Ltd. has agreed to provide credit facilities totaling $90 million to Vetco Gray Inc., which is undertaking a major recapitalization, according to documents filed Thursday with the Securities and Exchange Commission.

American Express said in an Aug. 1 letter to Vetco Gray, included in the SEC filing, that its Singapore branch will syndicate the loan among a number of banks.

American Express' commitment to obtain the funding expires Oct. 31.

According to the American Express letter, the $90 million will include a short-term multi-currency overdraft and/or revolving-credit facility, which will be used to finance Vetco Gray's short-term borrowing requirements.

Another $30 million will be for the issuance of bid, performance, advance payment and other guarantees, and the final $40 million will be a term loan with multi-currency options.

The loan conditions state that a Vetco Gray initial public offering, to be underwritten by Lehman Bros. and Saloman Brothers Inc., must yield a net of at least $128 million, and Vetco Gray must also reduce its present term bank debt to $55 million.

Under the planned recapitalization, Vetco Gray has authorized a reverse stock split and plans to acquire from a single stockholder all of its outstanding Series A preferred stock for $96 million.

In addition, the company will purchase 1.59 million shares of common stock

from certain shareholders for $25 million.

Funds from the public stock offering, in which 9 million shares of common stock will be offered for $17 to $19 a share, will be used to repay existing debt.

Vetco Gray, based in Houston, designs and manufactures equipment used in offshore exploration and production by the oil and natural gas industry.

#90221u2124 08/09/1990 ~United Press International

BIRMINGHAM, AL (AUG. 9) UPI - Bobby Wadkins, who in his 17th year as a professional golfer still seeks his first American tournament triumph, escaped the terrors of Shoal Creek with a 4-under 68 Thursday to take a two-shot lead late in the first round of the PGA Championship.

Wadkins, who has labored in the shadow of his far more successful brother Lanny, birdied three of the last four holes while many of the game's big names saw the hard greens and high rough ruin their chances in the final major golf event of the year.

The only players left on the course with a chance to challenge Wadkins for the first-day lead were Fred Couples, who was 3-under through 16, and Mark O'Meara, who was 3-under through 12.

With howls of protests rising from players who struggled with the conditions at Shoal Creek, Wadkins duplicated his first-round effort at the 1987 PGA - when his opening day 68 gave him the lead. He eventually tied for seventh with a final-day 77.

Such has been typical for Wadkins, who often has led early in tournaments but whose best efforts on the PGA Tour have been a pair of second-place finishes.

Among those who had finished Thursday, Wadkins had a two-shot lead over Scott Verplank and Billy Mayfair, two of the world's best amateur golfers during the 1980s who still are trying to make their mark in the pro ranks.

Another shot back at 1-under 71 were Nick Faldo, Payne Stewart, Steve Pate Mike Reid, Brian Tennyson, Chip Beck and Tim Simpson.

Faldo, trying to become the second player in history to win three major professional championships in the same year, turned a potential high score into a 1-under total and admitted he had escaped potential disaster in his bid for his first PGA crown.

''I was struggling a little for a while,'' said Faldo, who won this year's

Masters and British Open and who missed getting into a playoff for the U.S. Open when his 15-foot putt at the 72nd hole lipped out. ''I'll just play as good as I can the rest of the week. It's as simple as that.''

Wayne Grady and former PGA champs Hal Sutton and Bob Tway were among those at even-par 72.

Some familiar names, however, had a disastrous day at Shoal Creek. Two-time U.S. Open champion Curtis Strange shot 79, as did all-time leading money-winner Tom Kite. Current U.S. Open title-holder Hale Irwin had a 77, course-designer Jack Nicklaus 78 and Arnold Palmer, after starting with two birdies on the opening three holes, slumped to an 81.

And although Simpson with his 71 survived many of the problems that brought down Strange, Kite and many others, he lambasted the way the PGA had set up the course.

''I don't want you to take it as whining,'' Simpson said. ''But if you go into that locker room you are going to hear some powerful complaining in there.

''The greens are much too firm. Great golf courses don't need gimmicks. All they have to do is water the greens thoroughly and they will be fine. There are some pretty high players telling them to change things.

''I don't mind the rough. If you hit it where you should hit it, then you should be rewarded.''

Although several players were able to make small dents in Shoal Creek's par of 72, the long, gnarly rough eventually exacted its toll on the majority.

''It's the hardest course I've ever played,'' said Mayfair, the 1987 U.S. Amateur champion who is in his second year as a professional. ''There are no trick shots out there. What you see is what you get. It's fair, but it's very hard.''

''The rough is very severe,'' added Faldo. ''I don't think the public wants to see the best players in the world just chop the ball out of the rough. Every shot is demanding.''

Mayfair birdied the first two holes, gave one back at the difficult fourth when he drove into the rough and traded a birdie at the par-5 sixth for a bogey at the par-4 ninth when he again found the rough.

His lone birdie on the back nine came at the par-4 14th when he hit a pitching wedge to within six feet.

''The greens were much faster today than they were in the practice rounds '' Mayfair said. ''And I sure wouldn't want to play in rough like this every week. But for a major championship I don't see anything wrong with it.''

Verplank after five years on the tour is still trying to fulfill the promise of his outstanding amateur days. He got to as low as 5-under through 14 holes but he bogeyed the par-4 15th and had to make a 20-foot putt just to salvage a double bogey at the par-5 17th.

''You hit one bad shot and that's that,'' said Verplank, who in 1985 became the first amateur in 31 years to win a PGA Tour event. ''I hit it so far into the trees at the 17th that I couldn't do a thing. I couldn't even get back to the fairway with my first shot. I was lucky to make a double bogey.''

#90221u2140 08/09/1990 ~United Press International

HONOLULU (AUG. 9) UPI - A federal judge, saying he did not want to upset U.S.-West German relations, refused Thursday to block the transfer of chemical weapons from West Germany to tiny Johnston Island for incineration.

U.S. District Judge David Ezra denied the request for a temporary restraining order sought by Greenpeace USA and two native Hawaiian organizations, but set Aug. 20 as the date for a hearing on a preliminary injunction.

The groups - as well as some Pacific nations - said the weapon shipments pose a threat to the Pacific environment, and argue there are safer ways to dispose of the agents.

Government attorneys maintain that Johnston, a tiny atoll some 700 miles southwest of Hawaii, is the safest place for the weapons and that everything possible has been done to make the transfer safe.

The Johnston Atoll Chemical Agent Disposal System, or JACADS, began test operations on the U.S. possession last month, successfully incinerating a batch of chemical weapons, authorities said. The island is inhabitated only by military personnel.

In denying the request, Ezra noted that President Bush had promised West German Chancellor Helmut Kohl the chemical munitions would be removed from German soil by the end of the year and Congress had agreed the weapons should be destroyed.

He also noted that West German courts had rejected a challenge by some

German citizens to movement of the weapons.

''We must not forget that the presence of these weapons on German soil for many years was at the sufferance of the German people,'' Ezra said in his oral ruling.

Now, Ezra said, West Germany had decided ''that the risks of movement are tolerable and justified to meet the greater goal of removal of these weapons from their soil.''

Ezra also said that overturning the decision to move the weapons would send ''conflicting signals'' to the German government and people. He said ''events unfolding in the Middle East'' had demonstrated the importance of maintaining commitments made between states.

It would be ''irresponsible and dangerous'' to frustrate the commitment made by the president ''except in the most extreme circumstances,'' Ezra said.

The judge also said he was not convinced that the National Environmental Policy Act applies to the movement of the weapons within Germany, although he said it definitely applied once they reach the island.

He noted that stopping the movement of the chemical munitions now that they are located in multiple locations in Germany poses its own dangers. The weapons are to be shipped from Germany between Sept. 1 and 30, he said.

Ezra said the plaintiffs had expressed generalized fears of catastrophe but had not cited specific dangers posed by the movement of the weapons.

The judge said the only way to address the dangers of moving the weapons would be to destroy the chemical weapons where they are, and he said the German government has said that would be unacceptable.

Greenpeace attorney Skip Spaulding said he remained convinced the Army has broken the law and hoped to succeed in getting a preliminary injunction.

Spaulding said it was difficult to cite specific possible threats because the Army has kept much material secret. The plaintiffs expect to be able to find out more through the discovery process before the next hearing, he said.

#90221u2188 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - President Bush signed a bill Thursday raising the debt limit from $3.122 trillion to $3.195 trillion through Oct. 2 to permit the Treasury Department to continue issuing securities.

The president had asked for an increase of the debt to $3.444 trillion to permit the government to meet its obligations through June 30, l991, but went along with the short term boost approved by Congress.

The debt ceiling was raised after treasury officials said the government would have to default on its obligations after Aug. 15 in the absence of an increase.

Bush also singed into law legislation temporarily extending the Defense Production Act.

The one month extension to Sept. 10 was passed to keep the law in effect after Aug. 10, thus permitting more time to consider amendments and to pass a permanent reauthorization.

The Act authorizes management of the national defense industrial base in peacetime and prepares for industrial mobilization in event of a national emergency.

#90221u2201 08/09/1990 ~United Press International

NEW YORK (AUG. 9) UPI - The success rate for economic sanctions like the embargo the United Nations imposed on Iraq this week for invading Kuwait has not been very high in the past, economists and analysts said Thursday.

But they noted that Iraq, financially strapped, dependent on revenues from oil exports and heavily reliant on imported foodstuffs, machinery and weapons, could feel the pinch of a tight Western blockade.

Economic and strategic specialists suggested that the Bush administration, to oblige Iraqi President Saddam Hussein to leave Kuwait short of driving him out by force of arms, must garner unprecedented world support.

Yet even total economic isolation and deprivation may not sway Saddam, whose tightly controlled populace endured a devastating war of attrition with Iran and who might stake all to keep Kuwait, his strategic prize.

Several specialists said the cooperation of Arab nations - in particular countries bordering on Iraq - could be crucial. But obtaining this could be problematic given the shifting sands of Arab politics.

''The economic measures will hurt Iraq, especially the loss of oil revenues,'' said Chibli Mallat, a Middle East expert and lecturer on Islamic law with the University of London's School of Oriental and African Studies.

''The question is whether the pain Iraq will suffer because of sanctions can be ... counterbalanced by the acquisition of Kuwait,'' He said. Kuwait not only is rich in oil but provides Iraq better Gulf access.

''As far as the sanctions alone forcing them to pull out of Kuwait, I think no,'' Mallat concluded.

But others said sanctions could make a difference, though U.N. measures did not have much effect on Rhodesia or South Africa when they were ordered, and U.S. sanctions against Iran in the hostage crisis were ineffective.

''It's a pretty impressive list of things that should increase pressure as time goes on,'' said Brookings Institution senior fellor Edward Fried, a White House adviser in the Carter administration. ''Given that Iraq's position is none too strong to begin with, I would think the pressure internally would increase.''

Boding particularly well for the blockade's success was the speed with which the European Community, Japan and other nations, including the Soviet Union, backed it, a ''dividend'' of improved East-West relations.

But Fried, a former deputy assistant secretary of state and National Security Council staff member, said the success of the embargo could depend on whether the Arab nations around Iraq respect or bypass it.

The United Nations resolved this week that all nations should bar imports of Iraqi products - chiefly oil - and cut off all ''economic resources,'' including foodstuffs. Exceptions were medical supplies and humanitarian food shipments to relieve civilian suffering - not shortages.

''I think the food aspect is very important,'' said a U.S. official, who spoke on condition he not be named, ''but it's very early days yet.'' He admitted some nations might interpret the humanitarian clause more broadly.

International economist Nigel Rendell of the James Capel investment bank in London said loss of oil revenues might hurt the Iraqis most.

''They have fairly large supplies of food and raw materials - about six months supplies, according to our estimates,'' he said. But with a foreign debt of up to $80 billion, Iraq will sorely miss accrual of oil dollars.

Iraq has few friends now, but U.S. enemies like Libya, North Korea and others might make a point of helping it, said Charles Perry, director of studies at the Institute for Foreign Policy Analysis in Cambridge, Mass.

''If (Saddam) is able to end-run this by linking up with those few critical contacts,'' Perry said, ''he may be able to outlast us.''

Perry said the U.S. administration had to build a solid coalition of nations to prevent backslipping, as economic pressure could be the only way short of a war to persuade Saddam to seek a face-saving way out of Kuwait.

Only sustained sanctions will faze Saddam, Perry said. ''If they break down in a month, six months from now, we're facing an ineffective embargo.''

As economic pressure mounts, Saddam could find himself threatened by internal dissent, Evgueni Novikov said. The former Arabist with the central committee of the Soviet Communist Party, Novikov defected to the United States and now teaches at the U.S. Naval War College in Newport, R.I.

''They really import a lot,'' he said. ''If the embargo is a total embargo it will be very difficult for them to survive for a long time.''

He discounted the possibility of a popular revolt, having witnessed, on four trips to Baghdad as a Soviet adviser, the efficacy of Saddam's secret police. But the Iraqi officer corps might bridle if they thought Saddam was veering towards war with the West to break the blockade.

''If the military will be involved in the fight with Americans, British (and) French with their professional forces, in this case they will try to overthrow Saddam Hussein as quickly as possible,'' Novikov said. ''They wouldn't love to sacrifice their lives for his ambition to be the new Saladin of the Arab world.''

#90221u2213 08/09/1990 ~United Press International

ST. LOUIS (AUG. 10) UPI - A reorganization plan for Apex Oil Co. gained U.S. Bankruptcy Court confirmation Thursday, clearing the way for Apex to emerge from bankruptcy proceedings that limited company operations for more than two years.

''This is great news,'' said Tony Novelly, president of the Clayton, Mo.-based Apex. ''This allows Apex to keep moving forward.''

The joint plan filed in conjunction with 53 debtor affiliates provides unsecured creditors with a total of up to $60 million in cash and debt securities.

Apex filed for Chapter 11 federal bankruptcy protection from creditors Dec. 24, 1987.

At that time, primary bank lenders began foreclosure proceedings. After the filing, the banks urged the court to liquidate Apex to pay $550 million the banks claimed they were owed, Apex officials said.

The court agreed with Apex that the company should not be liquidated in a distress sale, which would have been for the sole benefit of the bank lenders.

''All of us at Apex knew that our business was viable and worth a great deal more than the amount of the bank lenders' claims,'' Novelly said.

The lenders' secured claims were satisfied in November 1988, when the company sold the refining and retail marketing assets of Clark Oil and Refining Corp.

The purchaser, ADC Acquisition Corp., paid about $1 billion to purchase those assets. The subsidiary of Canada's Horsham Corp. also assumed the banks' secured claims.

The Apex plan of reorganization provides unsecured creditors with a total of up to $60 million in cash and debt securities.

Under the plan, unsecured creditors will receive: up to $20 million in cash; $20 million in seven-year Series A notes secured by $20 million in Apex assets to be sold over the next two years; and $20 million in 10-year Series B secured notes guaranteed by Clark Oil Trading Co., a portion of whose profits will supplement payment of the notes.

Apex, which operated on a profitable basis throughout the Chapter 11 proceedings, will reorganize around its oil trading, oil terminal and shipping operations.

It is anticipated, Apex said, that the confirmed plan will take effect before the end of August, as soon as loan documents are finalized with Apex's post-confirmation lenders.

#90221u2239 08/09/1990 ~United Press International

WASHINGTON (AUG. 9) UPI - President Bush won't permit the biggest U.S. military operation since the Vietnam War to cancel his three-week summer vacation in New England, which is to begin Friday.

''Life goes on. You got to keep moving,'' Bush told reporters Thursday as he left the Oval Office. ''You can't stay in one place all the time.''

The president, joined by family and friends, intends to depart the White House at about noon EDT Friday for a 25-day stay at his seaside estate in

Kennebunkport, Maine.

Press secretary Marlin Fitzwater said Bush never gave serious consideration to canceling or even shortening the annual family gathering. But he said would get daily briefings on the Persian Gulf crisis from a bolstered travel staff.

Fitzwater said Thursday that the briefings ''would probably be'' in the morning and evening. In between, the athletic 66-year-old president is expected to enjoy a daily regimen of jogging, tennis, golf, boating or fishing.

Asked if Bush was concerned about public perception - being shown on the evening news hitting a golf ball while American soldiers try out gas masks - Fitzwater said: ''No.''

''The fact is that the president will be conducting the business of the presidency at Kennebunkport, just as he does every year and every vacation period.''

He said Bush would likely return to Washington one day next week for an update on the U.S. military operation that may eventually have up to 50,000 troops in Saudi Arabia to counter any more Iraqi aggression.

''Our forces are in Saudi Arabia on a defensive basis,'' Fitzwater said. ''They are not involved in conflict, and there's not the need for any kind of minute-by-minute or hour-by-hour update,'' Fitzwater said.

Moreover, he said, ''we believe that the (White House) communications system is excellent for maintaining liaison with anyone in Washington or around the world.''

This is the second time in eight months that Bush will go on vacation during a major military operation.

Last winter, during the U.S. invasion of Panama that involved more than 20,000 Marines, Bush went on an 11-day holiday vacation to Camp David, Md. his adopted home-state of Texas and then to Alabama.

He did interrupt the trips, however, to get a Christmas Eve briefing at the Pentagon, and to visit wounded soldiers at two military hospitals in San Antonio on the morning of New Year's Eve.

''Look, I don't make any cover,'' Bush said during that vacation. ''I'm going to be enjoying myself and I think the American people understand that. I've worked pretty hard all year long.''

''So I'll keep this path and I hope it is correct.''

During his 25-day vacation in Maine, Bush will certainly have some work. Besides monitoring developments in the Persian Gulf, he will continue efforts to reach agreement with Congress on a new deficit-cutting budget.

He also plans to attend a couple of GOP fund-raisers in New England, and make a quick trip to Baltimore to address a convention of the Veterans of Foreign Wars.

But mostly it will be play in his beloved Kennebunkport.

In his 66 years, Bush has failed to visit Kennebunkport just one year. That was during World War II when was overseas as a Navy combat pilot.

The president is to wrap up this vacation and return to Washington on Sept. 3, Labor Day.

#90221u2247 08/09/1990 ~United Press International

(AUG. 9) UPI - Today's decision by the United Nations to nullify Iraq's annexation of Kuwait will NO doubt headline a list of topics Arab leaders will discuss tomorrow at the re-scheduled Cairo emergency summit. The summit was pushed back one day to allow Arab leaders more time to travel to Egypt. The summit will include delegations from both Iraq and Kuwait. The last-ditch diplomatic effort comes as U-S ground and air forces continue to pour into Saudi Arabia to fortify their position to repel a possible Iraqi attack.

U-S intelligence reports say even more Iraqi troops are heading to Kuwait. Pentagon spokesman Pete Williams says the Iraqi military is consolidating its strength in Kuwait by beefing up ground and air forces. He says reports indicate that Iraqi forces are in a defensive position but cautions that they are capable of taking the offensive. He says there has been NO independent confirmation, however, that Iraq is massing troops on its border with Turkey.

France says it plans on immediately reinforcing its naval forces in the Persian Gulf and will send in additional arms and technicians to help defend Saudi Arabia from a possible invaders. The move does NOT necessarily suggest that France will formally join a U-S-led multi-national defense of the region.

A pilot accused of being drunk on the job testified in Minneapolis today that he went into treatment for drinking after the disputed incident in March. Northwest Airlines pilot Norman Prouse said he'd been a heavy drinker ever since his days as a Marine pilot in Vietnam... and he finally admitted it. On trial with two fellow crew members... Prouse admitted to

falling out of his chair while drinking the night before the flight in question.

NEW YORK (AUG. 9) UPI - The Federal Reserve Board said Thursday the basic U.S. money supply, narrowly defined under the name of M1, rose $2.0 billion in the latest reporting week. The broader aggregates M2 and M3 also rose in the period.

M2 increased by $0.3 billion and M3 increased by $0.2 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $809.8 billion in the week ended July 30 from a revised $807.8 billion the week before.

Over the latest 13 weeks, M1 averaged $808.2 billion, a 1.8 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader M2 measure averaged an estimated $3,270.4 billion in the latest week, up from a revised $3,270.1 billion. M2 includes M1, plus passbook savings, small time deposits including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts and institutional money market funds, averaged $4,056.8 billion in the latest week, up from a revised $4,056.6 billion, the Fed said.

#90221u2284 08/09/1990 ~United Press International

KALAMAZOO, MICH. (AUG. 10) UPI - The Kellogg Co. has filed suit against Nabisco Brands Inc., an operating company of RJR Nabisco, accusing it of copying its new bite-sized shredded wheat.

''That Nabisco should wait for 89 years and a competitive challenge from Kellogg before manufacturing its own unsugared, fortified shredded wheat biscuit is itself suspicious,'' the suit filed in U.S. District Court states.

Kellogg claims it has learned that Nabisco set out to copy both the ''features and marketing strategy'' behind Kellogg's new cereal.

Kellogg officials said the company has been preparing since June to put its new Whole Grain Shredded Wheat on the market this month under the claim that it is ''very simply, the most nutritious shredded wheat you can buy.''

A spokesman for Nabisco Brands, however, Thursday dismissed Kellogg's nutritional claim and the lawsuit.

''The Kellogg's suit is totally without merit and in a fact is a reaction to Nabisco's own threat of legal action,'' said Mark Gutsche from Nabisco Brands' New Jersey headquarters. ''Nabisco is absolutely confident that Kellogg's will be stopped from confusing customers that its new cereal is the most nutritious shredded wheat.

The Kellogg cereal purportedly contains 33 percent more dietary fibre, more thiamine, riboflavin, niacin, iron, vitamins B6 and B12, folic acid, magnesium and zinc than the vintage shredded wheat marketed by Nabisco Brands, plus it would contain no sugar or salt.

However, Gutsche claimed that Nabisco's cereal - a fortified shredded wheat cereal - was the most nutritious.

RJR/Nabisco notified Kellogg by fax July 27 that it also had developed a more nutritious shredded wheat with nearly identical nutritional value as the Kellogg product, which would be on the market in mid-August.

Kellogg officials said they had been sending samples and promotional materials to test markets in Buffalo, N.Y., Erie, Pa., northern Montana and all of Oregon and Washington state.

#90221u2287 08/09/1990 ~United Press International

WASHINGTON (AUG. 10) UPI - Regulators Thursday closed First National Bank of Corpus Christi, bringing to 71 the number of bank failures in Texas this year. Nationally, 116 banks have failed so far this year.

The Federal Deposit Insurance Corp. said First National, with assets of $127.9 million, will be taken over by First City, Texas of Corpus Christi bank.

First City will assume $120.8 million in 19,300 deposit accounts of the failed bank and pay the FDIC a purchase premium of $2.5 million. It also will purchase $90 million of the failed bank's assets.

The FDIC will advance $31.9 million to the assuming bank as part of the transaction.

The failed bank's eight offices were slated to reopen Friday as branches of First City and its depositors will automatically become depositors of the new bank, regulators said.

Last year, 133 banks failed in Texas and 206 in the nation.

#90221u2427 08/09/1990 ~United Press International

(AUG. 9) UPI - Hot, dry winds are sweeping flames across Oregon and Idaho in the worst of a rash of fires in the West. Weather officials issued ''red flag warnings'' for sections of those states and parts of California Idaho, Wyoming and Montana. Forecasts call for more dry lightning strikes and low humidity levels, which make for prime fire conditions. More firefighters are heading for Burns, Oregon, where a blaze is closing in.

Attorneys working on behalf of a 12-year-old Illinois boy stricken with leukemia took their court battle to the state's Supreme Court today in an attempt to force his twin half-brothers to undergo a test for a possible bone-marrow transplant. The mother of the twins has refused to let the three-year-olds be tested for the procedure.

Galveston Bay in Texas re-opened for shrimping today almost two weeks after a costly oil spill. But some state officials question whether the clean-up is good enough. The bay was closed to all fishing after a Greek tanker collided with three barges and spilled 700-thousand gallons of crude oil. A shipping assocation in the area says the partly-closed Houston ship channel should be fully re-opened for traffic.

The Consumer Product Safety Commission announced today the recall of 11 different types of electric-current converters and four varieties of toys. The converters are imported from Taiwan under the labels ''Rocket,'' ''Seven Star,'' ''Saiko'' and ''Step Up, Step Down.'' The toys- two

trains, a set of dolls and a motorized mouse- are sold by Missouri's House of Lloyd Incorporated. Consumers are advised to return the items for a full refund.

#90221u2558 08/09/1990 ~United Press International

(AUG. 9) UPI - The Pentagon reports that Iraq is sending in new troops to reinforce the ones already holding Kuwait. About 50-thousand Iraqi troops are said to be on the move, joining the 120-thousand who invaded the country. The Pentagon says the Iraqi troops in Kuwait ''seem to be in defensive posture.'' One Pentagon official says ''They are working to hold on to what they've acquired.''

As Iraqi troops dig in in Kuwait, the Iraqi government announced that it would send a delegation to the emergency Arab League summit in Cairo. That meeting was originally set for today, but was pushed back until tomorrow morning to allow delegates from Yemen and Tunisia to attend. Egyptian President Mubarak is expected to present a proposal that would call for Iraq to withdraw from Kuwait.

The judge in the New York jogger trial told the jury today that it is NOT necessary for a parent to be present when police question a minor. In reply to a question by the jury... Justice Thomas Galligan said police may question a minor as long as they try to notify the parent. The jury is in its first day of deliberating rape and attempted murder charges against three teen-agers for an attack on a woman in Central Park last year.

Peru's new government today freed the exchange rate, lifted price controls and raised the price of gasoline by nearly three-thousand percent. The changes are part of a drastic economic austerity program. Police patrolled with automatic weapons to keep order in the capital, Lima. But four bombs exploded in the Andean city of Ayacucho ... center of a guerrilla rebellion. NO one was reported hurt.

#90221u2772 08/09/1990 ~United Press International

(AUG. 9) UPI - Police in suburban Albany, New York, say one man is dead and another wounded after the two argued about money. Craig Pettinichi fatally shot himself after wounding his boss at the district headquarters of Radio Shack.

A federal judge in Honolulu today refused to impose a temporary restraining order that would have blocked the transfer of chemical weapons from West Germany to a South Pacific island. The matter will be the subject of a preliminary hearing August 20th.

The National Hurricane Center in Miami today predicted that the fifth tropical storm of the season will NOT last through the weekend. Tropical Storm Edouard was located about 105 miles north of the Azores Islands.

Continental Airlines Holdings announced today that Frank Lorenzo will sell most of his investment in the company in an effort to bolster the troubled carrier's image. Lorenzo will step down as the company's chief executive officer and chairman.

Environmentalists today urged the automobile industry to make more fuel efficient cars. A spokesman for the Sierra Club says continued refusal to produce more efficient cars will make the United States vulnerable to-what he called- ''trigger-happy nuts'' such as Iraqi leader Saddam Hussein

Actor Marlon Brando today had harsh words for the lawyer prosecuting his son on a murder charge. After Christian Brando's bail was reduced from 10-Million dollars to two-Million dollars, his father accused the prosecutor of using the case perhaps to advance ''political aspirations.''

-30- 1704

#90221u2908 08/09/1990 ~United Press International

(AUG. 9) UPI - The Pentagon reports that its intelligence sources say Iraq is sending 50-thousand new troops into Kuwait to bolster the 120-thousand troops already there. Pentagon officials say the troops ''seem to be in defensive posture,'' but warn that ''Iraqi troops are still capable of offensive action.'' Other defense sources say the U-S military deployment to Saudi Arabia could eventually grow to 50-thousand troops.

Stock prices in New York and Europe regained their balance today in response to the continuing crisis in the Middle East. Trading volume was moderate in both Europe and New York, but the Dow Jones recorded its second straight 24-point gain, to 27point-91. Stock analysts say the mood of investors remains cautious and watchful, but NO longer is marked by the anxiety immediately following the Iraqi invasion of Kuwait.

A federal judge in Hawaii decided today NOT to issue a temporary restraining order that would have halted the shipment of U-S chemical weapons from West Germany to a Pacific atoll incinerator. U-S District Judge David Ezra said he did NOT want to disrupt U-S-West German relations. He will consider the issue again when he holds a hearing on whether to issue a preliminary injunction August 20th.

The U-S Centers for Disease Control issued some optimistic news about AIDS. The C-D-C says a program begun in 1987 by the National Institute on Drug Abuse appears to be reducing the spread of AIDS. The program recruited former drug abusers to warn present users about the risks of taking intravenous drugs and UNprotected sex.

-30- 1754

#90221u2914 08/09/1990 ~United Press International

(AUG. 9) UPI - The Environmental Protection Agency today ordered an 80 percent cut in the amount of sulfur in diesel fuel during the next three years. The new rule will likely add about two cents a gallon to the cost of the fuel... which is heavily used by trucks, buses and trains. But the E-P-A promises the move will virtually eliminate black diesel smoke... cutting out 90 percent of the particles that can stay in the respiratory system and cause health problems.

President Bush signed a bill today to raise the federal debt limit by 73-BILLION dollars through October 2nd. That allows the Treasury Department to continue issuing securities. The president had asked for a much higher, longer-term increase... but went along with the short-term boost approved by Congress. The White House said Bush would also order U-S troops sent to Saudi Arabia EXEMPT from possible automatic budget cuts.

The Texas Commissioner of Health today ordered Galveston Bay re-opened to shrimping as of midnight tonight... implying a July 28th oil spill is sufficiently cleaned up. But state land and water commissioners questioned whether the clean-up should be strengthened instead. Land Commissioner Garry Mauro called it ''outrageous'' that a team to put oil-eating microbes in the bay was sent home this morning.

Special interest groups had state lawmakers today right where they wanted them. Nearly two-thousand state representatives are gathered in Nashville, Tennesee, for the National Conference of State Legislatures. At their

hotel... lobbyists gave away weinermobile whistles, anti-tax T-shirts and keychains. As Illinois Representative Lee Daniels said... ''If this offends anyone... just think what happens every day in state capitols.''

-30- 1913

#90222b0016 08/10/1990 ~Business Wire

LINCOLN, NEB. (AUG. 10) BUSINESS WIRE - A team of truck drivers based in Lincoln for CF Motor Freight (CF) has set a company record for safe driving excellence by completing a stretch of more than 10 million miles without an accident while moving freight through Nebraska and neighboring states.

The recent milestone represents the collective accident-free driving performance of 183 long-haul drivers who operate out of the company's Lincoln relay terminal. The record was accomplished over a six-month period of driving on highways and in cities throughout Nebraska and the surrounding states, according to Rick Paulus, Lincoln relay terminal manager.

''This is a tremendous safety record for these drivers and for CF Motor Freight,'' Paulus said. ''These Lincoln drivers have demonstrated that they are among the safest transport operators in the country.''

The Lincoln CF Motor Freight drivers broke a record of 7.6 million accident-free miles set recently by a group of the company's drivers in Richfield, Ohio.

The Lincoln operation is part of CF Motor Freight's Kansas City division, which encompasses 26 freight terminals and provides service to Nebraska, Iowa, Missouri and Kansas. The company employs approximately 1,000 people in the operating division and handles 1.5 million pounds of freight per day throughout the region.

Through its freight-flow system of 697 terminals and 22,000 employees, CF Motor Freight serves virtually every business address in the United States and Canada, including Alaska, Hawaii and Puerto Rico. The company is based in Palo Alto, Calif.

#90222b0022 08/10/1990 ~Business Wire

DENVER (AUG. 10) BUSINESS WIRE - United Artists Entertainment Co. (UAE) Friday announced revenue for the quarter ended June 30, 1990, of $355.1 million.

Operating income before depreciation and amortization (cash flow) was $96.7 million.

Interest and additional amortization and depreciation expense relating to the merger with United Cable Television Corp. (UCTC) in 1989 contributed to a net loss of $9.7 million, or 7 cents per share applicable to common shareholders for the second quarter.

For the six-month period ended June 30, 1990, revenue was $689.6 million. Operating income before depreciation and amortization (cash flow) was $186.8 million for the like period, with a net loss of $46.1 million, or 33 cents per share applicable to common shareholders.

On May 25, 1989, United Artists Communications and United Cable Television were merged into a new entity, United Artists Entertainment. The results of operations for UCTC are included in UAE's results from that date forward.

Cable television revenue increased to $184.5 million during the second quarter compared to $107.4 million for the period ended June 30, 1989. Cable operating expenses were $99.4 million during the second quarter, compared with $55.9 million for the like period last year, while cash flow grew from $51.9 million to $85.1 million.

UAE owns or manages 86 cable television systems serving approximately 2.7 million subscribers. The company also owns or manages approximately 2,600 motion picture screens in 609 locations.

UAE common stock is traded on NASDAQ's National Market Trading System under the symbols UAECA and UAECB. Rights to put UAE common stock also trade under the symbol TCOMR and are a security of Tele-Communications Inc. UAE is the largest publicly traded affiliate of TCI.

#90222b0041 08/10/1990 ~Business Wire
SOUTH SAN FRANCISCO, CA (AUG. 10) BUSINESS WIRE - Guy F. Atkinson Company of California (NASDAQ:ATKN) Friday reported second quarter 1990 net income of $1.2 million, or 14 cents per share, on revenue of $258 million.

This compares with a net loss of $20.2 million, or $2.30 per share, on revenue of $205 million for the second quarter of 1989.

For the first six months of 1990, Atkinson reported net income of $1.6 million, or 18 cents per share, on revenue of $447 million, compared with a net loss of $26.5 million, or $3.02 per share, on revenue of $398 million for the six-month period in 1989.

The company's backlog of uncompleted contracts totaled $907 million as of June 30, 1990, compared with $680 million as of June 30, 1989.

''The second quarter marked the return to profitability for our construction operations. Construction profits in the quarter were largely due to the settlement of disputes and resulting cost recoveries which have exceeded management's earlier estimates.

''While overall results from our construction segment are improving, they are not, quite frankly, occurring as rapidly as we would like,'' stated Thomas J. Henderson, chairman and chief executive officer. ''Our

diversified operations continue to be profitable, although at reduced levels when compared to 1989.''

Guy F. Atkinson Company of California is a diversified corporation providing construction and related engineering services worldwide. The company's diversified operations include manufacturing, industrial pipe supply, and oil and gas exploration and development.

WILMINGTON, CALIF. (AUG. 10) BUSINESS WIRE - Vector Aeromotive Corp. (NASDAQ:VCAR(D)) Friday announced the temporary postponement of its 1-1/2 million unit offering, previously filed on June 18, 1990.

The postponement was agreed to mutually by Vector Aeromotive's management and Commonwealth Associates, the company's underwriter. The offering is currently expected to take place some time in late September 1990.

''The decision to postpone the offering was made for several reasons,'' said Gerald A. Wiegert, Vector Aeromotive's chairman and chief executive officer.

''Recent international events have created an environment of volatility and uncertainty in securities markets throughout the world. We believe, as do our investment bankers, that this temporary situation has resulted in the development of a justifiably cautious attitude on the part of all investors.

''At the same time, one of our major market makers recently commenced liquidation, and administration of its client accounts has been assumed by the Securities Investor Protection Corp. (SIPC). We are pleased that Commonwealth Associates remains committed to seeing that this offering is executed on a timely basis, in a manner that is sensitive to market conditions beyond our control,'' said Wiegert.

Vector Aeromotive Corp. is headquartered in Wilmington, near the Port of Los Angeles.

BOULDER, Colo. (AUG. 10) BUSINESS WIRE - EXABYTE Corp. (NASDAQ:EXBT) in its recent 10-Q filing for the second quarter, disclosed that it currently expects third-quarter sales to substantially exceed the sales of $23.9 million for the comparable period of 1989, but to decline from the level of the second quarter of 1990.

Specific factors affecting third-quarter sales include excess inventory at certain customers, seasonal slowness in the European market and a general softening in the computer industry. The company also currently expects that net income for the third quarter of 1990 will be more than that of the comparable period of last year, but less than that of the second quarter.

EXABYTE is not aware of any other reason for the recent weakness in the stock price.

EXABYTE previously reported net income for the quarter ended June 30, 1990 of $8 million, or 38 cents per share. Net income for the comparable period in the previous year was $2.3 million, or 13 cents per share. Second-quarter revenues increased by 151 percent to $46.3 million from $18.5 million for the same period last year.

EXABYTE develops, manufactures and markets high-capacity 8mm cartridge tape subsystems which are used primarily with workstations, network file servers and minicomputers.

SALT LAKE CITY (AUG. 10) BUSINESS WIRE - Research Industries Corp. announced Friday that it has entered into an agreement to acquire the remaining 20 percent of its 80 percent-owned Research Medical Inc. subsidiary.

The boards of directors of both corporations have approved the proposed transaction after obtaining a third party valuation of the medical subsidiary.

Pursuant to a long-standing agreement between Research Industries and its president, Gary L. Crocker, Crocker will exchange his shares in Research Medical Inc. for shares in the parent company. As the company has historically consolidated the financial performance of the subsidiary, the transaction is not expected to have a significant effect on earnings per

share or the consolidated financial statements.

EMERYVILLE, CALIF. (AUG. 10) BUSINESS WIRE - Chiron Corp. (NASDAQ:CHIR) has elected John H. Williford, chairman of Advanced Polymer Systems (APS) to its board of directors, the company announced Friday.

Williford, 60, has been with APS since 1987 and also has served as president. From 1982 to 1987, he was president of CooperVision Inc. Prior to that, he was vice chairman of Cooper Laboratories Inc. and president of its Oral-B division.

Williford also was president of Revlon's healthcare group, and for 14 years was with Richardson-Merrell Inc., where he became group vice president of the Consumer Products Group. He was a member of the boards of directors of both CooperVision and Revlon, and also served on the boards of the Pharmaceutical Manufacturers Association and the Health Industry Manufacturers Association.

''John Williford's knowledge of the healthcare industry will be very valuable to our board,'' said William J. Rutter, chairman. ''In particular, his experience and perspectives on the opthalmic business will be useful as Chiron Opthalmics continues its growth.

''Furthermore, his general experience in building businesses in pharmaceuticals and healthcare will help the strategic planning process for Chiron's development into the 1990s and beyond.''

Chiron Corp., headquartered in Emeryville, applies genetic engineering and other tools of biotechnology to develop products that diagnose, prevent and treat human disease.

Chiron is building a healthcare business to address needs in four markets: diagnostics, vaccines, biopharmaceuticals and opthalmics, through its fully integrated subsidiary, Chiron Opthalmics Inc.

#90222b0071 08/10/1990 ~Business Wire

WOODLAND HILLS, CALIF. (AUG. 10) BUSINESS WIRE - In an order filed Aug. 1 the California Supreme Court denied a petition by Underwriters Reinsurance Co. seeking immediate review of a pretrial ruling by the Los Angeles Superior Court.

In that ruling, the Superior Court declined to decide at this time whether the Liquidator of the Mission Companies has a right to accelerated payment of future incurred-but-not-reported (IBNR) claims. The California Court of Appeal had previously declined to undertake an immediate review of the Superior Court's pretrial ruling.

Counsel for Underwriters disagreed with the description of the trial, appellate, and Supreme Court rulings contained in a statement issued on Thursday, Aug. 9, by the Insurance Commissioner.

Underwriters' attorney, Daniel M. Lewis, observed that the trial court did not reach the merits of Underwriters' motion; rather, Judge Lewin concluded that ''(t)here is no legal basis for the determination of the issue presented at this juncture.''

''It is simply untrue that the appellate court affirmed the Commissioner's right immediately to seek recovery of the present value of future policyholder claims; nor did the Supreme Court uphold such a decision,'' said Lewis.

''All the Supreme Court decided was not to consider whether the Court of Appeal properly declined immediate appellate review of Judge Lewin's ruling. The effect of the decision is only to delay such appellate review on the merits to a later stage of the litigation.''

Attorneys for Underwriters stressed that the Supreme Court rarely grants petitions seeking review of pretrial orders, and the denial of such a petition is not a ruling on the merits of Underwriters' legal position.

The Supreme Court's decision leaves Underwriters free to challenge the Liquidator's demand for accelerated payment of IBNR claims before the trial court. ''Underwriters is not refusing to pay its future obligations; it simply opposes the Liquidator's unprecedented attempt to compel Underwriters to make immediate payment of all future IBNR claims,'' added Lewis.

PORTLAND, Ore. (AUG. 10) BUSINESS WIRE - Softwood lumber production in the western United States hit 23.2 billion board feet in 1989.

That is the third highest year on record, according to the Western Wood Products Association (WWPA), which tallies statistics for the lumber industry operating in the 12-state Western Woods producing region.

The numbers were drawn from WWPA's new 1989 ''Statistical Yearbook of the Western Lumber Industry,'' which furnishes industry performance figures for 1989 and previous years.

The all-time high for western lumber production was 1987's 23.9 billion board feet. Second-highest year came in 1988, with production hitting 23.6 billion board feet.

U.S. imports of Canadian softwoods in 1989 was 13.5 billion board feet, the lowest volume since the 13.2 billion board feet imported in 1984.

LOS ANGELES (AUG. 10) BUSINESS WIRE - Thermador has promoted Bob Woods to director of marketing from his former post as director, product management and training.

''Bob's thorough understanding of the business, his superior sales background and his ability to translate customer needs into innovative Thermador products make him the ideal person for this key position in our sales and marketing division,'' said Cap Hendrix, vice president, sales and marketing.

Woods' promotion to director of marketing took effect July 2, 1990.

Woods' background includes such positions as director of distributor sales for the Thermador product line, export sales manager and senior product manager. Prior to joining Thermador, Woods worked as food and beverage manager at Marriott Hotels.

Woods earned his bachelor of science degree from Northern Arizona University.

Thermador is a leading American manufacturer and marketer of premium built-in kitchen appliances, downdraft ventilating systems, range hoods, food waste disposers and commercial dishwashers.

TEMECULA, CA (AUG. 10) BUSINESS WIRE - Temecula Valley National Bank is now open, with offices in Temecula and Murrieta. On July 16, Temecula Valley National Bank was established, upon purchasing the assets and assuming the liabilities of Escondido National

Bank's Temecula office. On that date, there were $17.6 million in loans and $26.9 million in deposits. Former customers of the Escondido National Bank Temecula office are now customers of Temecula Valley National Bank.

Temecula Valley National Bank joins Escondido National Bank and San Marcos National Bank as a member of the ENB Holding Co. group of local independent banks in key communities in San Diego and Riverside counties.

President of the new bank is Larry Hancock, formerly regional vice president of the Temecula office of Escondido National Bank. Joan Sparkman is senior vice president in charge of business development, and Brenda Woeckener is vice president/cashier.

Vice president and manager of the Temecula office is Denette Stewart, and Richard Villalobos is operations officer. Shirley Fleming is assistant vice president/branch manager of the Murrieta office. Peter Pizzuto is operations supervisor.

In addition to Hancock, local area members of the board of directors are chairman John Hoffee, president and chief executive officer of Professional Hospital Supply Co.; Peter Rosen, attorney, Rosen & Flemming; and Larry Markham, president and chief executive officer of Markham & Associates, a land-use consulting and civil engineering firm.

Other directors are Harvey Mitchell, president and chief executive officer of ENB Holding Co. and Escondido National Bank; Michael Wexler, chairman of the board of Escondido National Bank, director of ENB Holding Co. and vice president of Pine Tree Lumber Co. Inc.; Bryn B. Evans, chairman of the board of San Marcos National Bank and director of ENB Holding Co.; and Mark Baker, director of ENB Holding Co. and Escondido National Bank and executive vice president of Baker Electric Inc., Escondido.

"Temecula Valley National Bank was founded to meet the growing needs of businesses and residents in Temecula Valley," Hancock said. "As a local bank, we are able to offer faster response and a higher level of service than large branch banks with headquarters elsewhere."

Hancock also pointed out that checking and savings deposits will be invested back into the community in the form of business, personal and real estate loans to help the local economy.

LOS ANGELES (AUG. 10) BUSINESS WIRE - Thermador has promoted Rose Dickson to product manager.

In addition to retaining her current marketing services responsibilities, Dickson will assume line product management responsibilities.

''Rose's thorough understanding of Thermador marketing objectives and awareness of Thermador customer needs will enable her to handle the dual role effectively and will fulfill a vital role on our sales and marketing team,'' said Cap Hendrix, vice president, sales and marketing.

Dickson's promotion to product manager took effect July 2, 1990.

Dickson's background includes several key positions in media planning and account management with such prominent advertising agencies as Benton and Bowles, W.B. Doner and Ruud & Partners.

Dickson earned her bachelor of arts degree from California State University, Fullerton.

Thermador is a leading American manufacturer and marketer of premium built-in kitchen appliances, downdraft ventilating systems, range hoods, food waste disposers and commercial dishwashers.

BIRMINGHAM, AL (AUG. 10) BUSINESS WIRE - John W. Woods, chairman and chief executive officer of AmSouth Bancorporation and AmSouth Bank N.A., announced Friday that Dan L. Hendley will resign as president and chief operating officer of AmSouth Bank N.A. and vice chairman of AmSouth Bancorporation to pursue other business interests.

''We accept Mr. Hendley's notice of resignation with regret and wish him every sucess as he implements his decision to apply his considerable talens in other areas of finance and management,'' Woods said.

''Day has contributed significantly to AmSouth's success and growth since joining our company in 1973, and our company will continue to benefit in the years to come from his many accomplishments,'' Woods added.

In explaining his reasons for resigning, Hendley said, ''I am 52 years old and have worked for AmSouth since 1973. For some time I have had a desire to do something different in the general area of finance and management. I personally feel that it would not be proper to pursue other career opportunities while still working for AmSouth, and so I am resigning.

''I have thoroughly enjoyed my association over the years with AmSouth employees and customers. AmSouth is a great bank,'' Hendley said.

While Hendley initially joined AmSouth Bancorporation, he was elected in 1976 to serve concurrently as an executive vice president of AmSouth Bank N.S. and AmSouth Bancorporation. He has served as vice chairman of the board of the holding company since 1979 and was elected president and chief operating officer of AmSouth Bank N.A. in 1983

With assets of approximately $8.5 billion, AmSouth Bancorporation is the largest banking institution headquartered in the mid-south region consisting of Alabama, Northwest Florida, Tennessee and Mississippi.

AmSouth operates 155 banking offices throughout Alabama and 21 in Northwest Florida. In addition, AmSouth Mortgage Co. Inc. operates 15 offices throughout the Southeast.

#90222b0123 08/10/1990 ~Business Wire

REDONDO BEACH, CA. (AUG. 10) BUSINESS WIRE - TRW Inc. is sponsoring an Earthwatch team of teachers and a company scientist who will join U.S. and Soviet scientists next week on Russia's Caspian Sea to assess the dramatic implications of rapid sea level rise.

The expedition is part of an effort to involve people in the company and people in the communities where it has operations in constructive environmental initiatives. The team leaves for Moscow on Sunday.

The TRW contingent for the three-week expedition includes Dr. David Hinkley, a TRW program development manager from Palos Verdes, Calif., who is involved in exploratory studies for TRW's Applied Technology Division in Redondo Beach, and is a participant in TRW programs supporting the Global Change Initiatives.

The three educators are Don Cammiso, a science specialist with the Fairfax County, Va., Public Schools; Roxie Esterle, science department chairman at Heschel Middle School in Northridge, Calif.; and David Weaner, a physics teacher from Westerville North High School in Columbus, Ohio.

Hinkley will be a part of the expedition's core scientific team that hopes to establish both the first timed series of coastal response to catastrophic sea level rise and the world's only field-based model of coastal sea level rise variations over the next century.

''These 'ground truth' measurements can help calibrate space-based observations of sea level rises,'' says Hinkley, who believes the Caspian measurements can be correlated with certain satellites to observe such impacts as stress on agricultural areas and changes in wetlands.

The accelerated fluctuation in worldwide water levels due to global warming is a well-known forecast these days, and predictions of temperature rises paint a tragic environmental picture.

The Caspian Sea provides an ideal setting for experiments on rising water levels since it has risen 1.5 meters (about 5 feet) between 1978 and 1990. Some scientists predict global oceans may rise just as much in the next 60 years because of global warming.

Earthwatch, an international non-profit organization dedicated to sustaining the world's environment, has been bringing teachers, scientists artists, students and others together since 1971 in ventures aimed at documenting and understanding a changing world.

While many TRW employees have volunteered for expeditions in the past, participating at their own expense, by funding the three teachers' and Hinkley's expenses for this expedition, the company is now officially a part of the Earthwatch effort.

TRW was brought into the Earthwatch fold at the urging of employee Barbara Ackerman, a product line manager for NASA programs. A veteran volunteer of seven Earthwatch expeditions, she is a representative for the organization. TRW and Earthwatch are now developing a relationship that could lead to other cooperative programs.

''Expeditions can furnish hard data for Mission to Planet Earth programs and other environmental uses. It's an important and enlightening venture '' says Ackerman, who pursued and paid for her own Earthwatch excursions.

TRW's involvement in the Caspian Sea expedition is opportune, according to Dale Van Natta, director of civic and community relations for the company's Space & Defense Sector. ''By sponsoring teachers, we're sustaining our commitment to education,'' he says, ''and by sending one of our technical staff, we're reinforcing our commitment to environmental research.''

Cleveland-based TRW is an international company that provides high-technology products and services to the space and defense, automotive and information systems markets. The company's 1989 sales totaled more than $7 billion.

LOS ANGELES (AUG. 10) BUSINESS WIRE - Zero Corp. (NYSE/PSE:ZRO) Friday announced that it has sold the ground support equipment portion of its Air Cargo business.

According to Wilford D. Godbold Jr., president and chief executive officer: ''We have been in the process of evaluating our product lines and determined that the ground support portion of our Air Cargo business has not met our expected profitability requirements. The ground support equipment business accounted for approximately 3 percent of our revenues for the twelve months ended June 30, 1990.

''Sale of the ground support equipment will permit our Air Cargo management to focus on its core business of providing enclosures and accessories to the airline/airfreight markets. We are pleased with the progress shown in Air Cargo's core business during the past six months.''

Zero is a leading supplier of cases, cabinets and cooling equipment supplied primarily to the electronics industry and of cargo enclosures for airborne cargo and baggage. Its consumer, industrial and commercial cases are marketed under the Zero Halliburton and Anvil names.

SAN DIMAS, CA (AUG. 10) BUSINESS WIRE - Southern California Water Co. (OTC:SWTR) reported second-quarter earnings at 56 cents per common share, compared with 50 cents per common share for the same period in 1989.

Earnings for the twelve months ended June 30, 1990, were $3.08 compared with $1.90 last year.

Operating revenue for the quarter decreased slightly to $21,477,000 compared with $21,939,000 for the same period in 1989, reflecting the loss due to condemnation in June 1989 of one water district, the effects of which are partially offset by increases in sales volumes and rate increases in the remaining districts.

A dividend of 53 cents per share, payable Sept. 1 to shareholders of

record on Aug. 6, was declared at the latest meeting of the board of directors.

#90222b0159 08/10/1990 ~Business Wire

NORTH CANTON, OH (AUG. 10) BUSINESS WIRE - Belden & Blake Energy Co., a publicly traded master limited partnership (AMEX:BBE), today announced results for the second quarter and six months ended June 30, 1990.

For the quarter and six months ended June 30, 1990, Belden & Blake Energy Co. (BBEC) recognized net income of $51,289 and $130,346, respectively, compared to a net loss of $168,899 and $321,701 (before the cumulative effect of a change in accounting principle) for the comparable periods in 1989. The $220,188 increase in net income for the quarter was due primarily to $251,000 of net transportation income resulting from the company's acquisition of a 75 percent ownership interest in certain gas pipelines in August, 1989.

The company reported that working capital from operations (net income or loss plus depreciation, depletion and amortization less the cumulative effect of a change in accounting principle) for the second quarter increased 13 percent to $699,302, or 13 cents per unit, compared with $619,152, or 12 cents per unit during the second quarter of 1989.

Working capital from operations for the first six months of 1990 totaled $1,381,569, or 25 cents per unit. This compares to working capital from operations of $1,126,318, or 22 cents per unit in 1989.

During the second quarter of 1990, oil volumes decreased 40,946 barrels to 63,739 barrels and volumes of natural gas decreased 32,150 thousand cubic feet (Mcf) to 403,700 Mcf compared to the same period in 1989. These volume declines are the direct result of the disposition of certain marginal producing oil and gas properties in the fourth quarter of 1989 and the first quarter of 1990.

The average price paid for the company's crude oil before inventory write downs was $17.76 compared to an average price of $18.46 in the second quarter of 1989. The average price paid for the company's natural gas in the second quarter remained the same as the second quarter of 1989 or $2.13 per Mcf.

Belden & Blake Energy Co. declared a quarterly cash distribution of 5 cents per unit for the second quarter of 1990. The distribution was paid on July 20, 1990, to unitholders of record on June 29, 1990. The company

also announced that it has completed the acquisition of all of the assets of 15 Enterprise Energy limited partnerships in exchange for 586,727 BBE units. In aggregate, the company acquired the majority interest in approximately 196 wells located in southern Ohio. These wells are estimated to have remaining proved natural gas reserves of 2.8 billion cubic feet (Bcf) and oil reserves of 83,000 barrels.

Belden & Blake Energy Co. is engaged in exploration, development, production and marketing of oil and natural gas in the Appalachian Basin.

STANTON, CALIF. (AUG. 10) BUSINESS WIRE - FTG Data Systems on Friday announced a new light pen product, OS/2 PXL Support Software.

This software includes a pair of drivers that enable FTG's Precision Series Light Pen products to support OS/2 Versions 1.1 and 1.2. OS/2 PXL Support Software is being shown in the FTG booth at the Windows Conference and Exhibition, Aug. 16-17, at the World Trade Center in Boston.

''Both OS/2 and Windows are easy to use with an absolute pointing device like a light pen,'' according to Doug Lippincott, president of FTG Data Systems. ''Supporting OS/2 was a logical extension of the technology we developed for our Microsoft Windows drivers.''

OS/2 PXL Support Software sells for $49 and functions with FTG's light pen interface boards. The PXL-380 Light Pen Interface Board (for ISA bus computers) sells for $189, and the PXL-480 Light Pen Interface Board (for Micro Channel computers) sells for $179. Both are backed with a five-year limited warranty.

A Graphical User Interface, such as OS/2, often becomes friendlier with a light pen as a pointing device. A light pen takes up no desk space and provides the benefit of being able to manipulate graphical applications quickly and easily.

FTG Data Systems develops, manufactures and markets light pen products and graphics terminal emulation software for IBM and compatible personal computers. The company is located a 10801 Dale St., Stanton, CA 90680. Telephone: 714/995-3900, 800/962-3900; FAX: 714/995-3989.

#90222b0178 08/10/1990 ~Business Wire

BURBANK, Calif. (AUG. 10) BUSINESS WIRE - Lisa M. Hansen has been appointed president of the newly-formed CineTel Pictures, a production operation charged with producing up to eight medium-budget motion pictures a year, it was announced by Paul Hertzberg, president and chief executive officer of CineTel Films Inc., the affiliate company that will distribute the films internationally.

New Line Cinema, in a long-standing agreement with CineTel, will continue to release the features domestically.

With this new position, Hansen will be responsible for the day-to-day operation of the development, production and post-production divisions of the new company. As one of the few women decision-makers in the motion picture industry, it is her intention to create an atmosphere of creative freedom for quality films that will induce filmakers and/or actors with projects to CineTel Pictures.

''We want to be an alternative to the majors,'' notes Hansen, who is also the executive vice president of CineTel Films Inc. ''We want to be a strong, viable production operation that is attractive to talent for a number of different reasons: artistic autonomy, no bureaucratic hassles and the opportunity to reap the financial benefits of a picture when it becomes successful.''

It is Hansen's goal to work with a variety of creative talent who may not have necessarily thought of working with an independent film company previously -- an objective she has strived for since joining CineTel almost a decade ago.

In the last few years alone, Hansen has produced or executive produced more than a dozen of CineTel's in-house film productions, including the forthcoming ''Too Much Sun,'' written and directed by Robert Downey Sr., and starring Robert Downey Jr., Jim Haynie, Eric Idle, Ralph Macchio, Andrea Martin, Leo Rossi and Howard Duff; ''Fast Getaway,'' starring Corey Haim, Cynthia Rothrock, Leo Rossi and Marcia Strassman; and ''Masters of Menace,'' starring David Rasche and Catherine Bach.

Among her other recent producing accomplishments are ''Relentless,'' ''Far Out Man,'' ''976-EVIL,'' ''Hit List,'' ''Bulletproof,'' ''Armed Response '' ''Cold Steel,'' ''Fear'' and ''Tripwire.''

Now in various stages of preproduction or development at CineTel Pictures

are ''Past Midnight,'' a provacative thriller by Frank Norwood to be directed this fall by Jan Eliasberg; ''The Retreat,'' a taut thriller by James Lemmo and Karl Schiffman, which will be directed by Lemmo; and ''Zero Tolerance,'' written and directed by John Saxon, the character actor who will be making his directorial debut with this project.

A Chicago native, Hansen began her communications career as a deejay at a Gillette, Wyo., radio station. Upon returning to Chicago, she joined Spectrum Pay-TV as program manager. In 1982, Hansen left that firm for a position with Chicago Teleproductions (the forerunner of CineTel). She was promoted to vice president in 1983 and moved with the company to Los Angeles.

The following year, she was promoted to executive vice president charged with overseeing all film productions, advertising and promotional campaigns.

#90222b0183 08/10/1990 ~Business Wire

MILLBRAE, Calif. (AUG. 10) BUSINESS WIRE - Homestead Financial Corp. (NYSE:HFL/HFLB) reported a net loss of $30.2 million, or $2.66 per share for the second quarter ended June 30, compared to a net loss of $18.7 million or $1.65 per share for the second quarter ended June 30, 1989.

To take a conservative position in a softening real estate market, the company added $18.0 million in general valuation allowances during the quarter. These additional reserves for potential future losses resulted from a review of the company's assets by management and completion of examinations by the Federal Deposit Insurance Corp. (FDIC) and the Office of Thrift Supervision (OTS).

At June 30, Homestead Savings (the Association), the company's savings and loan subsidiary, had $29.0 million in general valuation reserve balances, representing 1.1 percent of assets.

To improve its future capital ratios, the company announced its intention to sell four of its five apartment complexes, representing $129.9 million in assets, rather than retain these properties as long-term investments. The company recorded a $16.7 million provision for potential losses and costs on the sale of these investments which are owned by Homestead Land Development Corp. (HLDC), Homestead Savings' real estate development subsidiary.

''Selling these complexes will have a positive impact on Homestead

Savings' future capital ratios and therefore, will enhance the savings and loan's ability to achieve its capital compliance goals,'' commented Lawrence Weissberg, chairman and chief executive officer.

Beginning on July 1, for the purposes of calculating capital under the new savings and loan legislation, Homestead Savings must deduct from capital 10 percent of its investment in and extensions of credit to HLDC. This percentage increases over a transition period to 100 percent on July 1, 1994.

In recognition of continuing market declines, provisions of $4.3 million were added to increase specific loss reserves primarily on commercial loans and to reduce the company's investment in various commercial properties acquired through foreclosure. The carrying value of the company's remaining ownership interest in a finance subsidiary was reduced by additional reserves of $2.2 million.

The controlling interest in this finance subsidiary was sold in 1989. During the second quarter of 1990, the company decided to sell the marketable equity securities owned by the parent company. As a result of the company's intention to sell these securities, a $2.8 million market valuation adjustment was recorded. The company also reported income of $1.5 million resulting from the recovery of previously reserved mortgage insurance claims.

Net interest income before loan loss provisions increased 66.1 percent from $5.2 million for the second quarter of 1989 to $8.7 million for the second quarter of 1990. The improvement was primarily due to both an increase in the average yield on interest-earning assets and a decrease in the average cost of interest-bearing liabilities. Primary interest rate spread increased from 1.06 percent at June 30, 1989 to 1.97 percent at June 30.

SAN JOSE, CA (AUG. 10) BUSINESS WIRE - TeleVideo Systems Inc. (OTC:TELV) has named Richard A. DuBridge to the position of president and chief operating officer.

The announcement was made by Dr. K. Philip Hwang, chairman and chief executive officer. DuBridge was also elected to the company's board of directors.

This is a return to TeleVideo for DuBridge, 56, who served the compnay from July, 1979, to January, 1985, as executive vice president and, later,

as vice chairman.

''Dick DuBridge was instrumental in helping grow TeleVideo from a startup to a 168 million dollar a year company,'' said Hwang in making the announcment, ''I am very happy to have him back to help us rebuild the company and initiate new strategies for growth,'

Most recently, DuBridge has been engaged in private venture captial business. Prior to joining TeleVideo the first time in 1979, DuBridge was with Memorex Crop., as director of marketing for the eqipment group, and with the General Electric Co. from 1958 to 1976, where he held various engineering and marketing management positions in San Jose, and Waynesboro Va.

DuBridge holds a B.S. degree in Physics from Harvard University,

TeleVideo Systems Inc. is a leading supplier of industry-standard, high performance LAN file servers and workstation products, video display terminals, computer enhancement products, and applications specific integrated circuits (ASICs).

#90222b0201 08/10/1990 ~Business Wire
LAS VEGAS (AUG. 10) BUSINESS WIRE - Electronic Data Technologies (NASDAQ:EDAT) Friday announced revenues of $6,475,700 for the quarter ended June 30, 1990 and $19,950,300 for the nine months ended June 30, 1990.

This compares to then record quarterly revenues of $6,995,100 for the quarter ended June 30, 1989 and revenues of $16,004,000 for the nine months ended June 30, 1989.

The company reported net income for the quarter ended June 30, 1990 of $289,900, or 8 cents per share, as compared to net income for the quarter ended June 30, 1989 of $596,700, or 16 cents per share. Net income for the nine months ended June 30, 1990 was $1,647,400, or 43 cents per share as compared to income from continuing operations for the nine months ended June 30, 1989 of $1,644,600, or 44 cents per share.

The decline in quarterly revenues is attributable primarily to a 31 percent decrease in revenue from the sales of Gaming Management Systems from a record $4,725,000 for the quarter ended June 30, 1989, to $3,281,400 in the current quarter, partially offset by a 17 percent increase in revenue from route operations and increases in Service and other revenue. Route management revenue was $2,159,900 for the quarter ended June 30, 1990 as compared to $1,847,800 for the comparable quarter of the prior year. Service and other revenue was $1,034,400 for the quarter ended June 30, 1990 as compared to $421,800 for the same quarter of the prior year. The increases in Service revenue and other is due to increased sales of slot system units and parts to existing slot system customers as well as increases in recurring software license and slot and keno system hardware maintenance fees.

The company currently has a Gaming Management Systems' backlog of approximately $3 million as compared to $6.9 million in business backlog at June 30, 1989. The decrease in contract backlog results from a reduction in large casino system contracts which tend to remain in backlog for periods of more than 120 days.

Route Management fees accounted for 33 percent and 32 percent of total revenues for the three and nine months ended June 30, 1990, respectively. The increase in gaming revenue is a result of the increase in machines and an increase in overall machine performance during the period as compared to the prior year.

The company's profit margin declined primarily due to the carrying costs

associated with game operations equipment, specifically increases in interest and depreciation expense. Additionally, the company incurred operating costs associated with new products whose introduction to the market have been delayed by regulatory constraints.

EDT is a world leader in the design and manufacture of computerized management systems for the gaming industry. The company also manages, through its wholly owned subsidiary, approximately 1,660 gaming machines placed in various non-casino locations in Nevada.

FOUNTAIN VALLEY, CA (AUG. 10) BUSINESS WIRE - National Lumber & Supply Inc. (OTC:NTLQE) Friday reported that the company has retained ALCO Capital Corp. and Sam Nassi Co. Inc. to conduct clearance and going-out-of-business sales at seven of its 12 stores.

Inventories will be sold at store locations in El Toro, Bellflower, Huntington Beach, Garden Grove, Carson, Torrance and South Gate. The inventory sales are expected to take about 60 to 90 days, after which the store leases may be sold.

The sales have been approved by the bankruptcy court. National Lumber filed for Chapter 11 bankruptcy protection in April 1990.

National Lumber & Supply Inc. operates retail home-improvement centers in Southern California.

#90222b0272 08/10/1990 ~Business Wire

SAN DIEGO (AUG. 10) BUSINESS WIRE - TeleQuest Inc. reported sales of $1,413,000 for the second quarter ended June 30, up 85 percent from $764,000 for the second quarter of the prior year.

Sales for the six-month period ended June 30, 1990, of $3,259,000 were 109 percent higher than sales of $1,563,000 for the first six months of 1989. The company also reported net losses of $739,000, or 3 cents per share, for the second quarter and $1,230,000, or 6 cents per share, for the first six months of 1990.

According to Robert C. Fick, vice president and chief financial officer, sales increases during the second quarter were primarily the result of quarterly variations in the timing of shipments to the company's major international customer and do not necessarily indicate an increase in sales to this customer for the full year.

Second-quarter sales also increased because of the addition of new domestic customers. Sales increases for the six-month period ended June 30, 1990, also benefitted from non-recurring sales of television sets that the company liquidated during the first quarter on behalf of its major stockholder.

The company's reported gross margin for its second quarter of negative 5 percent represented a decrease from 19 percent for the like period of 1989. This decrease was primarily the result of $215,000 of asset valuation adjustments recorded during the second quarter as well as liquidation sales. Operating expenses decreased 11 percent from the second quarter of 1989 to the second quarter of 1990.

In July, the company was informed that its major stockholder, Teletech International Holdings Ltd., had become the subject of a takeover bid by Swilynn International Holdings Ltd., a Hong Kong publicly traded company, as is Teletech. The directors and officers of Teletech oppose the takeover and are fighting it aggressively.

It is currently not possible to predict whether or not the takeover bid will be successful or how a successful takeover might impact the company. Teletech owns 84 percent of the company's outstanding stock.

TeleQuest designs, develops and markets a diversified line of telephone products for the residential and small-business markets.

HONOLULU (AUG. 13) BUSINESS WIRE - Hawaiian Airlines Friday announced fuel surcharges of $10 each way on trans-Pacific flights and $15 each way on South Pacific routes, effective Friday (Aug. 10).

Earlier this week, a $2.50 fuel surcharge for each one-way segment went into effect on interisland flights in Hawaii.

The temporary fuel surcharges represent 4-6 percent of trans-Pacific and South Pacific fares.

While other carriers have increased air fares as much as 10 percent due to

rising fuel costs, Hawaiian says it will hold the line on fares as long as possible to keep prices affordable for its customers.

''We hope oil prices continue to stabilize,'' said John Ueberroth, Hawaiian's president and chief operating officer. ''Our surcharge will go up or down according to our fuel price.''

Hawaiian's fuel prices have increased as much as 17 percent recently, but it is passing along only a fraction of that cost to customers. Fuel surcharges apply to published fares, coupons and tour wholesaler rates.

Hawaiian Airlines flies to Seattle, San Francisco, Los Angeles and Las Vegas on the West Coast. Its South Pacific destinations are Guam, Tahiti, American Samoa, Western Samoa, Tonga, the Cook Islands, and Australia.

The Honolulu-based airline uses approximately 120 million gallons of jet fuel a year and flies 230 flights daily.

EAST HANOVER, N.J. (AUG. 10) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) reported revenues of $52.4 million for the first quarter following its divisional reorganization in May, an improvement over revenue of $49 million, reported in the first quarter of last year.

Three of the company's four divisions reported profitable operations for the quarter ended July 31, 1990, but a loss in the company's largest division caused an overall loss of $845,320, or 9 cents loss per share.

In commenting, Ultimate chairman, president and chief executive officer, Michael J. O'Donnell said, ''The loss is a major disappointment for us and is attributable in large part to poorer gross profit margins in the Systems Division.''

''In years gone by, Ultimate was able to maintain consistently high margins; recently, with the price and margin squeezes across the entire computer industry, Systems Division margins have decreased to approximately 34.5 percent. Our recent divisonal reorganization is allowing us to size operations and expenses to make money even at those margins. We have made progress in that regard, but still have work to do in the Systems Division.''

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia. The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets.

In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

LAS VEGAS (AUG. 10) BUSINESS WIRE - MarCor Resorts Inc. (NASDAQ:MAAR) today announced operating results for the second quarter and six months ended June 30, 1990.

Total revenues for the quarter ended June 30, 1990, were $17,985,639, of which $13,732,223 is attributable to the company's gaming operations. Total operating income for the quarter ended June 30, 1990, was $330,610, compared to $688,994 in the quarter ended Aug. 31, 1989.

The company's gaming operating loss was $469,997 for the quarter ended June 30, 1990. There was no comparable 1989 gaming operating data, since the company's gaming operations at the Rio Suite Hotel & Casino commenced in January 1990.

MarCor's net loss for the quarter ended June 30, 1990, was $213,828, or 3 cents per share, compared to net income of $302,351, or 4 cents per share, for the quarter ended Aug. 31, 1989.

Net cash flow from operations, adjusting for minority partners' interests, was $202,511, or 3 cents per share, for the quarter ended June 30, 1990. Weighted average shares outstanding for the second quarter of 1990 and 1989 were 7,573,152 and 6,655,813, respectively.

MarCor reported total revenues for the six months ended June 30, 1990, of $32,511,796, of which $26,622,488 was attributable to the company's gaming operations. Operating income for the six months ended June 30, 1990, was $850,492, compared to $1,160,182 for the six-month period ended Aug. 31, 1989.

During the first half of 1990, MarCor reported a loss from gaming operations of $490,734, which included the one-time write-off of Rio opening expenses of $743,366 during the first quarter. There was no comparable gaming operating figures for the previous year.

MarCor's net loss for thesix months ended June 30, 1990, was $228,341, or 3 cents per share, compared to net income of $592,899, or 8 cents per share, for the six months ended Aug. 31, 1989.

MarCor Resorts Inc., through a wholly owned subsidiary, is the principal owner and operator of the first all-suite hotel/casino in the country, the Rio Suite Hotel & Casino, located in Las Vegas. MarCor and controlled entities own 165 acres in the greater Las Vegas areas targeted for the development of future gaming resorts and ancillary uses.

NEW YORK (AUG. 10) BUSINESS WIRE - JOE FRANKLIN PRODUCTIONS INC. (FNJD) announced Friday its entry into the fast-growing fax-mail business with the introduction of ''THE FAX EXCHANGE,'' which began operations on Aug. 1.

In its facility in El Monte, Calif., a key team of engineering, marketing and financial personnel specialize in facsimile communications and document storage and retrieval technology. Moshe Ovadya, a spokesman for the company said: ''The response to initial media advertising and test marketing is overwhelmingly positive.''

''THE FAX EXCHANGE'' will operate as a separate division of Joe Franklin Productions Inc. It has received its initial funding through a purchase of shares in Joe Franklin Productions Inc. by a group of private investors.

''THE FAX EXCHANGE'' is dedicated to all aspects of enhanced fax communications. Combining electronic document storage and retrieval technology with PC-based fax cards by Gammalink and custom software, ''THE FAX EXCHANGE'' provides unparalleled fax processing capabilities coupled with document archiving. The technology allows its subscribers to send and receive first-generation-quality documents without any degradation in image quality.''

''THE FAX EXCHANGE'' provides numerous fax services, including fax-mail-boxes that allow subscribers to receive faxes confidentially and securely. Subscribers can retrieve their faxes from any fax machine in the world by simply talking to a customer service representative and providing verbal instructions.

''THE FAX EXCHANGE'' is the first fax-mail service to feature live operators, eliminating the need to use complex PC-based programs or the dialing of long sequences of touch-tone telephone-based numbers, passwords and instructions.

KIRKLAND, WASH. (AUG. 10) BUSINESS WIRE - ProCyte Corp. (NASDAQ:PRCY) Friday announced that it has begun Phase II clinical trials of its Iamin compound on chronic wounds in humans.

The trials will be conducted in Seattle by Bernard Goffe M.D. and will look at wounds resulting from a variety of underlying diseases. Dr. Goffe, a dermatologist in the Minor and James Clinic, is a Clinical Associate Professor of Dermatology at the University of Washington School of Medicine.

The trials will further test the accelerated healing effect of ProCyte's patented core technology, the Iamin compound. The compound, a tripeptide is found to occur naturally in human blood. When complexed with copper, this tripeptide triggers the body's natural healing mechanisms.

Tests will be conducted on chronic wounds, such as skin ulcers and other types of non-healing wounds which have not responded to traditional therapies. According to a 1990 report published in ''Biomedical Business International,'' an estimated 1 million bedridden people suffer from chronic wounds that won't heal.

The Iamin compound is undergoing additional clinical trials for the healing of stasis and diabetic ulcers under the direction of Schering Corp. at two other U.S. sites and one site in France.

''These studies are key to future product development and expanded clinical trials,'' said Joseph Ashley, ProCyte's president and chief executive officer. ''This is part of ProCyte's plan to develop its own products for tissue repair and wound healing for the world healthcare market,'' he said.

ProCyte Corp., a biopharmaceutical company headquartered in Kirkland, is developing a new class of pharmaceuticals based on proprietary compounds that trigger tissue regeneration. Iamin is a registed trademark of ProCyte Corp.

STAMFORD, CT (AUG. 10) BUSINESS WIRE - CUC International Inc. (NYSE:CU) announced Friday that it has purchased three dining clubs for a total purchase price of $6.5 million.

The clubs, which were privately-owned, offer local dining and lifestyle discounts in Boston, Long Island, Phoenix, Denver and Texas.

Walter A. Forbes, CUC's chairman and CEO, said, ''The purchase of these three established clubs brings us 200,000 additional dining members and also provides us with a strong base in a number of important markets.

''Local market discount clubs, which typically are dining-oriented, are growing rapidly and enjoy high consumer and merchant acceptance. Moreover, local market clubs provide an additional distribution channel for all of our membership based services.''

The clubs purchased by CUC in this transaction will continue to market their services directly to consumers through print advertising, fundraisers, corporations, schools, and local TV ads, as well as credit card marketing.

CUC International is a leading membership services company, presently providing more than 14 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements, and extended warranties.

AMHERST, NY (AUG. 10) BUSINESS WIRE - Mark IV Industries, Inc. (NYSE: IV), Friday announced the acquisition of the assets of Ferranti-Packard Electronics from NEI Canada Limited, a subsidiary of Rolls Royce, for $20.9 million Canadian (approximately $18.2 million U.S.).

Ferranti-Packard is a Canadian designer, manufacturer and marketer of electro-magnetic display devices for use in destination signs, traffic control signs, gasoline pump displays, scoreboards and numerous other information display applications. Ferranti-Packard expects 1990 revenues

of approximately $24 million Canadian, (approximately $20 million U.S.). The company is a market leader in most of its product areas, with nearly 50 percent of its revenues generated in Europe.

Sal H. Alfiero, chairman and chief executive officer of Mark IV said, ''The purchase of Ferranti-Packard is Mark IV's second acquisition this year in line with its recently announced strategy of concentrating on building its core businesses through a balanced program of internal development and acquisitions. We are focused on targeting those companies with lines of business that are complementary to and strengthen our existing operations. The $10 million February acquisition of Dynacord, a West German maker of professional sound equipment, was a strategically important addition to the Mark IV Audio group, adding approximately $28 million in revenue to the audio business.

We have taken the same approach to the further development of our communication and information businesses with the acquisition of Ferranti-Packard. We expect that this combination will yield additional synergies through combined marketing and product development efforts.''

Ferranti-Packard has manufacturing facilities in Mississauga and Cobourg, Ontario, and distribution and service facilities in Mississauga, Ontario; Zurich, Switzerland; and Boston, Massachusetts. Mark IV, headquartered in the Buffalo suburb of Amherst, New York, is a diversified manufacturer of products in three business segments: Technical Products and Systems; Engineered Products and Systems; and Transportation Products and Systems.

#90222b0624 08/10/1990 ~Business Wire

NEW YORK (AUG. 10) BUSINESS WIRE - Roderick G. W. Chu, 41, Andersen Consulting's Worldwide Managing Partner - State and Local Government practice and former Commissioner of Taxation and Finance for New York State, has been appointed as the newest member of the State University of New York (SUNY) Board of Trustees. His nomination by Governor Mario M. Cuomo was confirmed by the State Senate on July 1. Chu is based in Andersen Consulting's New York office.

The SUNY Board of Trustees is responsible for developing new and managing existing programs of higher education, affording appropriate educational facilities for citizens of the State. Chu is the first SUNY Trustee of Asian heritage in its history. (He was also the first Chinese American Commissioner and the youngest Tax Commissioner ever appointed in New York State.)

"Rod Chu brought innovation and management excellence to state tax policy and tax collection," Cuomo said. "I'm confident he will bring the same qualities to the SUNY Board of Trustees as it attempts to guide our higher education systems in the 1990's."

As commissioner, from 1983 to 1988, Chu directed 6,000 state employees in the collection of tax revenues for the largest state revenue agency in the United States. He was responsible for an annual department budget of more than $200 million.

He instituted major changes in tax operations and tax policies, including initiatives to reduce tax evasion in the state. Audit and compliance programs initiated under Chu's tenure resulted in almost $1 billion per year in increased revenues from improved compliance with tax laws.

Chu first joined Andersen Consulting in 1971 and rejoined the organization in 1988. He has managed client work for engagements involving the design and installation of large-scale computer information systems and advising clients on the strategic use of information for competitive advantage.

Key projects have included state and local government systems for financial management, human resources, tax return processing, pension, welfare and benefits case management, vehicle maintenance, central accounting, decision support and related training, and purchasing, receiving and accounts payable.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954 when it installed the first computer for commercial use. The organization helps clients use information in all phases of their management activities - strategic, operations, and financial.

KANSAS CITY, MO (AUG. 10) BUSINESS WIRE - On Aug. 8, 1990, the board of directors of CenCor Inc. declared a 1-for-5 reverse stock split of the company's regular common stock.

The reverse stock split was approved by the holders of a majority of the outstanding regular common stock of the company and will become effective at the close of business on Aug. 31, 1990.

The board of directors of CenCor Inc. stated that the reverse stock split was advisable and in the best interests of the company and its stockholders in order to counter the lack of acceptability of the

company's regular common stock by the financial community and investing public, which has resulted due to its current low per share price.

Cash will be paid by the company in lieu of the issuance of fractional shares as a result of the reverse stock split.

DALLAS (AUG. 10) BUSINESS WIRE - Hogan Systems Inc. Friday announced that Patric J. Jerge has been named president and chief executive officer of the company, effective immediately.

Jerge previously was executive vice president of the company's Integrated Banking Applications (IBA) group.

In addition, William O. Hunt, currently a member of the board of directors of Hogan Systems, has been named chairman of the board. Hunt is and will remain chairman, president and chief executive officer of Alliance Telecommunications Corp.

Jerge and Hunt succeed Gary W. Fiedler, former chairman, president and chief executive officer of Hogan Systems, who will remain as a member of the board of directors. Fiedler previously announced his resignation to resume a career in the banking industry.

Jerge joined Hogan Systems in 1978, as one of the company's first 10 employees. Prior to being named executive vice president in 1988, he held various management positions with the company, including senior vice president of the field operations group, vice president of product development, and vice president of western region sales, sales support and customer support.

Before joining Hogan Systems, Jerge served as director of development and area manager of development and support with University Computing Company of Dallas. He began his career with M&T Bank of Buffalo, N.Y.

Hogan Systems Inc., of Dallas, designs, markets and supports integrated on-line application software products for use by financial institutions worldwide. The company maintains major sales and support offices in Woking, England; Melbourne, Australia; New York City and Dallas.

Company stock is traded on the NASDAQ National Market System under the symbol ''HOGN'' and is listed in alphabetical quotations as ''Hogan'' or ''HoganSys.''

NORTH MIAMI BEACH, FL (AUG. 10) BUSINESS WIRE - Home Intensive Care, Inc. 1/8NASDAQ/NMS:HICI (common stock) and HICIW (warrants)3/8, a leading provider of high-tech home health care, Friday announced unaudited results for the third quarter and nine months ended June 30, 1990.

James P. Cefaratti, President of Home Intensive Care commented, ''During the third quarter of fiscal 1990 we proceeded with our aggressive expansion plans. We now provide home infusion therapy in 45 major metropolitan areas through 24 locations in 19 states. According to McGraw Hill's ''Health-Business,'' based upon number of locations, Home Intensive Care is now the seventh largest home infusion company in the nation.

''As such, we are in an excellent position to emerge as a leader in an industry which is expected to achieve a 30 pct. annualized growth rate over the next several years.

''During the third quarter, we restructured the Company into two business segments; an Infusion Therapy Division (which includes home dialysis) and a Dialysis Clinic Division. The third quarter was the first under our new corporate structure and as such, should be used as a basis for measuring the future success of the Company.

''During the third quarter, revenues from the Infusion Therapy Division increased at an annualized growth rate in excess of 100 pct. The third quarter loss was considerably less than originally anticipated, and we expect the fourth quarter loss to be appreciably less than the third quarter, with a return to profitability early in 1991.

''We have gained national attention from several prestigious trade publications and industry analysts as a result of projections by industry experts that 'niche players' promise the most dramatic growth within our industry. Our niche is home dialysis which is recognized as being among the most sophisticated critical care therapies offered in the home today. Home Intensive Care remains the only national home infusion company that offers staff assisted home dialysis among its full range of infusion services.

''We are backing up our commitment to service excellence by seeking accreditation from the National League of Nursing's Community Health Accreditation Program (CHAP). We are the first national infusion company to seek such accreditation from CHAP, a nurse driven organization with an

unparalleled reputation for clinical excellence. In addition, we will be seeking accreditation from the Joint Commission on Accreditation of Health Care Organizations (JCHAO).

''To further capitalize on our expertise in dialysis, we continue to expand our dialysis clinic operations. We opened our third clinic in June in Dallas, Texas, and expect to open clinics in Detroit, Michigan in August, and in Prince Georges County, Maryland shortly thereafter. By the end of December, 1990 we expect to open six to eight additional clinics.'' concluded Cefaratti.

The Company also announced that it has extended the expiration date of its common stock purchase warrants from September 30, 1990 to September 30, 1991. The exercise price of each publicly traded warrant remains $7.50, and each warrant entitles the warrantholder to purchase two shares of common stock at the exercise price of $7.50.

Home Intensive Care, Inc. is a leading provider of high-tech home health care infusion therapy products and services including home dialysis, nutritional therapy, and intravenous antibiotic therapy in 40 metropolitan areas. The Company also operates three dialysis centers with a number of additional clinics scheduled to open in fiscal 1990 in major markets throughout the U.S. Its Lifeline Water Systems subsidiary markets water purification systems for commercial, industrial and residential use.

Home Intensive Care Inc.
Financial Highlights

	Three Months Ended June 30,	
	1990	1989
Revenues from ongoing operations	$ 7,807,000	$15,180,000
Income (loss) before income taxes	(2,146,000)	2,113,000
Provision (credit) for income taxes	(644,000)	795,000
Net income (loss)	$(1,502,000)	$ 1,318,000
Net income (loss) per common share	$(.16)	$.14
Weighted average number of shares outstanding	9,155,000	9,738,000

	Nine Months Ended June 30,	
	1990	1989
Revenues from ongoing operations	$23,692,000 (a)	$39,923,000
Income (loss) before income taxes	(3,828,000)(a)	7,348,000
Provision (credit) for income taxes	(853,000)	2,762,000
Net income (loss)	$(2,975,000)	$ 4,586,000
Net income (loss) per common share	$(.33)	$.49
Weighted average number of shares outstanding	9,134,000	9,451,000

(a) The above results for the nine months ended June 30, 1990 do not include revenues of $16,623,000 related to the terminated portion of the Company's home dialysis business. These revenues have been offset against operating expenses and the resulting operating income of $3,887,000 for the nine months ended June 30, 1990 has been credited to the reserve for closing costs which may be incurred.

WESTFORD, MASS. (AUG. 10) BUSINESS WIRE - Concurrent Computer Corporation and Empress Software, Inc. today announced the availability of Empress Software's relational database management system (RDBMS) products on Concurrent's 5000 and 6000 series of real-time UNIX computers. The Empress RDBMS products will be sold by both sales organizations.

The Empress products running on the Concurrent systems include Empress RDBMS, Empress 4GL, and Empress FORTRAN Host Language Interface. Empress RDBMS products are designed for advanced technical applications allowing the use of more complex data such as images, voices and unstructured text. They also handle routine database management applications. These products feature standards-based ANSI and SQL plus extensions for flexible programming. Interfaces to C and FORTRAN are also available.

Pam LaBove, third-party marketing manager at Concurrent said, ''As a member of Concurrent's successful Distributed Products Program, Empress will add a technical facet to our relational database offerings. Concurrent looks forward to selling Empress' RDBMS products as a technical database solution to our mutual engineering and scientific customer communities.''

Empress was designed in Canada by John Kornatowski and Ivor Ladd. Applications have ranged from mapping and voice messaging to simulator design and image processing, to medical and CAD/CAM, as well as traditional RDBMS and 4GL solutions. Empress sales and marketing offices are in the Washington, D.C. suburb of Greenbelt, Maryland and the company research and development center is in Toronto, Canada.

Concurrent Computer Corporation is the leading supplier of high-performance, real-time computer systems worldwide. The company's

products, marketed through the Commercial Products, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the commercial, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

SHREWSBURY, NJ (AUG. 10) BUSINESS WIRE - Wellman Inc. (NYSE: WLM) announced that its board of directors declared a quarterly dividend of 3 cents per share on the company's outstanding common stock.

This dividend is payable September 17 to shareholders of record on September 3.

The board also named two new directors, Allan R. Dragone and Raymond C. Tower, bringing the number of directors serving on Wellman's board to eight.

Dragone was formerly president of Celanese Corp., vice chairman of Burlington Industries and president and chief executive officer of AKZO America Inc. He served on Wellman's board of directors in 1987 and in 1988 became chairman of the board of Fiber Industries Inc., which was spun off from Hoechst Celanese Corp. in January of that year and which Wellman acquired in November 1989.

Tower was president, chief operating officer and a member of the board of directors of FMC Corp. until his retirement on March 1. He serves on the board of directors of several corporations and institutions and is an active member of many professional organizations.

Wellman, Inc. is the nation's largest recycler of plastic, fibre and film wastes, manufactures and distributes high quality polyester textile fibres under the Fortrel brandname and produces polyester and nylon fibres and plastic resins from its recycling operations.

#90222b0642 08/10/1990 ~Business Wire

FORT WORTH, TX (AUG. 10) BUSINESS WIRE - Lomak Petroleum Inc. (the ''Company''), Friday announced its June 30, 1990 results.

Revenues for the six months reached $2.9 million, a 21 percent increase over the prior year period. Net income rose to $88,600 vs. $14,100 in 1989. At June 30, 1990, working capital was $2 million, oil and gas properties totalled $7.5 million and total assets reached $13.1 million.

These figures represent increases of 140 percent, 150 percent and 90 percent, respectively. This growth was financed entirely through a $3.4 million preferred stock placement, issuance of common stock in acquisitions and retained earnings. As a result, debt remained level while shareholders' equity rose dramatically from $1 million at year end 1989 to $4.5 million at June 30, 1990.

In the second quarter, the company completed the sale of $3.4 million of 8 percent convertible preferred stock. The proceeds from the offering were used to fund two acquisitions.

In early May, the company acquired 39 percent of the outstanding stock of Dallas Oil & Minerals Inc. (''DOIL''). DOIL, a small publicly traded independent producer based in Fort Worth, owns oil and gas properties located principally in Texas, Louisiana and Oklahoma. Upon acquiring the position, the company assumed control of DOIL. The company is currently considering whether and how to acquire the remaining DOIL shares.

In late May, the company acquired Appalachian Exploration Inc. (''AEI''), another independent producer based in eastern Ohio. As AEI's assets and operations were contiguous to those of the company, the acquisition should permit substantial operating efficiencies once the properties are fully integrated.

The company is engaged in the acquisition, production and development of oil and gas properties and provides brine disposal and other ancillary services to the oil industry. The company's common stock is listed on NASDAQ under the symbol ''LOMK''.

ASHLAND, KY (AUG. 10) BUSINESS WIRE - Addington Environmental Inc., (NASDAQ/NMS:ADDR) has signed an option to acquire an existing landfill in South Carolina, the company announced Friday.

The option allows Addington Environmental, a subsidiary of Ashland-based Addington Resources, Inc., to purchase the assets of Appleton Sanitary Landfill in Allendale County, S.C., for an undisclosed sum, said Todd Skaggs, Addington operations manager.

If all requirements are met, the company expects to compete the acquisition within 90 days.

Skaggs said if the acquisition takes place, the company intends to improve the landfill's operations by providing new capital for additional workers and equipment. The company also plans to construct a recycling center to help Allendale County with long-term solutions to disposal problems.

Addington Resources mines coal in Kentucky, West Virginia, Ohio and Illinois and is engaged in contracting, highway construction operations and the development and operation of solid waste disposal systems.

BROOKLYN, NY (AUG. 10) BUSINESS WIRE - Polymer Research Corp. of America (NASDAQ:PROA) Friday reported results for the second quarter of 1990.

Polymer's second quarter revenues of $782,514 were 30 percent greater than the second quarter of last year.

Net income for the quarter was $112,000 (13 cents per share) compared with $5,500 for last year's second quarter.

Carl Horowitz, the company's president, attributed the higher net income to an incrase in research sales resulting from increased marketing efforts over the past two years, and to a decrease in the cost of research revenues.

Polymer Research Corp. of America is engaged primarily in research in the area of chemical grafting on a contract basis for a wide range of manufacturing and other companies.

NISKAYUNA, NY (AUG. 10) BUSINESS WIRE - Environment One Corp. (BSE:EON)

posted revenues of $2,879,061 for the second quarter of 1990.

Total revenues and other income increased $423,876 or 17.3 percent over the same period a year ago. Profits increased to $186,349 (5 cents per share) compared to '89's second quarter of $71,653 (2 cents per share). The 150 percent profit surge puts the company back on track after reduced earnings in the first quarter of this year.

Angelo Dounoucos, president and chief executive officer, views the company as experiencing strong sales in its two major product lines, grinder pumps and instruments. He expects to see the year continue at approximately the same level of operation and growth as for the first half.

Over the last year, Dounoucos has revamped and reinforced the Marketing, Engineering and Manufacturing sections with new leadership and initiatives aimed at making the company more competitive and profitable for the future.

Environment One is a manufacturer of environmental products and provider of environmental measurement services based in Niskayuna, N.Y. The corporation stock is traded over the counter and listed on the Boston Stock Exchange under the trading symbol - EON.

#90222b0651 08/10/1990 ~Business Wire
ASHEVILLE, NC (AUG. 10) BUSINESS WIRE - Ingles Markets Inc. (NASDAQ/NMS:IMKTA) Friday announced financial results for the third quarter and nine months ended June 30, 1990.

Also, the company's board of directors has declared a quarterly cash dividend on its Class A and Class B common stock.

For the three months ended June 30, 1990, net sales increased 13.9 percent to $258.1 million from $226.6 million in the comparable period last year. Gross profit for the most recent quarter increased 14.0 percent to $58.5 million compared with $51.3 million last year. Income from operations rose 28.1 percent to $10.0 million versus $7.8 million last year.

Net income was $3.5 million, or 19 cents per share, compared with $4.3 million, or 24 cents per share, last year.

For the nine months ended June 30, 1990, net sales were $746.3 million, a 14.7 percent increase from $650.6 million in the comparable period last year. Gross profit increased 14.2 percent to $166.9 million from $146.2 million in the year-earlier period.

Income from operations rose 23.0 percent to $24.7 million, compared with $20.1 million, last year.

Net income was $6.5 million, or 36 cen per share, for the nine months ended June 30, 1990, compared with $10.3 million, or 58 cents per share, last year.

Commenting on the results, Robert P. Ingle, chairman and chief executive officer, stated: ''The decrease in net income for the three- and nine-month periods ended June 30, 1990, is the result of net losses of $1.0 million and $5.8 million, respectively, incurred on the sale of marketable equity securities.

''The company terminated all its remaining investments in marketable equity securities during the quarter ended June 30, 1990, and has no present plans to reinvest in marketable equity securities.

''Our operating results for the year continue to be very strong. The increase in operating income for the three and nine month periods ended June 30, 1990, is primarily attributable to the increase in sales and a decrease, as a percentage of sales, in operating and administrative expenses due to improved expense control.

''During the period from June 25, 1989 to June 30, 1990, the company opened 19 new stores and closed 4 older stores. Our financial position is solid and we believe our operating results will continue to be strong in the fourth quarter,'' Ingle concluded.

The company also announced that the board of directors has declared a cash dividend of $.055 (five and one-half cents) per share on its Class A common stock and a cash dividend of 5 cents per share on its Class B common stock. The dividends are payable August 28, 1990, to all stockholders of record on August 17, 1990.

Ingles Markets Inc. is a leading supermarket chain with operations in five southeastern states. Headquartered in Asheville, the company operates 166 supermarkets. In conjunction with its supermarket operations, the company also operates 65 neighborhood shopping centers, each of which contains an Ingles supermarket.

The company's common stock is traded on the National Market System under the NASDAQ symbol IMKTA.

ATLANTIC CITY, NJ (AUG. 10) BUSINESS WIRE - Resorts International Inc., and its subsidiary, Griffin Resorts Inc., Friday announced consolidated operating results for the second quarter and the first half ended June 30, 1990.

For Resorts International Inc., the second quarter of 1990 resulted in net earnings of $803,000 as compared to a net loss of $27,896,000 for the second quarter of 1989.

Earnings from operations for the second quarter were $5,509,000, as compared to $1,257,000 for the same quarter in 1989. The first half of 1990 resulted in a net loss of $2,305,000 as compared to a net loss of $46,579,000 for the first half of 1989. The company and its subsidiaries did not accrue interest in their public debt during 1990.

For the second quarter of 1990, Griffin Resorts Inc. announced a net loss of $77,000 as compared to a net loss of $1,276,000 for the second quarter of 1989.

Griffin Resorts' earnings from operations for the second quarter of 1990 were $1,502,000, as compared to a loss from operations of $638,000 for the same period of 1989. The first half of 1990 resulted in net earnings of $2,022,000 as compared to net earnings of $3,877,000 for the first half of 1989.

Resorts International, whose creditors have approved the company's proposed plan of reorganization, is awaiting a ruling on confirmation of that plan from the U.S. Bankruptcy Court in Camden, N.J. At the conclusion of the confirmation hearings by the Bankruptcy Court in July, the court announced its intention to render a decision on or before Aug. 16, 1990.

In addition, a hearing on the plan is scheduled for today at the New Jersey Casino Control Commission. A decision by the Commission is expected to be rendered by it following announcement by the Bankruptcy Court of its decision on confirmation of the plan. The plan is also subject to necessary approvals from the Government of the Bahamas.

LITTLE ROCK, AR (AUG. 10) BUSINESS WIRE - Dillard Department Stores Inc. (NYSE:DDS) announced that the net income rose 53.2 percent for the quarter ended Aug. 4, 1990, to $28,722,000 vs. $18,752,000 last year.

Sales for the quarter increased to $774,564,000, compared to last year's second quarter sales of $629,203,000. This is an increase of 23.1 percent overall and a store-for-store increase of 13.8 percent. Earnings per share were 80 cents this year and 57 cents last year. Average shares outstanding were 35,991,000 for the quarter this year and 33,086,000 last year.

During the six months ended Aug. 4, 1990, sales were $1,516,946,000, compared to $1,227,268,000 last year, an increase of 23.6 percent. The store-for-store sales increase for the period was 13.9 percent. Net income for the first half this year is $58,112,000 vs. $38,334,000 last year, an increase of 51.6 percent. Earnings per share were $1.62 this year and $1.17 last year. Average shares were 35,954,000 for the six months this year vs. 32,674,000 last year.

CAMP HILL, PA. (AUG. 10) BUSINESS WIRE - Consumers Financial Corp. (OTC: CFIN) Friday announced that unaudited net income for the first half of 1990 decreased to $192,000 from $882,000 in 1989, principally as a result of higher claims and expense ratios in the Credit Insurance Division.

Earnings per common share decreased from 20 cents last year to a loss of two cents in 1990. The loss per common share is due to the fact that current year earnings were less than the amount needed to cover preferred dividend requirements.

Second-quarter net income also declined from $690,000 (18 cents per share) in 1989 to $346,000 (7 cents per share) in 1990 due to the higher claims and expense levels, primarily in a newly acquired subsidiary.

#90222b0680 08/10/1990 ~Business Wire

SHEFFIELD, AL (AUG. 10) BUSINESS WIRE - Net interest income for nine months ended June 30, 1990, improved slightly when compared to last year.

However, an increase in two expense areas reduced net earnings from the same period in 1989. There was an increase in office occupancy expense

associated with start-up costs when the bank expanded market operations. FIRREA reporting requirements have added to professional fees and the Office of Thrift Supervision has increased assessments.

The bank's retirement program was fully funded within government regulation last year; consequently, no contributions were allowed. The resumption of funding for 1990 and increased health insurance premiums accounted for most of the personnel costs change.

Even though the numbers reflect a decline in earnings per share there has been a steady increase this year by quarters. The bank's spread continues to improve as adjustable mortgage loans reprice. Cost of funds fell last quarter and have held steady throughout this quarter.

Income during the fourth quarter of fiscal 1990 is expected to continually improve and should exceed any of the previous quarters of this year.

Bank management has been extremely aggressive in marketing and with personal involvement to counter the adverse publicity associated with the savings and loan crisis.

The healthy capital position of Valley Federal must be understood not only by our customer base but also by the public sector in our market area. The board of directors and management has placed a high priority on the preservation of the bank's valued image and good reputation of over 56 years.

Valley Federal's asset quality remains very high while the delinquency rate remains respectfully low. Attention to conservative loan underwriting standards has accounted for the bank's lack of problems in the portfolio.

Bank value per share of outstanding stock was $20.51 as of June 30, 1990.

#90222b0682 08/10/1990 ~Business Wire

FORT WORTH, TX (AUG. 10) BUSINESS WIRE - DeRose Industries Inc. reported net income for the three months ending June 30, 1990 of $74,000 on net sales of $5,598,000 compared to net income of $17,000 on net sales of $4,842,000 for the same period in 1989.

For the nine months ended June 30, 1990, the company reported net income of $225,000 on net sales of $16,069,000 compared to a net loss of $48,000 on net sales of $13,159,000 for the comparable period in 1989.

Keith Finley, chairman and CEO, stated that sales at the manufacturing plant in Chambersburg, Pa., remained brisk during the third quarter. This quarter is normally strong year in and year out. Our raw material suppliers have indicated that while we have enjoyed improved sales over the last year, our competitors sales have slipped slightly. Our projections for the fourth quarter continue to remain on schedule.

As indicated in the second quarter report, we felt that a satisfactory resolution to the Tampa, Fla., situation was a possibility. Recent events seem to indicate that there is a possibility that this situation could be resolved in the fourth quarter. Hopefully, we will have put this behind us going into Fiscal 1991.

Our results for the nine months have been as projected and we remain confident of a satisfactory fourth quarter to achieve our projected annual earnings.

#90222b0684 08/10/1990 ~Business Wire

COLLEGE POINT, NY (AUG. 10) BUSINESS WIRE - EDO Corp. (NYSE: EDO) Friday reported sales and earnings for the fiscal 1990 second quarter and six months ended June 30.

For the fiscal 1990 second quarter, EDO reported net earnings of $1,401,000, or 19 cents per share (after preferred dividends of 7 cents per share), on sales of $34,444,000. In the year-ago quarter, the company had net earnings of $1,519,000, or 21 cents per share (after preferred dividends of 7 cents per share), on sales of $35,398,000.

1990 six months net earnings were $2,710,000, or 36 cents per share (after preferred dividends of 14 cents per share), on sales of $67,192,000. In the comparable first half of 1989, net earnings were $2,938,000, or 40 cents per share (after preferred dividends of 14 cents per share), on sales of $68,110,000.

Net earnings for the 1990 second quarter and six months periods reflect the impact of an extraordinary gain realized through the purchase, in open market transactions, of approximately $2 million principal amount of EDO's 7 percent convertible subordinated debentures due 2011 at prices below par value.

The net gain from retirement of these repurchased debentures contributed $526,000, or 10 cents per share, to net earnings in the 1990

second quarter and first half. EDO's board of directors has authorized purchase of up to $5 million principal amount of the company's debentures in such transactions.

Commenting on operations, EDO's president and CEO, Gerald Albert, stated, ''The slight decline in revenues in the 1990 first half versus a year ago resulted from procurement delays associated with defense budget reduction initiatives.

''The decline in profitability in the quarter reflected the lower sales volume as well as an unfavorable mix of high and low margin product deliveries within the military systems segment of our business.

''In our Marine Systems segment, the Electro-Ceramic Division is consolidating production facilities to realize long-term efficiencies. This consolidation has temporarily resulted in higher operating costs, adversely affecting the division's earnings in the current reporting periods.''

Second quarter and six months net earnings were also negatively impacted by an increase in costs stemming from legal fees incurred in connection with concluding the litigation phase of a contract dispute outlined in the company's 1989 annual report. A decision has not yet been rendered in this case.

EDO's backlog of unfilled orders stood at $166.7 million on June 30, approximately 6 percent above $157.1 million at the end of the 1989 second quarter. Albert stated, ''We are encouraged by the stability of new order input in our particular product niches enabling us to sustantially replenish production from our order backlog.''

EDO Corp. designs and manufactures advanced electronic and specialized equipment for military and commercial aerospace, marine and industrial markets.

#90222b0692 08/10/1990 ~Business Wire

EXETER, NH (AUG. 10) BUSINESS WIRE - Consolidated earnings of UNITIL Corp. (AMEX:UTL) for the three months ended June 30, 1990 were $417,664, or 55 cents per share, the company announced Friday.

The second quarter results compare to consolidated earnings of 36 cents per share for the comparable three months a year earlier.

The earnings of the company for the first six months were also higher than the comparable period last year before the effect of a one-time accounting change which occurred in 1989. The higher earnings for both the three and six month periods are primarily due to the lack of impact on expenses in 1990 related to the ongoing, 16 month old hostile tender offer by Boston-based Eastern Utilities Associates (EUA).

The New Hampshire Public Utility Commission (NHPUC) is currently considering whether to approve or disapprove the proposed hostile acquisition and its effects on New Hampshire ratepayers. The company has already presented evidence which suggests that an acquisition by EUA would present the risk of cost increases of up to 20 percent for UNITIL's New Hampshire retail electric customers.

The Office of Consumer Advocate of the State of New Hampshire, after analyzing EUA's proposal concluded that ''...EUA has failed to make a case that the public good will be served by the proposed take-over (of UNITIL).'' The NHPUC is expected to reach a decision in the matter by the end of September.

For the 12 months ended June 30, 1990, per share earnings, before the impact of the one-time accounting change, were down 70 cents from the same period a year ago primarily due to expenses recorded in the last six months of 1989 related to the hostile takeover attempt and the company's proposed merger with Fitchburg Gas and Electric Light Co.

UNITIL is a New Hampshire based utility holding company. Subsidiaries are Concord Electric Co., Exeter & Hampton Electric Co., UNITIL Power Corp., UNITIL Realty Corp., and UNITIL Service Corp.

FITCHBURG, MASS. (AUG. 10) BUSINESS WIRE - Earnings of Fitchburg Gas and Electric Light Co. (AMEX:FGE) for the three months ended June 30, 1990 were $175,860, or $.10 per share, the company announced Friday.

The second quarter results compare to a loss of $(.42) per share for the comparable three months a year earlier.

The earnings of the company for the first six months were also markedly

higher than the comparable period last year before the effect of a one-time accounting change which occured in 1989. The higher earnings for both the three and six month periods are primarily due to the lack of impact on expenses in 1990 related to the ongoing, 16 month old hostile tender offer by Boston-based Eastern Utilities Associates (EUA).

EUA is currently involved in a proceeding before the New Hampshire Public Utility Commission which is considering whether to approve or disapprove the proposed hostile acquisition of the company's proposed merger partner, UNITIL Corp., and its effects on New Hampshire ratepayers. A decision in that proceeding is not due until the end of September.

For the 12 months ended June 30, 1990, per share earnings, before the impact of the on-time accounting change, were also up $.14 from the same period a year ago mainly due to a decrease in expenses related to the hostile takeover attempt and the company's proposed merger with UNITIL Corp.

Fitchburg Gas and Electric Light Co. is an operating public utility providing electric service to over 25,000 customers and natural gas service to over 15,000 customers in north central Massachusetts.

#90222b0705 08/10/1990 ~Business Wire
NEW YORK (AUG. 10) BUSINESS WIRE - Phoenix Re Corp. (NASDAQ/NMS:PXRE) Friday announced results for the second quarter and six-month period ended

June 30, 1990.

The company's earnings continued to reflect the adverse effects of losses incurred from the European windstorms during the first quarter and the highly competitive pressures that exist in the insurance and reinsurance markets, along with the increased cost of the company's ceded reinsurance.

Revenues for the second quarter of 1990 were $10,052,000, or 1 percent less than revenues of $10,134,000 for the same period last year, and reflected a 71 percent reduction in management income due to reduced profit-related commissions on managed business. Net income for the quarter was $655,000, or 16 cents per share compared with $1,458,000, or 36 cents per share last year, representing a decline of 55 percent.

For the first half of 1990, the company's revenues declined 8 percent to $18,374,000 from $19,891,000 in the same period last year. The company reported a loss of $1,294,000 or 32 cents per share for the first six months of 1990 vs. net income of $2,958,381, or 73 cents per share in the year-earlier period.

Net premiums written for the second quarter were $6,268,000, or 18 percent less than the $7,682,000 reported in the same quarter last year. For the year to date, net premiums written were $14,110,000, compared with $15,651,000 for the year-earlier period, representing a reduction of 10 percent.

The European catastrophes have had a dual effect on the company's 1990 results in that increased loss activity also has reduced profit-related commissions on business managed by Phoenix Re for others and, therefore, has resulted in lower management fee income.

The combined ratio for the first six months was 132.0 percent compared with 94.0 percent for the same period last year. The second quarter's combined ratio was 110.6 percent compared with 95.8 percent last year, reflecting some loss development from prior quarters and reduced management income on a lower premium base.

Phoenix Re provides reinsurance products and services to a national and international marketplace, with principal emphasis on commercial and personal property risks.

#90222b0713 08/10/1990 ~Business Wire

NORTH HILLS, N.Y. (AUG. 10) BUSINESS WIRE - Hi-Shear Industries Inc.

(NYSE:HSI) Friday reported operating results for the fourth quarter and the fiscal year ended May 31, 1990.

Operating results for the year ended May 31, 1990 reflect overall improvement from the prior year despite continuing losses incurred by Hi-Shear's Space and Defense Systems operation in Reno, Nev.

Earnings of Hi-Shear's Aerospace Fastening Systems improved during the year ended May 31, 1990 as a result of the continuing surge in demand for Hi-Shear's fasteners by commercial aircraft manufacturers and a firming of fastener pricing levels.

A pre-tax loss of $9 million incurred by Hi-Shear's Space and Defense Systems operations was principally due to technical and operation difficulties encountered at the Reno facility on several larger counter-measure system contracts that continue to incur additional costs and higher than anticipated levels of unabsorbed manufacturing and engineering overhead.

Hi-Shear's backlog of orders (funded and unfunded) was $95.4 million at May 31, 1990 compared with $74.8 million at May 31, 1990, and increase of 32 percent. This increase reflects an acceleration of market demand for aerospace fasteners in the commercial aircraft market.

Taking into account the foregoing results, the Board of Directors announced the declaration of a quarterly cash dividend of 5-1/2 cents per common share payable August 30 to shareholders of record August 24.

Hi-Shear is a leading designer and manufacturer of aerospace fastening systems as well as highly specialized ordnance and electronic products and systems used for space and defense applications.

DENVER (AUG. 10) BUSINESS WIRE - Compliance Recycling Industries Inc. (NASDAQ Symbol:CRIK) Friday announced that the company has signed a five-year lease for its Chicago facility and corporate headquarters.

The announcement was made by Jeffrey L. Stanich Sr. chairman of the waste treatment firm.

Stanich said that the lease, which has a five year option, is for 60,000 square feet of space at 911 South Menard, which is located in an Enterprise Zone.

''We plan to be fully operational from this facility by October of this year. In the meanwhile, we have been selling Compliance Systems to metal finishers and platers in the Chicago metropolitan area. The four systems that are currently installed in this region are being serviced temporarily from our regeneration center in Levittown, Pa.''

According to Stanich, the Center in Chicago will house the corporate offices, which will move to Chicago from Denver, as well as the

regeneration manufacturing and smelting activities of the company.

''When we are fully operational, we anticipate that we will employ 45 individuals at the facility,'' Stanich said.

He added, ''Our address is particularly noteworthy: in today's plating marketplace, non-compliance can mean a jail sentence at Menard State Prison. So, if you're a metal plater, and you are in need of help, write to us at 911 (for emergency help) South Menard (to avoid that place).''

Compliance Recycling Industries Inc., is a service-oriented hazardous waste treatment company whose product, The Compliance System, effectively removes toxic heavy metals and cyanides from water and allows these metals to be recycled into raw materials for use in industry. The company manufactures, sells and services its product line from Regional Operations Centers. In addition to the new Chicago Regional Operations Center, others are located in the Philadelphia and Denver areas.

#90222b0730 08/10/1990 ~Business Wire

TUSTIN, Calif. (AUG. 10) BUSINESS WIRE - Quality Systems Inc. (NASDAQ:QSII) Friday reported revenues of $3,648,100 and net earnings of $132,900, or 3 cents per share, for the first fiscal quarter ended June 30 1990.

These results compare with revenues of $2,559,200 and net earnings of $112,700, or 3 cents per share, for the quarter ended June 30, 1989. This first fiscal quarter marks a return to profitability for the company.

Revenues from sales of computer systems, upgrades and supplies increased by $1,146,600 from $1,453,900 in the first quarter of last fiscal year to $2,600,500 in this first fiscal quarter. This increase in sales is attributable to acceptance of the company's enhanced family of IBM UNIX-based medical and dental systems by both new clients and QSI's existing clients.

The cost of products and services decreased from 65 percent of revenues in the quarter ended June 30, 1989, to 62 percent in the quarter ended June 30, 1990. This decrease resulted from a greater proportion of higher margin, larger system sales in this first fiscal quarter. The company believes that its IBM UNIX-based systems are well-suited to the needs of this larger system marketplace.

Selling, general and administrative expenses increased from $690,100 in

the quarter ended June 30, 1989, to $1,069,100 in the quarter ended June 30, 1990, primarily due to a significant expansion of the company's marketing and sales efforts.

This expansion included additional sales staffing and accelerated marketing and promotional activities associated with the increased market penetration of the IBM UNIX-based systems. Also, the company continued to strengthen its management and staffing structure with the addition of key personnel during the quarter.

Research and development expenditures for the quarter were $226,400 as compared with $182,600 for the prior first fiscal quarter. These expenditures reflect the company's continuing efforts to significantly enhance the functionality and flexibility of its systems.

The company remains financially strong, with $4,122,400 of cash and cash equivalents, no long-term debt and no other borrowings at June 30, 1990.

Quality Systems is engaged in the sale of computerized information-processing systems to medical and dental group practices.

#90222b0735 08/10/1990 ~Business Wire

PONCE, PUERTO RICO (AUG. 10) BUSINESS WIRE - The board of directors of Ponce Federal Bank F.S.B. (NASDAQ:PFSB) Friday announced that they have accepted, with regret, the retirement of Ramiro L. Colon Jr. Esq. as president and chief executive officer of the bank.

Colon will continue to serve as chairman of the board during an interim management transition period.

The board also announced the appointment, subject to regulatory approval, of Hans H. Hertell Esq. as president and chief operating officer of the bank succeeding Colon in those capacities. Hertell, an attorney in Puerto Rico and former partner in the law firm of Goldman, Antonetti, Ferraivoli, Axtmayer & Hertell, also serves as a public interest director of the Federal Home Loan Bank of New York.

Colon was a charter member of Ponce Federal's board of directors in 1959. He was elected chairman and chief executive officer of the bank in 1972 and president in 1978. During his tenure as chief executive officer of the bank, the institution grew from a two office, mutual savings institution with $27 million in assets to a $1.3 billion, publicly owned, federal savings bank serving the Commonwealth through a 26 branch island-wide network supported by one of the stronger capital positions in

the thrift industry. Colon's business achievement and leadership qualities were acknowledged most recently by his election as president of the Chamber of Commerce of Puerto Rico for the 1989-90 fiscal year just completed.

Miguel D. Lausell, Esq., vice chairman of the board of the bank stated: ''The names Ramiro L. Colon and Ponce Federal Bank have been synonymous for three decades and have been in the forefront of much of the financial services innovation that has helped shape the economic and social well being of our island economy. We regret his withdrawal from active management of the bank but take comfort in his continuing association during the management transition period that lies ahead.''

Ponce Federal Bank, F.S.B., the third largest thrift institution in the Commonwealth of Puerto Rico, is a federally chartered, full-service financial institution headquartered in the Southern Coastal City of Ponce, Puerto Rico.

The bank maintains an island-wide network of 26 branches and executive offices in Ponce as well as Hato Rey, the financial center of metropolitan San Juan.

SAN FRANCISCO (AUG. 10) BUSINESS WIRE - Phoenix Laser Systems (NASDAQ:PXLS) Friday announced that human clinical trials have commenced at the Barraquer Institute Bogata, Columbia under the guidance of Drs. Barraquer and other visiting physicians from Horatio Ferrer Institute (Miami, Fla.) and Pacific Presbyterian Medical Center (San Francisco) for Phoenix Opthalmic Surgical Workstation.

The trials began Thursday, Aug. 9.

The start of Phase I of clinical testing under FDA guidelines for corneal refractive surgery was, according to H. Alfred Sklar, director of research and development for Phoenix, a major landmark in the development of the company's technology.

Sklar went on to state that the first cases treated with Phoenix technology showed (1) clearly defined stromal lesions or ''bubbles'' as referred to by Phoenix, (2) that the lesion pattern exactly matched the

pattern programmed preoperatively, (3) that the lesion pattern was imbedded alternatively in either anterior stroma or mid-stroma following the requested pattern depth, (4) no evidence of Tindall or other inflammatory response was observed postoperatively, and (5) the early clinical response shows a refractive alteration similar to evolving patterns observed during preclinical tests.

The Phoenix Ophthalmic Surgical Workstation is a self-contained proprietary workstation that combines on-line diagnostic measurement, advanced laser beam positioning, high speed tissue tracking, and therapeutic devices for the precise control of laser surgery. The company's technology permits surgery at cellular levels without creating significant thermal damage to surrounding cells.

HARTFORD, Conn. (AUG. 10) BUSINESS WIRE - Bolstered by strong performances from life insurance and investment operations, ITT Hartford Insurance Group's net income increased in both the second quarter and first six months of 1990.

However, earnings from The Hartford's property- casualty operations continued to suffer from difficult market conditions in North America.

For the quarter, net income from worldwide insurance operations totaled $69 million, up 47 percent from $47 million in the second quarter last year. For the first six months of 1990, net income grew 21 percent to $137 million, compared with $113 million during the same period in 1989.

Second-quarter and six-month results in 1989 included a $27.5 million charge against earnings due to the writedown of The Hartford's investment in Thomson McKinnon Inc., a New York-based brokerage firm.

ITT Hartford Insurance Group, a subsidiary of ITT Corp., is one of the nation's oldest and largest international insurance and financial services operations. Member companies offer commercial property and casualty insurance, automobile and homeowners coverages, and a variety of life insurance, employee benefit and asset management plans.

ITT Corp. is a diversified enterprise engaged principally in a variety of product and service businesses that includes insurance, finance, automotive, electronic components and hotels.

To strengthen its identity as a member company of ITT Corp., the company

now identifies itself publicly as ''ITT Hartford.'' The legal names of the companies that comprise ITT Hartford Insurance Group have not changed.

#90222b0752 08/10/1990 ~Business Wire

NEW YORK (AUG. 10) BUSINESS WIRE - Peter J. Fearon has been named president of Universal Brands Inc. by Kenneth D. Anderson, chairman of Universal.

Headquartered in Miami, Fla., Universal is among the largest beer and beverage industry distributors in the country.

A veteran of 28 years in the brewing industry, Fearon was most recently president of Martlet Importing Co., the U.S. importer of Canada's Molson Beer & Ale, the largest selling Canadian Beer in the U.S. market. Before joining Molson in 1985, he was with Universal Brands as General Sales Manager responsible for the operations of their five branches covering Vero Beach to Key West.

Fearon began his career in the brewing business as a salesman for the Shaefer Brewery in New York and progressed within the industry to increasing responsibilities throughout the country at the brewer, importer and distributor levels. He maintains a residence in Boca Raton and will be relocating there on a permanent basis.

Fearon succeeds William G. Wiegand, current president of Universal Brands. Wiegand will remain to aid Fearon during the management transition period.

Universal's brands include those of Coors Brewing Co., Stroh Brewing, Heinekens, Becks, Corona, Perrier and New York Seltzer.

#90222b0755 08/10/1990 ~Business Wire

TIMONIUM, Md. (AUG. 10) BUSINESS WIRE - Kirschner Medical Corp. (NASDAQ:KMDC) Friday reported profits for the second quarter of 1990 and

the six months ended June 30.

Kirschner reported revenues from continuing operations for the second quarter of 1990 of $16,633,000 compared with $14,586,000 for the same period of 1989, an increase of 14 percent.

Earnings from continuing operations for the second quarter were $437,000, or 18 cents per share. Earnings from continuing operations for the second quarter of 1989 were $1,287,000, or 53 cents per share.

Gains from discontinued operations for the second quarter of 1990 of $1,712,000, or 71 cents per share compared with a loss of $610,000, or 25 cents per share for the second quarter of 1989.

For the six months ended June 30, revenues from continuing operations of $32,289,000 increased 17 percent when compared with $27,538,000 for the same period of 1989.

Earnings from continuing operations for the first six months of 1990 of $924,000, or 38 cents per share compared to $2,312,000, or 95 cents per share for the same period of 1989. Gains from discontinued operations for the six months ended June 30, of $482,000, or 20 cents per share compared with a loss of $1,198,000, or 49 cents per share for the same period of 1989.

The company said the quarterly increase in product revenues from continuing operations is attributed to growth in the sales of the Performance Knee and I.Q.L.'s reconstructive implant and F.V.M. spinal products, and the inclusion of sales of medical video systems by M.P. Video in 1990.

The gains from discontinued operations reflect the settlement of all existing legal disputes with ALM Equipment Hospitaliers, S.A., a former supplier of surgical lights to the Chick Medical Products Division and represents the reversal of previously established reserves offset by certain costs in connection with that litigation.

Kirschner said it has now completed the physical separation of its Chick and AOA businesses. Chick remains in Greenwood, S.C. and All Orthopedic Appliances administrative, sales and marketing functions have been relocated to Timonium.

Kirschner develops, manufactures and markets orthopedic instruments and implants including Reconstructive Surgery and Trauma Devices, Orthopedic Support Products and Medical Endoscopic Systems.

The company operates facilities in Timonium; Fair Lawn, N.J.; Delray Beach Fla.; Marlow, Okla.; Hopkinton, Mass.; and Valencia, Spain.

CRANFORD, NJ (AUG. 10) BUSINESS WIRE - Tofutti Brands Inc. (AMEX: TOF) Friday announced results for the second quarter and six months ended June 30, 1990.

Net sales for the thirteen weeks ended June 30, 1990 were $1,218,000 compared to net sales of $2,099,000 for the thirteen weeks ended July 1, 1989. Net loss for the thirteen weeks was $157,000, or $0.03 per share, compared to a net loss of $153,000, or $0.03 per share, reported in the comparable thirteen weeks last year.

For the twenty-six weeks ended June 30, 1990, net sales were $2,731,000 compared to net sales of $4,251,000 for the twenty-six weeks ended July 1, 1989. Net loss for the twenty-six weeks was $47,000, or $0.01 per share, compared to a net loss of $145,000, or $0.03 per share, reported in the comparable twenty-six weeks last year.

Tofutti Brands Inc. is principally involved in the development, production and marketing of Tofutti brand nondairy frozen desserts which contain no cholesterol or butterfat. The Company markets Tofutti in hard-pack pints, Tofutti Cuties and Tofutti Fruttir. Tofutti products, "Better Than Creamcheese" and Egg Watchers, are sold in grocery stores, supermarkets and retail stores.

PHILADELPHIA (AUG. 10) BUSINESS WIRE - Jefferson Bank's assets totalled $406 million at June 30, a 14-percent increase over the prior June total of $357 million, announced Betsy Z. Cohen, chairman of the board.

Total loans increased to $317 million at June 30, a 15-percent increase for the 12-month period then ended. Deposits increased during the same period from $321 million to $367 million. Earnings and earnings per share for the second quarter, respectively, totalled $588,000 and 18 cents compared to $665,000 and 21 cents in the comparable prior year period.

Pressure on the bank's interest margin continued as the cost of funds remains high. Jefferson Bank has recently completed a substantial expansion of its branch system, opening new offices in Exton, Bala Cynwyd and Manayunk during the past six months. The addition of these branches should generate new loans and core deposits and help to reduce the bank's cost of funds.

Jefferson Bank is a commercial bank, member FDIC, which has been serving the Delaware Valley for 16 years. The bank has 13 locations in Philadelphia, Montgomery and Chester Counties.

ATLANTA (AUG. 10) BUSINESS WIRE - Fulton Federal Savings Bank (NASDAQ:FFSB) reported Friday that, in light of the rejection by the district director of the Office of Thrift Supervision (the ''OTS'') of its capital plan, the bank had entered into an operating agreement with the OTS.

The agreement essentially embodies the existing growth and investment restrictions to which the bank is subject and reflects the board of

directors' willingness to work with the OTS in effectuating a resolution of the institution's substantial capital deficiency.

DECATUR, AL (AUG. 10) BUSINESS WIRE - William D. Powell, president and chief executive officer of First Federal Savings Bank (NASDAQ/NMS: FFSD), Decatur, Friday announced that First Federal's board of directors has increased the quarterly cash dividend to 15 cents per share on the savings bank's common stock.

This is a 50 percent increase from the previous quarterly cash dividend of ten cents per share. The cash dividend will be payable on Sept. 20, 1990, to stockholders of record as of Aug. 31, 1990.

"The 50 percent increase in our quarterly cash dividend is indicative of the strong financial performance demonstrated by First Federal in fiscal year 1990," stated Powell. "Our asset quality remains extremely high and our earnings continue to show improvement. We look forward to reporting our year-end results to you."

First Federal is a federally chartered, and FDIC-insured savings bank operating seven full-service offices in north Alabama.

NEW YORK (AUG. 10) BUSINESS WIRE - Commodore Environmental Services, Inc. (OTC) Friday announced that it has completed the sale of its wholly-owned subsidiaries Hesco Environmental Safety Co., Inc. (''Hesco'') and AWI Environmental Services, Inc. (''Allwash'').

As part of Management's ongoing effort to reduce Commodore's outstanding debt to its lending institution, the Company sold its environmental business. Hesco Environmental Safety Co., Inc., was purchased by a company controlled by members of the Hesco management team. In consideration of the sale of Hesco stock to the Hesco buyers, the Buyers repaid approximately $22 million of Hesco's related debt to its lending institution.

Commodore also sold its 80.1 pct. shares of common stock and all of the

outstanding preferred stock of its Allwash subsidiary for approximately $9,320,000 in cash and a release of certain bank debt guaranteed by Commodore, to members of the management team and other investors. Substantially all of the net cash proceeds from the Allwash sale will be applied to the retirement of certain outstanding Commodore obligations. In addition, in the transaction the buyer assumed approximately $9,300,000 of Allwash's existing indebtedness. Commodore noted that it plans to acquire a new business or businesses. It intends to form a committee to seek out and investigate acquisition possibilities by the Company. The Company will consider acquisitions in a number of business areas and will look for companies that are currently profitable.

Commodore also announced the resignation of Steven M. Weiss as Chairman, President, Chief Executive Officer and a Director of the Company.

MILWAUKEE (AUG. 10) BUSINESS WIRE - Badger Meter Inc. (AMEX:BMI) announced Friday that a special meeting of the shareholders has been scheduled to vote on a proposal to allow present and future officers of the company to own its Class B stock.

Currently only Class B shareholders may acquire Class B stock. Class B stock is entitled to ten votes per share and the Common stock, which is publicly traded, is entitled to one vote per share. The proposal does not involve the issuance of any additional shares. Earlier this year, Badger Meter had sought a determination by AMEX that the proposal did not contravene SEC Rule l9c-4, which prohibited listed corporations from taking actions which would restrict per share voting rights of existing shareholders. At that time, AMEX deferred its decision on the proposal pending SEC action on an AMEX proposed rule change involving a similar issue. Rule l9c-4 has since been vacated by a Federal Court of Appeals.

James L. Forbes, president and chief executive officer, said that allowing officers to participate in the voting control of the company will increase the company's ability to attract and retain high quality officers and will contribute to the continued stability of the management of the company.

The meeting is scheduled to be held at 11 a.m. on Tuesday, Sept. 18, at the Milwaukee Club, 706 North Jefferson, Milwaukee. Badger Meter Inc. is a leading marketer and manufacturer of products using flow measurement and control technology serving the industrial and utility markets worldwide.

WAREHAM, MA (AUG. 10) BUSINESS WIRE - Tons of Toys Inc. (NASDAQ:TONS) and T.H.E. Corp. Inc. Friday announced that they have completed their exchange of shares, and have funded Tons of Toys' reprganization as previously approved by the United States Bankruptcy Court in Boston.

The shareholders of T.H.E. Corp. Inc., the parent company of Merchants West, Karl's, Toys Plus and Toys Galore, have exchanged their shares for a controlling interest in Tons of Toys. Thereafter, these corporations will manage 52 stores on the east and west coasts. In connection with this exchange, PT. Bank Niaga, Los Angeles Agency, T.H.E. Corp. Inc.'s principal lender, has increased its credit line to provide credit to Tons of Toys to finance inventory and working capital requirements.

A venture capital investor and bank which held convertible subordinated debt of Tons of Toys have exchanged this debt for shares of convertible preferred stock of Tons of Toys. In addition, PT. Bank Niaga, Los Angeles Agency's investment banking group has been retained to assist the companies in obtaining equity financing.

Bruno R. Ferretti, president, stated that the reorganization now allows Tons of Toys to resume normal operations in its stores. Tons of Toys operates 20 toy supermarkets in Maine, Massachusetts, New Hampshire, New York, Rhode Island and Vermont. Its product line features more than 8,000 brand name toys, wheel goods, and juvenile and baby needs products. Merchants West, Karl's, Toys Galore and Toys Plus operate 32 toy stores in California, Nevada and the State of Washington.

#90222b0790 08/10/1990 ~Business Wire
HAMMONTON, NJ (AUG. 10) BUSINESS WIRE - Empire Financial Corp. (EMPR), the parent company of Empire Savings Bank, SLA and subsidiary, Friday announced that the Office of Thrift Supervision (OTS) completed its examination of Empire and as a result, Empire will be required to increase its provision for loan and real estate losses by $3.9 million.

Empire previously reported that additional reserves may be required as a result of the examination.

The additional provision for loan and real estate losses will bring

Empire's total loans and real estate loss reserves to $9.2 million and although results of operations for the year ended June 30 are as yet unavailable, management anticipates that Empire will report a loss for the year ended June 30. However, Empire said it expects to recognize a $1.2 million tax refund from its 1990 federal tax return due to the recovery of taxes paid in prior years under the loss carry back provisions of the tax law.

This will have the effect of reducing the loss for the period.

Empire's non-performing assets increased to $23.8 million or 10.9 percent of total assets of $218 million at June 30, compared to $11.4 million or 4.9 percent of total assets of $233 million at March 31. The increase in non-performing assets was attributable to several large real estate construction loans and direct investments in real estate becoming non-performing during the quarter.

Empire previously reported that the bank did not meet applicable capital standards and would be submitting a revised capital plan to the OTS. A revised capital plan was filed and Empire plans to submit an amendment to its revised capital plan to reflect the additional reserves which have further reduced Empire's capital below the regulatory standards as well as to provide other updated information. OTS has not yet acted upon the revised plan.

Since the filing of its revised capital plan, Empire has been working toward restoring the bank's capital and Empire is involved in negotiations which could result in the infusion of additional capital although no assurance can be made at this time that a transaction will ultimately be consummated.

President and Chief Executive Officer Frank M. Calletta noted, ''These results reflect the more conservative approach by federal regulators in making thrift industry credit evaluations relating to loan and real estate loss reserves and the current uncertain economic trends of the real estate market.

''Empire's $9.2 million of loan and real estate reserves represents approximately 39 percent of the bank's total non-performing assets. This ratio of total reserves to non-performing assets compares favorably to the thrift industry, particularly for thrifts of Empire's asset size. In addition, Empire has been concentrating on decreasing its investment in real estate construction loans and direct real estate investments.

''Empire's recent efforts have resulted in an $10.8 million, or 43 percent reduction in real estate construction loans as of June 30, 1990 compared to June 30, 1989. Similarly, Empire has reduced its direct investment in real estate $3.5 million or 34 percent, net of reserves established,

during the same period.''

Headquartered in Hammonton, N.J., Empire Financial Corp. is a unitary savings and loan holding company, which owns and operates Empire Savings Bank, SLA, and its subsidiary. Empire Savings Bank, SLA, a New Jersey chartered thrift and equal opportunity lender, operates full service banking centers in southern New Jersey. Empire's customer accounts are insured to the fullest extent permitted by the Federal Deposit Insurance Corp.'s Savings Association Insurance Fund.

#90222b0794 08/10/1990 ~Business Wire

MERRIMACK, NH (AUG. 10) BUSINESS WIRE - Chemical Fabrics Corp. (CHEMFAB) (OTC:CMFB) Friday announced results for its fourth quarter and year ended June 30, 1990, and recent developments in the Metrodome litigation.

As previously announced, in April 1990, a Minneapolis jury assessed $2.2 million in damages against CHEMFAB under a lawsuit filed in connection with the construction in 1981 of the roof on the Hubert H. Humphrey Metrodome stadium. Interest on the assessment through June 30, 1990 amounted to an additional $1.3 million. On August 9, 1990, the company was informed that the trial court denied its motions for relief from the judgement and, in the alternative, for a new trial. Accordingly, the company has now established a $3.5 million reserve to provide for this loss contingency, resulting in a $2.9 million non-recurring pre-tax charge to earnings, for the quarter ended June 30, 1990.

This charge to earnings, net of changes to certain profit-based accruals and the company's overall effective tax rate, reduced earnings for the quarter by 33 cents per share.

For the quarter ended June 30, 1990, the fourth quarter of fiscal 1990, CHEMFAB's worldwide sales increased by 16 percent to $13,140,000 compared with $11,295,000 for the same quarter in fiscal 1989. As a result of the above described non-recurring charge to earnings, net income for the quarter fell to $26,000 or 1 cent per share, compared with net income of $1,145,000 or 23 cents per share for the same quarter in the prior fiscal year. Gross profit margins on fourth quarter consolidated net sales improved to 36 percent from 34 percent for the comparable quarter in 1989.

Commenting on the loss reserve, Duane C. Montopoli, CHEMFAB's president and chief exeuctive officer said, ''Although the time has come to get the Metrodome litigation behind us from an accounting standpoint, we're a long way from conceding defeat in the matter. We will now appeal the verdict

at a higher court level, and we remain optimistic that we will ultimately prevail in this dispute.''

For the year ended June 30, 1990, CHEMFAB's worldwide sales increased by 23 percent to $48,726,000 from $39,751,000 for fiscal 1989.

Full year net income was $3,697,000 or 73 cents per share, compared with net income of $4,096,000 or 84 cents per share for fiscal 1989. Gross profit margins on consolidated net sales for the year improved to 35 percent from 34 percent for fiscal 1989. Net income for the prior fiscal year included an extraordinary item in the amount of $432,000 resulting from the utilization of net operating loss carryforwards. Income before extraordinary item was $3,664,000 or 75 cents per share. Fiscal 1990 results do not include the benefit of any extraordinary item.

CHEMFAB is an international advanced performance materials company that designs, manufactures and markets flexible composite products intended for use in extreme environments. Typical products consist of woven fiberglass or other high-strength reinforcements coated or laminated with thermoplastics and elastomers, and specialty fluoropolymer films. Worldwide end-use applications are in industrial, architectural, communications, military and protective clothing markets.

#90222b0795 08/10/1990 ~Business Wire

HUNTINGTON STATION, NY (AUG. 10) BUSINESS WIRE - Protein Databases Inc. (OTC:PDIQ) Friday reported net loss for the second quarter ended June 30, 1990 of $107,265 on revenues of $581,774 compared with net loss of $336,600 on revenues of $179,451 for the quarter ended June 30, 1989.

The per share loss was $.001 in the second quarter of 1990 compared with $.004 in the same period of 1989. The net loss for the six months ended June 30, 1990 was $274,181 on revenues of $1,040,385 compared with net loss of $696,198 on revenues of $369,076 for the six months ended June 30, 1989. The per share loss was $.003 in the six months ended June 30, 1990 compared with $.007 in the same period of 1989.

The revenues include Original Equipment Manufacturers (OEM) equipment costs of $263,367 and $438,068 in the second quarter and six months ended June 30, 1990, respectively, as compared with $79,645 and $147,131 of such sales in the second quarter and first six months of 1989, respectively.

However, the company's present financial position is remains critical. Additional funds will be required during the third quarter ended Sept. 30, 1990 or shortly thereafter. The company is exploring potential sources of additional financing but there can be no assurance that additional funds from external sources will be available, in which event, the company may be forced to cease operations.

Protein Databases Inc. markets protein and DNA analysis software systems for life science research and biotechnology applications at universities and research hospital laboratories, and at government, industrial and other research laboratories and comparable foreign institutions.

#90222b0807 08/10/1990 ~Business Wire

TORONTO (AUG. 10) BUSINESS WIRE - Corona Corp. Friday reported net earnings of $15.1 million, or 9 cents per share, for the six months ended June 30, 1990.

Net earnings for the same period in 1989 were $18.9 million, or 12 cents per share, and included an extraordinary item of $581,000 which represented a reduction of deferred income taxes on the application of previous years' losses.

The results for the first half of 1990 reflect higher operating earnings offset by lower interest and investment income and higher interest expenses and depreciation charges. Earnings in 1989 included a gain on the monetization of a gold loan of $7,688,000.

Second-quarter net earnings were $4.6 million, or 2 cents per share, in 1990 and $13.9 million, or 9 cents per share, in 1989. The 1990 results primarily reflect lower operating earnings and lower interest and investment income.

Revenues for the first half of 1990 were $166.9 million compared with $149.3 million for the same period in 1989. Second-quarter revenues of $75.8 million in 1990 compared with 1989 second-quarter revenues of $80 million.

Higher gold production in 1990, primarily from the Williams, David Bell, Marigold and Santa Fe mines, was offset by lower realized gold prices and the strong Canadian dollar, especially in the second quarter.

Production of gold and gold equivalent for the six months of 1990 was

367,012 ounces, an increase of 14.8 percent over the 319,616 ounces of gold and gold equivalent produced in the first half of 1989.

Direct operating-costs-per-ounce of gold produced declined by 10 percent to an average of $203 (USDLR) in the first half of 1990, in spite of a strong Canadian dollar. In the equivalent 1989 period Corona's direct operating costs averaged $226 (USDLR) per ounce of gold.

In calculating basic earnings per share, the weighted average number of shares outstanding for the six months ended June 30, 1990, was 149.1 million, compared with 135.6 million for the year-earlier period. Earnings-per-share figures for both years are after preference-share dividends.

#90222c0036 08/10/1990 ~Comtex

WASHINGTON (AUG. 10) COMTEX - The 8-K report filed at the SEC shows on Aug. 7, 1990, Graystone Companies Inc. reported preliminary results for the second quarter ended June 30, 1990. Graystone reports revenues of approximately $413,301 and a pre-tax net loss of approximately $377,556.

Graystone also announced that all efforts to secure financing which would enable it to maintain current staffing until its Form S-1 registration statement currently on file with the Securities and Exchange Commission has

been declared effective had not been successful to date.

Graystone reports it is still attempting to borrow or raise equity capital of approximately $250,000 which it believes would give it sufficient working capital through Oct. 1990.

Due to its deteriorating working capital situation, on Aug. 3 Graystone reports it reduced its work force from 35 full time employees to 30 full time e mployees.

Graystone Companies Inc. reports additional layoffs are anticipated over the next two weeks.

On Aug. 3, 1990, Stephen B. Hadelman resigned as a director of Graystone Companies Inc.

Graystone's executive office is located at 8 South Commons Road, Waterbury CT 06704 and its telephone number is (203) 755-4226.

MANILA (AUG. 10) - Philippine communist insurgents vowed Friday to attack U.S. government targets if Washington used its military bases in this country in its intervention in the Gulf crisis.

If Washington used its bases in the Philippines to intervene in the Gulf, the National Democratic Front (NDF) "will not hesitate to launch intense and all-out politico-military offensives against U.S. imperialism," the NDF said in a statement to news agencies here.

The NDF is a political organization of the banned Communist Party of the Philippines (CPP), whose New People's Army (NPA) has been fighting a guerrilla war with the Manila government for 21 years.

There was no immediate comment from the U.S. Embassy.

The NPA has assassinated five U.S. servicemen and two U.S. Defense Department employees in the past three years as part of a campaign to

force out U.S. troops from the major military facilities at Clark Air Base and Subic Naval Base.

Philippine diplomats have said Clark and Subic could resupply the U.S. facility at the Indian Ocean island of Diego Garcia, which they say could be involved in a long-term U.S. deployment in the region.

The NDF said the Iraqi use of force against Kuwait to settle disputes with its tiny neighbor was "uncalled for" and "disturbed regional peace and unity among Arab countries which the United States and other imperialist powers have tried to exploit to their advantage."

U.S. Ambassador to the Philippines Nicholas Platt said earlier this week that Washington has consulted Manila on the Gulf crisis.

Philippine President Corazon Aquino has said Washington would need to undertake prior consultation with Manila if it wanted to use the bases for its military mission in the Gulf.

#90222d3000 08/10/1990 ~French/German News Agency

WASHINGTON (AUG. 10) - More airlines have announced fare increases, citing increases in fuel prices even though oil companies announced on the same day they were freezing or lowering prices.

Delta, United, USAir and American hiked fares by 5.3 per cent and Northwest said it would scrap an eight dollar per flight surcharge but would impose a 10 per cent fare increase. The increases are effective August 15.

"Airline ticket prices are going up, and we want our passengers to know why. Jet fuel prices have gone through the roof," said Air Transport Association President Robert Aaronson.

But three big oil companies -- Texaco Inc., BP America Inc., and Conoco Inc. -- said they were trimming gasoline prices from a penny to four cents a gallon after public outcry over alleged price gouging.

Temporarily freezing their prices were Chevron Corp., Unocal Corp. and Getty Petroleum Corp.

After the Iraqi invasion of Kuwait on August 2, oil companies and gasoline stationss hiked their prices, drawing angry charges of using the crisis in the Gulf as a pretext to gouge consumers.

Texaco said it would cut gasoline prices to resellers by as much as three cents a gallon, BP cut pump prices by three cents a gallon, Conoco dropped wholesale prices by three to four cents and Getty froze prices for a week.

Other big companies like Exxon Corp., Mobil Corp. and Shell Oil Co. said they had not increased prices in recent days and would practice restraint, making sure that pricing reflects market conditions.

But experts warn that conditions may get worse.

Even if other oil-producing nations start pumping to capacity to make up for the shortfall caused by the Gulf crisis, they said prices this fall could double or even triple the June level of 15.50 dollars a barrel.

#90222d3040 08/10/1990 ~French/German News Agency

MOSCOW (AUG. 10) - The Soviet Navy is ready to evacuate Soviet citizens from Iraq should this become necessary, a Soviet naval spokesman said Friday.

Rear-admiral A. Karlin, deputy head of the navy's political department, told the army newspasper ''Kraznaya Szezda'' in an interview published Friday that the fleet had experience in this respect.

Karlin reiterated that no Soviet naval vessels would take part in a blockade of Iraq or any possible military action against Iraq.

Two Soviet warships passed through the Suez canal Thursday, heading for the Red Sea on their way to the Gulf.

#90222d3210 08/10/1990 ~French/German News Agency

TEHERAN (AUG. 10) - Iran on Friday denied U.S. reports that it had been in contact with the United States on the Gulf crisis.

A foreign ministry spokesman said the Swiss ambassador here, who represents U.S. interests, had "offered certain viewpoints in relation with Iraq's invasion of Kuwait" in a meeting with ministry officials.

But he stressed that no message had been exchanged between Iran and the United States over the past few days.

"We voiced the position of the Islamic Republic of Iran in relation with current developments in the region, which had been previously announced in various government communiques," the spokesman said in a dispatch from the official news agency IRNA.

U.S. Secretary of State James Baker on Wednesday declared that Washington had been in touch with Iran, a key Iraqi adversary, through the Swiss

Embassy here.

Iran has condemned Iraq's invasion of Kuwait and rejected its annexation of the Gulf emirate.

While Iranian authorities initially warned against foreign intervention in the crisis, they have lately appeared to revise their stand, as the long-term occupation of Kuwait by Iraq would be unacceptable to Teheran.

The Teheran Times, a leading Iranian newspaper close to the government of President Ali Akbar Hashemi Rafsanjani, on Thursday expressed support for foreign military action against Iraq, provided it was overseen by the United Nations.

Several Western nations, led by the United States, have bolstered their military presence in the Gulf following the invasion.

But the forces to date are serving under their national flags rather than than of the United Nations.

#90222d3220 08/10/1990 ~French/German News Agency
SEOUL (AUG. 10) - Samsung Electronics Co. said Friday it had developed its own super memory chip, bringing South Korea on par with Japan and the United States in semiconductor technology.

A company announcement said Samsung designed and produced the 16-mega dynamic ramdom access memory (DRAM) chip after 16 months of effort, making South Korea the third country to develop the state-of-art chip.

Only four companies in the world -- Japan's Hitachi, Toshiba and NEC and IBM of the United States -- have so far succeeded in putting out 16-megaDRAM new generation chips, the announcement said.

A 16-megaDRAM chip can store information equivalent to 128 pages of newsprint in a space the size of a thumb nail and is used, among other things,
in high-definition television sets, work stations and super computers.

Samsung will begin commercial production of the chips for sale by the end of next year, the announcement said.

One megaDRAM chips, which now hold the lion's share of the semiconductor market, are expected to be replaced by four megaDRAM chips by 1992 and 16 megaDRAMs are expected to be used frequently after 1994, a Samsung official said.

Samsung Electronics Co.'s 1989 net pre-tax profit tax was 158 billion won (220 million dollars) on sales of 4,000 billion won (5.6 billion dollars), but industry sources said it was losing money in semiconductors due to a glut on the world market.

#90222d3360 08/10/1990 ~French/German News Agency

MANILA (AUG. 10) - Three Filipino workers have been killed and three others raped in Kuwait, Philippine President Corazon Aquino said here Friday,
correcting her earlier statement that the incidents occurred in Iraq.

Mrs. Aquino said in a statement that the killings and sexual assaults occurred in Kuwait, without giving details.

The statement corrected a version issued earlier Friday in which Mrs. Aquino said the incidents occurred in Baghdad.

Mrs. Aquino said she was "deeply concerned" about the information relayed to her by Labor Secretary Ruben Torres, whom she sent to Saudi Arabia earlier this week to supervise the evacuation of Filipino workers who have fled Kuwait.

About 60,000 Filipinos are working in Kuwait and 5,000 in Iraq. Only a few have been able to leave Kuwait so far.

Shirley Gorospe, a Filipina domestic helper in Kuwait who arrived here on Friday via Saudi Arabia, told reporters at the airport that "Iraqi soldiers are raping the women there, Filipinas included."

She said she knew one of the rape victims, who she said was "in a state of shock" and was sheltering in the Philippine Embassy in Saudi Arabia.

"The Iraqi soldiers are raping a lot of women. They forcibly enter homes, loot them of food and rape the female occupants," she added.

Assistant Foreign Secretary Israel Bocobo told reporters here Friday that 220 Filipino workers from Kuwait had arrived in Baghdad.

An official from the Philippine Embassy in Baghdad is travelling to the Kuwait-Iraq border to monitor the evacuation, he said, adding that the workers were passing that way because it was easier to cross than the Kuwait-Saudi border, which has been closed by Iraqi troops.

#90222d3390 08/10/1990 ~French/German News Agency

BRUSSELS (AUG. 10) - The rate of unemployment throughout the European Economic Community (EEC) remained steady at 8.6 percent of the workforce, unchanged on the March figure, official EEC figures showed on Friday.

The Eurostat statistical office, which issued the figures, said that they had been adjusted for seasonal and national variations.

During the last 12 months the rate had fallen by 0.7 percent and by 1.5 per cent during the last two years.

In May 1990 13.6 million people were registered as unemployed compared with 14.3 million in May 1989.

-30- 732

#90222d3420 08/10/1990 ~French/German News Agency

ROTTERDAM, NETHERLANDS (AUG. 10) - The Anglo-Dutch Unilever group increased first-half net profits by four per cent over the same period of last year to 1.709 billion guilder (955 million dollars) the company reported on Friday.

Net profits per share rose to 6.09 guilder (about 3.4 dollars) from 5.87 guilder in the first half of 1989.

Excluding exchange-rate variations, net profits rose by 12 per cent to 1.799 billion guilder, the company said.

Sales rose by 14 per cent to 37.82 billion guilder partly due to the consolidation of results from companies which had been purchased. Operating profits rose by 15 per cent to 3.44 billion guilder.

#90222d3540 08/10/1990 ~French/German News Agency

LONDON (AUG. 10) - Egyptian military forces will not join the Western forces gathering in the Gulf to defend Saudi Arabia from an Iraqi attack, Egyptian ambassador to Britain Mohamed Shaker said here Friday.

Cairo instead favored an Arab-only solution to the Gulf crisis and believed the Arab League was the "ideal framework" for resolving the conflict, Mr. Shaker said.

Speaking in an interview with BBC radio, Mr. Shaker admitted the Arab world was in a "very serious crisis" and acknowledged sharp differences of opinion between Arab leaders on how to end the eight-day-old crisis.

But asked whether Egypt would be prepared to join the multinational force in the Gulf, Mr. Shaker replied "no" and said Cairo wanted "to solve the

issue peacefully" among Arab countries.

Mr. Shaker, speaking as Arab leaders opened their crisis summit in Cairo, reiterated Egyptian President Hosni Mubarak's proposal for stationing a pan-Arab defense force to act as a buffer between Iraq and Kuwait.

#90222d3550 08/10/1990 ~French/German News Agency

BONN (AUG. 10) - Iraq has followed up its annexation of Kuwait with a demand that all foreign embassies there close down within two weeks, a Bonn Foreign Office spokesman confirmed Friday.

The Iraqi government issued its demand in the form of a diplomatic note delivered Thursday, the spokesman said. The note said all diplomatic duties should be reassigned to embassies in Baghdad.

Baghdad simultaneously said diplomatic and consular missions of the ousted Kuwaiti leader, Sheikh Jaber al-Ahmed al-Sabah, now have ''no official status''.

The United Nations has proclaimed null and void the merger of Iraq and Kuwait, which Baghdad refers to as a ''reunification''.

''After the total reunification between Iraq and Kuwait on 8th of August 1990 ... diplomatic missions in Kuwait City have no official obligations with the Iraqi government in the capital Baghdad,'' read the text of the diplomatic note, the German Press Agency dpa learned.

It called on foreign governments ''to settle their diplomatic missions' affairs which are at present in Kuwait City and transfer them to their diplomatic missions in Baghdad not later than 24th of August 1990.''

The noted added: ''On this occasion the ministry would like to point out that the diplomatic missions and consulates of the previous regime in Kuwait and all their responsibilities which they used to conduct have no official status and would be considered null.''

TAIPEI (AUG. 10) - Taiwan's Economic Ministry on Friday announced an extensive energy-saving scheme and refreshed plans for a fourth nuclear power plant in the face of unsteady crude supply and the rising cost of oil imports.

Under the conservation scheme proposed by the Energy Commission, all government offices and state enterprises were asked to cut energy

consumption by at least 10 per cent, Vice Economic Minister Chiang Pien-kun said.

The conservation scheme, which still needs Cabinet approval, is aimed at tiding over the current oil crisis triggered by Iraq's invasion of Kuwait and fostering public awareness of energy conservation as domestic consumption had reached a high in the last few days, an energy official said.

With temperatures up to 38 degrees centigrade (100 degrees Fahrenheit), the island consumed a record 14.4 million kilowats of power Thursday against total power generation capacity of 16.5 million kilowatts.

The conservation plans included suspending imports of large cars and exports of steel and cement whose production consumes too much energy, Mr. Chiang said.

He urged Taiwan residents to join the energy-saving campaign in the face of a possible energy crisis, asking for restraint in the use of air conditioners and other electrical facilities.

Premier Hau Pei-tsun on Thursday ordered the Economic Ministry to refresh plans to build nuclear power plants to meet future demand.

Plans by the monopoly Chinese Petroleum Corporation (CPC) to build Taiwan's fourth nuclear power plant -- two generators with a total installed capacity of two million kilowatts -- started in 1983.

But the 160 billion Taiwan dollar (5.9 billion U.S.) project has been shelved under pressure from environmentalists and from residents of Yenliao along Taiwan's northeastern coast, the proposed site of the plant.

The three existing nuclear power plants, with a combined capacity of 5.14 million kilowatts, account for 13 per cent of the power generated by CPC.

Energy-scarce Taiwan imports an average 431,000 barrels of crude daily to generate 51.5 per cent of the power consumed by 20 million people. It bought an average of 75,000 barrels daily from Kuwait but none from Iraq.

Saudi Arabia has been a major crude supplier, selling Taiwan a daily average of 145,000 barrels, or 33.3 per cent of the island's imports.

Economic officials have said Taiwan would have to start rationing fuel if war broke out in the Middle East, affecting oil supplies from Saudi Arabia.

NAIROBI (AUG. 10) - A total of 45,478 bags of Kenyan coffee were offered for sale to markets at Nairobi's weekly auction and 44,891 bags were sold for an average price of 2,133.93 Kenyan pounds (1,827.77 U.S. dollars) per ton.

The steady rise continued, although there was an extra interest in advance of two weeks' break in auction.

To date, 1,956,488 bags have been sold to all markets, including 755,483 bags of 198990 pool, with an overall gross average price of 2,347 Kenyan pounds (2,010.27 dollars) per ton.

The next auction is scheduled for August 28.

HANOI (AUG. 10) - Vietnamese copper thieves have stolen hundreds of kilometers (miles) of copper wire, completely knocking out telephone services in two northern provinces, the army daily Quan Doi Nhan Dan reported Friday.

The threat of death by execution has not deterred the thefts, which were committed over the last few months.

The main victims of the copper thieves over the past 1-12 years have been the state railway company, which lost 265 kms (166 miles) of copper cable, and the provinces of Cao Bang and Lang Son on the border with China where, the daily said, "the entire public telephone network has been stolen."

The copper is stolen for resale in China, Quan Doi Nhan Dan said, adding that the thefts do great harm to an already shaky telephone system.

Copper thieves could face capital punishment, it said, because the thefts threaten national security. Two have already been sentenced to death, the paper noted.

But this does not seem to have discouraged the thieves, who are often either local officials or people in charge of guarding the networks, the daily said.

#90222d3730 08/10/1990 ~French/German News Agency

SINGAPORE (AUG. 10) - Singapore has frozen all Kuwaiti assets in the republic with immediate effect, the Straits Times reported Friday.

The report, quoting Finance Minister Richard Hu, said all transfers and

withdrawals of Kuwaiti assets in Singapore would now require the approval of the Monetary Authority of Singapore (MAS), which acts as a central bank.

MAS officials were not available to confirm the report.

The Singapore move was in keeping with a U.N. resolution to impose economic sanctions against Iraq for its August 2 invasion of Kuwait.

The move will prevent any Iraqi-backed regime in Kuwait from withdrawing the country's assets abroad.

The Kuwaiti government has an investment arm in Singapore, the Kuwait Investment Office (KIO). KIO's two biggest investments in Singapore are a 33 per cent stake in the Overseas Union Bank Centre and a 49 per cent stake in a stockbroking firm.

The amount of its investments in the two organisations is said to be in the region of 250 million U.S. dollars.

"KIO's also has investments in other companies in the region through its Singapore office, but its amount is not known," said one banking source.

Singapore's trade with both Iraq and Kuwait accounted for less than one per cent of its total foreign trade in 1989. Trade with the two countries jointly amounted to about 722 million U.S. dollars.

Main imports from Iraq were food products such as dates while exports were in timber.

Petroleum products were Singapore's major imports from Kuwait while Singapore exported timber products, machinery and transport equipment.

#90222d3740 08/10/1990 ~French/German News Agency

KUALA LUMPUR (AUG. 10) - Bank Negara, Malaysia's central bank, said Friday it was seeking a court order to place a troubled finance company in receivership, paving the way for its takeover.

A Bank Negara spokesman said the order would enable it to transfer the assets and liabilities of First Malaysia Finance Bhd. to Arab-Malaysian Finance Bhd. after the troubled company was liquidated and its licence withdrawn.

First Malaysia, with total assets of 386 million dollars (143 million U.S.) at the end of 1989, had accumulated loan losses of 136.6 million dollars (50 million U.S.). The company has a paid-up capital of 20.2 million dollars (7.5 million U.S.).

The Bank Negara spokesman said Arab-Malaysian, currently the third largest of 46 locally-incorporated finance companies, would take over First Malaysia's 24 branches, boosting its own network to 50.

First Malaysia is one of four finance companies and four commercial banks the central bank has taken over in the past three years after they ran up huge loan losses.

BONN (AUG. 10) - The West German navy is to send five minesweepers and a support ship into the eastern Mediterranean Sea, government spokesman Hans Klein said here Friday.

They will be deployed if international waters are mined, and will would be send to the Gulf if needed there, he added.

The West German constitution bans the stationing of troops in troubled areas or their involvement in battles. But the eastern part of the Mediterranean is regarded as a zone inside the sphere of interest of the North Atlantic Treaty Organisation (Nato).

#90222d3850 08/10/1990 ~French/German News Agency

SYDNEY (AUG. 10) - The historic family control of Australia's John Fairfax Group Pty. Ltd. newspaper empire could end within three months, the group's chairman said in the group's flagship newspaper Friday.

Chairman Bryan Kelman made the prediction in The Sydney Morning Herald following the resignation Thursday of Chief Executive Peter King and his replacement by the paper's former editor-in-chief Chris Anderson.

The Fairfax family currently owns 100 percent of the 158-year-old group after Warwick Fairfax, a descendant of the founder, launched an ill-timed 2.1 billion dollar (1.7 billion U.S.) bid for the group, at that time listed on the stock exchange, just before the stockmarket collapsed in 1987.

Warwick Fairfax owns 75 percent of the company and his mother, Lady Mary Fairfax, the remaining 25 percent although she has no voting rights.

Mr. Fairfax had voted for the removal of Mr. King, whom he appointed after the company's 1987 privatisation.

Mr. Kelman said the Fairfax family would have its holding watered down by a

debt refinancing program within three months.

The paper said: "It is envisaged that Warwick Fairfax's equity could be reduced to as little as five to 10 percent following the refinancing."

The significance of Mr. Anderson's appointment was that he had favoured more haste in refinancing the company's 1.6 billion Australian dollar (1.3 billion U.S.) debt, the paper said.

The group's debt includes a 450 million dollar (359 million U.S.) junk bond issue arranged by the collapsed U.S. firm Drexel Burnham Lambert.

The Fairfax group has already warned the U.S. Securities and Exchange Commission that it will default on its debt by 1992-93 if the slide in advertising revenues, down 23 percent on last year, continued.

"The immediate challenge for the group is to lower the debt burden by replacing the junk bond debt -- which carries punishing interest rates -- with new equity partners," the paper said.

The group's assets include The Australian Financial Review, The Sydney Morning Herald and The Age of Melbourne.

#90222d3890 08/10/1990 ~French/German News Agency

TOKYO (AUG. 10) - Asian economies will benefit from reforms in Eastern Europe while any decline in Western aid to the region will be offset by inflows of private capital, an affiliate of Japan's Nomura Securities Co. Ltd. says.

Kwan Chi Hung, an economist at Nomura Reseach Institute, dismissed fears that Eastern Europe's demand for funds would adversely affect Asian development, especially among members of the Association of Southeast Asian Nations (ASEAN).

"This worry seems to be overstated," he said in the institute's latest monthly review. "The outlook for Asia may not be so dim."

Mr. Kwan said that reduced military spending in the United States would ultimately flow through to its budget and trade deficits.

"The resulting fall in the U.S. twin deficits should increase global savings and thus expand the size of the pie available to both Asia and Eastern Europe," he said.

"While there might be a diversion of aid from Asia to Eastern Europe, the inflow of private capital will continue to support economic development in

the Asia-Pacific region," he added.

"Indeed, the emergence of Asia's newly industrialised economies as investors in the ASEAN countries in the last few years has greatly reduced the relative importance of the United States and Western Europe."

Mr. Kwan also noted that newly industrialised South Korea, Taiwan, Hong Kong and Singapore would find Eastern Europe an attractive market for their consumer goods.

The diversion of exports to Eastern Europe "should help reduce their dependence on the U.S. market and calm trade friction," he said.

Some members of ASEAN -- which groups Indonesia, Thailand, the Philippines, Malaysia, Singapore and Brunei -- voiced concern about reduced aid at their annual meeting with foreign ministers from six industrial nations last month.

#90222d3900 08/10/1990 ~French/German News Agency

MOSCOW (AUG. 10) - The Soviet government is to raise the producer price paid by the state to farmers by an average 32 percent from January 1, according to a cabinet decision published in the press here Friday.

The increases, part of the transition to a market economy, will cover livestock and poultry, sunflowers, beetroot, cotton, linen, tobacco and tea.

It will be up to the governments of the Soviet republics to set producer prices for other items.

The increases are aimed at bringing the prices paid to producers closer to production costs, reducing state subsidies, and encouraging Soviet farmers to increase production.

#90222d3960 08/10/1990 ~French/German News Agency

VEVEY, Switzerland (AUG. 10) - Nestle, the world's largest agro-food group, said Friday its turnover in the first half of this year was virtually unchanged from the same period of 1989, at 22.7 billion Swiss francs (16.3 billion dollars).

Turnover in the first half of last year came to 22.8 billion Swiss francs.

The stagnation was due to currency fluctuations, particularly of the yen and the dollar, Nestle said, estimating that exchange rate differences had

reduced turnover by 12 percent in the first half.

This was only "partially offset by price rises in high inflation countries " and "lower commodities prices, particularly of coffee, also play a role as they affect the selling price" on "a certain number of major markets," the group said.

Sales volume was up two percent in the first half of 1990 from the same period last year, but the group said it was "expecting better sales volume in the second half."

Consolidated turnover for the full year would depend on sales volume and exchange rate movements "which at the moment prevent any reliable forecasting."

Nestle had a consolidated turnover of 48.03 billion Swiss francs (32.6 billion dollars) last year, up 21.6 over the 1988 level, with net profit up 17.2 percent at 2.41 billion francs (1.45 billion dollars).

#90222d3970 08/10/1990 ~French/German News Agency

HONG KONG (AUG. 10) - China has received a government loan from Spain to modernize a Shanghai cement plant, the pro-Beijing Ta Kung Pao newspaper reported here Friday.

A Spanish Embassy source in Beijing said the 15 million dollar loan was to be drawn from a 250-million-dollar credit line for 1989-90 signed before last year's suppression of the democracy movement in Beijing, which was followed by Western economic sanctions against China.

The loan will be used for technology from Spain and Denmark to modernize the old plant in a way to save more than 80,000 tons of coal a year and eliminate 91.5 percent of the dust it produces, the newspaper said.

#90222d3980 08/10/1990 ~French/German News Agency

KUALA LUMPUR (AUG. 10) - The Gulf crisis is not expected to badly affect Malaysia's crude oil imports from West Asian countries, an official of the national oil company Petronas said Friday.

Petronas chairman Basir Ismail said Malaysia's crude imports from West Asia,
mainly through the Shell and Esso oil companies, was negligible.

Petronas received no instructions from the government to increase production in order to cope with an anticipated shortage following the

crisis, he said.

Malaysia's current output is 590,000 barrels per day.

Experts say Malaysia, a net exporter of crude oil, has limited capacity to raise production.

Mr. Basir said he expected the Gulf crisis to send local crude prices higher.

Malaysia's Tapis benchmark was traded at 29 U.S. dollars a barrel Wednesday,
 compared with 17 dollars before Iraq invaded Kuwait.

He said that if a local supply problem were to arise, Petronas would meet the oil companies to overcome it.

#90222d4030 08/10/1990 ~French/German News Agency
SUVA (AUG. 10) - Japan's Electronic and Industrial Enterprises Corp. (EIE) Friday bought a 7.5 percent stake from the government in Fiji's national carrier, Air Pacific, a tourism ministry official said.

The spokesman said EIE won the parcel for an undisclosed sum in recognition of its investments in Fiji.

The Japanese multinational is investing about 210 million U.S dollars in an island resort here.

The Fiji government holds the controlling stake in the airline that showed an 11.7 million dollar profit in the year up to March 31.

The government saw the sale as beneficial "from the point of view of Air Pacific's Japan service and EIE's investment and commitment in the tourism industry now and in the future," a tourism spokesman said.

#90222d4090 08/10/1990 ~French/German News Agency
BRUSSELS (AUG. 10) - Foreign ministers of the European Community voiced here Friday their ''deep concern'' for citizens of their countries in Iraq and Kuwait, a day after Iraq in effect closed its borders.

French Foreign Minister Roland Dumas went even further and charged that foreigners living in Iraq and Iraqi-annexed Kuwait were ''hostages''.

The E.C. ministers said in a statement the Community would hold Baghdad

responsible for the well-being of European citizens in the two states and that it would do everything possible to achieve their evacuation from the two internationally isolated Gulf nations.

The Community is to hold intensive talks with Arab states in order to implement a United Nations Security Council resolution calling for a boycott of Iraq and annexed Kuwait until Iraqi troops are pulled out from the neighbouring territory, the communique read.

Italian Foreign Minister Gianni de Michelis said the foreign ministers of the West European Union were scheduled to debate in Paris next week the military aspects of the Gulf crisis, which was triggered by the Iraqi invasion of Kuwait on August 2.

The E.C. ministers in Brussels were to be joined after their debate by ministers of those states which are members of the North Atlantic Treaty Organisation (Nato) but not of the Community.

-30- 1531

#90222d4100 08/10/1990 ~French/German News Agency

BANGKOK (AUG. 10) - Skyrocketing hotel prices and poor services and facilities have led a Thai travel agency to call off plans to organize tours to Cambodia.

Kudos Travel Service Co. managing director Jessada Kraipuspong said his firm had planned to join a regional hotel chain to organize tours to Cambodia, but decided to delay the project after a feasibility study showed it was not worth pursuing.

Mr. Jessada cited difficulities in procuring visas and the lack of security inside Cambodia as the main reasons for cancelling the project.

Charter companies refused to risk flying over Cambodian air space and insurance firms refused to cover the operation, he added.

The "Cambodian Tour" -- six days and five nights -- would have cost about 40,000 baht (1,600 dollars), he said.

Cambodian resistance forces spearheaded by the Khmer Rouge this year pushed their frontline to Cambodia's central province of Kompong Thom, 120 kilometers (75 miles) north of the capital, Phnom Penh, and several times shelled its airport.

#90222d4120 08/10/1990 ~French/German News Agency

BAGHDAD (AUG. 10) - More than a million volunteers have come forward to

join a popular army to defend Kuwait, according to an official statement published in the Iraqi press.

The statement came as Western military forces massed in the Gulf, with the United States, France, and Britain moving naval, air, and ground forces to the region following the Iraqi invasion of Kuwait.

Within a week of the call to enlist, 350,000 volunteers from Baghdad, 388,000 from the Euphrates region, 270,000 from the north and 260,000 from the south of the country had signed up, the statement said.

Reports Friday in Iraq's daily newspapers described Iraq as a "forest of guns" and said thousands of army volunteers had arrived from Arab countries including Palestinians, Jordanians, Yemenis, Tunisians, Algeriens and Libyans.

"Tens of thousands of Iraqis are thronging the ranks of the (ruling) Baath Party to defend their country against any foreign aggression," the official publications said.

Iraq's People's Army, demobilized in 1988 at the end of the war with Iran, has been rehabilitated by Baghdad following the invasion of Kuwait.

"Tens of thousands of volunteers were signing up "to defend the country and the revolution in Kuwait," an army official said Monday.

On Saturday, Baghdad said 140,515 Iraqi volunteers had asked to join the People's Army, which had been created by the "interim government of free Kuwait" and which welcomed conscripts among "Kuwaitis and Arab nationals".

Iraq announced Wednesday the total annexation of Kuwait, and that the political, military and diplomatic institutions of the two countries would in future be run from Baghdad.

#90222d4190 08/10/1990 ~French/German News Agency

HELSINKI (AUG. 10) - The Soviet Union has paid back in recent months part of the 235 million markka (63 million dollars) it owes Finnish companies in unpaid bills, according to a study published here Friday.

The study from the Finnish metallurgical industry said that at the end of June the Soviet Union had paid back 130 million markka (35 million dollars), with the largest single amount being a bill of almost 20 million markka (5.3 million dollars).

Most of the bills had been outstanding since the end of last year, but some Finnish companies had waited 18 months to be paid.

Finnish timber companies had threatened in June to suspend exports to the Soviet Union until the debts were paid off.

The Kauppalehti newspaper, which published the study's findings on Friday, said that Finnish exporters had learned that the Soviet Government was giving priority to paying off debts to West German companies.

-30- 1083

#90222d4240 08/10/1990 ~French/German News Agency

ANKARA (AUG. 10) - Denying press reports that Iraq was amassing troops on the Turkish border, the Iraqi embassy said Friday Turkey had given assurances it would not join the United States in a conflict in the Gulf.

A written statement here referring to Ankara's blocking of Iraqi oil exports through twin pipelines running to a Turkish port, the freezing of Iraqi assets and its refusal to recognise Iraq's annexation of Kuwait said ''we have understanding for the attitude Turkey had to take under American pressure''.

It said Iraq was respecting all its agreements with Turkey.

''Turkey, for its part, has told Baghdad that it would not allow the use of its territory for an attack on Iraq, and would not join the U.S. in a conflict in the Gulf,'' the statement said.

The embassy statement followed reports that Iraqi troops had been digging in along the border and that three divisions had been sent to the vicinity of Habur, the chief crossing point.

Turkish Premier Yildirim Akbulut said Thursday the reports were untrue. The General Staff confirmed that some units of the Turkish Air Force had been put on an ''advanced state of preparedness''.

Despite assurances Thursday by U.S. Secretary of State James Baker on the North Atlantic Treaty Organisation (Nato) committment to Turkey's security, Ankara remained cool to a military role in the Gulf.

Turkish officials said Baker had not sought permission for the use of Incirlik air base, 640 kilometres to the Iraqi border, where a squadron of long-range F-111 bombers have been ''exercising''.

#90222d4250 08/10/1990 ~French/German News Agency

BONN (AUG. 10) - West German airline Lufthansa said Friday it had asked the West German Transport Ministry to authorise it to operate regular

domestic and international flights to and from Berlin from October 28.

Since the end of World War II the allied powers -- the Soviet Union, Britain, the United States and France -- have had control over air routes serving Berlin.

Pan Am, British Airways, Air France and Euroberlin France, a joint venture between Air France and Lufthansa, are currently the only airlines allowed to operate services between West Berlin and West Germany.

Lufthansa will need the authorisation of the allied powers for its plans to use the Tegel airport at West Berlin and Schoenfeld outside East Berlin in East Germany.

The four allies have already said they are prepared to abandon their rights and responsibilities in Germany.

Lufthansa is planning to operate eight daily services between Berlin and CologneBonn, and four to Frankfurt, Stuttgart, Munich, Duesseldorf and Hamburg.

It also hopes to operate flights from Berlin to London, Athens, Brussels, Rome, Istanbul and Warsaw, plus weekly services to New York, Beijing, Tokyo and Bankgok.

A Lufthansa plane touched down at Schoenfeld for the first time last week, to pick up 200 children from Chernobyl on the way home from a holiday in East Germany.

#90222d4300 08/10/1990 ~French/German News Agency

ANKARA (AUG. 10) - Turkish President Turgut Ozal said Friday he did not expect a big military operation in the Gulf if nothing happens in the next seven days, the semi-official Anatolia news agency reported.

Mr. Ozal was critical of a Turkish newspaper which Thursday ran the front-page headline "War is drawing near". He said a military operation was "very unlikely" in the Gulf "if nothing happens over the next week".

Meanwhile, Turkish customs authorities said the border with Iraq would be closed from Monday, Anatolia reported Friday. Between 6,000 to 7,000 mainly Turkish vehicles were backed up at Habur border post waiting to enter Turkish territory.

Customs officials said that after the border closure "only trucks carrying supplies and medecine, as well as returning Iraqis, will be authorised to enter Iraq".

Mr. Ozal, who was speaking in Istanbul, also said oil prices would not rise "much more" and he expected the cost to drop to around 20 dollars a barrel.

In a broadcast late Thursday, Mr. Ozal said Turkey would enforce international sanctions against Iraq and again condemned the invasion of Kuwait by Iraq, stressing "Turkey's important strategic role for regional and world peace".

However, the Iraqi embassy here said Friday that "Turkey had informed Baghdad that it will not align itself with the United States in the Gulf conflict," Anatolia news agency reported.

In a communique, the embassy said Iraq understood the Turkish position "under American pressure". The communique also denied reports that it was concentrating forces along its northern border with Turkey.

In talks Thursday with U.S. Secretary of State James Baker, Turkish officials refused to take part in a multinational force in Saudi Arabia and ruled out the use of Turkish-American military bases as a launching pad for any strike against Iraq.

Turkey has closed the two pipelines which run through its territory bringing Iraqi oil to the Mediterranean in response to the U.N. embargo on Iraq. Movements of troops and military equipment to the Iraqi border area have been described as "precautionary" by the Turkish military.

On Thursday, two Austrians, two West Germans, a New Zealander, a Swiss and an Indian family crossed into Turkish territory at Habur.

A West German consular official in Ankara said that 600 German workers remain in Iraq. He said he expected 200 of them to leave Iraq by way of Habur.

#90222d4380 08/10/1990 ~French/German News Agency
KARACHI (AUG. 10) - Leaders of deposed prime minister Benazir Bhutto's Pakistan People's Party (PPP) met here Friday to discuss its future strategy and whether to take legal action against the country's president, party sources said.

Some 50 former ministers and members of the sacked provincial assemblies joined the party's central executive committee at Friday's meeting, the party sources said.

President Ghulam Ishaq Khan dismissed Ms. Bhutto and her government Monday and imposed a state of emergency, alleging that the government was corrupt

and the country faced internal and external security threats.

Insiders said the party was unlikely to boycott elections promised by Mr. Ishaq Khan for October 24. However, they said it was considering a petition to the country's Supreme Court to protest the government's sacking.

The PPP central committee has more than 24 members, but there were no details on how many took part in the meeting.

Sources said joint party leader Begum Nusrat Bhutto, Ms. Bhutto's mother, did not take part in the talks, which were expected to focus on party unity after the abrupt end of Ms. Bhutto's government.

Ms. Bhutto, 37, said her ouster was planned by military intelligence here.

Hours after he sacked Ms. Bhutto, Mr. Ishaq Khan gave a rundown of her 20-month rule, punctuated with charges of corruption and the misuse of power.

Ms. Bhutto rejected the charges as "vague and baseless."

The Dawn, a local English-language daily, said Ms. Bhutto spent Thursday attempting to gauge what effect the president's charges had on the country's population and how far they were convinced by her statement that the army was behind her overthrow.

Her main task now is to hold the party together and prevent desertions, a PPP source said.

Two of the party's senior members have already joined the caretaker government of former opposition leader Ghulam Mustafa Jatoi and there was speculation in the press here that they may be expelled from the PPP.

LONDON (AUGUST 10) - Iraqi troops are being redeployed from the Kuwait city centre to areas along the coast of the country, the British Foreign Office said Friday.

A spokesman had no further details on where the troops were being sent, but added there were "increasing reports" of low morale among Iraqi soldiers.

There was also "increased looting" in Kuwait city itself, the spokesman said, adding that the country still had adequate supplies of food and electricity.

-30- 668
#90222d4420 08/10/1990 ~French/German News Agency
PORT ELIZABETH (AUG. 10) - The death toll in this eastern Cape province city rose to 42 Friday as rioting entered its fifth day and spread to a neighbouring town in the worst single outbreak of political violence in South Africa since 1986.

Police said there were ''positive signs'' of a return to normality after troops were sent into Port Elizabeth's ''coloured'' (mixed-race) townships Thursday.

Several hundred people were treated for gunshot wounds after police and soldiers fought running battles with rampaging mobs during the four days of looting and arson attacks.

Most of the deaths occurred as a result of security-force action, and police said they had arrested 220 people.

''It would appear the situation is under control, but we cannot say if it would flair up again or what is going to happen,'' police spokesman Bill Dennis said.

While it is believed the violence began as a political protest against a ''coloured'' politician and related civic issues, police and activists agreed it had been hijacked by criminal elements.

#90222d4450 08/10/1990 ~French/German News Agency
BRUSSELS (AUG. 10) - The European Economic Community offered Friday to help Arab governments defuse the Gulf crisis, and hoped the Arab summit in Cairo would ''take concrete measures to this end''.

A statement issued by the foreign ministers of the 12-nation EEC said they had ''decided to maintain close contact with Arab governments and to offer their assistance to Arab efforts aimed at defusing tensions and restoring international legality'' following Iraq's invasion and annexation of Kuwait.

The EEC presidency would hold discussions with the Arab side about ''the possibility of cooperation aimed at achieving this common purpose" within the framework of U.N. Security Council resolutions.

The ministers were meeting ahead of emergency North Atlantic Treaty Organisation talks.

Current EEC ministerial council chairman Gianni de Michelis of Italy said

priority contact would be made with Egypt and Jordan. Economic aid had been promised to Jordan, and an agreement offering trade advantages to Gulf states would be expedited, he said.

Belgian Foreign Minister Mark Eyskens said all-round cooperation was planned, with the formation of a joint EEC-Gulf council, and a mission comprising Ireland, Italy and Luxembourg -- the past, present and next council chairmen -- would visit Jordan.

The ministers condemned the annexation of Kuwait and the Iraqi order to move embassies to Baghdad. They agreed to coordinate action to try to ensure an EEC diplomatic presence in Kuwait, of at least one embassy, Mr. Eyskens said. Mr. de Michelis explained that would be done without giving credence to the idea of even indirect recognition of the Iraqi annexation. EEC specialists are to tackle the matter next Monday and Tuesday.

The ministers stated readiness to take supplementary measures in the U.N. context to resolve the crisis, and noted that some member countries had already taken helpful steps -- Britain and France had offered military support to the American troops sent to Saudi Arabia, and Italy, Spain, West Germany, Portugal and Greece had opeend their bases for the United States to use.

#90222d4550 08/10/1990 ~French/German News Agency

CANBERRA (AUG. 10) - Prime Minister Bob Hawke indicated Friday that Canada, Western European nations and Japan may join the international naval fleet in the Gulf.

In an interview with the Australian Broadcasting Corp., Mr. Hawke said he had held discussions with Canadian Prime Minister Brian Mulroney.

"I can say they are deeply in the process of considering their position now," he said.

Mr. Hawke was interviewed after announcing his decision to order three Australian warships to the Gulf to join the multinational fleet.

He said, "It is not for me to announce what will come out of Canada, but I believe from the conversations I've had with Prime Minister Mulroney that you will see Canadian decisons not inconsistent with what we have done."

He also said members of the North Atlantic Treaty Organisation (NATO) were meeting Friday to discuss their involvement, following unilateral announcements by Britain, Italy and The Netherlands.

"So I have no doubt we will see a significant Western European involvement

" he said.

Asked whether Japan might also become involved, Mr. Hawke said he had discussed the issue with U.S. President George Bush. "I cannot go into detail, but it is possible that there may be some Japanese involvement", he said.

"The defence of all nations is involved in ensuring that aggression is checked," Mr. Hawke said.

He also said he had received a call from New Zealand Prime Minister Geoffrey Palmer, who said New Zealand also wanted to do something. "They will be considering the matter on Monday but they haven't got naval assets capable of doing what we're doing," Mr. Hawke said.

He said Mr. Palmer, who had "expressed his approval" for the Australian intervention, had raised the question of whether the New Zealand Navy might "pick up some vacuum left by the despatch of our forces."

MOSCOW (AUG. 10) - Soviet President Mikhail Gorbachev sent a message Friday to his Egyptian counterpart, Hosni Mubarak, and to the other Arab heads of state gathered in Cairo for an extraordinary Arab summit on the Gulf crisis, according to Soviet news agency Tass.

In addition, Soviet Foreign Minister Eduard Shevardnadze discussed the crisis by telephone with American Secretary of State James Baker, in Brussels for a meeting of the NATO council of ministers.

The Gulf crisis, touched off by Iraq's invasion of Kuwait, was also the subject of a meeting Friday in Moscow between Soviet Deputy Foreign Minister Alexander Belonogov and the Iranian ambassador to Moscow, Naser Heirany Noobary, who requested the interview.

The two men expressed their concern at the "dangerous developments" in the Gulf, Tass said.

#90222d4650 08/10/1990 ~French/German News Agency

MOSCOW (AUG. 10) - Canadian Chief of Staff General John de Chasterlain ended a five-day visit to the Soviet Union on Friday after trips to Moscow, Leningrad and Murmansk, in the far North, Tass news agency reported.

During his visit, Gen. de Chasterlain met Soviet military commanders and watched demonstrations by paratroopers and marines.

He also inspected the missile cruiser Marshal Ustinov at the Severomorsk naval base in Murmansk, and a number of garrisons in the Leningrad military district.

In Moscow, he held talks with General Mikhail Moiseyev, chief of the Soviet defence staff and first deputy defence minister, notably on confidence-building measures between the armed forces, Tass said.

DAMASCUS (AUG. 10) - Senior U.S. State Department envoy John Kelly met here Friday with Syrian Minister of State for Foreign Affairs Nasser Kaddour to discuss the crisis in the Gulf, the Syrian news agency SANA reported.

Mr. Kelly, Assistant Secretary of State for Near Eastern and South Asian affairs, said he and Mr. Kaddour "went over the whole range of what is going on in the region."

Western and Arab efforts to forge a diplomatic solution to the Iraqi invasion and annexation of Kuwait have intensified, amid a massive Western military buildup in the Gulf.

Mr. Kelly said he had come to Damascus Thursday "at the request of (U.S.) President (George) Bush and Secretary of State James Baker to discuss events in the region with the Syrian government."

"We had a good exchange of views that was worthwhile to me. I will be reporting to my government and we will all be awaiting the result of the Arab summit under way now in Cairo," he said.

Syria, ruled by a rival wing of the Baath party, has been Iraq's principal Arab adversary in recent years.

#90222d4730 08/10/1990 ~French/German News Agency

JOHANNESBURG (AUG. 10) - The Competitions Board is to investigate share transactions of the South African mining giant Anglo American Corporation (AAC), a spokesman for the board said here Friday.

The board is looking into purchases in South Africa's third-biggest mining company Gold Fields of South Africa (GFSA) by or on behalf of AAC, De Beers Consolidated Mines and their associated companies since June 1989.

The investigation was sparked by a statement in AAC's 1990 annual report,

saying the group at present owned at least 25 per cent of GFSA and that comment from business circles said the figure could even be higher, the South African Press Association (SAPA) reported Friday.

SAPA said the aim of the investigation was to examine whether the purchases represent an acquisition or a restrictive practice and if they could place AAC in a monopoly situation.

The board will also look into how the situation will enable AAC to appoint one or more directors to the GFSA board.

A spokesman for AAC said the situation was being investigated internally but declined to comment further, SAPA said.

(AUG. 10) - More than half a million Asians remained Friday in Iraq and occupied Kuwait as their governments explored options to evacuate them amid reports of killings and rapes.

A Pakistani newspaper quoting reliable sources reported that some of the 90,000 Pakistanis in Iraqi-annexed Kuwait and 50,000 in Iraq had started to leave.

But an estimated 170,000 Indians, 100,000 Sri Lankans, 90,000 Pakistanis, 70,000 Bangladeshis, 60,000 Filipinos, 7,000 Thais and 2,000 Japanese were still stranded in Kuwait, Asian officials said.

There were 6,000 Thais, 5,000 Filipinos and 3,000 Malaysians in Iraq.

Iraq sealed its borders Thursday and reportedly said only diplomats would be allowed to leave.

While New Delhi said it learned through its diplomatic mission in Kuwait that its nationals were safe, Philippine President Corazon Aquino said Friday that three Filipino workers have been killed and three others raped in Kuwait.

Mrs. Aquino said the information about the attacks was relayed to her by Labor Secretary Ruben Torres, whom she sent to Saudi Arabia earlier this week to supervise the evacuation of Filipino workers who have fled Kuwait.

Shirley Gorospe, a Filipina domestic helper in Kuwait who arrived here Friday via Saudi Arabia, told reporters at the airport that "Iraqi soldiers are raping the women there, Filipinas included."

Thai officials on Tuesday said Iraqi troops killed one Thai national and

detained more than 200 others in Kuwait.

SEOUL (AUG. 10) - A South Korean farmers' group said Friday it strongly opposed the current Uruguay Round of multilateral trade talks on agriculture and warned that they could ruin the local farming industry.

Han Ho-Sun, head of the National Agriculture Cooperative Federation, told a press conference that the nation's agricultural industry would collapse if the local market was thrown open to foreign products.

"We are especially dead-set against the import of major crops such as rice, barley, beans, corn, hot pepper, garlic, sesame and beef," Han said.

He said local heads of the federation's 1,460 member cooperatives would meet Monday to adopt a resolution urging the government to withstand pressure from the United States and other agriculture-exporting countries at the Uruguay Round talks under the General Agreement on Tariffs and Trade.

The Uruguay Round are the first GATT negotiations to tackle the touchy issues of trade in agriculture and services.

The round is due to end in December, but Western members have warned recently that without concessions on agriculture from Japan, South Korea and the European Economic Community, the talks may not reach a consensus.

South Korea's agricutural industry, which supports 16 percent of the country's 40 million population, has been sacrificed for industrial development in the past three decades, Han said.

He said the government must implement measures to protect local farmers from foreign imports and increase investment in agriculture.

An agriculture ministry official said South Korea's agricultural industry had little competitive edge over foreign products and major agricutural items would be outpriced by foreign imports.

Only vegetables and some fruits that are difficult to store would be able to survive competition from foreign countries, he said.

Each GATT member country is supposed to submit a timetable for liberalizing agricultural imports to negotiators in Geneva when talks resume there on Aug. 27.

KUALA LUMPUR (AUG. 10) - The Heavy Industries Corp. of Malaysia (HICOM), a state-owned automaker, Friday reported a group pre-tax profit of 236 million dollars (87 million U.S.) for the year ended Mar. 31.

This represented a five-fold increase from 46 million dollars (17 million U.S.) for the HICOM group which was set up to spearhead Malaysia's industrialization drive.

HICOM president Jamil Jan said group turnover soared to 1.56 billion dollars (578 million U.S.), up 64 percent from 951 million dollars (352 million U.S.) the previous year.

Jamil said HICOM also managed to reduce its accumulated losses to 96 million dollars (36 million U.S.) from 252 million dollars (93 million U.S.), the bulk of which resulted from foreign exchange losses on its Japanese yen loans.

The group, which also has interests in motorcycle and cement manufacture and property development, still has yen loans totalling 12.18 billion yen (81.2 million U.S.).

Jamil attributed the record performance to the improved Malaysian economy, strong expansion in domestic demand especially for cars and motorcycles and property along with the company's cost-cutting measures.

LONDON (AUG. 10) - The price of Brent North Sea crude oil rose to 26 dollars a barrel in afternoon trading in London on Friday, after slipping to 24.8 in early trading.

Brent had closed Thursday at 25 dollars a barrel.

Dealers said the market was calm while awaiting further developments in the Gulf and news from an Arab summit in Cairo discussing Iraq's invasion and annexation of Kuwait.

Brent North Sea crude for September delivery was around 24 dollars a barrel Friday on the Rotterdam free market, after soaring above 28 dollars early in the week.

The secretary general of the association of independent oil traders, Henk Oskam, warned that prices remained "very sensitive to the slightest development" in the Gulf.

In Singapore, fuel and crude oil prices weakened on the Singapore International Monetary Exchange (SIMEX) ahead of the Arab leaders' meeting in Cairo.

Dubai crude for September delivery closed at 21.50 U.S. dollars a barrel after hitting a high of 22.95 dollars in the morning, compared to 22.10 dollars a barrel Wednesday.

There was no trading Thursday as the market was closed for the National Day holiday.

Dealers attributed the lower prices to the reduction of tension in the Gulf and signs that the conflict may not be a long one, in view of the presence of U.S. troops in Saudi Arabia.

The meeting of Arab leaders to solve the crisis also put downward pressure on prices.

#90222d5000 08/10/1990 ~French/German News Agency

LONDON (AUG. 10) - British brokers James Capel and investment bank Midland Montagu have set up a joint stockbroking operation in Spain, the two companies said here Friday.

James Capel-Midland Agencia de Valores will trade on the Spanish stock market and have a team of specialist analysts.

The move marked a further step in the already close cooperation between James Capel's parent company, the Hong Kong and Shanghai Bank, and Britain's Midland Bank, the parent company of Midland Montagu.

The two banks have already pooled part of their data system and cash dispenser networks.

The new Spanish operation will be capitalised at 150 million pesetas (1.5 million dollars), with Midland Montagu holding 70 per cent and Capel the remaining 30 per cent.

Its setting up was made possible by changes in Spanish regulations to allow foreign companies to operate directly.

The City is avidly watching all signs of closer ties between Hong Kong and Shanghai and Midland, and is expecting the two major banks to merge at the end of the year, with the Hong Kong bank increasing the 14.9 per cent stake in Midland it acquired just after the 1987 world stock market crash.

Some analysts consider that the rival networks of James Capel and Midland

Montagu are one of the major obstacles to a merger.

#90222d5030 08/10/1990 ~French/German News Agency
AMMAN (AUG. 10) - Five thousand protesters gathered in the Jordanian capital Friday accusing the United States of leading a new crusade against the Arabs using the pretext of the Iraqi invasion of Kuwait.

In a demonstration organized by the "Moslem Brothers" at the mosque of Jordan University following prayers on the Moslem holy day, speakers said Washington was "heading a new crusade against the Arabs" and condemned Saudi Arabia for having "called in foreign armies to fight Arabs."

They burned an American, British and Israeli flag and chanted slogans against Saudi Arabia's King Fahd, saying: "Fahd, you are an American spy," and, "Fahd, (Iraqi President) Saddam (Hussein) will attack you."

Several of the demonstrators raised portraits of the Iraqi leader, but organizers ordered them to be put them away saying, "the Arab nation must unite against the dangers threatening it."

In the southern Jordanian city of Ma'an, demonstrators brandishing portraits of the Iraqi president burned U.S. and British flags Friday, witnesses said.

Hundreds of protesters marched through the city after Friday prayers carrying portraits of the Iraqi president and of Jordan's King Hussein and chanting anti-American slogans, they said.

They called for the downfall of the "Arab traitors," in a reference to Saudi Arabia which has invited American troops to deploy on its soil to help protect its borders from the threat of an Iraqi invasion.

In Damascus, more than 1,000 Kuwaiti demonstrators, led by the Kuwait's ambassador to Syria, Abdel Aziz al-Jassem, protested the Iraqi invasion and annexation of their country.

Kuwaitis symbolically spilled their blood at the beginning of the demonstration and raised banners "Yes to a legitimate government, no to the bogus Saddam government, "Saddam, enemy of God."

LONDON (AUG. 10) - Iraq could hold out against an economic blockade for at least six months, Philip Robins of the Royal Institute of International Affairs said Friday.

"Since last autumn, they have imported large quantities of Australian wheat and I think it could have been planned in advance," Mr. Philips said in an interview on ITN television.

The time could be exploited to encourage certain countries to break the embargo, Mr. Philips said, pointing out that resolution 661 of the United Nations permits each country to supply Iraq with food for humanitarian reasons.

According to some estimates, Iraq imports almost 80 per cent of its food and one of its main suppliers is Turkey.

Mr. Philips said it remained to be seen if Iraqis, who have already experienced serious privation during the eight-year war with Iran, will tolerate new restrictions, knowing the annexation of Kuwait is intended to bolster the financial resources of the country.

"Saddam Hussein will have to depend on his political skill to maintain the morale of his people," Mr. Philips said.

LONDON (AUG. 10) - Some 50,000 jobs could be lost in the British construction industry by the end of this year, according to a study published Friday by the British Employers Federation.

Construction demand in Britain in the second quarter saw its sharpest fall since mid-1981, and 40 percent of the federation's 9,500 members are intending to axe jobs by the end of the year, the study said.

"Prospects for the industry appear to be continuing to worsen," said federation chairman David Woods, adding there was no prospect "of an upturn in trading activity for at least 12 months, and possibly longer."

He said that if interest rates fell during the period, this would boost the private housebuilding sector.

#90222d5390 08/10/1990 ~French/German News Agency
WASHINGTON (AUG. 10) - U.S. President George Bush here Friday said a military showdown between U.S. and Iraqi troops in Saudi Arabia was ''not imminent'', but added that ''if necessary, the forces are fully prepared to defend themselves''.

Bush in a letter officially informed Congress about his recent decision to sent U.S. troops and military aircraft to Saudi Arabia in order to prevent Iraqi soldiers in annexed Kuwait from attacking the kingdom.

''I do not believe involvement in hostilities is imminent. To the contrary, it is my belief that this deployment (of U.S. troops in Saudi Arabia) will facilitate a peaceful resolution of the crisis.''

''If necessary, however, the forces are fully prepared to defend themselves. Although it's not possible to predict the scope and duration of this deployment, our armed forces will remain so long as their presence is required to contribute to the security of the region as desired by the Saudi government,'' the letter read.

Bush said Iraq ''has massed an enormous and sophisticated war machine on the Kuwait-Saudi Arabian border and in southern Iraq capable of initiating further hostilities with little or no additional preparation''.

-30- 1405
#90222d5490 08/10/1990 ~French/German News Agency
PRETORIA (AUG. 10) - Trade relations between South Africa and Hungary are to be normalised under a trade protocol signed in Budapest Friday by South African Trade Minister Kent Durr and Hungary's Minister of International Economic Relations, Bela Kadar, Mr. Durr's office said in a statement here.

The statement said the protocol was the first trade agreement between the two countries. The ministers also agreed on practical measures to promote bilateral trade and economic relations.

Mr. Durr was received on an official visit to Hungary by Hungarian Foreign Affairs Minister Geza Jeszenozky, the statement said.

The trade protocol follows a visit to Hungary in January by Foreign Minister Pik Botha -- the first by a South African foreign minister to a Warsaw Pact country.

Analysts at the time saw the mission as an attempt by South Africa to capitalise on upheavals in Eastern Europe in forging links that would end

South Africa's economic and political isolation.

-30- 1153
#90222d5710 08/10/1990 ~French/German News Agency
BONN (AUG. 10) - The West German government will evacuate its citizens remaining in Liberia as soon as possible, a Foreign Ministry spokesman said Friday.

A West German naval airplane is at Conakry, Guinea, and will take off for Monrovia as soon as the airport at Monrovia is sufficiently secure.

Some thirty West Germans, most of them diplomatic personnel, are currently in the West German embassy in Monrovia and some twenty others are at an iron mining site at Bong, 50 kilometers north of Monrovia.

The ministry said that combat took place Friday in the embassy district of Monrovia, which had previously been spared.

Some 300 Nigerians took refuge Thursday in the West German embassy, joining some 170 Liberians already in the compound.

Most of the 80 West Germans living in Monrovia and the 200 working at the Bong mine were evacuated in June.

-30- 1057
#90222d5760 08/10/1990 ~French/German News Agency
JOHANNESBURG (AUG. 10) - A wave of strikes cost the South African economy nearly 1.94 million man days in the first seven months of this year, labour researcher Erica Jancowitz said in a report Friday.

The figures were "way above those of last year", when according to government figures, 1.18 million man hours were lost through strikes, she said.

The report, covering the period from January 1 to July 31, said 32 percent of the total man days lost occurred in the retail sector, closely followed by the state sector at 30 percent.

The figures were based on 181 strikes which lasted one day and longer.

Miss Jancowitz said the fact that many workers belonged to the giant Congress of South African Trade Unions (COSATU) labour federation -- boasting some 1.2 million workers and representing 50 percent of all organised workers -- was a deterrent to employers resorting to mass dismissals during strikes.

South Africa's economic hub, the Pretoria-Johannesburg-Vereeniging region, showed greatest propensity for industrial action, with 35.4 percent of all strikes taking place in the region, she added.

-30- 1321

#90222d5770 08/10/1990 ~French/German News Agency

ANKARA (AUG. 10) - Turkey denied Friday it had furnished any assurances to Baghdad that it would not allow the use of its territory for attacks on Iraq, as claimed in an Iraqi embassy statement issued earlier in the day.

The Iraqis asserted that Ankara told them Turkey would not join the United States in a conflict in the Gulf, but a foreign ministry statement said Turkey had joined in mandatory U.N. sanctions ''being a responsible member of the United Nations Organisation''.

''Since Turkey has harbours no hostile designs against its neighbours or any other country, it feels no need to make a statement amounting to a confirmation of this point of principle,'' the statement said.

Denying press reports that Baghdad was massing troops on the Turkish border, the Iraqi embassy here expressed ''understanding for the attitude Turkey had to take under American pressure''.

It was referring to Ankara's blocking of Iraqi oil exports through twin pipelines running to a Turkish port.

In a written statement, the embassy had said Iraq was respecting all its agreements with Turkey, and in turn, Ankara had supplied guarantees against facilitating or joining a military intervention.

But while denying the embassy's claim, Turkish officials made clear that Anlkara had no intention of assuming a military role ''unless the events take a different course, like, for instance, an agression against Saudi Arabia''.

Official sources dismissed the reports of an Iraqi troop build-up on the border, saying there was no intelligence confirmation of any abnormality.

But General Staff confirmed that some units of the Turkish Air Force had been put on an ''advanced state of preparedness''.

Despite assurances furnished Thursday by U.S. Secretary of State James Baker as to the North Atlantic Treaty Organisation (Nato) committment to Turkey's security, Ankara has remained cool towards any military role in the Gulf.

Turkish Foreign Ministry spokesman Murat Sungar said possible use of bases

in Turkey had not featured at all in Thursday's talks here between Baker and Turkish leaders. The presence of American long-range F-111 bombers at the Incirlik base in southern Turkey has caused speculation they might be available for strikes inside Iraq.

MOSCOW (AUG. 10) - The supreme soviet (parliament) of the Soviet autonomous republic of Karelia Friday declared that its laws and constitution have have priority over Russian and Soviet legislation and proclaimed Karelian sovereignty, Tass news agency reported.

Karelia, with a population of more than 700,000 and sited on the border with Finland, is the second Russian autonomous republic to declare its sovereignty following Bashkiria in eastern Siberia.

Tass said legislators in the Karelian capital Petrozavodsk adopted the declaration after four days of heated debate.

The declaration said that the newly created democratic and sovereign state of Karelia would voluntarily delegate some of its powers to Russian and the Soviet Union.

Byelorussia, Moldavia and Uzbekistan have also decided that their national laws have priority over those of the Soviet Union. The Ukraine and Russia have passed declarations of sovereignty.

Lithuania, which broke away form the Soviet Union last March, meanwhile called on Soviet President Mikhail Gorbachev to allow all Lithuanian soldiers in the Soviet army to go home.

The call came after the Lithuanian parliament decided that it was legal for Lithuanians to refuse to serve in the Soviet army. The army has been trying for days to recapture Lithuanian army defectors.

#90222d5900 08/10/1990 ~French/German News Agency

WASHINGTON (AUG. 10) - President George Bush Friday played down the prospect of war in the Middle East as he officially informed Congress of the U.S. troop deployment to Saudi Arabia.

"I do not believe involvement in hostilities is imminent," Mr. Bush said in a letter submitted to Congress under the War Powers Act. "To the contrary, it is my belief that this deployment will facilitate a peaceful resolution of the crisis."

Under the War Powers Act, the president must notify Congress within 48 hours after committing U.S. forces overseas. He can be obligated to seek congressional permission, or a declaration of war, to keep the forces abroad for more than 60 days.

Mr. Bush announced the deployment in a televised address to the nation Wednesday. He said the deploymemt, codenamed "Desert Shield", was needed to defend the Saudis from Iraqi troops who invaded Kuwait August 2.

Mr. Bush said in the letter "our armed forces will remain (in Saudi Arabia) so long as their presence is required."

In a separate letter detailing U.S. sanctions against the regime of Iraqi President Saddam Hussein, Mr. Bush said Iraq "has tightened its unlawful grip over the territory of Kuwait and has installed a puppet regime that in no way represents the people or legitimate government of Kuwait."

The War Powers Act was passed in 1973 to protest then president Richard Nixon's actions during the Vietnam War. The Bush administration and others that preceded it dispute the law, contending that notifying Congress does not trigger any 60-day clock.

#90222d5930 08/10/1990 ~French/German News Agency

PARIS (AUG. 10) - Another navy frigate left the Mediterranean military base of Toulon for the Gulf as France on Friday began assembling a task force totalling some 3,200 men and seven warships in the wake of the Iraqi invasion of Kuwait.

The 2,339-strong crew of the aircraft carrier Clemenceau began returning to base as their leave was cancelled after French President Francois Mitterrand announced Thursday that Paris was stepping up its military presence in the Gulf to be ready for any "new aggression" by Iraq.

Sources at the base said Toulon was placed on alert overnight Thursday. About 100 troops were already on the quayside Friday, and food supplies were being loaded on board the 32,000-tonne aircraft carrier, an AFP reporter at Toulon said.

About half of the Clemenceau crew had been on leave.

The French warships will bolster two French escort vessels already in the Gulf region and a third which set off earlier this week. The frigate Dupleix was expected in Djibouti Saturday, the defence ministry said.

The frigate Montcalm, which according to the Defence Ministry Friday has just left Toulon for the Gulf, is equipped with short-range Exocet

sea-to-sea (eds: correct) missiles and a missile-launching system for Crotale surface-to-air missiles.

The Montcalm is also equipped with Lynx helicopters.

The defence ministry also confirmed that the Var military tanker, which refuels warships and carries provisions, and Colbert cruiser equipped with Exocet and surface-to-air Masurca missiles, would be part of the task force around the Clemenceau.

According to the ministry, the Clemenceau would notably have on board the fifth helicopter regiment, part of France's rapid intervention force, and a company of the first infantry regiment.

-30- 1988

#90222d5970 08/10/1990 ~French/German News Agency

BONN (AUG. 10) - Anxiety grew Friday in Bonn and other European capitals as well as in Washington over the fate of Western nationals in Iraq and Kuwait, following Iraq's demand that all foreign embassies in annexed Kuwait close down within two weeks.

According to figures released in Bonn, 600 Germans are in Iraq and 300 in Kuwait. In Washington, it is believed that about 3,000 to 4,000 U.S. citizens are in Kuwait and Iraq. Turkey has about 12,000 of its citizens in Iraq and Kuwait.

A few Americans and Europeans managed earlier this week to escape from Iraq via Jordan, Turkey or Saudi Arabia but only a trickle of officially permitted departures have been reported since Iraq set up bureaucratic obstacles for foreigners wishing to leave.

The White House is not calling them hostages, saying this would only worsen the situation.

In Stockholm, the Swedish foreign ministry Friday officially protested against Iraq's effective ban on Westerners leaving the country. The Iraqi ambassador was told that Sweden demanded an immediate exit clearance for 160 Swedish nationals believed to be in Kuwait and Iraq.

A foreign ministry spokesman said Sweden would contact other countries over Iraq's demand to close the foreign embassies in Kuwait and reassign their duties to embassies in Baghdad.

LUSAKA (AUG. 10) - The Zambian Parliament unanimously adopted a report

Thursday evening containing wide-ranging political reform proposals aimed at democratizing the ruling United National Independence Party (UNIP).

The report, presented to the house by a special parliamentary select committee on Tuesday, will be submitted to President Kenneth Kaunda, who will likely table it before the UNIP central committee for a decision on whether the parliamentary recommendations should be implemented.

The report proposes open presidential elections which will allow more than one person to stand for the post. Currently, President kaunda stands unopposed in presidential elections.

It also recommends that the time in office should be restricted to two five-year terms, and seeks to abolish the post of prime minister and secretary of state for defence and security, to be replaced by that of vice-president.

The report also called for cutting the UNIP central committee (policy-making organ of the party) membership from 68 to 23 members.

#90222d6330 08/10/1990 ~French/German News Agency

NEW DELHI (AUG. 10) - Foreign Minister Inder Kumar Gujral said Friday that India was contemplating a contingency plan to evacuate more than 170,000 of its nationals from Kuwait with Iraqi cooperation.

Mr. Gujral said that New Delhi had sought Iraqi permission to evacuate the Indians in Iraqi-occupied Kuwait by road, air and sea. Initially, the Indians cold be trasported from Kuwait to Jordan by bus.

The minister said Indian Ambassador to Kuwait Arun Kumar Budhiraja, contacted Friday for the first time since the Iraqi invasion of Kuwait on August 2, had reported that all 172,000 Indians there were safe.

Mr. Budhiraja also reported that essential services in Kuwait were functioning and shops were open.

India so far has not publicly taken any stand on the economic sanctions imposed by the United Nations against Iraq in the wake of the invasion of Kuwait.

#90222d6370 08/10/1990 ~French/German News Agency

DUBAI, UNITED ARAB EMIRATES (AUG. 10) - The first batch of British fighter planes arrived in the Gulf late Thursday, an informed British source said here Friday.

A number of Tornado F-3 fighter-bombers had landed but it was not known exactly how many British planes had arrived in the Gulf so far, the source said.

The British aircraft are part of a Western military buildup of forces in the Gulf to help defend Saudi Arabia from a possible Iraqi attack following Baghdad's August 2 invasion and annexation of Kuwait.

(In Cyprus, nine British Tornado aircraft, eight Hercules transport planes and three VC-10 in-flight refuelling aircraft were poised on the tarmac of the Akrotiri British sovereign base Friday ready to leave for the Gulf.)

British Defense Secretary Tom King said Wednesday that 12 British Tornado fighter bombers would leave Cyprus for Saudi Arabia before the end of the week.

Other British forces being sent to the Gulf include three minehunters, a squadron of Jaguar attack aircraft, and batteries of Rapier strategic air defense missiles, he said.

A U.S. official, who requested anonymity, said Thursday in Washington that Britain "plans to put some of their air force in Oman, some in Saudi Arabia and perhaps some in Bahrain."

U.S. ground and air forces have been deploying in Saudi Arabia, at the request of the authorities there, to shore up the kingdom's defenses against what Washington says is a threat from Iraqi troops in neighboring Kuwait.

Warships from the United States, Britain, France, Australia, the Soviet Union are already in or on their way to the Gulf.

But U.S. efforts to enlist regional partners in an international force encountered resistance among Arab leaders, who were meeting in Cairo Friday in a last ditch effort to find a diplomatic solution to the crisis.

Iraq, meanwhile, continued to beef up its forces in Kuwait, sending in an additional 50,000 troops to reinforce the estimated 120,000 soldiers occupying the country, Pentagon officials said.

The mobilization of Western forces came just hours after the U.N. Security Council voted 15-0 to declare "null and void" Iraq's annexation of oil-rich Kuwait, which it invaded August 2.

NICOSIA (AUG. 10) - Egyptian President Hosni Mubarak demanded an Iraqi military withdrawal from Kuwait at an Arab summit in Cairo on Friday as NATO nations pledged support for attempts to enforce U.N. sanctions against Iraq.

Hundreds of foreigners continued to flee the troubled Gulf region meanwhile and more Western nations announced that they planned to send warships to the Middle East.

In other developments, a senior U.S. official said a naval blockade of Iraq was under consideration, and EEC foreign ministers meeting in Brussels appealed to the Arab summit to take "concrete steps" to defuse the Gulf crisis.

Delegates from Iraq and Kuwait were present at the televised opening session of the summit, seen as a last-ditch effort by Arab leaders for a diplomatic resolution of the crisis in Gulf, where Western nations have dramatically bolstered their air and naval power following the invasion.

Iraqi leader Saddam Hussein called on Arabs and Moslems worldwide meanwhile to deliver Islam's holy sites in "occupied" Saudi Arabia. "Save Mecca and the tomb of the Prophet Mohammad (in Medina) from occupation," the Iraqi president said in an address reported Friday by the official INA news agency.

Iraq also continued to beef up its forces in Kuwait, according to Pentagon officials, sending in 50,000 troops to reinforce the estimated 120,000 soldiers occuping the tiny Gulf emirate following Iraq's August 2 invasion.

NATO secretary general Manfred Woerner said after a meeting of NATO foreign ministers in Brussels that the 16 members of the Alliance supported individual actions by its member states to implement U.N. sanctions against Iraq.

But he dismissed suggestions these individual moves could culminate in a joint NATO action, saying Saudi Arabia was outside NATO's operational zone. Mr. Woerner also said NATO supported Arab summit efforts to restore peace.

U.S. Secretary of State James Baker appealed to NATO members to "contribute -- each in their own way -- to stopping further Iraqi military aggression."

In Cairo, Mr. Mubarak called for the summit to forge an Arab solution to the crisis sparked by Iraq's invasion and subsequent annexation of Kuwait.

But Iraqi Foreign Minister Tareq Aziz said the priority should be a demand for the withdrawal of U.S. forces from the Gulf.

"The first step for this summit to take in order to save the credibility of the Arab solution ... is a call for the immediate withdrawal of U.S. forces from the region," he said.

Mr. Mubarak told Arab heads of state they "can only overcome the current crisis in the Gulf and envisage a solution to the situation through the departure of Iraqi troops from Kuwait."

But the Egyptian leader was quick to add that the summit had not been called "to embarrass brother Iraq."

"We must find a solution that ensures the protection of the Arab nation against the dangers threatening it ... We are not out to get anyone," Mr. Mubarak said, stressing that "recourse to the use of force among Arab countries and interference in internal affairs must be forbidden."

Arab League foreign ministers last week condemned the invasion and called for an immediate and unconditional withdrawal of Iraqi troops from Kuwait. The U.N. Security Council has endorsed mandatory sanctions against Baghdad and on Thursday voted unanimously to reject the Iraqi annexation of Kuwait.

The ousted Kuwaiti emir, Sheikh Jaber al-Ahmad al-Sabah, who along with most of the royal family have sought refuge in Saudi Arabia, attended the opening of the summit but left Cairo just hours later. Crown Prince Saad al-Abdallah Al-Sabah took over the leadership of the Kuwaiti delegation.

As the Arab leaders were meeting, U.S. and British ground and air forces continued to arrive in Saudi Arabia to shore up the kingdom's defenses against the possibility of an Iraqi attack from neighboring Kuwait.

France decided Thursday to send the aircraft carrier Clemenceau to the Gulf region, and Australian Prime Minister Bob Hawke announced on Friday that three Australian warships had been ordered to the area.

Mr. Hawke also indicated that Canada and Japan may contribute warships, and West Germany said Friday it was sending five minesweepers and a supply ship to the eastern Mediterranean.

In Brussels, Mr. Baker urged NATO foreign ministers to reaffirm the principle that "an armed attack against any member of the alliance shall be considered an attack against all the members of this alliance."

Mr. Baker urged NATO to "endorse actions which member states may take in order to enforce" the mandatory U.N. Security Council sanctions voted against Iraq.

LONDON (AUG. 10) - One-third of all Britons face water restrictions from Saturday as new bans on use of garden hosepipes and sprinklers take effect to ease shortages caused by a drought gripping England and Wales, officials said Friday.

Eleven million people were already under water restrictions when Thames Water Authority announced the ban would be extended to include an additional seven million customers in southern England.

The water authority said it would call on 300 water inspectors in the London area to "keep an eye out" from their roving water authority patrol vans to ensure the ban, which covers the watering of private gardens and carwashing, was enforced.

Inspectors would be asked to "to note reports from people that the neighbours are watering the garden," according to a spokesman.

The drought has been caused by low rainfall over several months and there is now "barely enough rain to damp down the dust" in many parts of the country, according to the London Weather Centre.

LONDON (AUG. 10) - Britain is to relax rules affecting exports to Eastern Europe for the second time in a matter of months, the Department of Trade and Industry announced Friday.

The move which comes into effect Saturday will "cut onsiderably" the requirement for licences to export computers, telecommunications equipment and machine-tools, the ministry said.

Restrictions on exports to Namibia are similarly eased.

Conversely, seven substances which can be used for the manufacture of chemical weapons come in for tighter control.

The changes follow an agreement signed by members of the western Coordinating Commitee for Multilateral Export Controls (COCOM) in June.

#90222d6610 08/10/1990 ~French/German News Agency
WASHINGTON (AUG. 10) - President George Bush Friday signed a measure that extends for a month his authority to tap the nation's Strategic Petroleum Reserve in the event of oil shortages following Iraq's invasion of Kuwait.

Congress passed the measure last week before adjourning for the summer recess.

Without the extension of the Energy Policy Conservation Act, Mr. Bush's authority to pump crude oil from the strategic stockpile would expire August 15, while lawmakers are out of town.

The stockpile now has 590 million barrels, the equivalent of 50 days' worth of oil imports at current import levels.

For the past 18 months Congress and the Bush administration have been arguing over whether to increase the oil reserve to one billion barrels to counter growing U.S. dependence on foreign oil.

Mr. Bush has opposed increasing the stockpile beyond 750 million barrels.

#90222d6620 08/10/1990 ~French/German News Agency

PARIS (AUG. 10) - Petrol (gas) stations and consumers struggled to obtain information Friday on the government's new pricing policy, with a telephone hot line breaking down regularly, swamped with calls.

Representatives of the 9,000 independent traders, out of a total 27,000 petrol stations, said they had not all been able to find out about the ceiling system fixed by the economy ministry earlier this week, aimed at stabilising prices.

The 1,300 Esso stations were Friday selling for two centimes less on Friday than the lowest government-fixed price.

Petrol prices jumped in France after the August 2 Iraqi invasion of Kuwait.

The price for Friday was to range from between 5.57 francs (1.05 dollars) and 5.71 francs (1.07 dollars) per litre in France's eight zones, according to the economy ministry.

The industry ministry said it would set up a special phone line on Monday to inform the public about the new system.

#90222d6660 08/10/1990 ~French/German News Agency

COLOMBO (AUG. 10) - Australian Foreign Minister Gareth Evans said here Friday that Australia fully supported international economic sanctions against Iraq even though they were at the expense of wheat exports to Baghdad.

Condemning the "outrageous behaviour of Iraq" in invading Kuwait, the visiting Australian minister told reporters that Australia "very strongly supports United Nations sanctions against Iraq."

"Australia stands to incur a very significant economic loss as a result of the sanctions policy," Mr. Evans said, adding that Canberra exported more than 400 million Australian dollars (320 million dollars U.S.) of wheat to Iraq a year.

But he said "we believe that we have a responsibility as good international citizens" to contribute towards the enforcement of the economic embargo. Australia and Canada are Iraq's main wheat suppliers.

The U.N. Security Council Monday passed a resolution calling for economic sanctions against Iraq for its invasion of Kuwait on August 2.

Mr. Evans also said that he did not envisage further Australian frigates or warships being sent to join the multi-national force deployed to counter Iraqi threats in the Gulf.

Prime Minister Bob Hawke announced earlier in Canberra that Australia had sent three warships to the Gulf.

#90222d6690 08/10/1990 ~French/German News Agency

JERUSALEM (AUG. 10) - Israel has produced and distributed injections and tablets to counter the effects of a chemical attack, the ITIM news agency reported Friday.

The medicines produced by the Rafa pharmaceutical company of Jerusalem are currently being issued to security forces only, ITIM said.

The injection, made of a special substance known as "Atrophine", is to be used when a chemical attack occurs, to prevent the user from losing muscle or nerve use, correspondents said.

"The tablets, to be taken as a preventive measure, are to avoid the irreversible negative process (of an attack), but one has to be forewarned " said Shmarya Levine, the company's director.

The announcement came amid heightened tension in the Gulf in response to Iraq's invasion of Kuwait on August 2, prompting a Western military buildup to prevent Baghdad from sending troops into Saudi Arabia.

Officials here have repeatedly warned Iraq, which has chemical weapons, against launching any attacks on Israel.

Prime Minister Yitzhak Shamir has warned that anyone attacking Israel would "unleash a big catastrophe on their countries" because Israel had the will and means to reply to any military attack.

On Thursday, Israel successfully tested an anti-ballistic missile, Voice of Israel radio reported.

It said the "Hetz" (Arrow) missile, underwritten by the United States, could "act as protection against rockets tipped with chemical weapons" but would not serve as a nuclear umbrella.

#90222d6820 08/10/1990 ~French/German News Agency

Washington (AUG. 10) - It is costing the United States hundreds of millions of dollars to transport troops and aircraft to Saudi Arabia, and the bill could rise to three billion if the crisis lasts several months, budget experts say.

The experts told the Wall Street Journal Friday that if hostilities break out and U.S. ships or planes are damaged or require extra missiles or ammunition, the costs could rise.

The two-week U.S. invasion of Panama, a country much closer to the United States, cost the nation almost 400 million dollars.

President George Bush conferred with his budget advisers in the White House Wednesday night, but the administration has so far refrained from putting a dollar figure to the operation.

Before the Iraqi crisis, the administration had planned to make drastic cuts in the Pentagon's budget. But the White House announced Thursday that Bush plans to exempt military personnel from cuts that were due to take effect automatically this autumn.

#90222d7040 08/10/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (AUGUST 10) - The United Nations Security Council will meet Monday to discuss the Gulf crisis, U.N. officials announced Friday.

The meeting had been scheduled for late Friday but was postponed until Monday. Officials gave no explanation for the delay.

Thursday the Security Council unanimously approved, by a 15-0 vote, a resolution declaring Iraq's annexation of Kuwait "null and void."

Following the vote, U.S. Ambassador to the United Nations Thomas Pickering said his government was prepared to call for another meeting of the council to discuss new measures to pressure Iraq to withdraw its forces from Kuwait.

Sources at the U.N. Friday indicated that the meeting had been called by the Security Council chairman, Aurel Dragos Munteanu of Romania.

Meanwhile, the security council's Military Staff Committee met Friday in what one diplomatic source said was a regular bimonthly meeting, not specially convened to deal with the Gulf crisis.

The Military Staff Committee consists of the chiefs of staff, or their representatives, of the five permanent members of the security council -- France, Britain, China, the United States and the Soviet Union.

Thursday the acting Soviet delegate, Valentin Lozinsky, proposed that the Military Staff Committee begin discussions on a possible U.N. intervention in the Gulf.

Iraq's decision-making Revolutionary Command Council declared Wednesday that Kuwait was an integral part of Iraq and that the union was "total and irreversible."

The Security Council Monday approved trade, military and financial sanctions against the regime of Iraqi President Saddam Hussein. Hours after the Iraqi invasion August 2, it condemned the invasion and demanded the immediate and unconditional withdrawal of Iraqi forces from Kuwait.

#90222d7160 08/10/1990 ~French/German News Agency

SANTO DOMINGO (AUG. 10) - Following bombings and car burnings in the streets here, President Joaquin Balaguer warned Friday that he would use the army to maintain law and order if protests turned violent.

Nine unions called a 48-hour general strike next Monday to protest economic

policies launched this week by Mr. Balaguer that include a 200 percent increase in fuel and foodstuffs, such as flour and sugar.

"I hope the protest will be peaceful, that they will demonstrate the discontent of the masses, if they are discontent, but that there will be no Dominican blood shed, so that it would not be necessary to use the army," Mr. Balaguer said.

The 83-year-old conservative president was re-elected last May by a narrow margin over his opponent, leftist Juan Bosch. His second term will begin next Thursday.

Unions and leftist groups have protested the new economic program, which includes 30-50 percent wage hikes and freezes prices, wages and taxes for six months.

Mr. Balaguer's announcement of the economic policies sparked protests, notably a violent confrontation last Monday between university students and police that left two students dead and seven injured.

#90222d7250 08/10/1990 ~French/German News Agency

JOHANNESBURG (AUG. 10) - The African National Congress (ANC) called Friday for the release from detention of one of its top officials, saying the detention goes against a historic accord reached with the government.

In a statement issued here, the anti-apartheid ANC said it "protests in the most vigorous terms" the continued detention of Mac Maharaj, a member of the ANC's National Executive Committee and of the Internal Leadership Group of the South African Communist Party (SACP).

Mr. Maharaj was one of 40 ANC and SACP members arrested by police under the Internal Security Act (ISA) following police claims last month that the SACP was planning a coup under cover of preliminary talks between the ANC and the white-minority government.

Section 29 of the ISA provides for the indefinite detention of a suspect for interrogation purposes.

In the statement, the ANC said the "continued detention" of Mr. Maharaj and some 151 other ANC activists under the ISA goes against the spirit of the accord -- known as the Pretoria Minute -- reached by the ANC and the government early Tuesday.

Observers believe that the Minute, which saw the ANC suspend the 29-year guerrilla war it has waged against the government, has paved the way for South Africa to break out of its political impasse and move quickly towards a negotiated political settlement.

The ANC called for "the suspension of the application of the Internal Security Act and other repressive laws" and for the immediate release of Mr. Maharaj and the other detained activists.

"Since February 2, despite its undertakings that it is committed to the process of peaceful resolution, the South African government has continued to employ the numerous repressive laws on the statute books to disrupt our organisations and and to harass our members," the statement said.

President Frederik de Klerk unbanned the ANC and 23 other organisations on February 2 this year. In terms of the Minute, the government undertook to review the ISA, particularly sections which applied to communism.

#90222d7300 08/10/1990 ~French/German News Agency

BELGRADE (AUG. 10) - Yugoslavia has suspended delivery of 200 tanks to Kuwait following the invasion and annexation of the oil-rich Gulf Emirate by Iraq, a Croatian official said Friday.

Drazn Kalogjera, the deputy prime minister of Croatia, told Belgrade Radio that the order by Kuwait was worth some 350 million dollars.

Meanwhile, the tanks were being kept at a factory near Slavonska Brod, in the north-west Yugoslavian republic.

Croatian companies engaged in trade with the Middle East stood to face heavy financial losses as a result of the conflict, Mr. Kalogjera said, one company alone with an Iraqi contract worth almost 100 million dollars.

Iraq owes Yugoslavia some 1.1 billion dollars.

There are some 10,000 Yugoslavs in Iraq and Kuwait, most of them technicians and workers engaged in road construction and other

infrastructure development projects.

-30- 1056
#90222d7360 08/10/1990 ~French/German News Agency
JOHANNESBURG (AUG. 10) - Two people were injured early Friday when unknown assailants lobbed a hand grenade into a hostel in South Africa's largest black township Soweto, police said.

The attack took place at 12.30 a.m. Friday when the grenade was hurled through the window of a room in the Mzimhlope hostel, in the Soweto suburb of Meadowlands, bordering Johannesburg.

Police said two people who were asleep in the room were injured by shrapnel.

It was the first hand grenade attack since the anti-apartheid African National Congress (ANC) and the white-minority government agreed to a historic accord early Tuesday which saw the ANC suspend its 29-year guerilla war against the government.

In the accord -- known as the Pretoria Minute -- both parties committed themselves to end violence in the country.

#90222d7440 08/10/1990 ~French/German News Agency
MOSCOW (AUG. 10) - The Gulf crisis provoked by the Iraqi invasion of Kuwait is "taking an extremely dangerous turn," Soviet President Mikhail Gorbachev said Friday in a message to leaders attending an emergency Arab summit in Cairo.

"The events in the Gulf are taking an extremely dangerous turn and an unpredictable character," the Soviet leader said said in the message addressed to Egyptian President Hosni Mubarak and other Arab leaders.

Mr. Gorbachev said the Soviet position has been to "help Iraq find a way out of the situation of its own choosing and at the least cost."

The Soviet leader said the application of United Nations Security Council Resolution 660 would have allowed Iraq a "dignified" way to extricate itself from the crisis "without humiliation."

"Unfortunately, that option was not chosen," Mr. Gorbachev added.

The Soviet leader said that given the failure of the U.N. resolution to secure an Iraqi withdrawal from Kuwait, the efforts of Arab countries "could play an important role in the resolution of the crisis."

Mr. Gorbachev said the Arab League, as an "influential regional organisation with considerable experience in resolving inter-Arab disputes " should now attempt to settle the conflict.

He said he was ready to remain "in permanent contact" with Arab nations at the summit in the hope that Arab leaders "will do all they can to resolve a crisis that is threatening the order and stability of the Gulf, relations among Arab nations and, without exaggeration, international peace and security."

KGB chief Vladimir Kriuchkov said meanwhile that an unspecified number of "Soviet experts" working in Iraq "were in the hands of the Iraqi authorities."

"We assume that they are safe," he told Soviet television on Friday.

Mr. Kriuchkov also said that the Soviet Union has successfully evacuated some of the 8,000 Soviet citizens living in Iraq.

"There are more than 8,000 Soviet citizens in Iraq. We have succeeded in evacuating some of them. No more than 700 Soviet citizens are in Kuwait," he said.

-30- 2277

#90222d7470 08/10/1990 ~French/German News Agency

CAIRO (AUG. 10) - The Arab League emergency summit in Cairo adopted a resolution late Friday calling for Arab forces to be sent to the Gulf to protect Saudi Arabia against a possible attack by Iraq, according to the Egyptian news agency Mena.

The resolution was adopted by a majority of the 20 heads of state and leading officials at the summit, said Mena after reporting that the summit had ended after a four-hour debate behind closed doors.

The summit had been called to find an Arab solution to the Gulf crisis triggered by Iraq's invasion of Kuwait.

The resolution apparently drafted by several countries called for Arab forces to be sent to the Gulf in response to a request from Saudi Arabia ''and others'' for support in the defence of their territories, according to the Egyptian news agency Mena.

Arab forces would bolster the military forces of the Gulf countries and would serve as a defence against outside aggression, Mena said. There was no immediate information how the resolution is to be carried out.

The resolution condemns the Iraqi ''aggression against Kuwait'' and does not recognise either Iraq's annexation of Kuwait or any other consequences resulting from the invasion, Mena said. All pertinent U.N. resolutions and Arab League statements since the Iraqi invasion of Kuwait were endorsed.

NICOSIA (AUG. 10) - The official Kuwaiti news agency KUNA has been dissolved and all its foreign bureaus are no longer operational, the official Iraqi news agency INA reported in a dispatch received here.

INA said the measure was justified by the proclamation Wednesday of union between Kuwait and Iraq.

Iraq invaded Kuwait on August 2 after the collapse of Iraqi-Kuwaiti talks on a bitter dispute between the two countries over oil production quotas and border markings.

KUNA, one of the most active Arab news agency during its heyday which boasted bureaus in most world capitals, ceased disseminating information from its Kuwait headquarters on August 2.

#90222d7510 08/10/1990 ~French/German News Agency

WASHINGTON (AUG. 10) - Female soldiers have been deployed along with male troops to the Gulf as part of the U.S. Desert Shield military mission, military officials said.

Defense spokesmen said there would be no segregation by gender of the forces and that troops were being sent as units, irrespective of the gender makeup.

The U.S. Central Command said a small number of women was deployed among noncombat personnel such as aircraft crews and medical and headquarter units flown to Saudi Arabia.

But defense officials said they did not know how Saudi officials might deal with U.S. female troops in Saudi Arabia, where there are strict Moslem laws on separating the sexes.

Defense Department spokeswoman Major Kathy Wood declined for security reasons to say how many women were among 50,000 troops being mobilized, or where and in what capacity they would be serving.

Brigadier General Wilma Vaught, who is retired from the U.S. Air Force, said women had proven themselves in times of war since World War I and

that in tense moments they were as effective as men.

"I think they hold up just as well as men, or just as well as men do not. There are men who don't hold up well, just the same as there are women, who occasionally don't do as well as we might like," she said.

"It depends on the person, and it depends many times on personal problems they may have in their lives ... at the time they are deployed. Both men and women are subject to those types of problems."

There are about 84,000 women in the U.S. Army, or about 11 per cent of the active force of 750,000. All but 49 of the 368 job titles are open to women and the number keeps growing, but the Army remains steadfastly opposed to enlisting them in combat.

#90222d7610 08/10/1990 ~French/German News Agency

PARIS (AUG. 10) - Deposed Pakistani prime minister Benazir Bhutto urged the international community Friday to help prevent a return to dictatorship in Pakistan.

In an interview with French television's Antenne 2, Ms. Bhutto said: "I hope France and other countries of the world will lend their support to ensuring that Pakistan does not revert to a state of dictatorship."

Ms. Bhutto, who was sacked by President Ghulam Ishaq Khan on corruption charges on Monday, said Pakistan could only progress "through democracy."

Her comments came as France expressed hopes that Pakistan's steps toward democracy would not be "called into question" by Ms. Bhutto's dismissal.

A French Foreign Ministry spokesman here said Friday that France was closely watching developments in the country, and hoped elections planned for October would "go ahead normally."

In the television interview, Mrs. Bhutto dismissed accusations of corruption against her as "baseless," calling them "a pretext, a political prosecution."

Asked if she feared imprisonment, Ms. Bhutto said she was "prepared to face whatever consequences are necessary for freedom."

"Freedom is a cause worth sacrificing for. I fought for a democratic Pakistan. I'm not going to give up that fight," she said. "I believe development can only come to Pakistan through democracy."

Pakistan's president also dismissed Mrs. Bhutto's government and dissolved

parliament on Monday. Interim Prime Minister Ghulam Mustafa Jatoi said Tuesday that a probe would be launched to investigate the corruption allegations and "severe action" would be taken against the guilty.

MOSCOW (AUG. 10) - Soviet drug traffickers make profits of some 15 billion roubles (24 billion U.S. dollars) a year, KGB director Vladimir Kriuchkov said Friday.

Mr. Kriuchkov, in an interview with Soviet television, pointed out however that the narcotics problem was nonetheless worse in the United States, where he said drug profits "amount to 200 billion dollars a year."

Mr. Kriuchkov's comments were the first time a Soviet official had released figures on the volume of illegal drug trafficking in the Soviet Union.

#90222d7890 08/10/1990 ~French/German News Agency

LIMA (AUG. 10) - Inflation soared a one-day record of 136.5 percent, five would-be looters were shot dead, streets were deserted and businesses closed Friday as Peru shuddered under a shock austerity plan unveiled by the government of newly-installed President Alberto Fujimori.

On the first day of the government's severe price hikes to stabilize the economy, dubbed "Black Thursday," inflation skyrocketed 136.5 percent in just one day, according to the private research center Cuanto.

Transportation was paralyzed by strikes while businesses remained closed as their owners feared looting.

Wednesday, Prime Minister Juan Hurtado Miller, who is also economy minister,

unveiled Mr. Fujimori's austerity plan, which increased the price of gasoline some 3,000 percent and sent prices on staple foods soaring to between 160 per cent and 300 percent.

But tensions boiled over in other cities, where thousands of poor families fought to obtain basic food supplies.

The drastic measures to control hyperinflation and to stabilize the worst economic crisis in Peru's history have hit the poorest sectors the hardest, union leaders said.

"What is certain is that we have been deceived by the price hikes and we

reject the burden imposed on the country," said Valentin Pacho, a former senator and secretary general of the General Confederation of Workers in Peru.

Mr. Fujimori -- who took office July 28 -- had virtually won the election on the platform that he would not impose a shock austerity plan as his conservative opponent, novelist Mario Vargas Llosa, had proposed.

Members of Mr. Fujimori's own party, Change 90, protested Thursday in front of the Government Palace against the austerity plan, shouting "Don't allow the shock!"

Police have shot dead at least five people in Lima as they attempted to break up mobs of would-be looters.

Mr. Miller indicated the austerity program was needed because of the economic shambles left by Mr. Fujimori's predecessor, Alan Garcia.

Mr. Garcia departed the presidency July 28, leaving Peru with an annual inflation rate approaching 3,000 percent.

KENNEBUNKPORT, ME (AUG 10) - President George Bush Friday arrived at his summer residence in Kennebunkport, Maine, for a 25-day vacation despite the volatile situation in the Gulf.

"What you don't want is to appear to be held hostage in the White House to events," he said on board the presidential plane Air Force one.

But, he added, this vacation "will be different" from previous ones.

The President is expected to return to Washington next Wednesday to attend briefing sessions.

Mr. Bush said his residence here was equipped with an advanced communications system allowing him to stay in touch with administration officials and world developments.

Before he departed from Washington on his 1-12-hour flight to Kennebunkport, Mr. Bush met with Defense Secretary Dick Cheney and other top aides, but on his arrival here he did not make any statement.

Mr. Bush has not missed a summer vacation here since 1944.

#90222d8150 08/10/1990 ~French/German News Agency
NEW YORK, United Nations (AUG. 10) - Gambian Foreign Minister Alhaji Omar Sey met Friday with U.N. Secretary General Javier Perez de Cuellar to tell him of West African plans to send a multinational force into Liberia "as soon as practicable."

Gambia currently presides over the Economic Community of West African States (ECOWAS) which has established the ECOWAS Cease-fire Monitoring Group (ECOMOG) to help end the bloody civil war in Liberia.

Two of the parties in the Liberia conflict, President Samuel Doe and dissident rebel Prince Johnson, have accepted ECOMOG, but the main rebel leader, Charles Taylor, whose National Patriotic Front (NPFL) started the

war in December, has vowed to resist foreign intervention.

The ECOMOG force is the first of its kind in Africa.

Mr. de Cuellar expressed his concern at Friday's meeting with the "continuing deteriorating situation in Liberia.

A U.N. official said Mr. de Cuellar "calls on all the combattants to respect the human rights of the people and to agree to an immediate cease-fire, thereby halting the senseless slaughter that is now occurring."

The official added that the secretary general "wishes to note that a successful peacekeeping role of ECOWAS in Liberia will enable the U.N. system to resume its humanitarian assistance program in Liberia."

AMMAN (AUG. 11) - About 6,000 Moslem fundamentalists demonstrated in the Jordanian capital Friday, burning the U.S. flag, booing Saudi Arabia and waving portraits of Iraqi President Saddam Hussein.

The protest, organized by the Moslem Brotherhood fundamentalist group, was held as Arab leaders were gathered in a summit in Cairo in an attempt to avert an explosion of the Gulf crisis sparked by the Iraqi invasion of Kuwait last week.

The crowd, gathered at the University Mosque on the northern outskirts of the capital, booed Saudi King Fahd, calling him a "spy for the United States."

An Egyptian cameraman, working for the British television company Visnews, was slightly injured when a demonstrator, recognizing him to be Egyptian, shoved his camera into his face.

Colleagues said Mohammad Fahmi, 41, returned to Cairo for medical treatment for an injured eye.

Egypt's President Hosni Mubarak on Friday demanded that Iraq withdraw its forces from Kuwait at the Arab summit in Cairo which ended with a decision to send an Arab peacekeeping force to Saudi Arabia.

Mohammed Abu Faris, a member of the Jordanian parliament and a leader of the Moslem Brotherhood, told the rally, "Those who know history see that Christian warriors are coming back to invade the Arab nation."

His speech frequently interrupted by shouts of "Allah Akbar" or "Allah is great," Mr. Faris warned that "Israel will be wiped off the map and the

Moslem nation will vanquish."

Several speakers took up the theme of Jihad or the Islamic Holy War, calling for arms and ammunition to "defend Iraq and the Arab nation."

In the past two days, several Moslem groups and religious leaders in Jordan have condemned the deployment of U.S. armed forces in Saudi Arabia, "in the holy sites of Islam."

MADRID (AUG. 10) EFE - Spain's consumer price index rose 1.3 percent in July, the National Institute of Statistics reported Friday.

With this increase, the inflation rate for the first seven months of the year was put at 3.9 percent, while the rate for the last 12 months was 6.2 percent.

The Socialist government of Prime Minister Felipe Gonzalez has set a target of 5.9 percent for the year.

MANILA (AUG 10) EFE - Rebellious military officers put off a planned coup against the Philippine government in order to avoid a deeper national crisis after last month's devastating earthquake, a renegade Army chief said in a newspaper interview Friday.

Fugitive Army Commander Abrahan Purugganan told the daily Manila Times that rebel officers had been plotting to overthrow President Corazon Aquino's government shortly before July 16's massive quake.

However, after the earthquake hit the Philippine island of Luzon, killing some 1,600 people, the bloodless coup they had drawn up was postponed so as not to aggravate the crisis.

Rebellious factions of the Armed Forces have launched six failed coup bids against Aquino since she took office in 1986.

More than 100 people died and 700 were injured in the last attempt in December.

According to Purugganan, his coup plot involved all young officers simultaneously resigning their posts and withdrawing their support from the government.

"In the process, the whole Armed Forces command structure will be isolated. The government will fall after realizing that it can't count on the Army," Purugganan, the suspected leader of the clandestine Union of Young Officers rebel group, explained to the paper.

He added that leaders of different rebel Army factions supported the project, including fugitive Col. Gregorio "Gringo" Honasan, the head of a clandestine reformist group which staged the December uprising.

Purugganan was also suspected of taking part in this uprising.

Almost 100 officers involved in plotting former coups remain at large. Authorities have offered a dlrs 45,000 reward for Purugganan's capture.

Military barracks in Manila were put on alert last weekend when rumors of another coup attempt began circulating.

BUENOS AIRES (AUG 10) EFE - Four bomb blasts ripped through different parts of the Argentine capital early Friday, causing extensive damage to property but no injuries, police said.

One of the explosions took place in a shop on the outskirts of Buenos Aires belonging to the son of a deputy who is a member of the ruling peronist Party.

Two more bomb blasts hit another two businesses also in commercial districts on the outskirts of the Argentine capital, while the fourth happened in an empty apartment building in the center of the city.

Police said there were no clues as to the identity of the bombers but a number of small ultra-left groups have claimed responsibility for a sporadic campaign of bombings targeted at banks and businesses over the last six months in Buenos Aires.

WETZLAR, WEST GERMANY (AUG. 10) - Two West German bomb explosive experts were killed Friday by a World War II bomb they were trying to defuse, an official spokesman said.

Another three of the experts were seriously injured when the U.S. bomb, found by children playing in the area, exploded in Wetzlar, 50 km north of Frankfurt.

Police had cordoned off the area and suspended traffic from a nearby motorway and trains on an adjacent railway line before the experts moved in to defuse the bomb.

Since the end of World War II, some 100 people have died in similar incidents although such explosions are becoming less frequent, the spokesman said.

#90222e0040 08/10/1990 ~Latin America New Agency

TIJUANA, MEXICO (AUG 10) EFE - Mexican customs officials and border police extort dlrs 1 billion a year from would-be immigrants trying to sneak into the United States, according to a report published Friday by a private university.

The report, released by the Colegio de la Frontera Norte, claims that Mexican authorities are fully aware of what is going on, but do nothing to control it.

According to the study, which is based on the border town of Tijuana, every day some 4,000 Mexicans and Central Americans cross into the United States through Tijuana.

The "polleros," the name given to those who smuggle Mexicans into the United States, will charge dlrs 150 to make the 30 km crossing from Tijuana to U.S. port city San Diego.

To travel further north to Los Angeles will cost dlrs 350, while to reach Chicago in the northeastern United States will cost 700.

Half the polleros' fee goes to corrupt customs officials and police.

Interviews with polleros revealed that Mexican police operate in the border region in plainclothes, and that those smuggling people across the border who do not pay up are beaten or taken to prison.

Each year some 600,000 illegal immigrants are caught and sent back to Mexico or further south to Central America.

In the last year alone nine people have been killed in the Tijuana area trying to cross into the United States.

Commander Ted Swoford of the U.S. Border Patrol charges that if Mexican authorities were to cooperate then the violence along the frontier could be checked in a month.

However, the Mexicans say that most of the border violence is attributable

to racists on the U.S. side.

Human rights organizations on both sides of the border have documented 318 cases of violence and rights abuses against immigrants by the U.S Border Patrol over the last 30 days.

MOSCOW (AUG 10) EFE - Seventeen people were killed and 15 injured Friday in a suspected bomb attack on a bus in the troubled Soviet republic of Azerbaijan, the Azerinform news agency reported.

The bus exploded en route from the Georgian capital of Tiflis to Agdam in the enclave of Nagorno-Karabakh, one day after renewed fighting began between Azeris and neighboring Armenians over the disputed territory.

Armenia has demanded Nagorno-Karabakh be incorporated into its republic, given that 85 percent of the people living there are Armenian.

No details were given about the nationality of the victims.

The latest outbreak of violence in the two-year-old conflict, which has claimed more than 200 lives, comes just a day after Armenian President Levon Ter-Petrosian won a three-month extension to Moscow's decree calling for illegal armed groups to hand over their arms.

President Mikhail Gorbachev had originally given Armenia and other republics where armed groups threatened Moscow's authority until Thursday night to disband and hand over their weapons, backed by a threat that he would send in Army troops.

#90222f0723 08/10/1990 ~United Press International

(AUG. 10) UPI - Pete Incavilgia took some extra batting practice to work on his hitting. Imagine if his teammates had done the same.

''I took some extra batting practice today,'' Incaviglia said after Texas rushed Cleveland 13-5 Thursday night.

''I was trying to work on some things. I went out and looked for my strength instead of the pitcher's strength. I've been pulling off the ball a lot. That's not my strength. My strength is hitting the ball to straightaway center, right center.''

The extra work paid off as the right-hander smacked a two-run home run 385 feet, a double and drove in four runs.

His teammates strength wasn't in hitting the ball in any direction against three hapless pitchers, but simply in hitting the ball. Texas collected 21 hits, scored nine times in one inning and had to settle for just 13 runs despite leaving 17 men on base. Eleven different Rangers had hits and 10 different players scored.

Ruben Sierra went four for five and Jeff Kunkel drove in three runs. Rafael Palmeiro extended his hitting streak to 15 games with a single in the sixth.

Leading 3-0 in the sixth, Texas scored nine runs to break open the game. Every Ranger starter scored in the inning in which Texas collected nine consecutive base hits to come within one of tying the major league record of 10 straight hits, last accomplished by Detroit in 1983 against Baltimore. Fifteen Rangers went to the plate in the inning as Texas tied a team record with the nine hits and nine runs in one inning. Eleven straight batters reached base safely in the inning.

''I've never been involved in anything like that,'' said Texas manager Bobby Valentine, who had pitcher Kevin Brown hit in the ninth inning. ''I don't see many nine-run innings. I don't see many nine-run games.''

Raphael Palmiero who extended his hitting streak to fifteen games with a single in the inning, said he couldn't wait to get up to bat.

''You just want to get up to the plate and hit,'' Palmeiro said of sitting on the bench during the big inning. ''The guy's throwing pitches that everybody's hitting, so you want to get up and get your turn.''

Texas batters certainly had enough chances to hit, with 46 batters going up to the plate in the first six innings and finishing with a total of 57 for the game.

''It got out of hand,'' Cleveland Manager John McNamara said. ''There wasn't anything we could do about it. Really, there's not a lot to say about that game. All that counts is who won.''

Bobby Witt, 11-8, won his eighth consecutive decision by giving up three runs, two earned, and five hits in seven innings with two walks and 10 strikeouts.

Bud Black, 10-7, gave up six runs on 10 hits in 5 1-3 innings with five walks, one intentional, and six strikeouts.

Incaviglia's 18th homer of the year in the second gave the Rangers a 2-0 lead, and they went ahead 3-0 on Kunkel's RBI double in the fourth. Incaviglia is now eight for 18 (.444) against Black in his career with

four home runs, and Sierra is 14 for 21 (.666) against Black.

''Every good pitch I make, he crushes,'' Black said of Sierra.

Elsewhere in the American League: Oakland downed Baltimore 5-2, Detroit edged Toronto 5-4, Kansas City topped Chicago 5-3, New York blanked Seattle 1-0 and Boston blasted California 14-3.

In the NL, it was: New York 5, Philadelphia 4; St. Louis 3, Chicago 1; Montreal 7, Pittsburgh 6, 10 innings; Los Angeles 10, Cincinnati 3 and San Diego 7, Atlanta 0.

-- AROUND THE AL --

Athletics 5, Orioles 2

At Oakland, Calif., Dave Henderson hit a two-run homer and added an RBI double to back Mike Moore's six-hit pitching. Moore, 10-10, went 5 2-3 innings for his second win in five starts. Dennis Eckersley, worked the ninth for his major-league leading 37th save. Dave Johnson fell to 11-7.

Tigers 5, Blue Jays 4

At Toronto, Larry Sheets hit a three-run home run to help Jeff Robinson's six-hit pitching over seven innings and rally Detroit. Robinson, evened his record to 9-9. Jerry Don Gleaton worked two innings one-hit relief, to gain his sixth save. Todd Stottlemyre, fell to 10-13.

Royals 5, White Sox 3

At Kansas City, George Brett doubled, singled twice and drove in three runs and rookie Brian McRae knocked-out two doubles to lift Kansas City. Kevin Appier, 7-4, gained his fifth win in his last six decisions. Steve Farr earned his 1st save and Adam Peterson, 2-4, took the loss.

Yankees 1, Mariners 0

At Seattle, Tim Leary allowed two hits over 8 1-3 innings and Bob Gerren delivered an RBI single to help New York to a three-game sweep of Seattle and fifth straight win. Leary, 6-14, walked four and struck out eight. Lee Guetterman picked up his first save. Matt Young, 5-12, absorbed the loss.

Red Sox 14, Angels 3

At Anaheim, Calif., Ellis Burks and Mike Greenwell each drove in three runs to help Roger Clemens capture his sixteenth win and lift Boston. Clemens, 16-5, shutout the Angels on five singles through six innings before they scored in the seventh. Jim Abbot fell to 7-10.

KATHMANDU (AUG. 10) XINHUA - NEPALESE INDUSTRIALISTS HAVE THREATENED TO LOCK OUT THEIR INDUSTRIES IF THE PRESENT LABOR UNREST AND UNTOWARD ACTIVITIES REMAIN UNCHECKED.

THIS WAS DISCLOSED THURSDAY AT A PRESS MEETING BY THE EMPLOYERS' COUNCIL, THE LOCAL ENGLISH PAPER "THE RISING NEPAL" REPORTED TODAY.

OWING TO THE CONTINUING LABOR UNREST AND DISTURBANCES IN THE COUNTRY, THE OUTPUT OF THE INDUSTRIAL SECTOR HAS DETERIORATED BY ABOUT 40 PERCENT OVER THE PAST THREE MONTHS, THE COUNCIL SAID.

THE NEPALESE INDUSTRIES, WHICH HAD ALREADY BEEN IN A DIFFICULT POSITION OWING TO SHORTAGE OF RAW MATERIALS AND FUELS AND MORE THAN FIFTEEN MONTHS' TRADE AND TRANSIT DEADLOCK BETWEEN NEPAL AND INDIA, ARE NOW BEING HARD HIT BY THE PRESENT INDUSTRIAL UNREST, ACCORDING TO THE COUNCIL.

THIS UNREST HAS BEEN GRADUALLY SPREADING TOWARDS OTHER SECTORS LIKE HOTELS AND TRANSPORT, AND HAS NEARLY PARALYZED THE KINGDOM'S ECONOMY.

"DESPITE THE IMPLEMENTATION OF THE GOVERNMENT DECISION RELATING TO THE SALARIES AND ALLOWANCE OF THE WORKERS, THE INDUSTRIAL PEACE AND SMOOTH OPERATION ARE NOW BEING CHALLENGED BY SOME LABORERS WHO ARE WORKING AT THE BEHEST OF SOME OUTSIDE TROUBLE MAKERS," THE COUNCIL CHAIRMAN PADMA JYOTI WAS QUOTED AS SAYING.

HE COMPLAINED THAT "AFTER THE COUNCIL HAD RESOLVED SOME OF THE DEMANDS RELATING TO FINANCIAL PROBLEMS, THE LABOURERS ARE COMING UP WITH NEW DEMANDS."

IT WAS REPORTED THAT NEPALESE PRIME MINISTER K.P. BHATTARAI AND MINISTER OF LABOR AND SOCIAL WELFARE N. ACHARYA ARE MAKING EFFORTS TO SOLVE THE PROBLEMS THROUGH DIFFERENT CHANNELS AND MEANS.

GABORONE (AUGUST 10) XINHUA -- AT LEAST 33 PEOPLE HAVE BEEN KILLED IN THE VIOLENCE TRIGGERED BY RENT RISE IN PORT CITY OF ELIZABETH, SOUTH AFRICA, ACCORDING TO A REPORT FROM PORT ELIZABETH TODAY.

POLICE SPOKESMAN MAJOR BILL DENNIS SAID LAST NIGHT THAT IT IS IMPOSSIBLE TO DETERMINE HOW MANY PEOPLE HAVE BEEN KILLED IN POLICE ACTION AND RETALIATION BY SHOPKEEPERS PROTECTING THEIR PROPERTY DURING RIOTING.

EYE-WITNESSES SAID VIRTUALLY EVERY SHOP IN THE AREA HAS EITHER BEEN LOOTED OR DAMAGED AND MORE DEATHS ARE EXPECTED AS RIOTING AND LOOTING CONTINUES.

THE AFRICAN NATIONAL CONGRESS (ANC) HAS JOINED POLICE IN APPEALING FOR PEACE.

A SENIOR ANC AND SOUTH AFRICAN COMMUNIST PARTY (SACP) LEADER IN THE AREA, MR. GOVAN MBEKI, SAID THAT ANC MEMBERS ARE ATTEMPTING TO GET THE SITUATION UNDER CONTROL "WITH THE COOPERATION OF THE POLICE".

MR. MBEKI STRESSED THE IMPORTANCE OF POLICE WITHHOLDING THEIR FIRE AND EXERCISING RESTRAINT.

"ON WEDNESDAY NIGHT PEOPLE WERE BEGINNING TO LISTEN TO THE ANC, BUT WITH THE POLICE SHOOTING, IT WAS DIFFICULT TO CONTROL THEM, IF ONLY THE POLICE WOULD HOLD THEIR FIRE," HE SAID.

YESTERDAY AFTERNOON, MR. MBEKI TOLD OVER 7,000 PEOPLE AT A PUBLIC MEETING THAT THE CAUSE OF THE RIOTING IS STINKING APARTHEID.

MR. MBEKI AND OTHER ANC AND ANC-ALLIED YOUTH ORGANISATION LEADERS APPEALED FOR CALM, DISCIPLINE AND A HAULT TO THE LOOTING.

POLICE MAJOR DENNIS SAID BY EARLY YESTERDAY 32 SHOPS, SIX HOUSES, TWO FACTORIES, A CHURCH AND THREE SCHOOLS HAD BEEN LOOTED AND GUTTED IN THE VIOLENT PROTEST AGAINST THE RENT HIKE WHICH ERUPTED ON MONDAY.

HE CLAIMED THAT POLICE VEHICLES TRYING TO RESTORE ORDER IN THE AREA HAVE BEEN STONED OR PETROL-BOMBED. AT LEAST 41 VEHICLES HAVE BEEN DAMAGED, AND SEVEN TOTALLY DESTROYED. 90 PEOPLE HAVE BEEN ARRESTED ON CHARGES OF ARSON, PLUNDERING OR LOOTING AND PUBLIC VIOLENCE.

LUANDA (AUGUST 10) XINHUA - "THE CONDITIONS OF HOLDING THE 3RD ROUND OF

PEACE TALKS BETWEEN THE ANGOLAN GOVERNMENT AND UNITA REBELS HAVE NOW BEEN MET," SAID PORTUGUESE PREMIER ANIBAL CAVACO SILVA.

MR. SILVA MADE THE REMARKS ON THURSDAY AFTER MEETING WITH ANGOLAN PRESIDENT JOSE EDUARDO DOS SANTOS, THE "JORNAL DE ANGOLA" REPORTED TODAY.

HE SAID THE MEETING WITH THE PRESIDENT ENABLED HIM TO SEE THE FLEXIBILITY ON THE PART OF THE ANGOLAN GOVERNMENT.

PORTUGAL IS ABOUT TO MAKE A NEW CONTACT WITH THE REBEL NATIONAL UNION FOR THE TOTAL INDEPENDENCE OF ANGOLA (UNITA) IN ORDER TO BRING THE STANDS OF THE TWO PARTIES CLOSER.

THE PREMIER ANNOUNCED THAT THE 3RD ROUND OF PEACE TALKS WOULD BE HELD IN PORTUGAL IN THE SECOND HALF OF AUGUST. "I HOPE 1990 IS INDEED A YEAR WHEN THE ANGOLAN PEOPLE CELEBRATE THEIR PEACE," HE NOTED.

HE SAID THAT "UNITA HAS A WISH FOR SIGNING A CEASEFIRE AGREEMENT." BUT HE QUICKLY ADDED THAT THIS DOES NOT NECESSARILY MEAN THERE ARE NO OBSTACLES IN THE PEACE COURCE OF ANGOLA.

HE STRESSED THAT "ALL PARTIES CONCERNED MUST KEEP IT IN MIND THAT NO ONE WILL BE LIKELY TO SCORE ANY POINTS IN MAKING A DEADLOCK."

LUANDA AND UNITA HAVE HELD TWO DIRECT TALKS IN PORTUGAL. THE 3RD ROUND OF TALKS, SCHEDULED TO TAKE PLACE IN THE FIRST HALF OF JULY, WERE POSTPONED FOR SEVERAL TIMES.

THE ANGOLAN GOVERNMENT HAS CALLED FOR, AS THE FIRST STEP, ARRIVING AT AN UNDERSTANDING OF CEASEFIRE. BUT UNITA HAS DEMANDED THAT THE GOVERNMENT FIRST RECOGNIZE UNITA AS A LEGAL OPPOSITION PARTY.

#90222h0160 08/10/1990 ~Chinese News Agency

OTTAWA (AUG. 10) XINHUA - THE CANADIAN FORCES WILL NOT MOVE INTO TWO TROUBLED AREAS IN QUEBEC PROVINCE BEFORE TOMORROW, BECAUSE NO DECISION HAS BEEN MADE ON HOW MANY SOLDIERS WILL BE SENT OR WHEN THEY WILL BE DEPLOYED, MILITARY SOURCES HERE SAY.

ABOUT 5,000 CANADIAN SOLDIERS ARE ON ALERT, READY TO REPLACE SOME 1,500 "EXHAUSTED" POLICE OFFICERS WHO HAVE BEEN IN TENSE STANDOFFS WITH NATIVES FROM TWO INDIAN RESERVES NEAR MONTREAL.

THE STANDOFFS BEGAN ON JULY 11 WHEN POLICE MOVED IN THE KANESATAKE RESERVE 30 KILOMETERS WEST OF MONTREAL, TO FORCIBLY DISMANTLE A ROADBLOCK SET UP BY INDIANS OPPOSED TO EXPANSION OF A GOLF COURSE ONTO THE LAND THEY CLAIM TO BE THEIR OWN. A FIERCE GUNFIGHT ERUPTED, LEAVING ONE POLICE OFFICER

DEAD.

THE SAME DAY, THE INDIANS FROM THE KAHNAWAKE RESERVE JUST SOUTH OF MONTREAL ERECTED A SYMPATHY BLOCKAGE AT THE NEARBY "MERCIER BRIDGE," WHICH IS ONE OF THE MAIN ARTERIES LINKING MONTREAL WITH THE SOUTH SHORE OF THE ST. LAWRENCE RIVER.

THE ACTION HAS ANGERED LOCAL RESIDENTS WHO USE THE BRIDGE AND THEY HAVE BEEN CALLING FOR THE MILITARY TO RAID THE BARRICADES.

ON WEDNESDAY NIGHT CANADIAN PRIME MINISTER BRIAN MULRONEY ANNOUNCED THAT THE ARMY WAS MOVING IN TO REPLACE THE POLICE, "WHO AFTER A MONTH OR SO ARE PRESUMABLY FATIGUED, AND EVENTUALLY TO WORK WITH AND SUBSTITUTE FOR THOSE FORCES."

HOWEVER, LIEUTENANT-GENERAL KENT FOSTER, COMMANDER OF THE CANADIAN MOBILE COMMAND, TOLD A PRESS CONFERENCE THURSDAY THERE WILL BE NO TROOP MOVEMENT UNLESS MEDIATION EFFORTS FAIL.

HE SAID THE AMRY WILL NOT BE CALLED IN WITHOUT A REQUEST FROM CHIEF JUSTICE ALAN GOLD OF THE QUEBEC SUPERIOR COURT, WHO HAS BEEN NAMED AS A MEDIATOR IN THE DISPUTE.

THE ROLE OF GOLD WILL BE SIMPLY TO GET THE TWO PARTIES BACK TO THE NEGOTIATING TABLE. THE TWO SIDES HAVE BEEN QUIBBLING FOR ALMOST TWO WEEKS OVER THE WORDING OF AN AGREEMENT SETTING OUT THE PRE-CONDITIONS TO RESUME TALKS.

THE INDIANS HAVE DEMANDED FREE ACCESS TO FOOD AND MEDICINE, EASY ACCESS FOR THEIR SPIRITUAL AND LEGAL ADVISERS AND A TEAM OF INTERNATIONAL OBSERVERS TO OVERSEE THE ACTIONS OF POLICE, WHO ONCE REFUSED ANY ENTERY OF FOOD AND MEDICINE INTO THE KANESATAKE RESERVE FROM OUTSIDE.

BOTH SIDES, WHO HAVE NOT MET FACE-TO-FACE SINCE JULY 15, CONCEDE THAT ONCE THEY SIT DOWN TOGETHER AGAIN, AN AGREEMENT ON TEARING DOWN THE BARRICADES COULD BE REACHED QUICKLY.

"IF NEGOTIATIONS ARRIVE AT A POINT WHERE OUR PRESENCE WILL FACILITATE NEGOTIATIONS, WE WILL BE THERE," SAID LIEUTENANT-GENERAL FOSTER.

COLOMBO (AUG. 10) XINHUA - THE AUSTRALIAN GOVERNMENT SUPPORTS THE SOVEREIGNTY AND INTEGRITY OF SRI LANKA, VISITING AUSTRALIAN MINISTER OF FOREIGN AFFAIRS AND TRADE GARETH EVANS SAID HERE TODAY.

SPEAKING AT A PRESS CONFERENCE HERE THIS EVENING, THE MINISTER, WHO

ARRIVED HERE LAST NIGHT FOR A TWO-DAY VISIT, SAID THAT HE CALLED ON SRI LANKAN PRESIDENT RANASINGHE PREMADASA THIS MORNING AND THAT THEY DISCUSSED BILATERAL ISSUES, TRADE AND ECONOMIC MATTERS AS WELL AS INTERNATIONAL AND REGIONAL DEVELOPMENTS.

EVANS SAID THAT HIS GOVERNMENT CALLED ON THE SRI LANKAN GOVERNMENT TO RESUME PEACE TALKS WITH THE LIBERATION TIGERS OF TAMIL EELAM (LTTE), THE DOMINANT TAMIL MILITANT GROUP IN THE COUNTRY, TO SOLVE THE ETHNIC PROBLEM.

THE AUSTRALIAN MINISTER SAID THAT HIS GOVERNMENT STRONGLY SUPPORTED UNITED NATIONS SANCTIONS AGAINST IRAQ WHICH INVADED AND OCCUPIED KUWAIT ON AUGUST 2.

THE AUSTRALIAN MINISTER'S VISIT HERE IS PART OF HIS TOUR OF THE SOUTH ASIA REGION, INCLUDING INDIA, PAKISTAN AND BANGLADESH.

HE WILL LEAVE HERE FOR HOME SATURDAY.

MANAGUA (AUG. 10) XINHUA - BORDEN, A CHEMICAL MANUFACTURER, HAS BECOME THE FIRST OF NICARAGUA'S STATE-RUN COMPANIES TO BE RETURNED INTO PRIVATE HANDS AFTER SEVEN YEARS OF MANAGEMENT BY THE PEOPLE'S INDUSTRIAL CORPORATION (COIP).

THE MOVE WAS ANNOUNCED AT A PRESS CONFERENCE THURSDAY BY ERWIN KRUGER, THE PRESIDENT OF THE NEWLY-CREATED NICARAGUAN PUBLIC SECTOR CORPORATION.

BORDEN, WHOSE SHAREHOLDERS INCLUDE FOREIGNERS AND THREE NICARAGUANS, WAS TAKEN OVER BY THE SANDINISTA GOVERNMENT IN 1983 AND TURNED OVER TO THE COIP, A STATE ORGANIZATION, THE SAME YEAR.

KRUGEN SAID THE COMPANY'S RETURN TO PRIVATE OWNERSHIP WAS A RESULT OF A DECISION HANDED DOWN BY THE FIRST JUDGE OF MANAGUA'S CIVIL DISTRICT COURT IN FAVOR OF THE SHAREHOLDERS.

DUILIO BALTODANO, THE ATTORNEY GENERAL AND PRESIDENT OF THE NEW NATIONAL COMMISSION CHARGED WITH REVIEWING GOVERNMENT SEIZURES OF PROPERTY, ANNOUNCED DURING A SEPERATE PRESS CONFERENCE THAT THE COMMSSION OFFICIALLY BEGAN REVIEWING CASES THURSDAY.

ACCORDING TO A LAW ENACTED BY THE NEW NICARAGUAN GOVERNMENT, THE COMMISSION "SEEKS TO REPAIR THE INJUSTICES AND ARBITRARY ACTS COMMITTED BY THE PREVIOUS GOVERNMENT."

#90222h0171 08/10/1990 ~Chinese News Agency

LIMA (AUG. 10) XINHUA - THE PERUVIAN GOVERNMENT PLACED AN ACROSS-THE-BOARD FREEZE ON THE HIRING OF ANY NEW PERSONNEL BY GOVERNMENT-RUN INSTITUTIONS, ACCORDING TO AN OFFICIAL DECREE ISSUED THURSDAY.

THE GOVERNMENT ALSO BANNED ANY NEW EXPENDITURES ON SUCH THINGS AS CLOTHING OFFICIAL CELEBRATIONS AND RECEPTIONS AND THE RENTING OF FURNITURE.

IN ADDITION, THE GOVERNMENT PLACED A FREEZE ON WAGES, LIMITED SPENDING ON PRINTING, SUBSCRIPTIONS, FUEL, FARES AND MONEY AVAILABLE FOR PETTY CASH.

THE DECREE ALSO CLOSES DOWN THE INSTITUTE OF FOREIGN TRADE AND TRANSFERS ITS ACTIVITIES TO THE OFFICE OF THE PREMIER.

THE MINISTRY OF FOREIGN RELATIONS HAS BEEN ORDERED TO REDUCE THE NUMBER OF EMBASSIES, CONSULATES AND STAFF IT MAINTAINS ABROAD, AND TO FIRST AUTHORIZE ANY TRIPS ABROAD THROUGH THE CABINET COUNCIL.

GOVERNMENT SOURCES SAID THE AUSTERITY MEASURES AIM TO DRASTICALY REDUCE PUBLIC SPENDING AND REVERSE THE COUNTRY'S INFLATIONARY TREND, WHICH IS CURRENTLY CLOSE TO 3,000 PERCENT.

#90222h0174 08/10/1990 ~Chinese News Agency

ADDIS ABABA (AUG. 10) XINHUA - ABOUT 7,000 HECTARES OF FORMERLY COLLECTIVELY-OWNED COFFEE LAND HAVE BEEN DISTRIBUTED TO INDIVIDUAL COFFEE PRODUCERS IN THE COFFEE-PRODUCING REGION OF ILLUBABOR IN WESTERN ETHIOPIA IN AN EFFORT TO BOOST COFFEE PRODUC- TION.

THE ETHIOPIAN NEWS AGENCY TODAY QUOTED THE REGION'S CHIEF AD- MINISTRATOR

DADI HUNDE AS SAYING THAT THE DECISION TO DISTRIBUTE THE LAND WAS MADE ON THE BASIS OF A STUDY WHICH SHOWS THE YIELDS FROM THE PLANTATIONS WERE LOW DUE TO THE LACK OF PROPER CARE UNDER COLLECTIVE OWNERSHIP.

HE SAID THAT THE DISTRIBUTION OF SUCH LAND WILL CONTINUE. THIS IS THE FIRST OFFICIAL REPORT THAT COLLECTIVELY-OWNED LAND HAS BEEN DISTRIBUTED TO PRIVATE PRODUCERS SINCE THE COUNTRY SHIFTED ITS ECONOMIC POLICY OF CENTRAL PLANNING TO A MIXED ECONOMY.

#90222j0001 08/10/1990 ~Journal Graphics (TV show transcripts)

(AUG. 10) JOURNAL GRAPHICS - Summarizing the previous day's television programs transcribed by Journal Graphics, Inc. Full transcripts available by fax or mail.

For more information, or to order transcripts, call (800) TALK- SHO. In New York City call: (212) 732-8552.

Primetime Live (ABC) August 9, 1990 (Transcript #153)

''One Who Confronts'' (further excepts from Diane Sawyer's recent interview with Iraqi President Saddam Hussein); ''Toby's Journey'' (Brother Toby McCarroll's mission to care for AIDS babies in America and Romania); ''Sale of the Century'' (an 1872 law still on the books allows the purchase of Federal land for $2.50 an acre for commercial mining); ''Letter to Mandela'' (a white South African expatriate's video letter to Nelson Mandela about their mutual homeland); Also: U.S. military locations in Saudi Arabia; a rundown of Iraq's chemical weapons and the U.S. military's defenses against them; how celebrity convicts actually serve community service sentences.

48 Hours (CBS) August 9, 1990 (Transcript #120)

Over Their Heads (R-#96): A report on credit card debt and bankruptcy in America today, the outcome of bad habits or bad luck for millions of people.

Nightline (ABC) August 9, 1990 (Transcript #2404)

From Cairo, Egypt: Arab Leaders' Summit: Middle East experts Tahseen Basheer and Kamel Abu Jaber give their perspectives on the invasion of Kuwait, the U.S. decision to send troops to Saudi Arabia and how far Iraqi President Saddam Hussein will go.

Larry King Live (CNN) August 9, 1990 (Transcript #104)

Escape from Kuwait / Chemical Weapons / Claims Father Killed JFK: Steve Betts tells his story of escaping by car across the desert to Saudi Arabia. David Silverstein of the Heritage Foundation and John Isaacs of the Council for a Liveable World discuss the role of chemical weapons in warfare throughout history. They concentrate on whether or not poison gases should be considered in the current crisis in the Mideast East, as Saddam Hussein has employed them in the past and may resort to them again. Ricky White claims his father was one of the three assassins that the CIA directed to eliminate President Kennedy, whom they considered a national security risk. He bases his claims on his deceased father's diary and his own investigations.

Crossfire (CNN) August 9, 1990 (Transcript #114)

Are We On Our Own Against Iraq?: A discussion allied support for the U.S. in the Persian Gulf and the fate of Americans in Iraq and Kuwait with West German Economic Minister to the U.S. Hagen Count Lambsdorff, Kan Ito of the Japan Forum on International Relations, and former National Security Adviser Richard Allen.

Moneyline (CNN) August 9, 1990 (Transcript #158)

How to pay for the expensive military operation of sending U.S. troops to the Persian Gulf; sanctions prohibit most food exports to Iraq and rice futures are falling dramatically; ten billion dollars of 30-year Treasury bonds were auctioned, with good results; William Donaldson discusses his election as Chairman and CEO of the New York Stock Exchange; Frank Lorenzo Chairman of Continental Airlines, is selling most of his stake in the carrier to Scandinavian Air System; Dan Dorfman discusses a United Telecommunications takeover rumor.

Donahue August 9, 1990 (Transcript #3008)

What Gets on TV? (R-#2658): Detroit housewife Terry Rakol and other guests discuss how to deal with television programming that they find offensive. Methods of protest are discussed, from simply turning off the TV to lobbying advertisers to pull commercials from a program.

Oprah Winfrey August 9, 1990 (Transcript #1019)

Gay Adoption: Two openly gay adoptive fathers discuss raising sexually healthy children in a society that rejects homosexuals as parents. Other guests support or condemn gay adoptions, either from a personal or moral viewpoint. (Transcript #1019)

Geraldo August 9, 1990 (Transcript #756)

Cheaper By the Dozen: Parents of large families discuss what it's like to raise 11 or more children, and some of their children express their feelings about being a member of such a large family. Psychologist Kevin Leman (The Birth Order) talks about the different aspects of large families and its impression in today's society.

Sally Jessy Raphael August 9, 1990 (Transcript #504)

Wedding Day Disasters: Guests tell how their wedding days turned into disastrous occasions, sharing stories of collapsing reception halls, bridegroom muggings, and being left at the altar. (Transcript #504) Good Morning America (ABC) August 9, 1990 (Transcript #1884)

State of Arab unity; communism in decline; threat of chemical weapons; Joel's videos of the month; Julia Roberts interview, Part 1; British role in Iraq crisis; nondiscriminatory casting; Julia Child's pear pudding; summer houseplant surgery; soap opera anniversary.

Newsline New York (WNYW-TV) August 9, 1990 (Transcript #144)

Persian Gulf Crisis: A discussion of the current Middle East situation with Dr. M.T. Mehdi (American-Arab Relations Committee), Dr. George Gruen (Columbia University) and Dr. Lawrence Korb (Brookings Institution).

#90222k0063 08/10/1990 ~Japanese News Agency
MANILA (AUG. 10) KYODO - PHILIPPINE DEBT NEGOTIATORS HAVE URGED JAPAN TO HASTEN THE RELEASE OF MANILA'S SHARE OF 358 MILLION U.S. DOLLARS FROM THE 2 BILLION-DOLLAR ASEAN-JAPAN DEVELOPMENT FUND TO PROVIDE MONEY NEEDED TO REBUILD AREAS DEVASTATED BY LAST MONTH'S EARTHQUAKE, OFFICIALS SAID FRIDAY.

PHILIPPINE FINANCE SECRETARY JESUS ESTANISLAO AND THE CENTRAL BANK GOVERNOR, JOSE CUISIA, REQUESTED JAPANESE OFFICIALS DURING THEIR TOKYO TRIP LAST WEEK, TO ALSO ENSURE THAT COMMITTED LOANS AND GRANTS ARE DISBURSED SPEEDILY, THE OFFICIALS SAID.

ON JULY 27, FINANCE OFFICIALS SAID THE PHILIPPINES WOULD ASK JAPAN FOR THE EARLY DISBURSEMENT OF THE 18TH YEN LOAN PACKAGE, UP FOR DISCUSSION NEXT YEAR, TO AUGMENT FINANCING FOR THE REHABILITATION OF SEVERAL NORTHERN PHILIPPINE REGIONS.

THE JULY 16 QUAKE KILLED AT LEAST 1,700 PEOPLE AND INJURED MORE THAN 3,000. IN ADDITION, ABOUT 1.5 MILLION FILIPINOS LOST EITHER THEIR JOBS OR THEIR HOMES.

OFFICIALS SAID THE PHILIPPINE DEBT PANEL WAS PUTTING ITS RELIANCE ON THE GOODWILL OF THE JAPANESE GOVERNMENT TO DISBURSE THE DEVELOPMENT FUND MONEY. THE PHILIPPINES STARTED NEGOTIATING FOR THE FUNDS IN 1987.

TOKYO'S RESPONSE HAS BEEN DELAYED AS IT IS STUDYING MANILA'S PROPOSALS ON TERMS AND CONDITIONS FROM MANILA, PARTICULARLY THE INTEREST RATE, SOURCES SAID.

JAPAN IS THE LARGEST AID DONOR AND CREDITOR OF THE PHILIPPINES, WHICH IS ONE OF SIX MEMBERS OF ASEAN, THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS.

#90222k0064 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - JAPAN'S EXPORTS ON A CONTRACT BASIS IN JULY ROSE 5.1 PERCENT FROM A YEAR EARLIER TO 22.59 BILLION DOLLARS.

IT WAS THE FIRST SUCH EXPANSION IN EXPORTS SINCE SEPTEMBER LAST YEAR, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED FRIDAY.

A MITI OFFICIAL ATTRIBUTED THE INCREASE IN EXPORTS TO THE YEN'S DECLINE AGAINST THE U.S. DOLLAR.

IMPORTS ROSE 8.1 PERCENT FROM THE YEAR-EARLIER LEVEL TO 16.54 BILLION DOLLARS, COMPARED WITH A PALTRY 2.7 PERCENT INCREASE IN JUNE, THE MINISTRY SAID.

THE TRADE FIGURES ARE BASED ON REPORTS TO MITI FROM THE COUNTRY'S MAJOR TRADING HOUSES.

EXPORTS OF AUTOMOBILES, SHIPS AND COMPUTERS REMAINED ON THE RISE, WHILE EXPORTS OF STEEL AND SEMICONDUCTORS WERE SLUGGISH.

ON THE IMPORT SIDE, JAPAN IMPORTED MORE AUTOMOBILES, SHRIMPS, LARGE AIRPLANES, AND PAINTINGS, THE OFFICIAL SAID.

-30- 1039

#90222k0065 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - THE POST AND TELECOMMUNICATIONS MINISTRY ANNOUNCED FRIDAY IT WILL TEMPORARILY STOP ACCEPTING MAIL TO IRAQ AND LIBERIA STARTING SATURDAY.

THE MINISTRY SAID THE STOPPAGE IS DUE TO THE CLOSURE OF IRAQI AIR AND SEA PORTS FOLLOWING INTERNATIONAL TENSION RESULTING FROM THE IRAQI INVASION OF KUWAIT. MAIL TO KUWAIT HAS BEEN STOPPED SINCE LAST SATURDAY.

MOUNTING INTERNAL STRIFE IN LIBERIA HAS ALSO DISRUPTED MAIL SERVICES IN THE COUNTRY.

-30- 639

#90222k0067 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - JAPAN WILL NOT COMPLY WITH IRAQ'S ORDER TO PULL ITS DIPLOMATS OUT OF KUWAIT AND MOVE THEM TO BAGHDAD, CHIEF GOVERNMENT SPOKESMAN MISOJI SAKAMOTO SAID FRIDAY.

''JAPAN'S POSITION IS THAT THE ANNEXATION (OF KUWAIT) IS A VIOLATION OF INTERNATIONAL LAW AND IS INTOLERABLE,'' SAKAMOTO SAID.

IRAQ ON THURSDAY GAVE ALL FOREIGN EMBASSIES IN KUWAIT TWO WEEKS TO CLOSE DOWN AND MOVE TO THE IRAQI CAPITAL.

THE ORDER CAME AFTER IRAQ ANNOUNCED IT WAS ANNEXING ITS TINY OIL-RICH NEIGHBOR, A WEEK AFTER LAUNCHING A MILITARY INVASION.

ASKED ABOUT POSSIBLE REPERCUSSIONS AGAINST JAPANESE NATIONALS IF JAPAN FAILS TO MEET THE DEMAND, SAKAMOTO RESPONDED THAT JAPAN IS THINKING OF ''VARIOUS OPTIONS.'' HE DID NOT ELABORATE.

ON THURSDAY, THE TRANSPORT MINISTRY ASKED JAPAN AIRLINES TO DISPATCH A JUMBO JET TO KUWAIT TO BRING HOME 276 JAPANESE NATIONALS. KUWAIT'S AIRPORT IS CLOSED.

A FOREIGN MINISTRY SOURCE SAID IT IS POSSIBLE THAT JAPANESE EMBASSY PERSONNEL MAY DEPART KUWAIT ONCE ALL JAPANESE CITIZENS HAVE BEEN EVACUATED.

''IF THE EMBASSY STAFF REMAIN THERE IS A POSSIBILITY THAT IRAQ COULD USE VIOLENCE, SO WE HAVE TO THINK OF THAT ASPECT,'' THE SOURCE SAID.

HE SAID THE GOVERNMENT WOULD WANT TO MAKE IT CLEAR THAT IT IS NOT

CONCEDING TO THE IRAQI DEMANDS.

THERE ARE 372 JAPANESE IN IRAQ.

-30- 1507

#90222k0077 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - SHOWA SHELL SEKIYU K.K. SAID FRIDAY IT WILL RAISE GASOLINE PRICES BY NEARLY 10 PERCENT AS EARLY AS NEXT MONTH TO COVER HIGHER COSTS DUE TO RISING CRUDE OIL PRICES, A MOVE EXPECTED TO BE FOLLOWED BY OTHER OIL COMPANIES.

THE AFFILIATE OF ROYAL DUTCH SHELL SAID THAT, INCLUDING A RISE OF 4 TO 5 YEN PER LITER WHICH WAS ALREADY PLANNED, THE TOTAL INCREASE IN THE PRICE OF GASOLINE WILL BE AROUND 10 YEN PER LITER.

MOTORISTS AT PRESENT PAY 120 YEN PER LITER. UNCERTAINTIES OVER THE TURMOIL IN THE PERSIAN GULF FOLLOWING IRAQ'S INVASION OF KUWAIT LAST WEEK AND THE U.N. TRADE EMBARGO ON THE TWO NATIONS HAVE SENT OIL PRICES SHARPLY HIGHER AROUND THE WORLD. THE SPOT BENCHMARK DUBAI OIL TOPPED 26 DOLLARS PER BARREL IN TOKYO EARLY THIS WEEK, THOUGH SLIDING DOWN TO THE 21 DOLLAR LEVEL ON FRIDAY, COOLED BY REPORTS THAT OTHER OIL NATIONS WILL RAISE PRODUCTION TO MEET THE SHORTFALL.

HIROSHI OTAKA, MANAGING DIRECTOR OF SHOWA SHELL, SAID, ''WE NEED TO RAISE PRICES BY 5 TO 6 YEN PER LITER TO EASE BURDENS FROM RISING OIL PRICES.''

A 1 DOLLAR RISE IN THE PRICE OF A BARREL OF CRUDE OIL IS CALCULATED TO PUSH UP COSTS OF GASOLINE DISTRIBUTORS BY 1 YEN PER LITER.

INDUSTRY SOURCES SAID THE MOVE MAY TRIGGER A WAVE OF PRICE HIKES BY COMPETITORS, THOUGH SOME OF THEM ARE STILL RELUCTANT TO DO SO FOR FEAR THAT SUCH AN ACTION WOULD PROVOKE CRITICISM THAT THEY ARE CASHING IN ON HIGHER OIL PRICES.

-30- 1615

#90222k0079 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - JAPANESE BANKS WILL NOT MAKE NEW LOANS TO VENEZUELA BECAUSE THEY ARE DISSATISFIED WITH THE PROGRESS OF ITS ECONOMIC RESTRUCTURING, INTERNATIONAL BANKING SOURCES SAID FRIDAY.

INSTEAD, THE BANKS WILL CHOOSE OTHER OPTIONS IN A FIVE-POINT DEBT RELIEF PLAN ADVANCED BY U.S. TREASURY SECRETARY NICHOLAS BRADY, INCLUDING A 30-PERCENT REDUCTION IN THE PRINCIPAL THE SOURCES SAID.

THE DECISION IS BASED ON A PERCEPTION THAT THE VENEZUELAN ECONOMY HAS SHOWN LITTLE IMPROVEMENT DESPITE HIGHER OIL PRICES, THEY SAID.

VENEZUELA'S MEDIUM- TO LONG-TERM FOREIGN DEBTS TOTAL ABOUT 20 BILLION DOLLARS, 20 PERCENT OF WHICH IS OWED TO 30 JAPANESE BANKS.

-30- 822

#90222k0080 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - AN INTER-MINISTERIAL LIAISON COUNCIL OF OFFICIALS FROM 15 MINISTRIES AND AGENCIES FRIDAY DISCUSSED HOW TO ENCOURAGE JAPANESE WOMEN TO HAVE MORE CHILDREN BY REMOVING ''OBSTACLES'' TO BIRTH AND CHILDREARING.

THE COUNCIL, HOLDING ITS INAUGURAL MEETING FRIDAY, SAID IT IS CONSIDERING REVAMPING THE SYSTEM OF MATERNITY LEAVE FOR JAPANESE WOMEN, IMPROVEMENTS IN HOUSING POLICIES, REDUCTIONS IN HOUSE WORK, AND BETTER CHILDCARE SERVICES.

THE OFFICIALS HOPE TO ISSUE A REPORT ON THEIR STUDIES BY THE YEAR-END. THE BUREAU CHIEF-LEVEL OFFICIALS MAKING UP THE LIAISON COUNCIL ARE RESPONDING TO AN APPEAL BY PRIME MINISTER TOSHIKI KAIFU TO ''INCREASE THE DESIRE IN YOUNG JAPANESE TO HAVE CHILDREN.''

A REPORT OF 1989 POPULATION STATISTICS, RELEASED EARLIER, REVEALED THAT JAPANESE WOMEN RECORDED THE LOWEST LIFETIME BIRTHRATE EVER WITH AN AVERAGE 1.57 CHILDREN.

EXPLAINING THEIR REASONS FOR FOREGOING CHILDBIRTH, JAPANESE WOMEN COMPLAINED ABOUT THE HIGH COST OF RAISING AND EDUCATING CHILDREN AND JAPAN'S PROBLEMATIC HOUSING CONDITIONS.

OTHER WOMEN REMARKED THAT HAVING CHILDREN SHOULD NOT BE A REASON TO BE FORCED TO QUIT WORK, GIVING RISE TO THE NUMBER OF ''MARRIED WOMEN WHO DO NOT WANT TO GIVE BIRTH.''

KAIFU HAS CALLED CHILDREN ''THE TREASURES OF THE WORLD'' AND SUGGESTED JAPANESE WOMEN MUST HAVE CHILDREN ''FOR THE FUTURE OF JAPAN.''

HE HAS ALSO URGED THAT HIGHER BIRTHRATES BE ENCOURAGED BY CREATING AN ''EFFECTIVE ENVIRONMENT FOR RAISING CHILDREN.''

-30- 1686

#90222k0083 08/10/1990 ~Japanese News Agency

BANGKOK (AUG. 10) KYODO - DIPLOMATS FROM THE ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) ARE DEBATING ON A COMMON POLICY ON THE IRAQI GOVERNMENT'S CALL TO WITHDRAW THEIR EMBASSIES FROM KUWAIT, A THAI FOREIGN MINISTRY SOURCE SAID FRIDAY.

THE SOURCE SAID SENIOR ASEAN OFFICIALS DISCUSSED THE IRAQI DEMAND EARLIER IN THE DAY AND WOULD SOON DECIDE ON A COMMON STANCE TO MEET THE TWO-WEEK DEADLINE GIVEN BY THE IRAQI GOVERNMENT.

THE IRAQI GOVERNMENT ISSUED A LETTER TO ALL EMBASSIES IN BAGHDAD CALLING ON THEM TO WITHDRAW THEIR EMBASSIES FROM KUWAIT BEFORE AUGUST 24. IRAQ ANNEXED KUWAIT ON WEDNESDAY, A WEEK AFTER IT LAUNCHED A LIGHTNING INVASION ON THE TINY OIL-RICH NEIGHBOR.

SOME ASEAN DIPLOMATS, THE SOURCE SAID, ARGUE THAT CONCEDING TO THE IRAQI DEMAND WOULD SIGNIFY RECOGNIZING ITS ANNEXATION OF KUWAIT.

THE SOURCE SAID IF ASEAN DECIDES TO ABIDE BY THE IRAQI REQUEST, THAILAND IS LIKELY TO GO ALONG AND SEND ITS KUWAITI EMBASSY STAFF TO BAGHDAD TO TAKE CARE OF ABOUT 6,000-7,000 THAI WORKERS IN KUWAIT.

#90222k0087 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - MIZUNO CORP., A LEADING MAKER OF SPORTING GOODS, SAID FRIDAY IT PLANS TO START A GOLF COURSE MANAGEMENT AND CONSULTING BUSINESS ON OCTOBER 1 IN A FIVE-YEAR COOPERATION AGREEMENT WITH CLUB CORPORATION OF JAPAN (CCJ).

CCJ IS THE JAPANESE SUBSIDIARY OF CLUB CORPORATION OF AMERICA (CCA), KNOWN AS THE WORLD'S LARGEST GOLF COURSE MANAGING COMPANY.

MIZUNO OFFICIALS SAID THE NEW COMPANY WILL AIM TO OPEN OR IMPROVE 12 TO 13 GOLF COURSES BY THE END OF ITS THIRD YEAR OF OPERATIONS, AND HOPES TO CHALK UP SALES OF 3 TO 5 BILLION YEN IN THE FIRST FIVE YEARS.

CCA MANAGES 200 GOLF AND RESORT CLUBS ACROSS THE WORLD, REGISTERING SALES OF ABOUT 90 BILLION YEN A YEAR.

ITS JAPANESE SUBSIDIARY, FOUNDED IN 1984, GIVES TECHNICAL HELP TO THE FUJI COUNTRY CLUB IN GIFU PREFECTURE, CENTRAL JAPAN. IT ALSO MANAGES CENTURY CLUB IN OSAKA.

YOKOSUKA, KANAGAWA PREF (AUG. 10) KYODO - THREE WARSHIPS FROM THE U.S. 7TH FLEET, INCLUDING THE FLAGSHIP BLUE RIDGE, WILL MAKE A PORT CALL AT THE SOVIET FAR EAST NAVAL PORT OF VLADIVOSTOK SEPTEMBER 10-14, THE U.S. NAVY SAID HERE FRIDAY.

THE PORT CALL AIMS AT ENCOURAGING GOODWILL BETWEEN THE SOVIET AND U.S. NAVIES.

THREE SOVIET WARSHIPS MADE A PORT CALL AT SAN DIEGO IN JULY.

-30- 537

#90222k0095 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - TYPHOON-DRIVEN RAINS FRIDAY SPARED THE TOKYO METROPOLITAN AREA FROM A POTENTIALLY CRIPPLING WATER SHORTAGE BUT RESULTED IN 14 INJURIES AND CONSIDERABLE DAMAGE AND TRANSPORTATION DISRUPTIONS THROUGHOUT EASTERN JAPAN.

TYPHOON NO. 11, A MEDIUM-SIZED STORM THAT LANDED AT OMAEZAKI POINT, SHIZUOKA PREFECTURE 200 KILOMETERS SOUTHWEST OF TOKYO EARLY FRIDAY MORNING ROARED THROUGH EASTERN JAPAN AND ENTERED THE NORTHEASTERN PREFECTURES AROUND 5 P.M., WEAKENING RAPIDLY AS IT ADVANCED ALONG THE PACIFIC OCEAN COAST.

THE METEOROLOGICAL AGENCY FORECAST THAT THE TYPHOON, WHICH HAD LOST SOME OF ITS CONSIDERABLE FORCE OF WINDS OF 90 KILOMETERS PER HOUR, WOULD EDGE TOWARD EASTERN HOKKAIDO AND INTO THE NORTHERN PACIFIC BY SATURDAY.

SEVEN RESERVOIRS IN THE MOUNTAINS NORTH OF TOKYO, SERVING THE METROPOLITAN AREA, ROSE TO 34 PERCENT OF CAPACITY DUE TO THE TYPHOON'S RAIN, AND THE 10 PERCENT CUT ON WATER SUPPLIES TO HOUSEHOLDS IN THE CAPITAL WAS DISCONTINUED.

THE MINISTRY OF CONSTRUCTION'S KANTO (EAST JAPAN) REGIONAL CONSTRUCTION BUREAU, HOWEVER, POINTING TO FORECASTS FOR SUNNY WEATHER AFTER THE TYPHOON INDICATED THAT WATER RESTRICTIONS MAY BE RESTORED LATER.

THE NATIONAL POLICE AGENCY REPORTED FRIDAY THAT 14 PEOPLE HAD BEEN INJURED IN TYPHOON-RELATED INCIDENTS IN VARIOUS PLACES IN EASTERN JAPAN AND THAT 627 HOMES HAD SUFFERED FLOOD DAMAGE CAUSED BY TYPHOON RAINS.

SOME 43 LANDSLIDES WERE CAUSED BY THE HEAVY RAINS AND ROADS WERE WASHED OUT IN 19 PLACES.

JAPANESE TRAVELERS, LEAVING EARLY FOR THEIR HOMETOWNS FOR THE BON MIDSUMMER HOLIDAYS, WERE THWARTED BY THE TYPHOON.

THE EAST JAPAN AND CENTRAL JAPAN RAILWAYS REPORTED THAT CLOSE TO HALF A MILLION TRAVELERS WERE AFFECTED BY 73 SUSPENDED RUNS OF THE SHINKANSEN BULLET TRAINS AND ANOTHER 536 DELAYED BY THE TYPHOON.

BULLET TRAIN RUNS OUT OF UENO STATION IN TOKYO HEADING NORTH WERE HALTED FOR NEARLY FOUR HOURS FRIDAY, RESULTING IN RUSH HOUR-LIKE CONGESTION ON THE PLATFORMS, WHILE SHINKANSEN RUNS OUT OF TOKYO STATION FOR KYOTO AND OSAKA WERE REPORTEDLY RUNNING AT THREE TIMES THEIR CAPACITY.

EAST JAPAN RAILWAYS ALSO REPORTED THAT SOME 267 SPECIAL EXPRESS TRAIN RUNS WERE SUSPENDED AND ANOTHER 213 WERE UP TO 90 MINUTES BEHIND SCHEDULE, AFFECTING 120,000 COMMUTERS.

CONFUSION WAS COMPOUNDED WHEN POWER LINES IN SHIZUOKA PREFECTURE WERE DAMAGED BY HIGH WINDS FROM THE TYPHOON EARLY FRIDAY MORNING, FORCING A HALT TO ALL RAILWAY SERVICES CONNECTING TOKYO AND OSAKA.

HANEDA AIRPORT SAID 62 FLIGHTS WERE CANCELED BECAUSE OF THE TYPHOON CONDITIONS AND ANOTHER 300 FLIGHTS DELAYED -- SOME UP TO FIVE HOURS -- AFFECTING SOME 80,000 TRAVELERS.

JAPAN AIR SYSTEM SAID IT WOULD ARRANGE SPECIAL EARLY MORNING FLIGHTS FOR ITS CUSTOMERS WHOSE FLIGHTS WERE CANCELED FRIDAY, BUT FEARED THAT ITS SERVICE TO HOKKAIDO MIGHT NOT BE BACK TO NORMAL BY THEN BECAUSE OF THE TYPHOON.

#90222k0102 08/10/1990 ~Japanese News Agency

TOKYO (AUG. 10) KYODO - CHINA PLANS TO CONSTRUCT A 2,364-KILOMETER RAILWAY LINE BETWEEN BEIJING AND HONG KONG AND KOWLOON IN PREPARATION FOR THE RETURN OF THE BRITISH CROWN COLONY, SET FOR 1997, THE CHINA DAILY REPORTED FRIDAY.

THE MINISTRY OF RAILWAYS ESTIMATES THE TOTAL CONSTRUCTION COST OF THE PROJECT AT 15.6 BILLION YUAN, OF WHICH 20 TO 25 PERCENT WILL BE BORNE BY THE PROVINCES AND MUNICIPALITIES ALONG THE PROJECTED RAILWAY.

THE RAILWAY WILL BE BUILT BETWEEN THE PRESENT BEIJING-SHANGHAI AND BEIJING-GUANGZHOU LINES, LINKING 10 PROVINCES AND MUNICIPALITIES.

THE AIM IS TO STEP UP ECONOMIC DEVELOPMENT IN THE AREAS ALONG THE PROJECTED ROUTE.

RELATIVELY SLOW PROGRESS IN THE ESTABLISHMENT OF A TRANSPORTATION NETWORK COVERING RAILWAYS, ROADS, AND CIVIL AVIATION HAS BEEN CITED AS ONE OF THE BARRIERS TO THE MODERNIZATION OF CHINA.

#90222k0103 08/10/1990 ~Japanese News Agency

TOKYO, AUG. 10 KYODO - MARUBENI CORP. AND SANKO GOSEI LTD., A TOYAMA-BASED PLASTICS MAKER, SAID FRIDAY THEY HAVE JOINTLY ACQUIRED BIRKBYS PLASTICS LTD., A MAJOR BRITISH PLASTICS FIRM.

THE MARUBENI GROUP HAS ACQUIRED A 90 PERCENT INTEREST IN BIRKBYS PLASTICS,

AND SANKO THE REMAINING 10 PERCENT STAKE.

MARUBENI REFUSED TO REVEAL THE PURCHASE PRICE, BUT INDUSTRY SOURCES SAID IT IS BELIEVED TO BE SEVERAL TIMES THE BRITISH FIRM'S NET WORTH OF 3.3 BILLION YEN.

BIRKBYS USED TO BE A DIVISION OF THE BRITISH DEFENSE AND COMMUNICATIONS EQUIPMENT MAKER PLESSEY PLC UP TO LAST YEAR-END. GENERAL ELECTRIC CO., PLC AND WEST GERMANY'S SIEMENS A.G. JOINTLY TOOK OVER THE ENTIRE PLESSEY PLC GROUP, AND BIRKBYS WAS PUT UP FOR SALE.

MARUBENI SAID BIRKBYS IS THE NO. 4 OR NO. 5 PLASTICS MAKER IN BRITAIN, AND THAT IT HOLDS THE PREMIER POSITION IN TERMS OF TECHNOLOGICAL CAPABILITIES.

MARUBENI AND SANKO JOINTLY SET UP A PLASTICS PRODUCTION COMPANY IN BRITAIN IN 1987. THE TWO FIRMS SAID THEY HAVE TAKEN OVER BIRKBYS TO BUILD UP THEIR JOINT FIRM.

-30- 1219

#90222m0001 08/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 10) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The LABOR DEPARTMENT reports this morning that producer prices fell 0.1% in July.

The Nikkei fell 286.18, posting a net loss for the week of almost 2200 points, setting a new closing low for the year at 27,329 ... Near midday, the FT 100 was down 5.9, and the DAX index had slipped 6.39.

PROCTER & GAMBLE reports a 66% gain in earnings for the company's fourth-quarter. The stock rose 3/4 on the news yesterday. ... Several major retailers report modest July revenue gains. SEARS sales rose 3.1% on a same-store basis from July 1989. K MART was up 2.2%, WAL-MART 8%, WOOLWORTH 4.9%, J.C. PENNEY 2%, GAP 28% and LIMITED 8%. ... WILLIAM DONALDSON, founder of DONALDSON, LUFKIN & JENRETTE has been elected chairman of the NEW YORK STOCK EXCHANGE as expected. ... Operating losses at savings and loans controlled by the government shrank from $1.6 billion in the fourth-quarter of 1989 to $1.35 billion in the first quarter of this year.

WHAT'S AHEAD:

IRAQ PRESIDENT SUDDAM HUSSEIN makes a televised speech this morning at 11

a.m., Eastern Standard Time. ... SALOMON INC., says it will scale down the commodities-trading operation of its PHILIPP BROTHERS unit. ... FORD is extending its buyer incentives. ... CHRYSLER is postponing work on a new luxury car and will focus instead on developing new midsized models.

FROM THE BULLS:

"We're prepared for upside surprises while the world waits for the other shoe to drop," DON WOLANCHUK tells his clients. He looks for another rally to 3000 followed by a retesting of the August lows. Then, says Wolanchuk, "the stage should be set for the most powerful thrust to the upside ever witnessed on the New York Stock Exchange." (CNBC "World Business", 8/10)

The bull market is still in force and the primary trend is still up, says ANTHONY LUDIVICI, market analyst for TUCKER ANTHONY. "In bull markets, when the market goes through a secondary decline, it's a buying opportunity." Ludivici says the lower volume on up days reflects continuing investor concerns. "However, remember that bull markets do climb a wall of worry. If we don't have uncertainty and a wall of worry, then you do want to be careful." (CNBC "World Business", 8/10)

"One of the better things I saw once [the correction stemming from the Persian Gulf crisis] took place, is [the market] hit very good areas of support," says ROBERT RITTER of LADENBURG, THALMANN. He says the market's bounce off 2680 was very positive. Ritter thinks the bull market will continue once the crisis is resolved. (FNN "Marketwrap", 8/9)

FROM THE BEARS:

"The market has broken down technically," says LARRY WACHTEL of PRUDENTIAL-BACHE. "Any rally is a dead-cat bounce." He sees the Dow falling at least to 2700. STAN WEINSTEIN of "Professional Tape Reader" says there could be an 80- to 100-point bounce in the Dow over the next week "but I'd [sell] short on strength." He says the market "looks horrid" technically and looks for a Dow down to 2400- 2500 in the next three to six months. ("USA Today", 8/10)

"The rally is not sustainable," says JOSEPH DeMARCO of MARINVEST. He thinks a weak economy will re-emerge as the central focus once the Mideast crisis is resolved. "This isn't the time to be a hero," says MARTIN SASS of M.D. SASS INVESTORS SERVICES. Sass jumped back in quickly after the 1987 crash, but this time he is much gloomier about the economic outlook. (WSJ, 8/10)

STOCK MARKET:

"The situation remains fragile," says DREYFUS CORP's MONTE GORDON on the Dow's tentative rise yesterday. "This is the calm in the eye of a storm, but that doesn't mean the storm is gone. I can't feel comfortable yet." The lack of dramatic new developments in the Middle East during the day kept the market calm. "We're in a dust settling phase," says RALPH ACAMPORA, director of technical research at PRUDENTIAL-BACHE. "I think we've seen the worst for the near- term. We've had unbelievably emotional trading (Reuters, 8/9)

The urgent sellers are now out of the way, says MICHAEL METZ of OPPENHEIMER. "But there's no great desire to buy now, particularly in the face of a weekend that could incorporate some blow-up of hostilities in the Middle East." Metz says potential buyers are waiting on the sidelines until the situation is resolved or cools down. (CNN "Business Morning", 8/10)

"The bond results are what turned the [stock] market around," says PETER VANDENBERG of SHEARSON LEHMAN BROS. But he notes a lot of continued nervousness over the Mideast situation and says "nobody's making a big commitment to stocks until things there are resolved." ("USA Today", 8/10)

"The worst is over," says EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT regarding a jittery market due to events in the Middle East. Peroni feels the market has hit bottom and that bargain hunting is lucrative at this juncture. (CNBC "Business View", 8/9)

"There's been a general lull in stocks," says EDWARD COLLINS of DAIWA SECURITIES. ("The Washington Post", 8/10)

STOCK TIPS:

"CONTINENTAL has been on a steadily improving track and I expect that to continue," says PAUL KAROS of FIRST BOSTON. The airline stock rose 1 3/4 yesterday to 6 1/4 on news that FRANK LORENZO is stepping down as chairman. "What they need is credible people," says MORGAN STANLEY airline analyst KEVIN MURPHY. "Lorenzo has been boxed into a corner. He was not a credible representative for that enterprise anymore." ("USA Today", 8/10)

WALT DISNEY, a stock under siege on fears that its theme parks will suffer from high gasoline prices and a sagging economy, is featured in the "Heard on the Street" column this morning in "The Wall Street Journal." FIRST BOSTON's JESSICA REIF has downgraded her "buy" recommendation to a hold. "The economy is weak and Disney has no new major attractions planned domestically for several years," she says. But RICHARD SIMON of GOLDMAN SACHS is reinstating his "buy" recommendation on grounds "the current price has more than adjusted

for the risks in light of a very favorable long-term environment." (WSJ, 8/10)

ROBERT RITTER of LADENBURG, THALMANN says he is "very, very interested" in energy stocks. "Over the next few years, with the outlook for an improvement in the world economy, the energy stocks especially the drillers and service stocks ... will do quite well." He thinks investors should look to buy these stocks on weakness, as well as drug and communications stocks, specifically the Baby Bells. (FNN "Marketwrap", 8/9)

Analyst MONROE GREENSTEIN says there are some good buys among department store stocks but "you can't predict when something's going to come back to life." He cautions that such investments are for investors who plan to stay in a stock for a year or so. His picks: MAY, DAYTON HUDSON, DILLARD DEPARTMENT STORES and NORDSTROM. Analyst CAROLE CRANMER of COUNTY NATWEST USA likes DILLARD. ("USA Today", 8/10)

Are there still buying opportunities in energy stocks? "Absolutely," says the bullish ANTHONY LUDIVICI, market analyst for TUCKER ANTHONY. He still likes the oils but is especially bullish on natural gas, which he says is undervalued in relation to oil. "We've seen the low point in the price of natural gas." His energy favorites are AMOCO, with the largest North American reserves, ARCO and MESA. Ludivici also likes electrical products manufacturers like WESTINGHOUSE and GE. (CNBC "World Business", 8/10)

Another analyst who likes natural gas is PHILIP DODGE of the NOMURA RESEARCH INSTITUTE. CHEVRON is the largest natural gas producer in the United States. AMOCO is the largest holder of gas in the country. Dodge also likes COASTAL, a producer and shipper of natural gas. (CNN "Business Morning", 8/10)

EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT likes energy, technology and pharmaceutical sectors among over-the-counter stocks. On the big board, he particularly likes PROCTER & GAMBLE, PHILIP MORRIS and BOEING. (CNBC "Business View", 8/9)

"The wave structure can best be counted as having completed a decline," says market analyst DON WOLANCHUK who believes another rally to 3000 is underway. The newsletter author recommends buying KODAK, GM and McDONALDS. (CNBC "World Business", 8/10)

Believing the United States is on the brink of a recession, IRWIN YAMAMOTO of the "Yamamoto Forecast" recommends staying 75% in cash and 25% in precious metals stocks. He suggests ECHO BAY, where gold production keeps growing, and AMERICAN BARRICK, where gold production has "gone through the roof." (CNBC "World Business", 8/10)

With some money managers ready to hunt for bargain stocks, "The Wall Street Journal" asks several for their favorites. GRAHAM TANAKA of TANAKA CAPITAL likes INTEL, FEDERAL NATIONAL MORTGAGE ASSOCIATION and HUMANA INC. LASZLO BIRINYI of BIRINYI ASSOCIATES likes HOUSEHOLD INTERNATIONAL, WELLS FARGO, BROWNING FERRIS INDUSTRIES, COMPAQ COMPUTER, GENERAL MOTORS, IBM and PRIMERICA. BYRON WIEN of MORGAN STANLEY is recommending UNITED TELECOMMUNICATIONS, MCI COMMUNICATIONS, INTEL, WALT DISNEY, TOYS 'R' US and PRIMERICA. ALAN GAINES of GAINES BERLAND likes DIAMOND SHAMROCK R&M and HORSHAM CORP.

#90222m0002 08/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 10) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I would say that we're probably seeing the peak in long-term interest rates," says KATHLEEN CAMILLI of RAMIREZ CAPITAL CONSULTANTS. She says that if the 8.87% yield is not the top, it should come within the next month. "Gradually as the economy slips into a recession we probably will eventually have slightly lower long-term rates, possibly with long-term rates moving back towards 8%." (CNBC "World Business", 8/10)

The Fed will wait a little longer before lowering rates because they do not want to be seen as easing in the face of inflation pressures from higher oil costs, predicts DAVID JONES of AUBREY G. LANSTON. He also expects the Fed to ease more gradually, "so they don't come out with both six-guns firing." The oil shock could not have come at a worse time, says Jones, with consumer confidence and corporate profits already weakening. "The bottom line is at least a half-a- point more inflation next year and a half-a-point less real growth," says Jones, who looks for a mild recession in the first two quarters of 1991. (CNN "Business Morning", 8/10)

Strong demand for yesterday's $10.25 billion auction of 30-year Treasury bonds resulted in an average yield of 8.87%, well below estimates. "After [Wednesday's] shaky auction, today was a pleasant surprise," says DAVID JONES of AUBREY G. LANSTON & CO. ("USA Today", 8/10)

ALTHEA DUERSTEN, senior manager of the WORLD BANK's $9 billion bond portfolio, explains why her group stayed away from yesterday's Treasury auction: "The markets are better at quantifying economic risk than political risk. We're not making a major stand when political affairs could blow up when the market's closed." (WSJ, 8/10)

"The auction of the new long bonds was as good as the other two sales were terrible," says WARD McCARTHY of STONE & McCARTHY RESEARCH ASSOCIATES. He says the response, in part, was "a sigh of relief that the quarterly refunding sales were over, given the beating the long end of the market has taken since the Iraqi invasion of Kuwait." ROBERT BRUSCA, chief economist at NIKKO SECURITIES INTERNATIONAL, says one reason for the good reception of the new long bonds was the surge in oil prices set off by the invasion of Kuwait caused investors to flee earlier this week from longer Treasury maturities. They were ready to come back, he says, when the "statistics of the auction, namely the 'tail', were broadcast. (NYT, 8/10)

"The demand from Japan [for U.S. Treasury bonds] continues to be quite small," says WILLIAM BRACHFELD of DAIWA SECURITIES AMERICA. "This was not a Japanese auction [yesterday], this was a domestic auction." (WSJ, 8/10)

THE ECONOMY:

"I'm afraid the next year that we can feel at all good about [the economy] is probably 1992," says ALLEN SINAI, chief economist at BOSTON CO. ECONOMIC ADVISORS. ("USA Today", 8/10)

"I think we're now going to have to contend with the threat of recession," says BRIAN FABBRI, chief economist at MIDLAND MONTAGU. "In my view, the Fed is going to ease interest rates over the course of the balance of this year not once, but several times." (CNBC "World Business", 8/10)

DELOS SMITH of THE CONFERENCE BOARD says the future of the economy is very difficult to foresee because the price of oil is so unpredictable. He points out that "the differences between $21 or $22, economically, and $30 is going to be enormous." Nonetheless, he foresees a "slow, sputtering, slow-growth economy" ahead. (FNN "Marketwrap", 8/9)

"The Fed has been on what I consider to be rather misguided monetary policy," says RICHARD RAHN of the U.S. CHAMBER OF COMMERCE. "We've had virtually no monetary growth at all in recent months and all that leads us to believe that, unfortunately, we're going to go into recession." The bright spot according to Rahn is that the recession will be neither long nor particularly harsh. But JEFF FAUX of the ECONOMIC POLICY INSTITUTE says Rahn "is only half right." He says the coming recession will not be mild, and counsels the Fed to ease immediately. Faux says the "number one task" of all Americans is to prevent a recession because "we have a tremendous overhang of debt," both private and public. "We could have quite a bath if the economy goes into recession," predicts Faux. (C-SPAN, 8/9)

"August will be a critical month," says IRWIN KELLNER of MANUFACTURERS

HANOVER. "If people are unwilling or unable to go out and buy back-to-school clothes and other materials, we might as well just start the clock counting a new recession." (FNN "Marketwrap", 8/9)

"Overall, the western states should do well compared with other regions during the next year or so," says ROBERT PARRY, president of the FEDERAL RESERVE BANK OF SAN FRANCISCO. Parry cites rapid population growth during the 1980's, a diverse economy and a strategic location vis-a-vis the Pacific rim nations as factors driving regional growth. He says declining real estate and construction activity in some areas "marks a return to more normal conditions following 'booms' of recent years." (Reuters, 8/9)

IN WASHINGTON:

FEDERAL RESERVE BOARD governor JOHN LAWARE tells the HOUSE BANKING COMMITTEE that serious real-estate problems have spread from New England to much of the East Coast. He also says signs of weakness are cropping up in the Midwest and that California, Oregon and Washington are starting to report higher office-vacancy rates. ("USA Today", 8/10)

Savings and loan regulators say the government is suing CHARLES KEATING JR., and five business associates, to recover $40.9 million in depositors' funds from the defunct LINCOLN SAVINGS AND LOAN ASSOCIATION. "We believe Mr. Keating and his associates profited from improper use of depositors' funds and we want that money returned to Lincoln," says TIMOTHY RYAN JR., director of the OFFICE

SALT LAKE CITY (AUG. 10) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) today announced it had determined to reduce the carrying value of its investment in the Thousand Springs Project. The company indicated that its decision is a result of the announcement by Sierra Pacific Resources on Aug. 9, 1990 not to proceed with further development of the project.

According to Robert L. Wood, chief executive officer and chairman of the board of Bonneville, the exact amount of the reduction in carrying value has not yet been determined, but the maximum exposure to the company would result in a reduction of income after tax effect of approximately $750,000. The uncertainty as to the amount of reduction stems from provisions in the Partnership Agreement which provide for reimbursement of development costs incurred.

Bonneville Pacific, one of the nations leading independent power producers was one of the initial investors in the Thousand Springs Project and holds a 9.5 percent interest in the project.

#90222p4031 08/10/1990 ~PR Newswire

QUITO, ECUADOR (AUG. 10) PR NEWSWIRE - Galapagos Cruises is offering one- two- and three-week cruises by chartered yacht in the Galapagos islands. Eight yachts, each of a different character, carry from eight to 12 passengers.

The yachts provide small groups with opportunities to see the islands in more detail than can be offered aboard the company's flagship, the Santa Cruz, or its recent addition, the 34-passenger Isabela II. They can tuck into small coves and isolated beaches, and anchor beneath cliffs swarming with birds where man otherwise has no chance to watch or walk.

Encantada is a 70-feet steel schooner accommodating 10, with a large saloon and plenty of deck space. Beagle III, a 68-feet motor yacht originally used for research by the Charles Darwin Station on Santa Cruz Island, was converted for 10-passenger cruising in 1978. Sulidae, a gaff-rigged wooden ketch of 63 feet, also carries 10.

The 62-foot motor yacht Amigo I, built by Galapagos Cruises in 1985 specifically for the islands, accommodates 12. A conspicious feature of the six-passenger Merak, a fast, 48-foot sailing yacht built in 1986 in

France, is a large amount of deck space -- an afterdeck with bimini top and a forward sun deck. The Nortada, a 66-foot motor yacht also built in France in 1986, sleeps 12, cruises at 16 knots, and carries a variety of watersports equipment. The Mistral, a motor yacht built in Holland in 1987, is the same size as the Nortada and offers almost identical accommodations and service. The 55-foot, fiberglass Marigold accommodates eight.

Each yacht's navigation and communications equipment meets the highest standards. Naturalist-guides sail with each charter.

A recommended one-week itinerary includes Bartolome, Tower, Isabela (Tagus Cove), Narborough (Punta Espinosa), James Bay and Espumilla, Santa Cruz with a visit to the Darwin Station, Floreana (Post Office Bay, Devil's Crown, Point Cormorant), Hood Island and Punta Suarez. Two-week routings add points on the large island of Santa Cruz, Fernandina (where larger vessels don't call) and Isabela, with an overnight excursion to the tortoise reserve in the Alcedo Crater. A three-week itinerary will visit many sides of all the larger islands where other boats make only one call -- and every side has a different bird and marine population, different plants and flowers. Scuba groups use Encantada, Beagle III and Marigold.

LANSING, MICH. (AUG. 10) PR NEWSWIRE - Maxco, Inc. (NASDAQ: MAXC) today announced higher net income on an 8-percent sales increase for the first

quarter ended June 30, 1990.

Sales rose to $23,810,000 from $21,951,000. Operating earnings declined 17 percent to $993,000 from $1,196,000 in the year earlier quarter. Net income almost doubled to $606,000, or 12 cents a share, from $305,000, or six cents a share. There were approximately 4.8 million weighted average shares outstanding in this year's quarter compared to 4.9 million in the year earlier period.

Maxco's net in this quarter benefited from $46,000 equity in the earnings of affiliated companies, primarily earnings of Medar, Inc. (NASDAQ-NMS: MDXR), of which Maxco holds 40 percent equity as an investment. Year earlier net was affected by Maxco's $338,000 equity share in losses of affiliated companies, of which $318,000 was attributable to losses incurred by Medar.

Also positively impacting net income in the first quarter was the favorable resolution of the collection of a receivable, which included $125,000 of interest.

"The company is on track for strong performance this year," said Max A. Coon, chairman and president. "Finishmaster, our distributor of automotive refinishing supplies, continues to lead the way in both sales and profitability, with revenues up 28 percent over last year. We have the base to continue growth with this business, with the recently completed distribution facility and the potential in the Illinois market. We are now operating three outlets in the Chicago area and plan for that number to grow.

"Because we believe our stock is an excellent value, we have bought shares in the open market from time to time. We have bought 45,000 shares since July 1, at prices ranging from $1.81 to $2, and we will most likely buy more if circumstances are appropriate," Coon continued.

"With each quarter of financial improvement, we are more confident that our strategic plan is a sound one. We look forward to a good year for fiscal 1991," he concluded.

Maxco distribution businesses include Finishmaster, Inc., and the construction supply group (Ersco and Wisconsin Steel), which markets commercial and highway construction materials throughout Michigan, Wisconsin and Indiana. Wright Plastics, Pak Sak Industries and Akemi Plastic are other Maxco businesses.

DURHAM, NC (AUG. 10) PR NEWSWIRE - Coordinated Medical Services of North Carolina, Inc., parent company of Carolina Physicians' Health Plan, Inc., announced today that it has entered into a Stock Purchase Agreement with Healthsource Management, Inc., wholly owned subsidiary of Healthsource, Inc. (NASDAQ: HLTH) of Concord, New Hampshire, whereby Healthsource Management will purchase from Coordinated Medical Services 29 percent of its stock for $2.5 million. Under the Agreement, Coordinated Medical Services also will issue to Healthsource Management a warrant to purchase additional stock which, if exercised by the payment of an additional $3.5 million, would result in Healthsource Management owning up to 49 percent of the stock of Coordinated Medical Services.

Additional terms of the Agreement require Coordinated to meet certain financial covenants and provide Healthsource Management with rights to provide consulting services, designate two directors for election to the board and executive committee of Coordinated Medical Services, approve or disapprove certain material transactions, and exercise additional rights affecting the operations and control of Coordinated Medical Services under certain circumstances. The Agreement also obligates Healthsource Management to loan to Coordinated Medical Services up to $1 million under certain conditions. This and other obligations of Healthsource Management are guaranteed by Healthsource, Inc. Subject to certain limitations, the Agreement is assignable by Healthsource Management.

Consummation of the stock purchase, which is scheduled to take place this fall, is subject to regulatory approval and certain other conditions, including approval by Coordinated Medical Services shareholders of amendments to its Articles of Incorporation and Bylaws to create a Class B Common Stock to issue to Healthsource Management, remove certain existing restrictions or transfer as applied to Healthsource, and eliminate preemptive rights of shareholders to acquire additional shares.

Healthsource, Inc., a publicly traded company founded in 1985, has interests in and manages three health maintenance organizations which market and provide for the delivery of prepaid health care services in New Hampshire, Maine and South Carolina to 63,000 members. Healthsource has emphasized in its expansion efforts investments in individual practice association (IPA) and model HMOs in secondary markets which offer attractive growth opportunities. Carolina Physicians' Health Plan (CPHP) is such an IPA model which is currently 100 percent physician owned.

CPHP, the state's second largest HMO, was licensed in 1986 to serve six Triangle counties. The service area was expanded in 1988 to serve an additional nineteen Eastern North Carolina counties.

#90222p4059 08/10/1990 ~PR Newswire

WEST CHESTER, PA. (AUG. 10) PR NEWSWIRE - Commodore International Limited (NYSE: CBU) today reported net income of $1.5 million or $.05 per share on sales of $887.3 million for the fiscal year ended June 30, 1990. In the prior year net income was $51.3 million or $1.59 per share on sales of $939.7 million.

For the fourth fiscal quarter ended June 30, 1990, Commodore reported a net loss of $3.5 million or $.11 per share on sales of $198.1 million. In the prior year quarter Commodore reported a net loss of $8.9 million or

$.28 per share on sales of $180.3 million.

Irving Gould, chairman and chief executive officer, said that in the fourth quarter unit sales of Amiga computers increased by more than 40 percent compared with the prior year quarter, while unit sales of the C64 and PC XT products declined. Total sales for the quarter increased by 10 percent, with a major portion of the increase attributable to favorable currency exchange rates.

Operating profit for the quarter was adversely affected by pricing and an increase in operating expenses as Commodore continued to make substantial sales and marketing investments in certain markets. These factors resulted in a pre-tax loss for the quarter of $14.0 million compared with a pre-tax loss of $16.7 million in the prior year. In the fourth quarter of fiscal 1990, the company reduced by $10 million income tax accruals no longer needed to meet certain tax exposures. Accordingly, the net loss for the quarter was $3.5 million compared with a net loss of $8.9 million in the prior year quarter.

Although fiscal year sales declined by 6 percent, sales increased by 10 percent during the fourth quarter as growth of the Amiga and PC product groups more than offset the decline in C64 sales. Moreover, profitability for the fiscal year was significantly affected by the sales and marketing investment required to build a presence in the PC and Amiga professional market.

Commodore International Limited, through its operating subsidiaries around the world, manufactures and markets personal computers for the professional, home/office and consumer markets. The company has three product lines: Amiga multimedia computers, PC compatible computers, and the classic C64 computers.

ST. LOUIS (AUG. 10) PR NEWSWIRE - Edison Brothers Stores, Inc. (NYSE: EBS), announced today that it has entered into an agreement to acquire Webster Clothes, Inc. Edison will pay $6.00 per share in cash, of which 50 cents per share will be deposited into escrow and will be subject to certain contingencies and adjustments. The transaction will be structured as a merger of a subsidiary of Edison into Webster. Certain shareholders of Webster, who together own over 80 percent of its shares, also have granted Edison an option to purchase their shares at the merger price.

The merger is subject to certain conditions, including the approval of

Webster's shareholders. Closing is anticipated to occur in late September.

Webster operates 128 young men's clothing stores in 25 states, under the name Webster, Zeidler & Zeidler, and Aggio. Sales were over $70 million last year.

"We expect Webster to become an important part of our Edison Menswear Group," said Andrew E. Newman, Edison chairman. "With this addition, we will have about 1,200 men's apparel stores in six distinct formats."

Martin Sneider, Edison president, added, "Webster complements our current menswear line-up, appealing to yet another group of menswear customers. Like J. Riggings, Webster focuses on 20- to 40-year-old men, but with more emphasis on young-classic business and dress attire, and less on sportswear."

Edison Brothers Stores, Inc., operates JW/Jeans West, Coda, Oaktree, J. Riggings, and Repp Ltd. men's apparel stores; 5-7-9 Shops women's apparel stores; Joan Bari accessories boutiques; Bakers, Leeds, Chandlers, The Wild Pair, Velocity, and Sacha London shoe stores; Fashion Shoe departments in certain department stores; Space Port and Time-Out entertainment centers; and Dave and Buster's restaurant/entertainment complexes.

BOSTON/ GENEVA, SWITZERLAND (AUG. 10) PR NEWSWIRE - The Ares-Serono Group today reported worldwide sales of US $162.3 million for the second quarter ending June 30, 1990, compared with $132.6 million for the same period last year, an increase of 22.4 percent. Net income increased by 12.6 percent to $17 million or $31.26 per share, compared with $15.1 million or $27.81 per share in 1989.

Worldwide sales for the six months ending June 30, 1990, rose 20.7 percent to $302.3 million, compared with $250.4 million during the same period in 1989. Excluding favorable currency fluctuations, actual sales growth for the first six months of 1990 was 12.6 percent. Net income rose 1.1 percent to $30 million or $55.23 a share. This compares with $29.7 million or $54.61 per share for the first six months of 1989.

Year-to-date ethical pharmaceutical sales worldwide increased by 25.6 percent to $252 million from $200.6 million during the same period last year. After adjusting for currency effects, the growth in sales of pharmaceutical products was 17.1 percent. Sales of the company's

diagnostic products were $44.9 million, up from $41.7 million.

Pharmaceutical sales were particularly strong in Italy, Spain and France, while the rate of sales growth declined in the United States.

During the first half of 1990, sales of over-the-counter products declined from $8.1 million to $5.4 million, due to the on-time repurchase of inventories in the first quarter of 1990 resulting from a switch from an external to an internal Ares-Serono distribution network. Second quarter sales of the OTC division increased by 12.2 percent to $4.3 million.

Major developments for The Ares-Serono Group in the second quarter of 1990 included:

-- The registration of 22 pharmaceutical products in various countries, bringing in the total number of new drug registrations worldwide to 33 in the first six months of 1990.

-- Substantial growth for Saizen, a bioengineered human growth hormone, and Ares-Serono's first recombinant product. The product, launched in the middle of 1989, has shown an excellent market acceptance and gained significant market share during recent months. Saizen is now registered and sold in 20 countries.

-- An important new indication for Frone, a native beta interferon, in Itlay, for adjuvant therapy in breast and uterine cancers.

-- A favorable recommendation by the CPMP (Committee for Proprietary Medicinal product) of the European Community for the registration in European countries of Geref, an in vivo diagnostic test used to asess the capacity of the body to produce human growth hormone. Geref is already registered and sold in Italy and Spain.

-- The completion of the nearly $7 million expansion of the mammalian cell biotechnology manufacturing facility at Serono Laboratories, Inc. in Randolph, Mass., U.S. The expansion provides an additional 3000-liters of bioreactor capacity for the production of biopharmaceuticals. The new installation is now waiting for US Food and Drug Administration approval to start operations.

The Ares-Serono Group is a leading international developer and marketer of pharmaceutical and diagnostic products with executive headquarters in Geneva, Switzerland and operating headquarters in Boston. The Group operates subsidiaries and manufacturing facilities in more than 20 countries. Shares of Ares-Serono S.A., the parent company of the Group, are listed on the major Swiss stock exchanges.

RICHMOND, VA (AUG. 10) PR NEWSWIRE - Markel Corporation (NASDAQ: MAKL) has announced reduced consolidated earnings for the second quarter and six months ended June 30, 1990. The decline was due to reduced earnings from investments in unconsolidated subsidiaries caused by lower realized gains on investments. Operating revenues for the second quarter increased 44 percent to $31.2 million and net income decreased 14 percent to $2.7 million. On a per share basis, net income was $0.50 in 1990, compared to $0.60 in 1989. For the six month period operating revenues were $60.3 million for 1990 compared to $42.0 million for 1989, an increase of 44 percent. Net income for the six months decreased 6 percent to $5.4 million, or $1.00 per share, in 1990 from $5.8 million, or $1.10 per share in 1989. Average shares outstanding for the quarter and six months ended June 30, 1990 was 5.4 million compared to 5.2 million in 1989.

Revenue growth for the quarter and six months ended June 30, 1990, was realized in all areas of operations. Brokerage commissions increased primarily due to the October 1, 1989 acquisition of certain assets of Rhulen Agency, Inc. Claims operating revenues increased due to internal growth and expansion of new offices. The underwriting operations continue to benefit from greater investment income and profitable underwriting experience. Operating income increased 35 percent to $3.4 million for the quarter and 7 percent to $5.4 million for the six months ended June 30, 1990 compared to 1989. Earnings from investments in unconsolidated subsidiaries was $0.6 million for the quarter and $2.1 million for the six months in 1990 compared to $1.7 million for the quarter and $2.5 million for the six months in 1989.

Book value per common share decreased from $11.98 in December 31, 1989 to $11.92 at June 30, 1990 due to unrealized losses on equity securities held by the Company and its unconsolidated subsidiaries of $5.4 million or $0.99 per share.

Markel Corporation is a diversified, specialty insurance organization with operations in the claims management, brokerage and underwriting segments of the industry.

MINNEAPOLIS (AUG. 10) PR NEWSWIRE - International Dairy Queen, Inc. (NASDAQ: INDQA) announced today that it has agreed with Druther's International, Inc., a Kentucky-based, fast-food franchiser, to jointly

evaluate the feasibility of converting existing corporate and franchisee-operated Druther's restaurants to "Dairy Queen" stores or "Golden Skillet" stores.

If a decision is reached to proceed with the conversion, IDQ and Druther's expect that more than 100 Druther's restaurants located in Kentucky, Tennessee, Virginia, West Virginia, Indiana and Illinois would become part of the "Dairy Queen" or "Golden Skillet" systems over the next 30 months.

Druther's is a privately owned, fast-service restaurant company with more than 140 restaurants in Kentucky and surrounding states. Druther's is 25 years old and last year had chain sales of more than $95 million.

IDQ develops, licenses and services a system of more than 5,200 "Dairy Queen" stores in the United States, Canada and other foreign countries, featuring hamburgers, hot dogs, various dairy desserts and beverages; more than 650 "Orange Julius" stores in the United States, Canada and other foreign countries, featuring blended drinks made from oranges and other fruit flavors, along with various snack items; more than 160 "Karmelkorn" stores featuring popcorn and other treat items; and more than 70 "Golden Skillet" stores featuring fried chicken.

WELLESLEY, MA (AUG. 10) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG) has entered into an agreement with TI Group plc (U.K.) for the purchase of EG&G's Fluid Components Technology Group for $240 million in cash. The agreement is subject to a definitive contract and conditional on appropriate regulatory clearances.

John M. Kucharski, chairman of EG&G, noted, "The purchase price represents a premium over a previously announced offer. This offer represents a very real opportunity for EG&G. We have terminated negotiations with our prior offerer and will proceed toward a year-end closing."

The FCTG businesses had revenues of $180 million in 1989. TI expects to finance the acquisition from its own cash resources and existing credit facilities.

EG&G is a diversified Fortune 300 company that employs more than 30,000 people worldwide to provide advanced scientific and technical products and services to commercial and governmental customers. The company's shares are traded on the New York Stock Exchange under the symbol EGG.

VIENNA, VA (AUG. 10) PR NEWSWIRE - United Financial Banking Companies, Inc. (NASDAQ: UFBC) today reported results for the second quarter and six months ended June 30, 1990. Earnings for the quarter totaled $174,479, up from $173,629 for the same quarter last year. The six-month total was $174,747, down from $381,063 for the first six months of 1989. Earnings per share were 19 cents for both the six months and the three months ended June 30, 1990, compared to 42 cents and 19 cents for the same periods last year.

The company said the weakened economy and real estate market in the Washington area are the primary factors causing net interest income to decline 44.8 percent from $2,147,896 to $1,185,278 for the six months and 45.4 percent from $1,070,694 to $584,156 for the three months ended June 30, 1990.

Revenues from the Community Development Corporation and a new mortgage brokerage subsidiary account for the majority of the increase in other income. Other income rose 112.3 percent from $529,523 to $1,123,948 for the six months and 119 percent from $299,629 to $656,101 for the three months ended June 30, 1990.

CONCORD, N.H. (AUG. 10) PR NEWSWIRE - Healthsource, Inc. (NASDAQ: HLTH) announced today it has signed an agreement to purchase a 29 percent interest in Coordinated Medical Service of North Carolina, Inc. ("CMS") for $2.5 million. CMS is an HMO holding company headquartered in Raleigh N.C., with estimated fiscal 1990 revenues of $38 million. Healthsource will receive a warrant to acquire additional equity not to exceed 49 percent total ownership in CMS for $3.5 million. In addition, Healthsource will provide certain consulting services to CMS for an annual fee representing Healthsource's cost not to exceed .2 percent of revenue or about $76,000. Subject to certain conditions Healthsource has agreed to provide a $1 million loan to CMS. The agreement is subject to CMS shareholder approval of certain matters and approval by North Carolina regulatory authorities. The closing is scheduled for this fall.

CMS owns and operates Carolina Physicians' Health Plan, Inc. ("CPHP"), a 37,000-member HMO serving the Raleigh-Durham area and 19 counties in eastern North Carolina. In addition, CMS owns a third party administrator and preferred provider organization in the same region.

"We look forward to joining the physicians affiliated with Carolina Physicians' Health Plan in their health plan," said Norman C. Payson, M.D. president and chief executive officer of Healthsource, Inc. "CPHP is well positioned to benefit from the continued growth forecast for North Carolina in the 90's."

Healthsource currently manages HMOs in New Hampshire, Maine and South Carolina. The company is traded on NASDAQ under the symbol "HLTH".

OAK BROOK, IL (AUG. 10) PR NEWSWIRE - Chemical Waste Management Inc. (NYSE: CHW), and its parent, Waste Management, Inc. (NYSE: WMX), announced that Chemical Waste Management is offering $500 million principal amount at maturity of Liquid Yield Option(TM) Notes (LYONs(TM) due 2010. The LYONs are zero coupon, subordinated notes priced at $306.56 per LYON ($1,000 principal amount at maturity) to yield six percent to maturity. LYONs are convertible into shares of common stock of Chemical Waste Management at an initial conversion rate of 11.676 shares per LYON.

The offering is expected to result in proceeds to Chemical Waste Management of approximately $150 million which will be used to retire existing indebtedness to Waste Management, Inc. Waste Management intends to apply such amounts as are received by it from Chemical Waste Management to the reduction of Waste Management's commercial paper or short-term indebtedness issued to provide funds for use in the ordinary course of business and for general corporate purposes.

Merrill Lynch Capital Markets is acting as sole underwriter of the offering. Chemical Waste Management has granted Merrill Lynch an option to purchase up to an additional $75 million principal amount at maturity of LYONs to cover over-allotments, if any.

Waste Management is the nation's largest comprehensive waste services company, providing waste reduction and recycling services, as well as the collection, treatment and disposal of solid and hazardous wastes, with operations in 48 states, Canada and a number of countries overseas.

Chemical Waste Management is the nation's largest environmental services company, specializing in the transportation, treatment and disposal of hazardous wastes and the cleanup of sites contaminated with such wastes, and is a 77 percent-owned subsidiary of Waste Management.

This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State. The offer of these securities shall only be made by means of a prospectus.

Copies of the prospectus relating to the offering may be obtained from Merrill Lynch Capital Markets.

CALABASAS, CA (AUG. 10) PR NEWSWIRE - Players International, Inc. (NASDAQ: PLAY) today reported increased operating results for the first quarter of fiscal 1991, ended June 30, 1990.

For the first quarter of fiscal 1991, the company reported revenues of $4,304,900, a 14 percent increase over the $3,786,400 reported for the comparable period the prior year. Income before proceeds from a contract settlement for the first quarter of fiscal 1991 increased 40 percent to $505,600, from $360,600 reported in last year's first quarter. Net income for the quarter was $303,400, or $.04 per share. This compares to last year's first quarter net income of $2,875,500, or $.37 per share, which included a pre-tax gain of $3,500,000 from a contract settlement.

In commenting on the results, David Fishman, Players' vice-chairman, said, "We continue to benefit from the growth in our core businesses, including the incremental profitability of membership renewals at Players Club. This provides us with both the resources and infrastructure to enter new areas in the entertainment industry, most notably the recent debut of our 900 number call-in game, Phone Jeopardy!

Players International is currently test marketing Phone Jeopardy! and, based upon research and testing, the game is expected to be fully operational by the third quarter of the fiscal year. Phone Jeopardy! will be the first in a series of interactive telephone games developed by Players. Test marketing for Wheel of Fortune is planned for the Fall of 1990, and negotiations are underway with other television game shows and board game manufacturers for the right to develop additional interactive telephone games.

Players International specializes in the marketing of numerous services and products to the gaming and entertainment industries. Players Club is a membership club with over 96,000 members, designed to deliver discounts and other benefits to recreational gamers; International Gaming Promotions markets gaming tournaments and special events; Players World Travel is a full-service travel agency; the company markets electronic cash advance systems; through 50 percent owned affiliates, publishes a monthly newspaper for gaming enthusiasts and operates cruise ship casinos; and recently entered the 900 number call-in game industry with Phone Jeopardy! as the first in a full network of games.

MIDDLEBORO, MASS. (AUG. 10) PR NEWSWIRE - Mayflower Co-operative Bank

(NASDAQ: MFLR) announced today that its board of directors has voted to suspend payment of its quarterly cash dividend, effective immediately. The bank had previously paid a quarterly cash dividend of 5 cents per share.

According to bank President William C. MacLeod, the bank expects to report net income for the quarter ended July 31, 1990. However the board of directors voted to suspend the payment of the dividend in response to reduced income levels. "While our capital to assets level remains strong at 11.5 percent at April 30, 1990, the board of directors has decided that it would be prudent to suspend payment of the dividend, given the current real estate market and economic development. We do expect a profitable first quarter of fiscal 1991," stated MacLeod. The resumption of the payment of a dividend will depend upon the bank's future earnings. The bank expects to report its results of operations for the first quarter, ended July 31, 1990, in the next few weeks.

At April 30, 1990, the end of its 1990 fiscal year, the bank's total assets were $91.7 million and its stockholder's equity was $10.6 million. The bank had 851,900 shares of common stock outstanding.

Mayflower Co-operative Bank. with three offices of Middleboro, Plymouth and Wareham, Mass., has its deposits insured by the Federal Deposit Insurance Corporation (FDIC) and the Share Insurance Fund (SIF) of the Co-operative Bank.

CERRITOS, CALIF. (AUG. 10) PR NEWSWIRE - Cardis Corp. (OTC) today announced a sharply reduced fourth quarter and fiscal 1990 operating loss before an extraordinary gain related to the company's emergence from Chapter 11 reorganization.

The company reported a loss from continuing operations before extraordinary item of $1,052,000, or 11 cents per share, for the fourth quarter ended April 30, 1990, compared with a loss from continuing operations of $11,661,000, or $1.06 per share, in the same period a year ago. The company posted net sales of $21,189,000 for the three-month period, compared with $21,596,000 a year earlier.

For the fiscal year ended April 30, 1990, Cardis incurred a loss from continuing operations before extraordinary item of $2,986,000 or 28 cents per share, versus a loss from continuing operations of $22,225,000, or $2.03 per share, in the comparable period last year. Net sales were $84,825,000 compared with $93,733,000 a year ago.

Fiscal 1989's operating results reflect reduced interest expense, since interest was not charged on debt deferred by Chapter 11 bankruptcy. Since the company's emergence from Chapter 11, interest on debt has been charged to operations at contractual rates. Exclusive of interest costs and the write-off of goodwill in 1989, losses from continuing operations in the fourth quarter and 12 months ended April 30, 1990 were down from the prior year's corresponding period by $4,331,000 and $11,914,000, respectively.

Cardis Corp. emerged from its Chapter 11 reorganization on Dec. 12, 1989. The company operates nine automotive parts warehouse distribution centers and 25 jobber retail stores located throughout California.

TACOMA, WASH. (AUG. 10) PR NEWSWIRE - The Hillhaven Corp. (AMEX: HIL) announced today that it will purchase six nursing centers that it currently operates under lease agreements. The nursing centers, located in Kentucky, represent almost 800 beds and are approximately 98 percent occupied.

The purchasing price of $20,750,000 will be financed primarily through a mortgage pool financing line available to Hillhaven. The transaction is subject to appropriate governmental and other approvals and is expected to close before Oct. 31.

"In June we announced the purchase of five nursing centers from National Medical Enterprises Inc. (NME) and this transaction is consistent with our long-range plan to purchase a number of nursing centers currently leased from others," remarked Chris Marker, president of Hillhaven. "The purchase of these nursing centers reaffirms our commitment to long-term care in Kentucky, where Hillhaven operates 15 nursing centers providing care to almost 1,900 residents on a daily basis."

The Hillhaven Corp. is a leading provider of quality long-term health care. The company owns, leases or manages approximately 350 long-term care centers in 38 states and 24 retirement housing communities in 14 states. Additionally, its Medi-$ave Pharmacies subsidiary operates 116 retail and institutional pharmacies in 23 states. Hillhaven provides care for over 42,000 people on a daily basis and employs more than 35,000 individuals nationwide.

On Jan. 31, Hillhaven became a public company through a spin-off

distribution from its prior parent company, NME. Founded in 1946, Hillhaven had been the principal operating subsidiary of the Long Term Care Group of NME since 1979.

LOS ANGELES (AUG. 10) PR NEWSWIRE - Price Stern Sloan (NASDAQ: PSSP) today announced that it has signed an exclusive licensing agreement with Mattel Inc. (NYSE: MAT) under which Price Stern Sloan has the right to produce a Barbie (TM) series of books for young readers, a cookbook, Mad Libs (R), Doodle Art (R), and See 'N Say (TM) based on the popular doll character. Price Stern Sloan plans to introduce the first line of Barbie books for its Spring 1991 list.

"We are particularly enthused about this agreement, since the Barbie characters, whose popularity continues into new generations, has never before been the focus of any storybooks geared to such as a broad audience " said L. Lawrence Sloan, chairman of Price Stern Sloan. He added, "The company has enhanced its standing with the addition of another quality company such as Mattel for new licensing material, following our agreement reached with the Walt Disney Company last month."

As previously announced, Price Stern Sloan entered into a licensing agreement in July with the Walt Disney Company to produce a Questron (R) electronic wand using a Mickey Mouse head, and to publish six Questron books featuring a variety of standard and classic Disney characters.

Price Stern Sloan publishes and distributes children's books and related audio and videocassettes, cookbooks, humor and self-help books, calendars, puzzles and poster art, as well as the Questron electronic wand and books.

NORMAL, IL (AUG. 10) PR NEWSWIRE - Diamond-Star Motors (DSM) is going "Back-to-School" with a fleet of 21 cars donated to automotive classes at Illinois high schools, colleges and vocational training centers. The autos, valued at almost $275,000, will benefit more than 3,500 vocational technology students each year.

The cars - eight Mitsubishi Eclipses and 13 Plymouth Lasers - are

pre-production vehicles used during the start-up period of the state-of-the-art Chrysler/Mitsubishi joint-venture facility located in Normal.

"These vehicles were instrumental in training our associates at Diamond-Star," explained Pat Walter, general manager of human resources at DSM. "Typically, pre-production cars would be scrapped once the testing phase is completed.

"With Diamond-Star's 'Back-to-School' program, the cars will go out to the community to assist in training programs for tomorrow's automotive technicians. Some of these students may even bring these skills to Diamond-Star one day."

According to Walter, "Many automotive technology students get their 'hands-on' experience while working on their own cars or with autos loaned by family or faculty members. Usually these are older cars unequipped with the latest technology."

The 21 cars provided by Diamond-Star will give students an opportunity to work with multiport fuel injection, double overhead cam engines and turbocharged engines, front wheel drive and on-board computer systems.

Students will be able to perform diagnostic tests on complicated mechanical and electronic systems, do tune-ups on the newest engines and body repairs on today's sleekly molded, aerodynamic contours.

"Without such a donation, it would be financially impossible for the college to provide a live, hands-on vehicle for teaching sophisticated automotive systems," noted Mark Harbaugh, dean of occupational programs at Lincoln Land Community College in Springfield, Ill. The school received its Mitsubishi Eclipse this week.

The Illinois State Board of Education assisted Diamond-Star in identifying area schools offering automotive technology programs. These schools were then invited to submit an application describing their programs and their plans for incorporating a DSM vehicle into their training curriculum.

Diamond-Star Motors, manufacturer of the Plymouth Laser, Mitsubishi Eclipse and Mirage, and Eagle Talon and Summit, is a 50/50 joint venture company formed by Chrysler Corp. and Mitsubishi Motors Corp.

ATLANTA (AUG. 10) PR NEWSWIRE - BellSouth Corp. (NYSE: BLS) today announced officer changes effective Sept. 1 in several of its subsidiaries.

"These changes position BellSouth and its family of companies to better respond to the increasingly competitive marketplace of the 1990s," said BellSouth Chairman and Chief Executive Officer John L. Clendenin.

H.C. "Buddy" Henry Jr. was named executive vice president of marketing and business development at BellSouth Enterprises. Henry will be responsible for overseeing corporate strategy and development, marketing and technology matters, and regulatory and international operations. He is currently vice president-Florida for Southern Bell.

Joseph P. Lacher was appointed vice president-Florida succeeding Henry. Lacher is presently vice president-North Carolina for Southern Bell.

J. Billie Ray Jr. was named vice president-North Carolina, succeeding Joseph Lacher. Ray is currently associate general counsel for BellSouth Services in Birmingham, Ala.

W. Hagood Bellinger was named vice president-network staff at Southern Bell headquarters in Atlanta. He is presently Southern Bell vice president-network for Georgia, North Carolina and South Carolina.

D.L. (Don) Strohmeyer was elected Southern Bell vice president-network succeeding Bellinger. Strohmeyer, who will assume responsbility for network operations in Georgia, North Carolina and South Carolina, is currently vice president-marketing for BellSouth Services.

William F. Reddersen was named vice president-marketing with BellSouth Services, succeeding Strohmeyer. Reddersen is presently vice president-marketing and technology for BellSouth Enterprises.

Michael K. Harrell, current president of BellSouth Communications, will replace Reddersen as vice president-marketing and technology for BellSouth Enterprises.

Rod D. Odom, current vice president-publishing for BellSouth Advertising and Publishing Corporation, will replace Harrell as president of BellSouth Communications.

BellSouth is an Atlanta-based international telecommunications holding company. Its subsidiaries offer local telephone service in nine southeastern states, mobile communications service worldwide, provide advertising and publishing services, and market and maintain stand-alone and fully integrated communications systems.

COLUMBIA, MD (AUG. 10) PR NEWSWIRE - (Singer) Link Miles Simulation Corporation, the world's largest producer of nuclear power plant simulators, announced a change in the name of their corporation today.

The new name of the company is S3 Technologies. "S3" stands for Simulation, Systems & Services. For the safe operation of nuclear power plants, many regulatory agencies around the world now require operator training in a customized power plant simulator. S3 Technologies currently has revenues in excess of $40 million and is forecasting a healthy market expansion, especially in the Soviet Union.

S3 Technologies has recently formed a joint venture company with the Soviet Union in a plan to upgrade and support the Soviet nuclear power plant industry with simulators, training and engineering services.

General Energy Technologies, as the company is called, is the first venture of its kind in the Soviet Union, a country whose power plant training needs represent the industry's largest untapped market. The Soviet Union presently has approximately 50 power plants in operation with another 30 under construction.

In commenting on the company name change and expanding operations, Dean Crawford, president of S3 Technologies said: "Nothing else has changed except our name - our expert engineering, technical leadership and our continuing commitment to excellence remains unchanged. The 'S3' in our new name more accurately reflects the basic strategies that have made us a world leader in the industry: Simulation, Systems & Services."

According to Crawford, S3 Technologies has won 72 out of approximately 123 competitively procured power plant simulator contracts during the last two decades worldwide.

The company employs more than 400 people and is headquartered in offices based near Washington in Columbia, Md. In 1991, S3 Technologies will move to a larger building designed especially for simulation to accommodate its expanding operations.

CONTACT: Nancy Ryan of S3 Technologies, (301) 290-6684, or Holly Pollinger of The Adams Group, (301) 279-5555, for S3 Technologies.

EAST HARTFORD, CT (AUG. 10) PR NEWSWIRE - Barry Baskind, president of Motts Holdings, Inc. (AMEX: MSM), today reported the results of the company's operations for the second quarter and first half ended June 30, 1990. In announcing results, Baskind pointed out that the losses sustained from operations of the three remaining supermarkets have been included as part of discontinued operations.

The company's income from continuing operations before discontinued operations amounted to $137,800, or $.05 per share, for the 1990 second quarter, versus $113,325, or $.04 per share, for the same 1989 period. Losses from discontinued operations net of tax provision amounted to $291,321 as compared to $368,709 a year earlier. In the most recent quarter, the foregoing loss of $291,321 is net of credits for insurance reimbursements of $374,891. After providing for losses from discontinued operations, the net loss amounted to $153,521, or $.06 per share, in the 1990 quarter versus a net loss of $225,384, or $.10 per share, sustained in the corresponding 1989 period.

For the first half of 1990 income from continuing operations before discontinued operations amounted to $235,397, or $.09 per share, versus

$223,437, or $.09 per share, for the same 1989 period. After losses from discontinued operations net of tax provision of $794,357 and $678,230 in fiscal 1990 and fiscal 1989, respectively, the net loss amounted to $558,960, or $.21 per share, for the latest six months versus a net loss of $454,793, or $.17 per share, sustained in the year earlier first half.

The foregoing per share calculations are based on 2,610,454 shares outstanding at June 30, 1990 and July 1, 1989.

#90222p4094 08/10/1990 ~PR Newswire

ROCHDALE, MASS. (AUG. 9) PR NEWSWIRE - The board of directors of The Rovac Corporation (OTC), declared on Aug. 3, 1990, that it will recommend a reverse split of its common stock to shareowners at the company's next stockholder's meeting. The board also recommended stockholder approval of a merger of the company's affiliate, Stafford Industries, Inc., into The Rovac Corporation through an exchange of common and preferred shares of Rovac for the common stock of Stafford. The Rovac directors agreed to a one-for-fifteen reverse split of the company's common stock subject to shareholder approval. They also voted to enter into an agreement in principal with Stafford Industries to merge Stafford's common stock into Rovac. This proposal is subject to approval by the directors of Stafford as well as the shareholders of both companies.

The one-for-fifteen reverse stock split will reduce the number of Rovac common shares currently issued and outstanding from approximately 37.7 million to approximately 2.5 million shares. The company also expects to ask its shareholders to approve the authorization of an additional 2 million shares of common stock, after giving effect to the reverse stock split. This will ensure that sufficient capital stock is available for future issue.

Raymond E. Shea, chairman of The Rovac Corporation, said that -- in his opinion -- a reduction of the company's common shares, and the increase of 2 million shares of post-split authorized capital stock, will better position Rovac to achieve earnings per share which are consistent with the company's anticipated revenues from its several product development licensing programs. Thus, Shea added, "We believe that these actions will make the company and its shares more attractive to the investment community."

In addition to the more than 22.5 million shares of Rovac common stock held by Stafford, that company also owns real estate and other property which carries a current net fair market value of approximately $2 million.

Under the terms of the proposed merger, Rovac is to receive all of the shares of Stafford's capital stock and each shareholder of Stafford will receive a combination of Rovac preferred and common stock, which will be equivalent to the fair value of Stafford's assets, less any liabilities.

If the merger takes place, Rovac management anticipates that approximately 13,000 shares of preferred stock -- valued at $100 per share -- and, perhaps, as many as 1.6 million shares of Rovac's post- split common shares, depending upon the market price of the common stock prior to the merger, will be exchanged for Stafford's common stock. The company has already issued 12,000 shares of preferred stock, at $100 per share, to extinguish the intercompany debt.

Shea expects that the merger will be approved by the shareholders of both companies. If so, he believes that Rovac may have sufficient assets to qualify for filing an application to list its shares on a regional stock exchange, or with NASDAQ.

The company expects to file a Registration Statement with the Securities and Exchange Commission covering the shares of common and preferred stock of Rovac to be issued in exchange for the stock of Stafford. No date has been announced for a shareholder meeting to approve the merger, nor has a date been set by the directors of either company as to when the stockholders of record will be affected by the reverse stock split or the merger.

The Rovac Company is a small research and development firm, which is located just outside of Worcester, Mass. The company is engaged principally in designing, building and testing a number of products which eliminate the use of ozone-depleting chloroflourocarbons (CFCs) through its patented, low-pressure, rotating, gas-handling power technology.

In late May of this year, Rovac announced formation of a joint venture with Autocam Corporation to commence the immediate production and marketing of its ozone-protective, automotive air conditioning systems. Located in the Grand Rapids, Mich., area, Autocam is a major supplier to the automotive industry.

SPOKANE, WASH. (AUG. 10) PR NEWSWIRE - Montana Precision Mining Ltd. (MPM) (NASDAQ: MPML) announced today that Smogless S.p.A., Milan, Italy, will complete construction of the first Skygas commercial demonstration unit within four months.

Skygas is a photo-electrokinetic process for converting solid and semi-solid wastes into a clean burning medium BTU gas that can be used for producing steam or electric power. The composition of the gas also offers the potential for conversion into valuable chemicals such as methanol and ammonia.

During this time, Smogless also plans to start development of two full scale commercial Skygas units for inclusion in a refuse derived fuel (RDF) incineration plant and in a RDF plus sewage sludge incineration plant, both in Italy.

On March 20, MPM announced that it had entered into an agreement with Smogless S.p.A., Milan, Italy, and Xytel Corp., Mt. Prospect, Ill., for the purpose of commercializing the Skygas process.

"Smogless will be investing in excess of $4,000,000 in the first unit," said MPM spokesman Robert Little. "We are very pleased with the progress of this project, as a commercial unit will be completed in only 8 months from the time we entered into the agreement with Smogless and Xytel," he added.

Smogless, headquartered in Milan, Italy, specializes in designing and constructing plants for treating municipal and industrial wastes and effluents. With over 30 years of experience in the field of environmental protection engineering, Smogless is well recognized in Europe as a leader in the fields of air, water and soil pollution control.

Xytel, headquartered in Mt. Prospect, Ill., is the world's leading designer and manufacturer of advanced process and product research systems for the petroleum, petrochemical, chemical, pulp and paper, and food industries. In their 15-year history, Xytel has completed 600 plus projects for 168 customers in 21 countries. Xytel has joint ventures and affiliations in the United States, Europe, Japan and the People's Republic of China.

Montana Precision Mining Ltd., with offices in Spokane, Wash., and Eureka, Mont., with exclusive licensing rights to the Skygas process, is involved in waste-to-energy projects and in exploration and development of mining properties.

#90222p4098 08/10/1990 ~PR Newswire

LOS ANGELES (AUG. 10) PR NEWSWIRE - In line with previously announced expectations, National Mercantile Bancorp (NASDAQ: MBLA) today reported a loss of $1,002,000, or $.32 per share, for its second quarter ended June

30, 1990. For the current six months, the company recorded a loss of $334,000, or $.11 per share.

In the prior year second quarter and six-month periods, National Mercantile reported net income of $919,000, or $.36 per share, and $1,725,000, or $.67 per share, respectively.

Losses in the current periods result from the company's previously disclosed decision to take a $3.1 million pre-tax charge against earnings in the second quarter.

The charge encompasses a one-time payment relating to the resignation in April of the company's then president; a write-off of the balance due on a loan determined to be uncollectible; and an increase in the company's loan loss reserves to replenish reserves and recognize significant growth experienced in the loan portfolio.

"After a thorough analysis of all the bank's operations, these charges were determined to be absolutely necessary to create a clean, solid base for achieving our full growth potential," said William T. Hughes, president and chief operating officer. "We are highly confident that the second half of 1990 will properly reflect the strong core earnings of the bank."

Hughes added that the company's financial position at June 30, 1990 continued to be strong. He noted that total shareholders' equity of $30.2 million represented a 31 percent increase from a year ago.

The bank's primary and risk-based capital ratios of 8.14 percent and 13.26 percent, exceeded regulatory requirements of 6.0 percent and 7.25 percent. And the bank's allowance for possible loan losses was increased to $4.7 million at June 30, 1990, from $3.5 million a year ago.

The greater number of weighted average shares outstanding for the 1990 periods result principally from the sale of shares earlier in the year to two private investor groups.

National Mercantile Bancorp is the holding company for Mercantile National Bank, member FDIC, an independent commercial bank with offices in Century City and Irvine, Calif.

The bank offers a wide range of financial services to middle market companies, the entertainment industry, the real estate community, professionals, high net worth individuals and the escrow and title industries.

CHARLOTTE, NC (AUG. 10) PR NEWSWIRE - Joseph P. Lacher, Southern Bell's Vice President for North Carolina, has been named to head the company's Florida operations. He will be replaced by J. Billie Ray Jr., who was elected by the Southern Bell Board of Directors to be the company's chief executive officer for North Carolina.

The moves will be effective Sept. 1, 1990. Ray, 43, is currently Associate General Counsel for BellSouth Services in Birmingham, Ala. He was promoted to his current position in 1989 after five years as the company's General Attorney in North Carolina. He has also served in the company's legal office in its Atlanta headquarters and its Georgia state office. Prior to joining Southern Bell, he was in private practice in Athens, Ga.

A native of Calhoun, Ga., Ray earned his undergraduate degree from the Georgia Institute of Technology before enlisting in the U.S. Navy. He served four years as a pilot with the rank of lieutenant. Following his

discharge from the service, Ray attended the University of Georgia Law School, where he earned a legal degree with honors.

During his previous tenure in North Carolina, Ray served as a member of the Board of Trustees and as Secretary and Vice President of Discovery Place Science Museums of Charlotte.

Ray and his wife, Carol, have two children, Chris and Calli. Lacher, 44, came to North Carolina in 1988 after having served as Executive Secretary and Treasurer at company headquarters in Atlanta. A native of Bradenton, Fla., he had begun his Southern Bell career in Charlotte two decades before. He said that although he looks forward to taking his new position in Florida, he is sad to be leaving North Carolina.

During his North Carolina tenure Lacher has been active in many civic, economic development and education groups. His activities have included serving on the Board of Directors of the United Way, the Public School Forum and University Research Park.

He is a trustee of the Cities in Schools program, the Performing Arts Center and the N.C. Council on Economic Education. He is also a member of the executive committee of North Carolina Citizens for Business and Industry, the Governor's Council of Economic Advisers and is president of the North Carolina Telephone Association.

#90222p4107 08/10/1990 ~PR Newswire

MCCONNELLSBURG, PA (AUG. 10) PR NEWSWIRE - JLG Industries Inc. (NASDAQ-NMS: JLGI) today announced plans for a reduction in its work force as a result of the previously announced softening in its incoming order rate.

John L. Grove, chairman of the board and chief executive officer, attributed the decline in orders to a further deterioration in economic conditions, which has had an adverse effect on residential and commercial construction as well as key industrial markets.

Grove said, "Our distributors' rental business remains relatively strong, except for certain regional softness, and requests for quotations on new equipment are continuing at a healthy pace, but buyers seem to be taking a 'wait-and-see' attitude relative to the future direction of the economy and to the impact of recent international events."

Grove placed current levels of unfilled orders equal to approximately 45

days' sales. This compares to levels of approximately 100 days three months ago.

Grove indicated that the work force reduction will affect approximately 150 workers at its McConnellsburg plant. This is in addition to a reduction of approximately 135 workers that has taken place over the past several months at the company's domestic and foreign facilities.

Grove said, "Additional cost reduction measures have also been implemented, and significant emphasis is being placed on reducing inventories and borrowing levels. These efforts will continue along with other cost reduction programs." JLG reported that its work force after the reduction will total approximately 1,400 people, with 1,150 in the United States and 250 overseas.

Grove reiterated that these recent events have not altered his assessment of the outlook for the company's most recently completed fiscal year, which is expected to show both record sales and net income.

JLG Industries Inc. is an international manufacturer and marketer of specialized hydraulic machinery, including mobile aerial work platforms and cranes. Sales are made principally to independent distributors which provide sales and service support as well as rent the company's products to a broad customer base, including users in the construction and industrial markets.

The company is headquartered in McConnellsburg, Pa., with additional manufacturing facilities in Fort Littleton, Bedford, and York, Pa.; Cumbernauld, Scotland; and Port Macquaire, Australia.

DALLAS (AUG. 10) PR NEWSWIRE - Comstock Resources, Inc. (NASDAQ-NMS: CMRE) today announced that it has entered into a definitive gas purchase contract for a term of 15 years with The Maple Gas Corporation ("Maple") for all of the casinghead gas production from Comstock's 54,000 acre Bivins Ranch Lease located in Moore, Potter, Oldham, and Hartley Counties, Texas.

Under the terms of the contract, until Dec. 1, 1990, Maple will purchase all casinghead gas produced by Comstock on an unprocessed basis. By Dec. 1, 1990, Maple has agreed to install cryogenic processing facilities with a capacity of at least 20,000 Mcf per day which, subject to Comstock's deliverability, will increase to 40,000 Mcf per day by April 1, 1991. Beginning Dec. 1, 1990, Maple will pay Comstock based on 90 percent of residue gas and 70 percent of all liquids extracted by the processing facilities.

Comstock anticipates completion of Maple's initial pipeline connection within 10 days. Maple will ultimately construct two additional interconnects with major pipelines, as well as construct approximately 20 miles of pipeline gathering facilities at an estimated cost in excess of $20 million.

In addition, Robert L. Cook, chief operating officer, stated, "Preliminary test results on the first seven of the 97 wells being completed on the Bivins Ranch Lease indicate that the Ellenburger, Weathered Granite, Granite Wash and Red Cave zones are commercially oil productive and should exceed originally engineered oil production estimates, as well as produce the allowable casinghead gas." Cook also noted that there are still several additional zones to be tested that log analysis indicate should be commercially productive. Comstock plans to complete preliminary tests on an additional 14 wells during the next two weeks, as well as commence drilling the sixth well in its 10 well 1990 drilling program.

Comstock Resources, Inc. owns and manages income producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. Additional information about the company may be obtained by contacting M. Jay Allison, president and chief executive officer, at 5005 LBJ Freeway, Suite 1150, Dallas, Texas 75244, 214-701-2100.

DALLAS (AUG. 10) PR NEWSWIRE - Recognition Equipment Incorporated (NYSE: REC) announced today that it had sold two of its European subsidiaries in Italy and the United Kingdom in separate transactions to the existing subsidiary managers in each country.

The actions are part of the company's previously announced intention to sell non-imaging assets to enable it to focus on the market for imaging products that process such documents as insurance claims, waybills and government forms.

The operations in both countries include sales and service of document processing systems manufactured in Recognition's Dallas headquarters plant. While the terms of the sales were not disclosed, the company said Recognition's products will continue to be distributed through the newly independent entities.

"Earlier this year we announced our intention to focus on products which process the images of documents, rather than the paper itself," said Bob Vanourek, co-chief executive officer of Recognition. "To capitalize on this potential, we had announced our intention to sell certain non-image related assets. The sale of these subsidiaries is part of that plan, and we expect additional asset sales in the future."

J.P. Morgan acted as financial advisor to Recognition for these transactions.

Recognition, headquartered in Dallas, and its wholly owned subsidiary, Plexus Software, Inc., manufacture, sell and service image and data capture hardware and software systems for customers throughout the world.

#90222p4111 08/10/1990 ~PR Newswire
GREENWICH, CT (AUG. 10) PR NEWSWIRE - Finevest Foods, Inc. (NYSE: FVF) today reported net income of $764,000, or $.07 per share, for the quarter ended June 30, 1990, compared to net income of $179,000, or $.02 per share for the quarter ended June 30, 1989. For the six months of 1990, the company reported a net loss of $1,509,000, or $.14 per share, compared with a net loss of $1,454,000, or $.14 per share, for the same period last year.

Lower raw milk costs in April and May and continued efficiency improvements enabled the company's dairy operations to improve margins, recording operating income in the second quarter which was higher than in

the comparable period last year. The higher operating income was achieved despite higher raw milk costs in 1990 compared to 1989 levels, and despite lower volume in the company's Florida and Georgia regions due to price competition. The company's frozen food distribution operations continued to record outstanding results, and expanded into Texas during the second quarter with a distribution facility in Houston. The company anticipates continued profitability of both its frozen food and dairy operations for the remainder of 1990.

Net sales for the quarter ended June 30, 1990, were $177,207,000 compared to $177,097,000 in the 1989 period, as dairy sales declined 6 percent and frozen food distribution sales increased 9 percent. The decrease in dairy sales resulted essentially from a loss of customers in the Florida and Georgia regions due to continued price competition. The increase in frozen food distribution sales resulted primarily from the start-up of the new Houston distribution facility, which began operation this quarter, and from increased volume from new and existing customers.

Net sales for the six months ended June 30, 1990, were $354,991,000, an increase of 1.4 percent from $349,975,000 in the 1989 period. The increase resulted from a 6.4 percent increase in frozen food distribution sales, offset by a decline of 2 percent in dairy sales for the reasons previously mentioned.

Finevest Foods, Inc. is a leading wholesale distributor of frozen foods and dairy products in the Southeastern United States and is one of that region's largest processors of fluid milk, ice cream and other related dairy products.

#90222p4113 08/10/1990 ~PR Newswire

NEW YORK (AUG. 10) PR NEWSWIRE - The Gitano Group, Inc. (NYSE: GIT) today announced, for the second quarter ended June 30, 1990, net income of $6,649,000, a 35.3 percent increase from $4,913,000 in the 1989 second quarter. Net sales totalled $180,350,000 for the quarter, reflecting a 36.6 percent increase from net sales of $132,021,000 recorded a year ago. Earnings per share for the quarter were $.47 based on 14,289,752 weighted average shares outstanding, compared with $.35 per share based on 13,920,655 shares outstanding in 1989.

For the first six months of 1990, Gitano reported an increase of 24.9 percent in net income to $20,824,000 from $16,677,000 in 1989. Net sales increased 39.0 percent to $404,240,000 from $290,777,000 recorded a year ago. Earnings per share totalled $1.47 for the first six months based on 14,119,617 shares outstanding, compared with $1.20 last year, based on 13,920,655 shares outstanding.

Haim Dabah, president and chief operating officer of The Gitano Group, Inc. said, "We are pleased by the sales and earnings results in the second quarter, which reflected increases of 36.6 percent and 35.3 percent, respectively. These results were achieved despite a continuing unsettled retail climate. Furthermore, some shipments of denim jeanswear, scheduled to ship at the end of the second quarter, were deferred into the third quarter by certain accounts. In light of these conditions, the company plans to focus its efforts during the balance of the year and thereafter, to improve its capital productivity, including reduction of inventory."

On June 12, 1990, Gitano successfully completed a public offering of 1.95 million shares of common stock, of which 1.65 million shares were offered by the company and 300,000 shares were offered by certain of the company's principal stockholders. The offering raised approximately $56 million for the company, which proceeds were used for the reduction of short-term and stockholder debt, resulting in increased working capital.

The Gitano Group, Inc. is a marketer, designer and manufacturer of branded

apparel sold under the Gitano and Gloria Vanderbilt trademarks. Diversified product lines include women's jeanswear, sportswear, swimwear and intimate apparel in junior, missy, maternity and plus sizes as well as men's and children's jeanswear and sportswear. Gitano brand products are sold primarily through mass merchants and discounters throughout the U.S. at an average retail price of under $20. The company's Gloria Vanderbilt and Regatta product lines are sold primarily through department and specialty stores. Gitano operates 78 company- owned retail locations selling Gitano products exclusively. Headquartered in Manhattan, Gitano has 14 foreign offices and owns factories in the United States, the Caribbean basin and Central America, and manages a network of manufacturers and suppliers in over 40 countries throughout the world.

#90222p4116 08/10/1990 ~PR Newswire

MELBOURNE, FL (AUG. 10) PR NEWSWIRE - The Goldfield Corporation (AMEX: GV) announced today net income of $985,685 ($.03 per share) for the six month period ended June 30, 1990, compared to net income of $1,380,359 ($.05 per share) for the like period in 1989. Total revenue for the 1990 period was $8,824,106, compared to $9,356,616 for the 1989 period. Net income of $174,739 ($.01 per share) was reported for the three month period ended June 30, 1990, compared to $330,737 ($.01 per share) for the like period in 1989.

Goldfield's mining operations had higher operating profits during the six and three month periods ended June 30, 1990 than the like 1989 period, as income from the Getchell gold and Harlan coal royalties and deliveries of concentrates from St. Cloud Mining Company's Midnight mine more than offset the reduced income resulting from the conclusion of St. Cloud's joint venture with Cyprus Metals Company.

In the six month period ended June 30, 1990, the mining operations had revenue of $3,267,151 and an operating profit of $1,661,010, compared to $4,499,319 and $1,512,975 respectively, for the like period in 1989. For the three month period ended June 30, 1990 mining revenue was $825,725 and an operating profit of $441,689, compared to $2,217,968 and $339,515 respectively, for the like three month period in 1989. Operating profits included mining royalties of $897,257 and $446,048 for the six and three month periods ended June 30, 1990, respectively. No royalty income was recognized during the 1989 periods as these royalties were acquired in December 1989.

Southeast Power Corporation, the company's electrical construction subsidiary, in the six month period ended June 30, 1990 had contract

revenue of $4,519,705 and an operating profit of $239,158, compared to $4,785,870 and $602,345 respectively, for the like period in 1989. For the three month period ended June 30, 1990, contract revenue was $2,291,644 and operating profit was $163,740, compared to $2,582,849 and $411,002 respectively, for the like three month period in 1989. The 1990 operating profit was lower due primarily to increased workers' compensation and group health insurance costs.

Goldfield is engaged in the business of mining base and precious metals and electrical construction. It also owns royalty interests in gold and coal properties.

JASPER, IN (AUG. 10) PR NEWSWIRE - Kimball International (NASDAQ: KBALB) reported that sales and net income set records in fiscal 1990. Douglas A. Habig, president, said profits in the year ended June 30 increased at a much higher rate than sales because of improved efficiency and larger income from cash investments compared to last year.

Net income climbed 27 percent to $43,475,000, or $2.05 per share of Class B common stock, from the prior year's $34,299,000, or $1.62 per Class B share. Sales grew three percent to $612,956,000 from the year-earlier $595,005,000. Income from cash investments was approximately three times higher than last year.

In the fourth quarter, sales declined three percent while net income increased 15 percent over the strong performance in the last three months of the previous year.

Sales were $152,344,000, compared with $156,933,000 in the prior year's same period. Net income rose to $11,765,000, or 55 cents per Class B share from $10,150,000, or 48 cents per Class B share, in the year-earlier quarter.

As during the year, higher fourth quarter earnings reflected efficiency gains and larger income from cash investments, Habig said. The quarter's income also was improved by a downward adjustment of the LIFO inventory reserve, increasing net income by $399,000. This resulted from inventory quantities and cost at year end being lower than was forecast at March 31, 1990.

For fiscal 1990, the Office Furniture Divisions increased total sales and income in an industry that had negligible growth. Income in the previous year was negatively affected by costs associated with developing and introducing new products.

Artec and National Office Furniture posted higher sales than the previous year. Sales of Artec's Cetra office furniture system increased strongly, continuing the momentum that began in the fourth quarter of fiscal 1989. Healthcare furniture sales grew substantially, and operating results were much improved, although still at a loss.

In the Cabinet & Furniture Division, sales and income were down from the prior year. Habig said results were hurt by a downturn in TV cabinet business, particularly in console cabinets. Although sales and income

continued to decline in the fourth quarter, orders increased late in the period.

Sales of hospitality furniture were at a record level for the year, and high order rates in the fourth quarter indicate continued growth, Habig said. Kimball Furniture Reproductions had a fourth straight year of record sales and profits.

NEW YORK (AUG. 10) PR NEWSWIRE - Telemundo Group, Inc. (NASDAQ: TLMD) today reported operating income of $648,000 for the three months ended June 30, 1990 as compared to an operating loss of $335,000 for the same period last year. The operating loss was $4.3 million for the six months ended June 30, 1990 as compared to an operating loss of $6.9 million for the same period last year. Commercial air time revenues for the company's continental U.S. operations increased 28 percent for the three and six months ended June 30, 1990 over the corresponding periods of the prior year, reflecting Telemundo's increased market coverage and improved ratings.

The company reported a net loss of $9.2 million ($.30 per share) for the second quarter of 1990, compared with a net loss of $10.6 million ($.63 per share) in the same period last year. For the first six months of 1990 the net loss was $24.0 million ($.77 per share), as compared to a net loss of $27.8 million ($1.65 per share) for the 1989 six-month period. The average number of shares outstanding during the current quarter was 31,141,000 compared to 16,843,000 last year.

Chairman and chief executive officer Saul P. Steinberg commented, "We continued to enjoy solid growth in commercial air time sales in the continental United States, resulting from our network's increased market

coverage and improved ratings. We are also optimistic that the future operating results of WKAQ in Puerto Rico will show improvement, further enhancing the company's overall performance. In addition, our financial position has been significantly strengthened by the recent issuance of an additional six million shares of common stock."

Telemundo, headquartered in New York City, is a Spanish-language television network operating in the continental United States. The company serves 37 U.S. markets through its owned and operated stations and its affiliates, reaching approximately 78 percent of all U.S. Hispanic households. The company also owns and operates WKAQ, the dominant television station in Puerto Rico and its related production facility. Programming produced at Telemundo's production facilities in Florida and Puerto Rico is syndicated by the company to international markets.

CHICAGO (AUG. 10) PR NEWSWIRE - United Airlines announced today it established two all-time single-day traffic records yesterday for passengers boarded and for revenue passenger miles (RPMs) flown.

United boarded 225,920 revenue passengers Thursday, surpassing the previous mark of 220,850 set Aug. 2, 1990.

United also flew 285,311,431 revenue passenger miles, eclipsing the old record of 281,987,554 also set Aug. 2. A revenue passenger mile is one revenue-paying customer flown one mile.

"The flying public has recognized our superior service and is responding to our expanded domestic and international flight schedules this summer by filling the seats of our aircraft," said John C. Pope, executive vice president marketing and planning.

"Also, I would like to salute the more than 73,000 men and women of United Airlines in this country and overseas who are handling the sharply increased volume of customers while continuing to provide a high level of service," Pope said.

NEW YORK (AUG. 10) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today predicted a moderate increase in construction costs for the third quarter of 1990.

According to the Turner Building Cost Index released today, construction costs during the third quarter will rise approximately 0.9 percent to 443, four points above the predicted level for the second quarter of 1990. Compared to the third quarter of 1989, construction costs for the third quarter of this year are 3.5 percent higher, up from 428 points.

"The four-point change reflects our prediction that in the third quarter the construction industry will be seeing more of the same as in recent quarters," commented Leslie V. Shute, Turner vice president responsible for calculating the Turner Building Cost Index. "Our third-quarter index excludes any potential effect of this past week's events in the Middle East."

Turner has made its quarterly forecast for more than 50 years. Used widely by the construction industry and federal and state governments, the building costs and price trends tracked by the Turner Building Cost Index may or may not reflect regional conditions in any given quarter. Regional conditions often vary from composite national trends.

Based in New York City, the Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and health care, institutional, government, building and multi-unit housing projects.

Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad. During 1989, the Turner Corporation put in place approximately $3.6 billion of new construction.

NEW YORK (AUG. 10) PR NEWSWIRE - PR NEWSWIRE, the world's foremost press relations wire, has introduced "CalFax," a high-speed broadcast facsimile service which expands PRN's electronic reach to more than 275 newspaper, television and radio outlets in the Golden State.

"In addition to our statewide wire circuit which reaches all major dailies and the leading radio and television stations, we found there was a need to provide even more comprehensive coverage of media in the state," explained PR NEWSWIRE Senior Vice President John Williams.

"We surveyed our clients and then approached the news editors at 100 additional locations to confirm that they would accept PRN copy via facsimile. The response was positive and we married our wire to our internal facsimile transmission system to produce what we now term CalFax.

It works and our clients and the media seem pleased," Williams added.

The PR NEWSWIRE executive said the comprehensive coverage is particularly attractive to customers needing more extensive local media penetration. State agencies, utilities, local governments and companies with stories of local or regional interest have found the extended immediate reach of PRN extremely useful, he added.

PR NEWSWIRE, headquartered in New York, has offices in 21 U.S. cities including five in California. The firm pioneered the electronic distribution of news releases in 1954 and is the leader in the field.

FORT COLLINS, CO (AUG. 10) PR NEWSWIRE - Atrix Laboratories Inc. (NASDAQ: ATRX) announced that a registration statement filed with the Securities and Exchange Commission for new warrants became effective Aug. 8, 1990. The new warrants are exchangeable for 646,875 outstanding warrants issued in 1987 to investors in Vipont Royalty Income Fund Ltd. Officials of Atrix said the new warrants will be immediately exchangeable for the existing warrants. The exchange period and the new warrants will expire on Oct. 12, 1990. Investors exercising their warrants by the expiration date are expected to receive their Atrix stock by Oct. 22, 1990.

The new warrants may be exercised immediately at $2 on a one-for-one basis for Atrix Laboratories common stock. Holders of the existing warrants will receive in mid-August information about the new warrants.

Atrix Laboratories is a research and manufacturing company specializing in the development and production of therapeutic drug products for treating periodontal disease. In addition, the company's polymeric drug delivery system offers applications in the delivery of a broad range of drugs in the general medical and veterinary fields. Colgate-Palmolive will be the exclusive global distributor of the company's Periodontal disease product. Atrix common stock is listed on the National Association of Securities Dealer Automated Quotation System (NASDAQ) under the trading symbol, ATRX.

DEARBORN, MI (AUG. 10) PR NEWSWIRE - CMS Energy Corporation Chairman and Chief Executive Officer William T. McCormick Jr. has been named by the U.S. Department of Energy as a new member to its National Petroleum Council.

The council was created in 1946 to advise the federal government on matters relating to oil and natural gas. McCormick and other natural gas industry executives were added to the panel "specifically for their expertise in natural gas matters," said the Department of Energy.

McCormick will become chairman of the American Gas Association, representing approximately 250 natural gas distribution and transmission companies, this fall.

McCormick, 45, became chairman of Consumers Power Company, the principal subsidiary of CMS Energy, in 1985. Before that, he had been chairman, president and chief executive officer of American Natural Resources Company (ANR), a diversified energy firm.

McCormick previously was vice president for policy analysis and government relations at the American Gas Association and served in several senior positions in the U.S. government, including on the White House staff.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services.

CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

#90222p4150 08/10/1990 ~PR Newswire

FORT WORTH, TX (AUG. 10) PR NEWSWIRE - De Rose Industries, Inc. reported net income for the three months ending June 30, 1990 of $74,000 on net sales of $5,598,000 compared to net income of $17,000 on net sales of $4,842,000 for the same period in 1989.

For the nine months ended June 30, 1990, the company reported net income of $225,000 on net sales of $16,069,000 compared to a net loss of $48,000 on net sales of $13,159,000 for the comparable period in 1989.

Keith Finley, chairman and CEO, stated that sales at the manufacturing plant in Chambersburg, Pa., remained brisk during the third quarter. This quarter is normally strong year in and year out.

Our raw material suppliers have indicated that while we have enjoyed improved sales over the last year, our competitors sales have slipped slightly. Our projections for the fourth quarter continue to remain on schedule.

As indicated in the second quarter report, we felt that a satisfactory resolution to the Tampa, Fla., situation was a possibility. Recent events seem to indicate that there is a possibility that this situation could be resolved in the fourth quarter. Hopefully, we will have put this behind us going into Fiscal 1991.

Our results for the nine months have been as projected and we remain confident of a satisfactory fourth quarter to achieve our projected annual earnings.

#90222p4152 08/10/1990 ~PR Newswire

NEW YORK (AUG. 10) PR NEWSWIRE - Banyan Corp. (AMEX: BYC), formerly The Fur Vault, Inc., today reported its results for the fiscal year ended June 2, 1990, which reflect the loss on the disposition of the retail fur business in May.

Revenues were $65,571,000, excluding revenues of the retail fur business for the second half of the year, compared total revenues of $105,740,000 the prior year. There was a net loss of $31,575,000 or $2.52 per share, including $24,232,000 on the disposition of the company's retail fur business, compared to a net loss of $2,941,000 the prior year, or $.23 per share. The net loss for the year was totally attributable to the company's retail fur business.

For the fourth quarter, revenues decreased to $4,101,000 from $12,326,000 the prior year. The net loss was $6,156,000 or $.49 per share compared to $3,026,000 or $.24 per share the prior year.

The company's Andrew Marc division experienced another year of record growth with revenues of $44,768,000 compared to $31,273,000 the prior year.

The company also reported that it is currently in technical default of certain financial covenants contained in its revolving credit facility but that its banks had extended to Aug. 31, 1990, the date by which the company must have in place a commitment to refinance its working capital requirements beyond the termination of the current revolving credit facility on Oct. 31, 1990. The company is currently engaged in discussions with certain financial institutions concerning this refinancing.

RICHARDSON, TX (AUG. 10) PR NEWSWIRE - Convex Computer Corporation (NYSE: CNX) announced today that the Joint Electronic Warfare Center (JEWC), San Antonio, Texas, has installed a Convex C240 high-speed processor to enhance the responsiveness of the JEWC to short-notice, operational taskings from the Joint Staff and military commanders from around the world.

Co-located with the Electronic Security Command (ESC) at Kelly Air Force Base, the JEWC is comprised of 180 hand-picked, highly qualified men and women from the Army, Marines, Navy, Air Force and civil service.

The military personnel are highly skilled in combat arms specialties such as infantry, artillery, communications, surface warfare intelligence, and aviation.

Civilian employees provide primarily scientific and administrative skills as well as continuity to the work force. Working together, they permit the JEWC to assist operational forces with the dynamic aspects of electronic warfare and bolster our country's national defense.

The Convex system was selected because of its demonstrated performance on the JEWC benchmarks, compatibility with the existing computer environment, and the company's track record of providing cost-effective quality hardware that is easy to maintain.

"The addition of the Convex to the Joint Electronic Warfare Center's computer network gives us the computational performance critical to our assigned mission," said U.S. Army Col. John R. Dickson, vice director, Joint Electronic Warfare Center.

"We will be able to analyze more alternatives faster and with greater fidelity than ever before. We will be able to provide to U.S. soldiers, sailors and airmen the information necessary to win in a complex electronic war."

Convex offers a family of compact, air-cooled, 64-bit computer systems that deliver performance of up to 200 MFLOPS and 224 MIPS as determined by the 32-bit Whetstone benchmark.

The systems in the C Series run an enhanced version of the industry standard UNIX operating system and provide up to two Gigabytes of physical memory complemented by a 200-megabyte-per-second I/O bandwidth.

"This is an important sale for Convex because it shows how our systems continue to be accepted in all areas of national defense such as electronic warfare, armament design, and intelligence gathering," said Steven J. Wallach, Convex senior vice president of technology. "The JEWC required state-of-the-art capabilities with cost-effective systems and Convex high-speed processors met these criteria."

#90222p4156 08/10/1990 ~PR Newswire

NEW YORK (AUG. 10) PR NEWSWIRE - HEM Research, Inc., announced today that it had received clearance from the Food and Drug Administration to conduct clinical trials with the drug Ampligen in the treatment of patients who test positive for HIV, the virus that leads to AIDS. Ampligen is a mismatched double stranded from of RNA which has broad anti-viral activities as well as being an immune system modulator, without the severe toxicity and side effects associated with most current AIDS treatments.

The protocol for the double-blind study of HIV-positive patients calls for three study groups of 45 patients each. Ampligen will be administered twice weekly in conjunction with treatment with AZT, the only approved drug for AIDS treatment. The trials are expected to begin in September 1990, with initial results reported in the fall of 1991.

One key measure in the trials will be of the ability of Ampligen to extend significantly the period of time over which a patient can maintain a healthy level of T4 cells, key regulators of the human immune system that are inactivated by the AIDS virus. AZT has been shown to be effective in stabilizing and slightly increasing patients' T4 counts for several months after which T4 counts generally begin declining again. Patients selected for the Ampligen trial will largely include those for whom AZT treatment has run past the point where their T4 levels are being maintained, with the objective being to evaluate Ampligen's ability to prolong T4 stability indefinitely.

Another key measure will be the evaluation of side effects, which with large doses of AZT alone often include severe headaches, gastro-intestinal disorders, and nausea. One of the most striking attributes of Ampligen is its lack of toxicity and side effects even at large doses.

HEM Research, Inc. is a biomedical and pharmaceutical company with executive offices in Philadelphia, and Tavernier, Fla., and a research and development center in Rockville, Md.

#90222p4157 08/10/1990 ~PR Newswire

MCLEAN, VA (AUG. 10) PR NEWSWIRE - Primark Corporation (NYSE,PSE: PMK) reports a loss from continuing operations for the second quarter of 1990 of $336,000, or 2 cents per share.

This loss is composed of $875,000, or 5 cents per share, of start-up costs associated with Primark's new aircraft maintenance and electronic medical claims processing businesses, with Primark's remaining operations contributing income of $539,000, or 3 cents per share. These results compare to income of $1,186,000, or 6 cents per share, for the same period in 1989.

Primark's income from continuing operations of $102,000 for the six-month period ended June 30, 1990, reflects investments in Primark's start-up operations of $1,526,000, or 8 cents per share, which were more than offset by income generated by its remaining operations of $1,628,000, or 8 cents per share. Income from continuing operations for the corresponding 1989 period is $3,096,000, or 16 cents per share.

"We are pleased that our new start-up operations are proceeding on schedule and within budget," said Joseph E. Kasputys, Primark's chairman and chief executive officer. "While our financial services businesses generated good operating profits for Primark, lower access revenues have caused substantial operating losses at Health Information International throughout 1990. We are currently evaluating alternative measures to minimize the effect of future losses of this business."

Primark also realized significant cash flows during the second quarter from a $17,269,000 federal income tax refund, which, along with its existing cash balances, will be used to fund Primark's future growth.

Primark Corporation is a holding company headquartered in McLean which, through its diversified businesses, is primarily engaged in healthcare information, financial and ground transport services.

BLOOMSBURY, NJ (AUG. 10) PR NEWSWIRE - Wedco Technology Inc. (AMEX: WED), a provider of custom processing services and manufacturer of related machinery for the plastics industry, today announced its first quarter operating results for the three-month period ended June 30, 1990.

WEDCO TECHNOLOGY INC.

Three months ended June 30	1990	1989
Net revenues	$6,435,348	$5,685,438
Operating income	721,741	1,024,523
Income before income taxes	267,512	820,616
Net income	178,939	524,097
Net income per common share	$.06	$.16
Average shares outstanding	3,063,775	3,258,176

In commenting on these results, President and Chairman William E. Willoughby stated, "We normally expect operating income to improve proportionately when sales increase by 13 percent. Due to the heavy investment in new plants completed late last year, however, we are incurring certain fixed costs, such as local plant overhead, depreciation and interest costs.

"We anticipate that sales will pick up over the balance of the current fiscal year as a result of these investments, and our operating margins should therefore improve."

#90222p4167 08/10/1990 ~PR Newswire

SEATTLE (AUG. 10) PR NEWSWIRE - The Boeing Co. (NYSE: BA) today announced a revised policy that stresses rehabilitation as the cornerstone of its efforts to achieve and maintain a drug- and alcohol-free workplace.

An enhanced Employee Assistance Program is an integral part of the policy, which, in addition to emphasizing rehabilitation and employee education, also contains provisions for drug testing.

The details of the program, including employee drug and alcohol testing, are subject to continued discussion between the company and the unions that represent Boeing employees.

Boeing Vice President - Human Resources Larry McKean said, "Maintaining a drug- and alcohol-free workplace is not only critically important to the health, safety and well-being of every Boeing employee, it is without argument the right thing to do. Drug and alcohol abuse is a nationwide

problem. We have a responsibility to provide all employees with a workplace that is free from these substances."

Employees who voluntarily disclose a drug- or alcohol-abuse problem or who test positive for drugs will be referred to the company's Employee Assistance Program so they can be given professional counseling, rehabilitation, and follow-up care.

Those who voluntarily enter a drug treatment program and fail a follow-up drug test will receive another chance for rehabilitation. Failure to pass a subsequent drug test would result in job termination.

The Boeing policy regarding the buying or selling of drugs on company property remains unchanged. Employees who buy or sell drugs on company business or on company property will lose their jobs.

Bob DeLappe, Boeing director of personnel, said, "Although illegal drugs receive major attention, alcohol is probably the more prevalently abused substance. Consequently, the revised Boeing policy addresses both drug and alcohol abuse."

He noted that in addition to drugs and alcohol the Boeing Employee Assistance Program is designed to accommodate employees with marital and family problems, mental health concerns, and financial difficulties.

Any employee will be subject to drug and alcohol tests in cases where there is reasonable suspicion of drug or alcohol use, or as part of an investigation of on-the-job accidents. Employees who have failed a previous drug test will also be subject to follow-up testing.

ST. LOUIS (AUG. 10) PR NEWSWIRE - CPC-Rexcel Inc. (NASDAQ: CPST) today reported an increase in net earnings and net earnings per share, despite a decline in sales for the second quarter 1990.

Net earnings for the period were $94,697, up from $5,869 in the second quarter 1989. Net earnings per share for the second quarter were 2 cents compared with 0 cents per share in the like 1989 period. Net sales for the second quarter were $14,027,096, down 8 percent compared with $15,253,813 in the second quarter of 1989.

For the six months ended June 30, 1990, net earnings were $298,578, up from $11,198 for the like period in 1989. Earnings per share for the first six months of 1990 were 7 cents compared with 0 cents per share for the like 1989 period. Sales for the first six months were $28,415,822, a decline of 1 percent from $28,577,589 for the like period in 1989.

Gerald G. Burnett, president of CPC-Rexcel, attributed the increase in earnings to better margins and improved manufacturing efficiencies.

"Second quarter sales were affected by soft market conditions in the cultured dairy segments of our business, believed to be caused by high milk prices," Burnett said. "In addition, sales were negatively influenced by start-up delays with our new cold drink cup products, although orders booked were at record high levels."

CPC-Rexcel designs, manufactures and markets plastic containers for cultured dairy, yogurt and other food products. The company's stock is traded over-the-counter under the NASDAQ symbol CPST.

MADISON, WIS. (AUG. 10) PR NEWSWIRE - Madison Gas and Electric Co. (MGE) (NASDAQ: MDSN) today reported earnings for the second quarter ended June 30, 1990, of $0.32 per share, compared with $0.20 earned in the same quarter a year ago. Earnings for the six months ended June 30, 1990, were $1.11 per share, compared with $1.10 earned in the comparable six-month period a year ago. The 12-month earnings for the periods ended June 30 were $2.93 per share this year versus $2.91 last year.

Revenues in the June 30 quarter just ended were $45.0 million compared with $41.5 million a year ago. Revenues in the first half of this year were $110.8 million, compared with $111.8 million in the same year-ago period.

"The second-quarter earnings rise reflects increases in both the number of electric customers and the usage of electricity by all customers," said G. Howard Phipps, senior vice president-finance. "In the first half of 1990, the increase in electric revenues was offset by a decrease in gas revenues. The mild first-quarter weather and the company's continued success at purchasing gas at lower prices, which are passed along to its customers, affected the decrease in gas revenues for the six months ended June 30, 1990."

MGE is a public utility engaged in generation and transmission of electric energy and in its distribution over 250 square miles in Dane County. The company also distributes and transports natural gas through 962 square miles in Dane, Columbia and Iowa Counties.

BOISE, ID (AUG. 10) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) announced today the election of Joseph G. Fearon to chairman of the company's Rail Systems Group and the appointment of Thomas J. Smith as president and chief executive officer of the group.

Smith was formerly senior vice president of manufacturing operations for Fokker Aircraft BV in Amsterdam, Holland. He had direct responsibility for all aspects of manufacturing, assembly and delivery of Fokker commercial jets, turboprops and fighters. Previously he was president of Fairchild Aircraft Corp., Mooney Aircraft Corp. and worked for Grumman Aircraft Corp. on the space program. He has a 30-year work experience primarily in the area of managing manufacturing operations.

Fearon is a 27-year veteran of the company and pioneered MK's entry into the rail systems market. William M. Agee, chairman, president and chief executive officer of Morrison Knudsen, said, "Under Joe Fearon's marketing talents this group has seen the backlog grow to approximately $1 billion. He will continue to give excellent leadership for all domestic and international marketing and customer development programs.

"Joe Fearon and Tom Smith will provide the Rail Systems Group with an experienced, strong leadership team at a time when this operating group is undergoing significant growth," said Agee. "Tom's strong background in industrial manufacturing operations will strengthen and enhance the Rail Systems Group's locomotive and transit car manufacturing operations."

MK's Rail Systems Group is headquartered at Boise and has manufacturing complexes at Boise; Hornell, N.Y.; and Mountaintop, Penn. The group remanufactures railroad transit cars and freight locomotives and is now the only U.S.-owned manufacturer of new transit cars.

Morrison Knudsen Corp. is an engineering, design, environmental, construction, rail systems and mining company.

SAN JOSE, CA (AUG. 10) PR NEWSWIRE - Cadence Design Systems Inc. (NASDAQ: CDNC) today announced that it has applied for listing of its securities on the New York Stock Exchange (NYSE) and expects to be listed on the "Big Board" by mid-September. The company's stock has traded on the NASDAQ National Market System since June 1987.

Joseph B. Costello, president and chief executive officer of Cadence, said "We're extremely pleased to announce our move to the NYSE, scheduled for mid-September 1990. Our listing on the Big Board is a significant milestone for Cadence, recognizing the growth of the electronics design automation industry and Cadence's keystone position in the industry's bright future." Costello concluded, "The listing will enhance Cadence's access to international capital markets, increase opportunities for a more diversified shareholder base and further enhance liquidity in the company's shares."

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company, headquartered in San Jose, is traded on NASDAQ under the symbol CDNC.

#90222p4197 08/10/1990 ~PR Newswire

DENVER (AUG. 10) PR NEWSWIRE - Asset Investors Corp. (NYSE: AIC) today announced its net income for the three and six months ended June 30, 1990 was $7,046,000 or 51 cents per share, and $15,279,000 or $1.10 per share respectively. Federal taxable income during these periods was $7,100,000 or 51 cents per share, and $14,900,000 or $1.07 per share, respectively (all based on 13,892,000 weighted average shares outstanding). Net income for the three and six months ended June 30, 1989 was $965,000 or 7 cents per share, and $4,250,000 or 31 cents per share, respectively.

As a real estate investment trust, Asset Investors' dividends are based on taxable income calculated under the Internal Revenue Code and not on net income computed in accordance with generally accepted accounting principles. On June 30, 1990, the company paid a second quarter dividend of 45 cents per share increasing total dividends paid through the first half of 1990 to 90 cents per share.

Net and taxable income for the three and six months ended June 30, 1990 continues to benefit from lower short-term interest rates. Short-term interest rates, specifically the average London Interbank Offered Rate ("LIBOR"), upon which all of the company's variable rate CMO debt is based

averaged 8.36 percent and 8.43 percent for one-month and three-month LIBOR, respectively, for the six months ended June 30, 1990. This was 134 and 137 basis points lower than the rates during the comparable periods in 1989. Other factors resulting in increased income in 1990 over 1989 included lower short-term interest expense due both to lower interest rates and reduced borrowings and a reduction of over 50 percent in general and administrative expenses, although partially offset by larger management incentive fees resulting from the company's increased profitability.

The company also announced the cancellation of its remaining interest rate swap agreements as a part of an on-going effort to strengthen its liquidity position. The cancellation of these swap agreements reduced the company's floating rate exposure tied to LIBOR by $90 million to $844 million, a reduction of approximately 10 percent. Through Aug. 8, 1990, the company has reduced its short-term debt on its bank line and repurchase agreements by 41 percent to $35 million, from $59 million at Dec. 31, 1989.

Asset Investors is a real estate investment trust that generates income primarily from a portfolio of ownership interests in issuances of collateralized mortgage obligations and other mortgage-related assets.

PEORIA, IL (AUG. 10) PR NEWSWIRE - Caterpillar Financial Services Corp. today announced second quarter 1990 financial results. Caterpillar Financial Services is a wholly owned subsidiary of Caterpillar Inc. (NYSE: CAT).

CATERPILLAR FINANCIAL SERVICES CORP.

Second Quarter ended June 30:	1990	1989	Percent change
Revenues	$ 65.4	$ 51.0	plus 28 percent
Profit	$ 5.6	$ 4.7	plus 19 percent

First Six months ended June 30:	1990	1989	Percent Change
Revenues	$126.9	$97.6	plus 30 percent
Profit	$ 12.5	$8.9	plus 40 percent
New business acquired	632.4	471.2	plus 34 percent
Portfolio value	$ 1,926.3	$ 1,514.5	plus 27 percent

Revenues increased as higher business volume significantly added to the level of earning assets. This resulted from greater dealer and customer use of financing and continued focus on the delivery of exceptional customer service.

Profits increased as a result of higher business volume and earning assets. Also contributing was a lower cost of debt compared with a year ago.

In its second-quarter report released today, Caterpillar Financial Services Corp. announced record revenues, profit, and new business volume for the second quarter and first half of 1990.

Revenues for the quarter reached $65.4 million, a $14.4 million or 28 percent increase over the same period last year. Profit after tax rose to $5.6 million, a 19 percent increase over the second quarter of 1989.

New business financed reached $632.4 million, a 34 percent increase compared with the first six months of 1989.

Total assets also grew substantially, reaching $1.96 billion from $1.53 billion a year ago. Return on average assets increased from 1.2 percent in the first half of 1989 to 1.4 percent year-to-date 1990.

"This solid financial performance year-to-date is a result of greater dealer and customer use of our financing options, and our continued focus on the delivery of exceptional customer service," said James S. Beard, vice president of Caterpillar Inc. and president of Caterpillar Financial Services Corp. "Revenues and profits increased as additional business volume added significantly to our level of earning assets."

Caterpillar Financial Services provides a wide range of financing

alternatives for Caterpillar earthmoving and construction equipment, lift trucks, engines, turbines, and related products sold through Caterpillar dealers in the United States, Canada, and Australia.

Additional information included in the second quarter report: Through the first six months of 1990, profit after tax reached $12.5 million, a 40 percent increase over the same period a year ago.

The number of customers increased by 21 percent to 16,614. The portfolio value increased to $1.93 billion from $1.51 billion.

Caterpillar Financial Services Corp. is headquartered in Peoria, and is a wholly owned subsidiary of Caterpillar.

ST. LOUIS (AUG. 10) PR NEWSWIRE - Monsanto Company (NYSE: MTC) and Golden Hope Plantations Berhad of Malaysia today jointly announced the signing of an agreement in principle to form a joint venture in Southeast Asia.

This joint venture will focus on the manufacture of thermoplastic elastomers (TPEs) based on natural rubber utilizing Monsanto's patented TPE technology and Golden Hope's natural rubber technology and management capability. Both companies see this venture as significant step in building this exciting class of TPE materials.

The joint venture is subject to appropriate government approvals as well as the execution of definitive agreements by both companies, with formation targeted for early in 1991. Manufacturing operations are expected to start up in the latter half of 1992.

TPEs are a diverse family of cost-effective, high-performance rubberlike materials that, unlike conventional vulcanized rubber products, can be easily processed and recycled.

TPEs are used in engineered industrial rubber and soft plastic applications in the automotive, medical, food, electrical, construction, appliance, business machine, and other industries.

"The alliance with Golden Hope," stated John L. Tuley, vice president and general manager of Monsanto Chemical Company's plastics division and elastomers business group, "will combine Monsanto's technology and knowhow in natural rubber-based TPEs with Golden Hope's expertise in natural rubber production ranging from agronomic techniques through the processing of the rubber latex. We believe this synergy can lead to the development of a variety of unique natural rubber TPEs with significant performance advantages," added Tuley.

Echoing similar sentiments on the proposed venture, Abdul Rahman Ramli, group chief executive of Golden Hope, added, "The proposed venture is indeed very strategic to the overall development of the rubber-based industry, particularly in Malaysia. It is a milestone in raw material product development. The potentially wide general application of TPEs, which require sophisticated technologies and specialized efforts at product/market developments, not only will spur more intensive research activities at Monsanto and Golden Hope, but also will invariably bring even closer the collaborative ties between the producers and consumers.

This augers well for the future of natural rubber usage."

Golden Hope is one of the largest publicly listed plantation companies in Malaysia with it headquarters in Kuala Lumpur. The company owns 287,000 acres of prime agricultural land planted with oil palm, rubber, cocoa, coconut and tropical fruits. It also is involved in the downstream manufacturing of refined palm oil, methylesters, refined glycerine, fatty alcohol, rubber-based products and fruit juices, and in real estate development. The company employs about 25,000 people at all levels and recorded sales last year of about $218 million. The company has a strong base in agricultural research and development, and over the years has developed a number of rubber and oil palm planting materials which currently are widely planted in Malaysia and other tropical countries.

#90222p4220 08/10/1990 ~PR Newswire

TROY, MI (AUG. 10) PR NEWSWIRE- Larizza Industries, Inc. (AMEX: LII), an original equipment supplier to the automotive and defense industries, today announced that operating profit for the second quarter of 1990 increased to $2,428,000 compared to an operating loss of $144,000 for the first quarter of 1990 and operating income of $1,057,000 in the second quarter of the prior year.

According to Ronald T. Larizza, president and chief executive officer, the improved operating performance is a result of the company's restructuring which included the closure of its Pulsar Plastics operation in December 1989, and the sale of its plating operation in April 1990. Mr. Larizza stated that the company is now focusing its efforts on one plant which experienced operating losses during the quarter.

As previously announced, Larizza has retained a financial adviser and is involved in discussions with third parties which the company believes will result in a corporate restructuring, equity infusion or other transaction.

After interest and other non-operating expenses, the company reported a net loss for the second quarter ended June 30, 1990, of $763,000 equal to $.05 per share, compared to a net loss of $1,548,000 equal to $.11 per

share for the second quarter of the prior year. Sales for the current quarter were $38,175,000 compared with $52,513,000 in the prior year's second quarter.

For the first six months of 1990, the company reported a net loss of $5,009,000 or $.36 per share, vs. a net loss of $1,687,000 or $.12 per share reported in the first half of 1989. Sales for the six months were $79,426,000 vs. $101,846,000 in the prior year's first half. Results for the current six months include a non-recurring net loss of $2,147,000 ($.16 per share) related to the company's plating operation.

Sales for the quarter and the six months decreased primarily as a result of the disposition of the company's plating operation on April 6, 1990, and the closure of its Pulsar Plastics operation in December 1989. Sales for the periods were also down as a result of lower sales to the automotive OEMs caused by lower OEM car builds.

CORPUS CHRISTI, TX (AUG. 10) PR NEWSWIRE - Marine Holding Co. (NASDAQ: MDCO) announced today the formal completion of the sale of 3,450,000 shares of the company's common stock at $6.375 per share. This sale included 450,000 shares of the company's common stock purchased by Salomon Brothers Inc, Smith Barney, Harris Upham & Co. Inc. and Howard, Weil, Labouisse, Friedrichs Inc. pursuant to the over-allotment option. Copies of the final prospectus are available from the company.

Net proceeds from the offering will be used to repay indebtedness, for capital expenditures and for general working capital purposes.

Concurrently with the closing of the underwritten public offering, the company issued 693,306 shares of common stock in full satisfaction of indebtedness of approximately $4.1 million owed to three principal shareholders of the company.

The company engages in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil and gas companies. The company's common stock is listed on the NASDAQ National Market System under the symbol MDCO.

ROANOKE, Va. (AUG. 10) PR NEWSWIRE - Littlefield, Adams & Company (AMEX: LFA), a company engaged in the business of manufacturing and imprinting leisurewear and team garments, has filed its form 10Q for the quarter ended June 30, 1990.

Revenues for the second quarter 1990 were $1,619,000 as compared with $1,497,000 for the second quarter of 1989. The net operating profit for the second quarter ended June 30, 1990, amounted to $4,000 compared to a loss of $54,000 for the same period in 1989.

As a result of the settlement of litigation with the third party buyer of the publishing division, a write-down of $316,000 against a long term note has been recorded in the second quarter ended June 30, 1990. In May, 1989 a settlement was reached with a former director in litigation over a certain deferred compensation dispute. As a result of this, the company recorded a $214,000 gain on this settlement.

Management believes the third quarter will be profitable.

STAMFORD, CT (AUG. 10) PR NEWSWIRE - Terry S. Parker has been named president of GTE's newly formed Telecommunications Products and Services Group and a member of the company's policy committee, announced GTE Corp. (NYSE: GTE) President and Chief Operating Officer Charles R. Lee. His appointment is effective immediately.

The new group comprises GTE's Government Systems, Information Services, Mobile Communications and Spacenet units. Upon shareholder and regulatory

approval of the previously announced merger between GTE and Contel Corp., GTE expects that certain Contel operating units will become part of this new GTE group.

Parker, 45, has served as president of Houston-based GTE Mobile Communications since 1988. He will continue to head GTE Mobile Communications until a successor is in place.

"In today's fast-paced, global business climate, we see rapidly converging technologies and traditional government and private-sector communications markets blending," Lee said. "In creating the GTE Telecommunications Products and Services Group, we are combining the many years of accomplishment and technical expertise in Government Systems with the tremendous opportunities in the emerging information- services, cellular and satellite-services businesses."

Parker joined General Telephone Company of Indiana in 1969, and held various financial and accounting positions there and at GTE's Telephone Operations headquarters until his election as vice president and controller for General Telephone Company of Michigan in 1980. From 1982-85, Parker served as vice president - revenue requirements and then vice president - marketing for GTE's Midwestern Telephone Operations, and subsequently became group vice president - regulatory affairs. He holds a bachelor's degree in accounting from Ball State University, and a master's degree in business from Indiana University.

GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989.

GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

PEMBROKE PINES, FL (AUG. 10) PR NEWSWIRE - Decorator Industries Inc. (AMEX: DII), which manufactures draperies, bedspreads and other accessories for the hospitality (motel/hotel), health care, recreational vehicle and mobile/manufactured home industries, today reported its results for the second quarter of 1990.

William Bassett, president, reported that sales for the second quarter of 1990 were $6,379,236 and net income was $99,545 and, while these results

were an improvement over the first quarter, they were down from last year's second quarter.

These results reflect the continuing weakness in the mobile/manufactured home markets, he advised, and while sales to the motel/hotel market were up compared to a year ago, a greater amount of those sales was in lower margin products.

Bassett reported that the company began the introduction of a new program of draperies, bedspreads, cubicle curtains and related products to the health care market during July and that although the company does not expect any immediate contribution from this program, it expects it to develop into a significant business in the near future.

#90222p4240 08/10/1990 ~PR Newswire

NEW ORLEANS (AUG. 10) PR NEWSWIRE - Robert E. Howson, chairman of the board and chief executive officer of McDermott International, Inc. (NYSE: MDR), today reported that revenues for the first quarter of fiscal 1991 were $684,525,000 compared with $658,774,000 in the same quarter last year. The net loss for the June quarter was $44,327,000, or $1.01 a share primary and fully diluted, compared with a net loss of $19,670,000, or

$0.53 a share, primary and fully diluted in the June 1989 quarter.

Howson said, "While our reported first quarter net loss was greater than the net loss reported in the same quarter last year, this year's net loss reflects events which negatively impacted our results by approximately $30 million.

"McDermott-ETPM, our joint venture which became effective on April 1, 1990 is incurring losses on some of its first major contracts in the North Sea and West Africa. We recognized the anticipated losses on these contracts in the first quarter and these losses are now behind us. These losses, along with lower utilization of the joint-ventures' marine equipment and higher overhead and bid costs, increased the operating loss of the Marine Construction Services segment by approximately $21 million when compared with the same quarter last year. We are not aware of any additional losses on existing contracts that the joint venture recognize, and we expect this segment to show significant improvement in operating results for the remainder of the fiscal year.

"Also, we had expected to close the sale of our seamless tubular operations during the first quarter. This was delayed, and it now appears that the sale will occur in the September quarter.

"Finally, we included the recognition of certain insurance claims in our projections for the June quarter. These were also delayed, but now will be reported in the September quarter.

"Except for these events and delays, our net loss for the June 1990 quarter would have been approximately $14 million compared with a net loss of $19.7 million in the same quarter a year ago.

Howson continued, "I am very confident that fiscal 1990 will prove to be the year during which our markets began a long-term period of growth, and that we will continue to experience the improving trend of earnings that started last year.

"Our marine construction backlog, which exceeded $2 billion at the end of the June 1990 quarter, is the highest in the company's history. Further, we believe about $3.5 billion of offshore projects worldwide will be awarded during the next 12 months. We will be bidding on a substantial portion of these projects and expect to be awarded a significant amount of this work.

"In our power generation markets, the overall growth in demand for electricity, as well as environmental concerns, will be the dominant factors. In the near term, we believe environmental equipment and the continuing need for service provide the greatest opportunities, although longer term we believe the market for base-load power generation equipment

will become increasingly important.

"Service will also continue to drive our commercial nuclear markets. "In our Government markets, we look forward to our participation in the advanced solid rocket motor program for NASA as well as other aerospace and ordnance programs that will use our capabilities for precision manufacturing. Our new position as sole supplier of fuel to the U.S. Naval Reactors Program puts us in a strong position, and should offset the likelihood that Congress will decrease funding for the Program."

Howson concluded, "I believe that McDermott's future is growing increasingly bright. I believe we have persevered through the most difficult of times, and I believe the rewards of our perseverance are becoming apparent."

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

DALLAS (AUG. 10) PR NEWSWIRE - Endevco Inc. (AMEX, EI) chairman and chief executive officer James W. Bryant today announced the election of Kelcy L. Warren as president and chief operating officer of Endevco Inc., and Jack W. Young as executive vice president primarily responsible for finance and administration, a newly created position.

Warren has been with Endevco since 1981, most recently as executive vice president, responsible for gas supply, marketing and business development. In addition to these former duties, Warren will now have mananagement responsibility for the operation of all company facilities. Warren succeeds Bryant as president. Bryant retains his position as chairman and CEO.

Young has served Endevco as a consultant for the past six months. He has been active in the oil and gas industry since 1975. Beginning in 1975 Young organized, financed, and operated serveral companies which were merged into a holding company in 1980. In 1977 Young was one of the original Endevco stockholders and was on the first board of directors. Young has served as president of a privately owned company involved in oil gas and real estate since 1980.

In announcing the management changes, Bryant said, "These organizational

changes are designed to better equip Endevco to meet the great challenges and opportunities in natural gas for the 90s. Our goals and opportunities are great and exciting. These changes will help us achieve these sooner."

Endevco is a rapidly growing natural gas company built around a core business -- gas transportation, consisting of gathering, transmission, storage and marketing natural gas. The company is also engaged in the closely related and complimentary business of treating and processing natural gas and natural gas liquids.

PANAMA CITY, FL (AUG. 10) PR NEWSWIRE - Sunshine-Jr. Stores Inc., (NYSE: SJS) a Fla.-based convenience store and supermarket chain today announced sales and earnings for the second quarter.

For the 26-week period ended June 28, sales were $98,683,299 compared to $94,914,408 for the same period last year, a 4 percent increase. Sales for the quarter were $52,016,608 in the current year compared to $52,062,787 in 1989. Earnings for the second quarter were $160,815, or $.09 per share, as compared to $377,038 for the period last year, or $.22 per share. For the 26-week period, the company reported a net loss of $222,878, or $.14 per share, compared to a net loss for the same period last year of $113,346, or $.07 per share.

Commenting on second quarter revenues, company President Lana Jane Lewis-Brent said: "Although 15 fewer stores were in operation in the second quarter this year as compared to last, merchandise revenues increased 3 percent overall. A significant portion of this increase can be attributed to an improvement in video rental income which is the direct result of the company's purchase of a video business from our primary supplier in November of last year." She added that the company experienced a decrease of 3 percent in gasoline sales reflecting a lower retail gasoline price at the time, however, actual gallons sold increased during the quarter.

At the close of the second quarter, 1990, Sunshine-Jr. Stores Inc. was operating 298 convenience stores in Florida, Alabama, Mississippi, Georgia and Louisiana plus four supermarkets in Bay County, Fla.

NEWTON, MA (AUG. 10) PR NEWSWIRE - Greenery Rehabilitation Group, Inc. (NYSE: GRG) today announced its financial results from operations for the quarter and nine months ended June 30, 1990:

GREENERY REHABILITATION GROUP, INC.
Income Statement Data
($ in thousands except per share)

	Three Months Ended June		Nine Months Ended June	
	1990	1989	1990	1989
Total revenues	$23,744	$20,224	$69,365	$57,616
Total expenses	22,052	18,728	64,182	53,906
Net income	$1,692	$1,496	$5,183	$3,710
Average shares outstanding	8,941,000	8,918,000	8,927,000	8,923,000
Net income per share	19 cents	17 cents	58 cents	42 cents

Gerard M. Martin, chairman and CEO of Greenery Group, issued the following statement upon releasing these results:

"This quarter, June 30, 1990, financial results from operations have continued a consistent improvement over the same quarter last year.

"Although we are pleased with the results for this quarter, I must say I am generally concerned with stock market analysts' focus on one or two penny differences in quarterly results. In a company the size of Greenery Group a change in occupancy or payor mix of only a few patients may not be statistically visible but may have a several cent per share quarterly impact."

"Overall, we are satisfied with our company trends and I hope analysts and shareholders can begin to look toward longer term trends rather than penny per quarter changes."

Greenery Group, headquartered in Newton, Mass., is a leader in head injury rehabilitation services to patients with traumatic brain injury. Greenery Group currently operates six head injury rehabilitation facilities in Boston, Seattle, San Francisco, Dallas, Durham, N.C., and Worcester, Mass. as well as four skilled nursing facilities in Massachusetts, Connecticut and Maryland, which emphasize care medically demanding geriatric patients.

Greenery Group was formerly listed on the NASDAQ National Market System and was accepted for listing on the New York Stock Exchange effective Aug. 3, 1990.

NEW YORK (AUG. 10) PR NEWSWIRE - Scholastic Corporation announced today that it has filed a registration statement with the Securities and Exchange Commission for a proposed initial public offering of 4.2 million shares of its common stock, of which 3,270,000 shares will be sold by the company and 930,000 shares will be sold by certain selling stockholders.

The offering will be made concurrently in the United States and internationally - 3.4 million shares in the United States and 800,000 shares internationally.

The U.S. offering is to be co-managed by Goldman, Sachs & Co. and Alex. Brown & Sons Incorporated, and the international offering is to be co-managed by Goldman Sachs International Limited and Alex. Brown & Sons Incorporated. The initial public offering price is anticipated to be between $18 and $21 per share.

The company will apply to have its common stock included in the NASDAQ National Market System. The company intends to use the net proceeds from the offering to repay bank debt.

The voting power of the company's capital stock is vested in its Class A stock which is controlled by Richard Robinson, chairman, chief executive officer and president of the company, and two trusts controlled by descendants of Maurice R. Robinson, founder of the company. This voting power is subject to the right of the holders of common stock to elect one-fifth of the board of directors.

Scholastic Corporation, formerly SI Holdings Inc., is the parent company of Scholastic Inc. which was a public company traded on NASDAQ from 1969 to 1987, when all of its outstanding shares were acquired by Scholastic Corporation, a privately held company owned by the Robinson family and certain other investors and management.

Scholastic Inc., headquartered in New York, is a leading publisher and distributor of children's books, classroom and professional magazines, and other educational materials, with operations in the United States, Canada, Australia, the United Kingdom and New Zealand.

The registration statement has not yet become effective. The common stock may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This press release shall not constitute an offer to sell or a solicitation of an offer to buy the common stock, which offer may only be made by means

of the prospectus included in the registration statement, nor shall there by any sale of common stock in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such jurisdiction.

#90222p4257 08/10/1990 ~PR Newswire

CINCINNATI (AUG. 10) PR NEWSWIRE - Great American Communications Company (NASDAQ: GACC) reported that operating profit increased by 24 percent from $13.0 million to $16.2 million during the second quarter of 1990 over the same period in 1989. Revenues increased 6.5 percent for the quarter, to $78.9 million in 1990 from $74.1 million in 1989. Second quarter net earnings were $21.1 million or $.60 per share compared to a net loss of $23.6 million or a loss of $.76 per share in the same period a year ago. The increase in net earnings is due to a gain of approximately $45 million on the sale of 7.2 million shares of Chiquita Brands International, Inc. (NYSE: CQB) common stock, as well as the company's improved operating results.

Through the first six months of 1990, revenues increased 3.6 percent, from

$135.5 million to $140.4 million. Operating income for the six months was $19.1 million versus $20.4 million for the same period in 1989. The net loss for the period decreased from $47.7 million or $1.52 per share during the first six months of 1989 to $14.0 million or $.40 per share during the same period in 1990. Again, the major portion of the reduction in the loss is due to the Chiquita stock sale.

The company expects its broadcast and entertainment operations will continue to improve their performance for the balance of the year.

GACC and its subsidiaries own and operate five network affiliated television stations, and 12 FM and six AM radio stations in the top 50 markets. Through Hanna-Barbera, it is involved in animated film and video production, distribution and marketing worldwide. GACC beneficially owns approximately 46 percent of Spelling Entertainment Inc.

American Financial Corporation benefically owns 68 percent of GACC. GACC's common stock trades in the over-the-counter market under the symbol GACC.

PHILADELPHIA (AUG. 10) PR NEWSWIRE - McDonald's(R) restaurants of southeastern Pennsylvania, southern New Jersey and Delaware is leading a search for four model Hispanic citizens, those who go beyond the call of duty to enhance the quality of life for family or community.

As part of Puerto Rican week in September, these special Delaware Valley residents will be saluted tri-statewide as winners of McDonald's Heroes Anonimos Contest, and will be showered with accolades and fanfare as "unsung heroes" for their special accomplishments or contributions within the Latino community.

Joining McDonald's to salute the area's Heroes Anonimos are media partners WTGI-TV, "La Actualidad" and WTEL Radio, who will help bring important recognition to the four selected role models by featuring them in special print and broadcast stories during Puerto Rican Week.

The winners will also be awarded plaques and $150 cash prizes by McDonald's at the Puerto Rican Week Professional's Reception on Sept. 27, an event which many of the area's Hispanic leaders and corporate representatives attend.

"McDonald's Heroes Anonimos Contest is designed to have the entire Latino

community join us in praising the ordinary citizens who are making an extraordinary difference, whether in one life or many," said Abby Montsinger, regional marketing manager, McDonald's Corp., Philadelphia region.

"Countless people are unsung heroes and McDonald's wants to help bring recognition to those rare individuals, who, as teachers, business owners, parents or students, can be considered role models for their good deeds or accomplishments."

The public is encouraged to nominate Hispanic friends, family and neighbors of any age for the award. To receive an entry form for McDonald's Heroes Anonimos Contest, call Gina Carroll at (215) 790-7839, or call the offices of any of the media participating in the search.

Entry forms will also be available at McDonald's booth at the Hispanic Fiesta on Penn's Landing, a festival on Saturday and Sunday, Aug. 18-19, in Philadelphia. The deadline to submit nominees is Friday, Aug. 24.

There are 219 McDonald's restaurants in the Delaware Valley, serving a third of a million people each day. McDonald's is the world's leading foodservice organization, serving more than 22 million people daily in more than 11,300 restaurants in 52 countries. Seventy-five percent of McDonald's restaurants are locally owned and operated by independent entrepreneurs.

SAN DIEGO (AUG. 10) PR NEWSWIRE - Burnham Pacific Properties Inc. (NYSE: BPP), a San Diego-based equity real estate investment trust (REIT), reported today record revenues for the second quarter and first half ended June 30, 1990, and slight declines in funds from operations available for dividends in the same periods.

The company reported revenues of $6,025,000 for the second quarter and $11,839,000 for the first six months of 1990, compared to $5,076,000 and $10,025,000, respectively, a year ago.

Funds from operations and available for dividends dropped to $1,851,000 for the quarter, or 31 cents a share, and $3,816,000, or 63 cents a share for the half, compared to $2,008,000, or 34 cents a share, and $3,905,000, or 70 cents a share, respectively, in the same periods of 1989.

The company also reported net income fell to $229,000 (five cents per

share) from $3.58 million (61 cents per share) in comparative second quarters and to $944,000 (16 cents per share) from $4.44 million (80 cents per share) in comparable six-month periods.

President Louis J. Garday said this was because of a combination of increased depreciation, extraordinary second quarter write-offs of costs associated with a cancelled public offering and of corresponding expenses for a New York Stock Exchange listing, and a one-time gain of $2.6 million from the sale of an Escondido, Calif., shopping center in June 1989.

According to Garday, second quarter and first half results also reflect increased interest expense from 100 percent financing of the purchase of Point Loma Plaza shopping center for $35.5 million in late 1989. Garday also said all the company's property holdings are substantially leased with an overall current vacancy rate of less than five percent.

CONTACT: Louis J. Garday, president, (619) 236-1555, or Bill Gabriel, (619) 525-2642, both of Burnham Pacific Properties Inc.

#90222p4276 08/10/1990 ~PR Newswire

ST. CLOUD, MINN. (AUG. 10) PR NEWSWIRE - Security Financial Group (NASDAQ: SFGI) announced today that net income for the third quarter ended June 30, 1990, was $128,000 or $.18 per share compared with $438,000 or $.60 per share for the same quarter in fiscal 1989.

Security reported a slight increase in its net interest income for the quarter. Third quarter 1990 net interest income was $2,094,000 compared with $2,060,000 reported for the third quarter a year ago. The increase was primarily the result of decreased interest expense. A reduction in the average cost of deposits and a lower average rate on borrowings contributed to reduced interest expense.

Interest income for the quarter decreased by $114,000 as Security's yield on earning assets decreased from 10.97 percent in 1989 to 10.66 percent in 1990. Average loans outstanding for the 1990 quarter were down from the prior year. Contributing to the decrease were payoffs and reduced originations on commercial real estate loans and fewer adjustable residential loans being originated. While total residential (one to four family) origination activity for the third quarter of 1990 was comparable to 1989, the majority of originations in 1990 have been fixed-rate mortgage loans which are sold at origination. Commercial and multi-family real estate loan originations for the quarter were $3.2 million, down significantly from $12.7 million in 1989.

Contributing most significantly to the decrease in net income for the quarter was the increase in the Bank's loan loss provision. During the

quarter, $430,000 was provided for potential loan losses. Net chargeoffs on loans were $482,000 during the quarter. Chargeoffs were related primarily to the Bank's lending relationship with a local real estate development firm and to delinquencies experienced in a contract- serviced purchased automobile loan pool.

Security Financial Group, Inc., provides financial services to central Minnesota through its operating subsidiary Security Financial Banking and Savings, FSB. Security Financial is a $300 million savings bank with headquarters in St. Cloud, Minn., and offices in St. Cloud, Princeton, Mora, Sauk Rapids, Monticello, and Elk River, Minn. Security Financial Group, Inc., is traded on the national over-the-counter market under the NASDAQ symbol: SFGI.

NORFOLK, NE (AUG. 10) PR NEWSWIRE - Nucor Cold Finish in Norfolk, Nebraska has added stress relieved bars to its product offering.

Stress relieved bars are noted for their greater strength, better machinability and improved fatigue and wear resistance. This in turn results in longer part life with less manufacturing costs. The bars are more uniform, providing consistent quality and less distortion.

Nucor designed a unique thermal processing furnace as a key element in their stress relieving procedure. This furnace maximizes productivity, minimizes manpower requirements and insures state-of-the-art control of the process. Engineering and construction of the furnace was provided by Johnston Manufacturing of Minneapolis.

Nucor stress relieved bars meet or exceed ASTM 311, and are offered in both A and B specifications. All steel grades in the specification are available in sizes from 1/4 inch to three inches.T he bars can also be turned and/or ground.

In the future, Nucor plans to expand into other heat treating processes. Nucor Cold Finish is a division of Nucor Corporation (NYSE: NUE), a Fortune 500 company. Additional cold finish facilities are located in Darlington, South Carolina, and Brigham City, Utah.

For more information, contact Joe Rutkowski, Nucor Cold Finish, P.O. Box 94, Norfolk, NE 68701, (402) 644-8600 or (toll-free out-of-state) 1-800-228-8107.

DALLAS (AUG. 10) PR NEWSWIRE - Endevco Inc. (AMEX: EI) today reported a net loss applicable to common stock of $193,000 (3 cents per share) for the second quarter of 1990, compared to a loss of $58,000 ($.01 per share) for the second quarter of the prior year. Revenues for the recent quarter were also lower at $43,298,000, compared to $48,769,000 for the year earlier quarter, primarily due to lower sales prices for natural gas. The lower average sales prices resulted in lower gas sales margins, one of the major factors causing lower earnings for the period.

The decline in second quarter revenues resulted from decreases of $5.4 million in off-system revenues and $2.9 million in facilities sales revenues which were offset by an increase of $2.8 million in gas processing and refining revenues.

For the first six months of 1990 the net loss applicable to common stock (after the preferred dividend requirements of $950,000) was $675,000, or 9 cents per share, compared to $258,000, or 4 cents per share for the same 1989 period.

"We anticipate improved results by the fourth quarter 1990 from increasing gas transportation volumes, and increased volumes of facilities sales," Bryant said. "As the winter approaches, well head prices should begin to increase. This will encourage increased throughput from many of the Endevco systems where producers have curtailed or shut in a portion of their production.

"In addition, we are confident that our expansion into the natural gas storage business will add growth and earnings beginning in late 1990," Bryant added. "Endevco is the 50 percent managing partner in a $30 million joint venture to convert an existing liquified petroleum gas salt dome storage facility, near Hattiesburg, Miss., to a natural gas storage facility. This important new business complements our Mississippi Fuel Co. pipeline system and improves our abilities to serve our local and East Coast markets."

Endevco is a rapidly growing, natural gas company built around a core business - gas transportation, consisting of gathering, transmission, storage and marketing of natural gas. The company is also engaged in the closely related and complementary business of treating and processing natural gas and natural gas liquids.

PERTH, AUSTRALIA (AUG. 10) PR NEWSWIRE - Bond Brewing Holdings Limited (BBH) today announced that its wholly-owned subsidiary, Dimola Pty. Ltd. (Dimola), has extended its offer to purchase all outstanding 12-5/8 percent extendable subordinated debentures of BBH until 12:00 midnight, New York City time, on Friday, Aug. 17, 1990.

Debentures tendered pursuant to the offer may be withdrawn at any time prior to acceptance for purchase pursuant to the offer. The depositary has advised BBH and Dimola that, as of 12:00 noon, New York City time, on Friday, Aug. 10, 1990, approximately 2% of the outstanding principal amount of debentures had been tendered to the depositary pursuant to the tender offer.

As BBH has previously disclosed, the availability period for funding under Dimola's tender offer facility has lapsed. There is no assurance that Dimola will be able to obtain financing for the tender offer.

#90222p4286 08/10/1990 ~PR Newswire
COLUMBUS, OH (AUG. 10) PR NEWSWIRE - Laidlaw Waste Systems, Inc. is mounting a unique education and consulting program for U.S. manufacturers and solid waste generators in response to new U.S. EPA Toxicity Characteristic Leaching Procedure (TCLP) hazardous waste regulations.

Effective Sept. 25, 1990, the U.S. EPA will add 25 new volatile organic compounds to its list of toxic materials and a new test to determine hazardous waste status.

Observers estimate these new regulations could triple reportable hazardous waste, changing solid waste handling practices and, in some cases, core manufacturing and production processes in thousands of businesses across the nation.

To prepare its customer base and solid waste generators for this new regulation, Laidlaw has launched an aggressive education program of mailings, a telephone hotline manned by the company's TCLP specialists (assembled in Laidlaw's suburban Dayton TCLP Headquarters from across the country), industry workshops and close personal follow-up with solid waste generators.

"The new regulations create real questions for any business that generates

significant amounts of solid waste," said Matt Fulton, Regional Marketing Director and coordinator of Laidlaw's national TCLP program.

"We think the EPA ruling will change the way thousands of businesses deal with solid waste. If a business entity that is generating or disposing of a TC waste is not prepared for these changes, they could face expensive disposal problems, as well as fines of $25,000 per day and up to five years in prison for noncompliance. That's why we are moving quickly to respond to these changes in concert with our customers."

Under the 1984 Resource Conservation and Recovery Act (RCRA), solid waste is classified as hazardous according to four criteria: ignitability, corrosivity, reactivity and toxicity, (easily the most controversial).

Previous EPA toxicity regulations listed only 14 metals and pesticides such as arsenic and 2,4 D, while the new regulations include such materials as benzene, chloroform, trichloroethylene, and carbon tetrachloride.

In addition to the new target Volatile Organics Compounds (VOCs), the EPA has substituted a new test, the Toxicity Characteristic Leaching Procedure (TCLP), for the previously-approved Extraction Procedure (EP) test, in an effort to more closely emulate the leaching process that occurs in some disposal sites.

YOUNGSTOWN, OH (AUG. 10) PR NEWSWIRE - American Waste Services, Inc. filed today with the Securities and Exchange Commission a registration statement on Form S-1 relating to a proposed initial public offering by the company of 6,000,000 shares of its class A common stock.

The planned offering, which will be made only by prospectus, will include 6,000,000 primary shares, with 4,800,000 shares offered through a United States offering and 1,200,000 shares offered in a concurrent international offering. The stockholders of the company have granted the underwriters an option for 30 days to purchase up to an additional 900,000 secondary shares. Goldman, Sachs & Co. will lead manage the proposed offering and PaineWebber Incorporated and First Analysis Securities Corporation will co-manage the offering.

Prior to this offering, there has been no public market for the common stock of the company. It is currently estimated that the initial public offering price per share will be between $14 and $17.

American Waste Services, Inc. provides integrated waste management services, including disposal, transportation and brokerage, to industrial, commercial, municipal and governmental customers primarily in selected eastern and midwestern markets. The company's principal activities include the operation of nonhazardous solid waste landfills for the disposal of special waste, garbage and refuse; the transportation and brokerage of hazardous and nonhazardous waste; and, upon the acquisition of Earth Sciences Consultants, Inc. and two affiliated companies concurrently with the completion of the offering, the provision of environmental engineering, site assessment, analytical laboratory and remediation services. The company believes it is one of the largest transporters and disposers of special waste in the United States.

Proceeds to the company from the sale of its shares will be used to complete pending acquisitions, reduce debt, fund working capital and finance possible future acquisitions, as well as for general corporate purposes.

The company has applied to list the class A common stock on the New York Stock Exchange. A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws

of any such state.

TULSA, OKLA. (AUG. 10) PR NEWSWIRE - Unit Corp. (NYSE:UNT) today reported revenues of $13,126,000 for the second quarter of 1990, up 34 percent from $9,784,000 for the second quarter of last year. The increase in revenues was due to higher natural gas production and average prices and an increase in the company's gas marketing operations. Revenues for the first six months of 1990 were $26,583,000, up 45 percent from the first six months of 1989.

A net loss of $378,000, 2 cents per share, was reported for the second quarter of 1990 compared to $675,000, or 3 cents per share for the second quarter of 1989. The net loss for the first six months of 1990 was $651,000 down from $895,000 for the same period last year.

Unit reported oil and gas production of 677,000 equivalent barrels during the first six months of 1990, an increase of 36 percent over the same period in 1989.

Rig utilization for the six months of 1990 was 43 percent as compared to 37 percent for the same period in 1989.

Unit Corp. is a Tulsa-based, publicly held energy company engaged in oil and gas exploration, production, and contract drilling. Unit's common shares are listed on the New York Stock Exchange under the symbol UNT.

MINNEAPOLIS (AUG. 10) PR NEWSWIRE - Lund International Holdings, Inc. (NASDAQ: LUND) announced sales and earnings for the fourth quarter were $4,206,901 compared to $3,587,198 for the same period last year. Net income was $602,353 or 13 cents per share compared to $734,502 or 15 cents per share for the same period in 1989. Net sales for the years ended June 30, 1990 and 1989, were $13,250,878 and $12,074,675, respectively. Net income for the year ended June 30, 1990, was $1,893,510 or 39 cents per share compare to $2,045,959 or 44 cents per share for the same period last year.

Sales increased principally because of the increased share of the vehicle market gained by trucks and vans and an expansion of marketing efforts by

Lund. The declines in income for the fourth quarter and the year were primarily the result of increased investment spending which includes a new advertising campaign which included national consumer ads, production of packing and catalog sheets for new products, national promotion of direct sales to retailers, the addition of warehouse space for new products, implementation of bar coding of products and electronic data interchange of orders and billings, and patent and related litigation expenses.

One hundred percent of the sales came from Lund Industries, a subsidiary of Lund International Holdings. Lund Industries is a manufacturer of aftermarket accessories for trucks and vans. Its product line is marketed through automotive warehouse distributors throughout the United States and Canada.

The corporation is headquartered at 9055 Evergreen Blvd., Coon Rapids, Minn., 55433.

IRVING, TEXAS (AUG. 10) PR NEWSWIRE - Gamma International, Ltd. (NASDAQ: GAMM) today reported results for the second quarter and six months ended June 30, 1990, including record game sales, improved net gaming revenues and sharply reduced losses for the periods reported.

For the second quarter of 1990, game sales increased to $3,642,730 from $3,503,030 for the second quarter of 1989. After deducting payments for prizes and related fees and allotments to hall operators, the company posted net gaming revenue of $943,547 compared to $15,218 for the prior period.

The company sustained a loss of $118,487 for the second quarter of 1990, or 11 cents per share, including an extraordinary charge of $50,000 relating to elimination of debt issue costs in connection with the repayment of bridge loans, vs. a loss of $999,269, or 89 cents per share, for last year's second quarter. The adjusted weighted average number of shares outstanding for computational purposes was 1,158,482 and 1,154,454, respectively, for the 1990 and 1989 quarters.

For the first half of 1990, game sales were $7,174,097 compared to $4,801,315 for the first half of 1989. After payments for prizes and related fees and allotments to hall operators, net gaming revenue was $1,834,649 in the first half of 1990 vs. a net gaming deficiency of $163,774 for the 1989 period.

The company sustained a loss of $156,034, or 15 cents per share, for the

first half of 1990, including the above-mentioned $50,000 extraordinary item, compared to a loss of $2,324,863, or $2.03 per share, for the first half of 1989. The adjusted weighted average number of shares outstanding for computational purposes was 1,156,468 and 1,154,454 for the first six months of 1990 and 1989, respectively.

In commenting on the results, Jack Saltiel, president and chief operating officer, stated, "Gamma achieved record revenues for the second quarter and first half of 1990, and substantially reduced losses from operations. We are now operating profitably and continue to add new bingo halls to our satellite-based network which currently supports daily high stakes bingo games played simultaneously in up to 44 halls operated by or on behalf of sovereign American Indian communities in 18 states.

Gamma's shares, warrants and units are traded on NASDAQ under the symbols GAMM, GAMMW and GAMMU, respectively.

#90222p4303 08/10/1990 ~PR Newswire

ST. LOUIS (AUG. 10) PR NEWSWIRE - The following was released today by the U.S. Postal Inspection Service:

The Chrysler Corporation was sentenced today in federal court to pay $7.6 million in criminal fines for selling approximately 30 previously wrecked vehicles to consumers who believed they were purchasing new automobiles.

The corporation was also charged with disconnecting odometers on approximately 60,000 newly manufactured vehicles which were driven between one day to five weeks by Chrysler executives. Chrysler was also charged with changing odometers on vehicles which had accidently been left connected.

The scheme occurred between 1949 and 1986 and was discovered by U.S. postal inspectors as a result of a four-year-long investigation which resulted in Chrysler being convicted on 15 counts of mail fraud. The mail fraud charges came about because titles of the vehicles were sent to the consumers through the mail.

On Dec. 14, 1987, Chrysler Corporation entered a plea of no contest to the entire indictment.

St. Louis Postal Inspector-In-Charge L.S. Crawford Jr., and the U.S. Attorney's Office announced to date Chrysler has replaced all vehicles identified as having been previously wrecked, with the exception of vehicles involved in ongoing litigation. On Jan. 5, 1990, Judge John Nangle, who today sentenced Chrysler to pay the $7.6 million fine, ordered Chrysler to complete the terms of the settlement of a class- action suit by paying $500 each to 37,000 people worldwide. The awards went to people who purchased Chrysler cars with disconnected odometers that were previously driven by company executives. The consumers are also entitled to second payment that depends on the amount plaintiff's attorneys are awarded.

#90222p4313 08/10/1990 ~PR Newswire

NEW YORK (AUG. 10) PR NEWSWIRE - LIN Broadcasting Corporation (NASDAQ: LINB) today reported record revenues and cash flow from its cellular operations for the quarter ended June 30, 1990.

Net revenue for the second quarter of 1990 attributable to LIN's cellular operations was $68.3 million, up 57 percent, compared to $43.5 million in the same quarter of 1989. Cash flow (income from operations before depreciation and amortization) for the second quarter of 1990 attributable

to LIN's interests in cellular telephone operations grew to $35.9 million, up 49 percent, compared to $24.1 million in the same quarter a year ago.

The number of cellular subscribers in the five systems in which LIN has interests grew to 470,000, a 59 percent increase compared to the 295,000 subscribers in the second quarter of 1989.

Net revenue for the second quarter attributable to LIN's seven broadcast television stations and its specialty publishing business was $42 million compared to $44.1 million in the second quarter of 1989. Cash flow (income from operations before depreciation and amortization) attributable to LIN's media operations was $21.6 million compared to $24.2 million in the second quarter of 1989. The decrease was due principally to increased costs associated with the expansion of news coverage and lower cash flow and revenues from its specialty publishing business. In contrast to the first six months, broadcast orders for the third quarter of 1990 are currently running approximately even with last year.

LIN reported net income of $18.1 million, or $.35 per share, for the second quarter of 1990, compared to $27.6 million, or $.52 per share, for the same period in 1989. The decrease was principally due to increased interest expenses incurred as a result of borrowings to purchase $425 million of Class A common stock of McCaw Cellular Communications, Inc., which was distributed as a dividend to all non- McCaw shareholders of LIN in connection with McCaw Cellular successfully completing its tender offer for 21.9 million shares of LIN's stock, and to legal obligations to former LIN officers arising from the completion of the tender offer.

Separately, LIN announced that it has obtained loan facilities totaling $2.1 billion from two bank syndicates and has completed its purchase of Metromedia's 46 percent direct and indirect interest in New York's non-wireline cellular system bringing its total ownership to approximately 93 percent. The loan facilities were oversubscribed by nearly $1 billion.

For information about the progress of LIN's operations, including all of its cellular investments on a proportionate consolidation basis, supplemental information follows which is not a part of LIN's financial statements.

LIN Broadcasting Corporation common stock is quoted on the NASDAQ National Market System under the symbol LINB. LIN is engaged in cellular telephone operations, television broadcasting and specialty publishing. LIN has major ownership interests in cellular telephone systems serving the metropolitan areas of New York City, Los Angeles, Philadelphia, Dallas-Fort Worth and Houston, owns and operates seven network-affiliated television stations, and publishes advertiser- supported hardcover magazines placed in the rooms of distinguished hotels in 37 metropolitan areas. McCaw Cellular Communications, Inc. owns approximately 52 percent

of LIN.

#90222p4316 08/10/1990 ~PR Newswire

KIRKLAND, WASH (AUG. 10) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ: MCAWA), achieved record levels of revenue and cash flow in the second quarter of 1990, reflecting the fundamental strength of its operations, continuing market penetration, and the consolidation of its financial results with those of LIN Broadcasting Corporation, the company announced today.

In the three months ended June 30, 1990, revenues increased 102 percent to $242.4 million from $120.1 million for the second quarter of 1989.

For the eighth consecutive quarter, cash flow (income from operations before depreciation and amortization) rose, increasing to $63.4 million in the second quarter of 1990 from $11.6 million in the comparable 1989 period.

During the quarter, the number of cellular subscribes in McCaw Cellular's markets, and in markets where McCaw and LIN have the right to buy a controlling interest, increased to 963,000 at June 30, 1990, up 62 percent

from 595,000 in the 1989 second quarter.

Craig O. McCaw, chairman and chief executive officer, said: "Our financial results and business progress in the second quarter reflect the strength of the company's operations as well as growing public recognition of the advantages of personal communications. We continue to build upon this strong performance, to increase that recognition, and to advance our strategic objective of a seamless, high-quality personal communications network spanning North America."

For the quarter ended June 30, 1990, income from operations was $11.2 million versus a loss from operations of $36.0 million in the prior-year period. The second quarter net loss was $60.7 million, a decrease compared to the $87.5 million net loss for the quarter ended June 30, 1989. Non-cash depreciation and amortization expenses of $52.2 million represent a substantial portion of the 1990 second quarter net losses.

Net income for the first six months of 1990 was $791.1 million compared to a net loss of $185.2 million for the first half of 1989. Results for the six months ended June 30, 1990, include a non-recurring gain of approximately $1.2 billion during the first quarter from the sale of certain of the company's southeast cellular operations to Contel Cellular Inc. and the consolidation for accounting purposes of LIN, which is 52 percent owned by McCaw, as of March 5, 1990.

McCaw Cellular Communications, Inc. is the nation's leading cellular telephone company, with 59.5 million "pops." It currently offers service, primarily under the Cellular One(R) name, in over 100 markets across the country. Approximately 80 percent of McCaw's and LIN's "pops" are in the nation's 30 most populous markets and their contiguous service areas. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast. LIN Broadcasting holds significant interests in cellular systems in New York, Los Angeles, Philadelphia, Dallas and Houston, operates seven network-affiliated television stations, and publishes advertiser-supported hardcover magazines placed in hotels.

MCCAW CELLULAR COMMUNICATIONS, INC.

Proportionate Operating Data

(In millions) The following operating data

reflects proportionate consolidation of the operations in which McCaw Cellular owned a significant interest as of June 30, 1990. During the first quarter of 1990, McCaw Cellular completed the sale of certain of its southeast cellular systems and the purchase of approximately 52 percent of the stock of LIN Broadcasting. The proportionate operating data presented below utilizes McCaw's ownership interests as of the end of the periods presented except that for periods prior to McCaw's acquisition of LIN Broadcasting, McCaw's ownership interests as of March 31, 1990 are utilized.

#90222p4321 08/10/1990 ~PR Newswire

RYE, NY (AUG. 10) PR NEWSWIRE - Supradur Companies, Inc., (NASDAQ: SUPD) today reported the results of its operations for the second quarter and the first six months of 1990.

Sales for the second quarter were $7,088,000 as compared to $6,666,000 for the same period in 1989. The company incurred a net loss during the period of $889,000 or $.99 per common share compared to net income of $459,000 or $.49 per share in 1989. For the six months, sales increased to $13,378,000 from $13,021,000 for the same period in 1989. Net loss for the six months was $1,927,000 or $2.12 per share compared to net income of $789,000 in 1989.

K. Fred Netter, president, reported that the loss for the quarter was in part attributable to lower than expected sales of the products manufactured in the new Montreal facility. He announced that an exclusive agreement was entered into with an established Canadian building materials distributor for representation throughout Canada.

Netter said that the domestic building material subsidiary in Wind Gap, Pa., operated profitably for the quarter and these results should continue through the balance of the year.

Sales in the high-tech machining and sheet metal business increased over the first quarter of 1990 by 10 percent. However, this business operated at a marginal loss for the second quarter. Many of the items sold in 1990 were new bookings to the facilities which are not as profitable as "repeat" business, which had been the historical norm.

Netter said, "1990 is going to be a tough year as we are experiencing significant pressures on profit margins in all of our businesses."

Supradur Companies, Inc. is a diversified company with operating subsidiaries throughout the United States, Canada and Europe.

BRIDGEPORT, CONN. (AUG. 10) PR NEWSWIRE - First Connecticut Small Business Investment Company, a federally-licensed SBIC, said today the Small Business Administration has agreed it will take no action on its distribution of dividends made in excess of amounts permitted by SBA regulations if the excess is cured by March 31, 1991, the end of the company's current fiscal year. The company said it is working on a plan to meet SBA requirements.

The company said it is in the process of amending the notes to its financial statements for the fiscal year ended March 31, 1990 to clarify the SBA's approval, subject to specific conditions, of the company's request that no action or acceleration of the due dates of the company's subordinated debentures owed SBA would be taken against First Connecticut for $1.7 million of distributions declared by the company through March 31 1990 in excess of retained earnings available under SBA guidelines.

The SBA told the company the violation must be corrected by replenishment through future earnings or by other means acceptable to the SBA by no later than March 31, 1991 and informed the company that it must expect the SBA to demand payment of all debentures then outstanding if the excess distribution is not restored in full by that date. The SBA also said any proposal to accomplish this other than through earnings must be advanced by the company to SBA for consideration.

First Connecticut previously reported it was amending its March 31, 1990 financial statements to add pertinent information concerning participation agreements relating to long-term loans and investments.

LAWRENCEVILLE, NJ (AUG. 10) PR NEWSWIRE - The directors of both American Reliance Group Inc. (NASDAQ: ARIG), and its parent, American Reliance Insurance Company, voted today to indefinitely postpone further consideration of a joint plan to restructure their insurance business.

Under the plan, the insurance business of America Reliance Insurance Company would have been transferred to subsidiaries of American Reliance Group. American Reliance Insurance Company would then liquidate and its eligible policyholders would have exchanged their ownership interests in the mutual company for securities of American Reliance Group.

Last February the two boards voted to suspend consideration of their joint proposal for six months in order to evaluate the potential impact on the plan of New Jersey's Fair Automobile Insurance Reform Act (FAIRA). The legislation imposes taxes and assessments on insurance companies doing business in New Jersey to fund half the state's $3 billion deficit from its Joint Underwriting Association.

Bruce Herrick, chairman and chief executive officer of American Reliance Group, said, "Due to the adverse impact of FAIRA on the market of New Jersey property and casualty insurers' equity securities, both boards decided to indefinitely postpone the plan of restructuring."

Herrick further said the company is pursuing alternatives to lessen the impact of the FAIRA legislation on the business of the company and American Reliance Insurance Company.

American Reliance Group is a regional property and casualty insurance holding company which specializes in providing coverage form?all to me um size businesses and individuals in rural and suburban locations.

SEATTLE (AUG. 10) PR NEWSWIRE - In response to industry and consumer concerns, Holland America Line announced today it is guaranteeing all currently published cruise fares for all cruise departures through Jan. 31 1991. This guarantee applies to all bookings under deposit by Sept. 15, 1990.

While others in the vacation and travel industry may be raising rates due to increased fuel costs, Holland America Line plans no fuel surcharges at this time.

Holland America Line is notifying 40,000 U.S. and Canadian travel agencies by letter about the company's guarantee to protect current rates.

"We're taking this step because we feel it is important to inject a note of stability during these unsettled times. We want to assure consumers and travel agents it's still an excellent time to go ahead and book a cruise vacation," said A.K. Kirk Lanterman, Holland America Line president and chief executive officer.

BINGHAMTON, N.Y. (AUG. 10) PR NEWSWIRE - Lawrence J. Schorr, president and chief operating officer of Resource Recycling Technologies, Inc. (AMEX: RRT) (RRT) made additional comments on RRT's second quarter earnings report. Schorr points out that while RRT's operating performance improved during the second quarter (including generating a pre-interest income and pre-investment gain operating profit in the last month of the quarter) the company incurred an operating loss in the second quarter of $228,000 before recognition of investment gains ($470,000) and interest income ($139,000). Schorr indicated that he remains positive on operating results for the third and fourth quarters of 1990.

BANGOR, Maine (AUG. 10) PR NEWSWIRE - Nyle International Corp. ("Nyle"), a pink sheet, over-the-counter company, announced a consolidated net loss of $(1,096,786), $(.17 per share), for the calendar year ended Dec. 31, 1989, vs. a net income of $35,310, $.006 per share, for the calendar year ended Dec. 31, 1988.

The 1989 financial results included one-time write-offs in the last quarter of 1989 of investments in foreign ventures in the amount of $187,529 and a favorable lease, $219,847, for a total one-time write-off of $407,376, comprising 37.1 percent of the reported loss for the calendar year ended 1989.

Consolidated net sales for the calendar year ended 1989 were $7,468,036, a decline of 18.2 percent from sales of $9,127,765 for the calendar year ended Dec. 31, 1988.

For the first quarter ended March 31, 1990 (unaudited), Nyle's consolidated net loss was $(120,699), $(.019 per share), as compared to a consolidated net loss of $(114,727), $(.06 per share), for the first quarter ended March 31, 1989.

Consolidated net sales for the three-month period ended March 31, 1990 (unaudited) were $1,700,422, vs. consolidated net sales of $1,890,941 for the three-month period ended March 31, 1989.

For the six-month period ended June 30, 1990 (unaudited), consolidated net sales were $3,339,904, vs. $3,651,353 for the six months ended June 30, 1989.

For the six-month period ended June 30, 1990 (unaudited), Nyle suffered a consolidated net loss of $(204,205), $(.03 per share), vs. a $(274,826) net loss $(.04 per share) for the six-month period ended June 30, 1989.

#90222p4342 08/10/1990 ~PR Newswire
NEW YORK (AUG. 10) PR NEWSWIRE - Leucadia National Corporation (NYSE PSE: LUK) today announced its unaudited operating results for the six month period ended June 30, 1990. Income from continuing operations for the six month period ended June 30, 1990 was $53,915,000 or $4.33 per common share compared to $7,968,000 or $.59 per common share for the six month period ended June 30, 1989.

Loss from discontinued operations was $17,050,000 or $1.37 per common share for the six month period ended June 30, 1990 compared to income of $2,528,000 or $.19 per common share ($.18 on a fully diluted basis) for the six month period ended June 30, 1989. During the second quarter of 1990, the company entered into an agreement to sell a mature block of traditional life insurance which constituted the company's traditional life insurance business. Accordingly, the loss on disposition ($16,857,000, including a provision for income taxes) and the results of operations of such business have been presented as a discontinued operation. Discontinued operations also include the company's railcar leasing and management operations and the electronic visual communications subsidiary which were sold in 1989.

Net income was $36,865,000 or $2.96 per common share for the six month period ended June 30, 1990 compared with $10,496,000 or $.78 per common share ($.77 on a fully diluted basis) for the six month period ended June 30, 1989.

At March 31, 1990, the reported net assets of Cambrian & General Securities ("Cambrian"), a consolidated subsidiary principally acquired in 1989, were approximately $40,000,000 in excess of the company's investment in Cambrian at such date. In the second quarter of 1990, the company concluded that Cambrian's existing reserves were adequate to satisfy claims and other contingencies related to Cambrian's prior operations. Accordingly, since Cambrian has no continuing operations, such amount has been reflected in 1990 pre-tax results of continuing operations.

Prior to the second quarter of 1990, the company amortized deferred policy acquisition costs applicable to certain of its investment oriented insurance products over an eight year estimated life for the policies. The company's experience has been substantially better than anticipated and in the second quarter of 1990 the company changed the estimated life for such policies to thirteen years. As a result, continuing operations for 1990 reflect pre-tax credits of approximately $14,777,000 resulting from this change.

Included in income from continuing operations for the six month periods ended June 30, 1990 and 1989 were pre-tax net securities gains (losses) of ($965,000) and $936,000, respectively.

Included in pre-tax income from continuing operations for the 1989 period was a provision for restructuring the trading stamps operations of $5,100,000 and income from sale of certain properties of approximately $15,400,000.

Leucadia National Corporation is a holding company for its consolidated subsidiaries engaged in life insurance (through Charter National Life Insurance Company of St. Louis and First Charter Life Insurance Company of

New York), manufacturing (principally through its Leucadia, General Marble and Electri-cord Divisions), banking (principally through American Investment Bank, N.A.), equipment leasing and real estate development. Through its approximately 66 percent interest in PHLCORP, Inc. the company is also engaged in trading stamps (through The Sperry and Hutchinson Company, Inc.), motivation services (through S&H Motivation, Inc.) and property and casualty insurance (through Empire Insurance Company and Allcity Insurance Company). The company also currently has equity interests of more than 5 percent in the following domestic publicly owned companies: Carmike Cinemas, Inc. (16 percent of Class A Shares), Jones Plumbing Systems, Inc. (19 percent), Olympus Capital Corporation (24 percent) and Transportation Capital Corp. (13 percent).

#90222p4346 08/10/1990 ~PR Newswire

BALTIMORE (AUG. 10) PR NEWSWIRE - PharmaKinetics Laboratories, Inc. (NASDAQ-NMS: PKLB) today announced that its outside counsel has received a letter from the United States Attorney for the District of Maryland stating that the company and Dr. Mark Perkal, chief scientific officer, are now targets in an investigation in connection with the grand jury investigation of certain generic drug companies which have been clients.

The letter does not give any indication of the grounds upon which Perkal and the company are being investigated. The company is not aware of any facts or circumstances that would lead it to believe that Perkal or any

other employee has violated any laws. The company, as it has done over the last year, expects to continue to actively cooperate with this investigation.

Steven A. Woodman, president and chief executive officer of the company, stated: "This comes as a surprise to us given the active and positive nature of Dr. Perkal's and the company's assistance in the various government investigations of the generic drug industry over the last year. We believe that without our assistance and policies of test sample retention, policies that were created by Dr. Perkal, most, if not all of the alleged fraudulent acts of test sample switching by some generic drug companies would have gone undetected. This same assistance also enabled the government to substantiate products that were in fact authentic and thus validate the integrity of honest generic drug manufacturers." Commenting further, he said: "Our integrity and the actions of our employees in dealing with the alleged misdeeds of certain clients has already been closely scrutinized by other government agencies over the last year resulting in no material criticism. We are confident the integrity of our employees will again be confirmed."

PharmaKinetics Laboratories, Inc. is a leading pharmaceutical development company providing services to pharmaceutical and biotechnology firms seeking new drug approvals in the United States and Europe.

KANSAS CITY, MO (AUG. 10) PR NEWSWIRE - Rhinos, giraffes and zebras will be found grazing on an African veldt. Wallabies and kangaroos will leap through the Australian underbrush. These animals and hundreds of other exotic species, will soon be at home in ecologically authentic environments at a newly expanded Kansas City Zoo. The expansion is possible due to a $50 million bond referendum passed by voters on Aug. 7.

The $50 million plan will generate funds to add about 100 acres to the current 80-acre zoo and will place animals in natural habitats rather than cramped cages. The expansion will allow room for the construction of an African exhibit, part of a new Australian exhibit, and a domestic animal area. This construction, expected to begin next summer, is only the first phase of what ultimately would be a $117 million expansion, doubling the number of animals and species at the zoo. The 81-year-old zoo will remain open to the public during construction.

The zoo's new design will be both innovative and unique. "This is the most imaginative approach to zoo planning," Jane Goodall, world- renowned

ape researcher, has said. "Kansas City will have one of the most important and effective zoos in the world."

A report published this month by Midwest Research Institute (MRI), estimated that the new zoo would double its attendance by 1994. Already Kansas City's third-largest tourist attraction, the zoo draws about 500,000 visitors a year. The expanded zoo is expected to have a total economic impact of $17.2 million a year, and create 471 new jobs in Kansas City, according to the MRI study.

The new zoo, scheduled to open in the spring of 1994, will include a $16 million educational and interpretive center, Kingdom of the Animals, which will feature an eight-story Imax movie screen, the world's largest.

Also in the plan is a large African exhibit that will incorporate the lagoon in Swope Park to create a "Zambezi River," where visitors can take a dugout canoe or a boat called the African Queen to view animals and visit a Masai village. The Kansas City Zoo is located in Swope Park, the country's second largest urban park consisting of 1,769 acres of recreational facilities.

The domestic animal area will include examples from the continents of Eurasia, Australia, North America and South America; featuring such attractions as pony and camel rides, a dairy barn, paddocks, and a demonstration barn.
